Debt & Investment, NSS 70th Round : Jan - Dec 2013 (NSS 70th Round)

Overview	
Type	Socio-Economic/Monitoring Survey [hh/sems]
Identification	DDI-IND-MOSPI-NSSO-70Rnd-Sch18pt2-Jan-Dec2013
Version	Production Date: 2015-02-10 V1.0; Re-organised anonymised dataset for public distribution.
Series	<p>The 70th round (January 2013 - December 2013) of NSS is earmarked for surveys on land and livestock holdings, debt and investment and situation assessment survey of agricultural households.</p> <p>The Reserve Bank of India (RBI) conducted, for the first time during November 1951 to August 1952, the “All India Rural Credit Survey” in 75 selected districts spread all over the country. The main objective of this survey was to study two aspects, viz.,(i) the demand for credit from rural families and (ii) the supply of credit by credit agencies -both institutional and non-institutional. The data were collected mainly for formulating the banking policies. The design of the survey was not suitable for providing estimates of indebtedness at the state and national level. The second such survey on rural “Debt and Investment” was conducted by the RBI in the year 1961-62 for obtaining reliable estimates of debt, borrowing, capital formation etc. The third comprehensive enquiry in this series of decennial surveys was entrusted by the RBI to the National Sample Survey Organisation (NSSO) and was conducted along with the survey on “Land Holding” during the year 1971-72, as a part of the NSSO programme in its 26th round survey operation. The fourth such survey was conducted in the 37th round (January to December 1982) along with Land Holdings as per the ten years programme charted by the Governing Council. The fifth such survey “All India Debt and Investment Survey (AIDIS)” was conducted along with “Land and Livestock Holdings” in the 48th round (January to December, 1992).</p> <p>The last survey on these subjects was conducted in 59th round of NSS (January 2003 - December 2003).The objectives of the AIDIS remain the same as those of the earlier surveys, namely, to obtain quantitative information on the stock of assets, incidence of indebtedness, capital formation and other indicators or rural/urban economy which will be of value in developing the credit structure in particular, and also for obtaining other allied information required in the field of planning and development. Further, since the survey will be of the kind of a repeat survey of that of the NSS 48th round, it is considered necessary to plan the survey in such a way as to ensure, as far as practicable, comparability with the estimates of the various characteristics generated from the earlier rounds.</p>

Abstract

The objectives of the debt and investment survey remain the same as those of the earlier surveys, namely, to obtain quantitative information on the stock of assets, incidence of indebtedness, capital formation and other indicators or rural/urban economy which will be of value in developing the credit structure in particular, and also for obtaining other allied information required in the field of planning and development. Further, since the survey will be of the kind of a repeat survey of that of the NSS 59th round, it is considered necessary to plan the survey in such a way as to ensure, as far as practicable, comparability with the estimates of the various characteristics generated from the earlier rounds.

The survey period of the 70th round was from January to December 2013. This survey covers the whole of the Indian Union. Each sample FSU is being visited twice during this round in visit 1 and visit 2. Since the workload of the first visit (i.e. visit 1) is more, the first visit continues till the end of July 2013. Thus, period of the first visit is January - July 2013 and that of the second visit (i.e. visit 2) is August - December 2013.

Broadly, the following information will be collected in this round from each household:

- (i) the assets of the household as on 30th June 2012, classified into (a) physical assets and (b) financial assets
- (ii) the liabilities of the household as on 30th June 2012 in visit 1 and as on 30th June 2013 in visit 2
- (iii) the amount of capital expenditure incurred by the household during July 2012 - June 2013 on
 - (a) residential plots, houses or buildings,
 - (b) farm business, and

(c) non-farm business.	
Kind of Data	Sample survey data [ssd]
Unit of Analysis	Randomly selected households based on sampling procedure and members of the household

Scope & Coverage

Scope

Descriptions of blocks appearing in Sch. 18.2, Visit2 , NSS 70th Round

Block 1&2_ Identification of sample household and particulars of field operations : -

Identification particulars of the sample household and names of the Field Investigator/ ASO, FO/SO, their signatures, dates of survey/ inspection/scrutiny, despatch, etc. are recorded in block 1 and block 2.

Block 11 Transaction of shares & debentures made by the household in co operative societies & companies during 01.07.2012 to 30.06.2013.

This block records stock of financial assets held on a reference date in the form of ownership of shares and debentures. The shares and debentures may be held in credit or non-credit cooperative societies, commercial banks, financial and non-financial companies, mutual funds including the Unit Trust of India, and similar institutions.

Block 14 Particulars of cash loans payable by the household to institutional, non-institutional agencies as on the date of survey and transactions of loans during 01.07.2013 to date of survey

The details of cash loans payable by the household as on the date of survey and transactions of all loans will be recorded in this block. The reference period for recording items of loan is from 01.07.2013 to the date of survey.

Block 15 Kind loans payable by the household as on the date of survey

In this block, information in respect of all kind loans payable by the household is recorded.

Visit 2_Block 16_value (`) of transactions by the household on specified items during 01.01.2013 to 30.06.2013

Block 16 Value (`) of transactions by the household on specified items _capital expenditure

This block has been designed to record

- (a) capital expenditure in cash and or in kind that has been incurred for new purchase, constructions, additions, major repairs and alterations, improvement in addition to expenditure incurred on normal repairs and maintenance of physical assets, and
- (b) value of physical assets due to sale, discardment and loss during the reference period of January -June 2013.

Block 16 Value (`) of transactions by the household on specified items during 01.01.2013 to 30.06.2013.

The amount financed from borrowings is to be recorded in this block depending on whether the lending agency is an institutional or a non-institutional one.

Time Period(s)	2013
Countries	India

Geographic Coverage

In this round all the States and Union Territories except Andaman & Nicobar Islands, Chandigarh, Dadra & Nagar Haveli and Lakshadweep are participating.

Universe

The survey used the interview method of data collection from a sample of randomly selected households and members of the household.

Sampling

Sampling Procedure

3. Sample Design

3.1 Outline of sample design: A stratified multi-stage design has been adopted for the 70th round survey. The first stage units (FSU) are the census villages (Panchayat wards in case of Kerala) in the rural sector and Urban Frame Survey (UFS) blocks in the urban sector. The ultimate stage units (USU) are households in both the sectors. In case of large FSUs, one intermediate stage of sampling is the selection of two hamlet-groups (hgs)/ sub-blocks (sbs) from each rural/ urban FSU.

3.2 Sampling Frame for First Stage Units: For the rural sector, the list of 2001 census villages updated by excluding the villages urbanised and including the towns de-urbanised after 2001 census (henceforth the term 'village' would mean Panchayat wards for Kerala) constitutes the sampling frame. For the urban sector, the latest updated list of UFS blocks (2007-12) is considered as the sampling frame.

3.3 Stratification:

(a) Stratum has been formed at district level. Within each district of a State/ UT, generally speaking, two basic strata have been formed: i) rural stratum comprising of all rural areas of the district and (ii) urban stratum comprising all the urban areas of the district. However, within the urban areas of a district, if there were one or more towns with population 10 lakhs or more as per population census 2011 in a district, each of them formed a separate basic stratum and the remaining urban areas of the district was considered as another basic stratum.

(b) However, a special stratum in the rural sector only was formed at State/UT level before district- strata were formed in case of each of the following 20 States/UTs: Andaman & Nicobar Islands, Andhra Pradesh, Assam, Bihar, Chhattisgarh, Delhi, Goa, Gujarat, Haryana, Jharkhand, Karnataka, Lakshadweep, Madhya Pradesh, Maharashtra, Odisha, Punjab, Rajasthan, Tamil Nadu, Uttar Pradesh and West Bengal. This stratum will comprise all the villages of the State with population less than 50 as per census 2001.

(c) In case of rural sectors of Nagaland one special stratum has been formed within the State consisting of all the interior and inaccessible villages. Similarly, for Andaman & Nicobar Islands, one more special stratum has been formed within the UT consisting of all inaccessible villages. Thus for Andaman & Nicobar Islands, two special strata have been formed at the UT level:

(i) special stratum 1 comprising all the interior and inaccessible villages

(ii) special stratum 2 containing all the villages, other than those in special stratum 1, having population less than 50 as per census 2001.

3.4 Sub-stratification:

Rural sector: Different sub-stratifications are done for 'hilly' States and other States. Ten (10) States are considered as hilly States. They are: Jammu & Kashmir, Himachal Pradesh, Uttarakhand, Sikkim, Meghalaya, Tripura, Mizoram, Manipur, Nagaland and Arunachal Pradesh.

(a) sub-stratification for hilly States: If 'r' be the sample size allocated for a rural stratum, the number of sub-strata formed was 'r/2'. The villages within a district as per frame have been first arranged in ascending order of population. Then sub-strata 1 to 'r/2' have been demarcated in such a way that each sub-stratum comprised a group of villages of the arranged frame and have more or less equal population.

(b) sub-stratification for other States (non-hilly States except Kerala): The villages within a district as per frame were first arranged in ascending order of proportion of irrigated area in the cultivated area of the village. Then sub-strata 1 to 'r/2' have been demarcated in such a way that each sub-stratum comprised a group of villages of the arranged frame and have more or less equal cultivated area. The information on irrigated area and cultivated area was obtained from the village directory of census 2001.

(c) sub-stratification for Kerala: Although Kerala is a non-hilly State but because of non-availability of information on irrigation at FSU (Panchayat Ward) level, sub-stratification by proportion of irrigated area was not possible. Hence the procedure for sub-stratification was same as that of hilly States in case of Kerala.

Urban sector: There was no sub-stratification for the strata of million plus cities. For other strata, each district was divided into 2 sub-strata as follows:

sub-stratum 1: all towns of the district with population less than 50000 as per census 2011

sub-stratum 2: remaining non-million plus towns of the district

3.5 Total sample size (FSUs): 8042 FSUs have been allocated for the central sample at all-India level. For the state sample, there are 8998 FSUs allocated for all-India. State wise allocation of sample FSUs is given in Table 1.

3.6 Allocation of total sample to States and UTs: The total number of sample FSUs have been allocated to the States and UTs in proportion to population as per census 2011 subject to a minimum sample allocation to each State/ UT. While doing so, the resource availability in terms of number of field investigators as well as comparability with previous round of survey on the same subjects has been kept in view.

3.7 Allocation of State/ UT level sample to rural and urban sectors: State/ UT level sample size has been allocated between two sectors in proportion to population as per census 2011 with double weightage to urban sector subject to the restriction that urban sample size for bigger states like Maharashtra, Tamil Nadu etc. should not exceed the rural sample size. A minimum of 16 FSUs (minimum 8 each for rural and urban sector separately) is allocated to each state/ UT.

3.8 Allocation to strata: Within each sector of a State/ UT, the respective sample size has been allocated to the different strata in proportion to the population as per census 2011. Allocations at stratum level are adjusted to multiples of 2 with a minimum sample size of 2.

For special stratum formed in the rural areas of 20 States/UTs, as discussed in para 3.3 (b), 2 FSUs were allocated to each.

For special stratum 1 in the rural areas of Nagaland and Andaman & Nicobar Islands, 4 and 2 FSUs were allocated respectively.

3.9 Allocation to sub-strata:

3.9.1 Rural: Allocation is 2 for each sub-stratum in rural.

3.9.2 Urban: Stratum allocations have been distributed among the two sub-strata in proportion to the number of FSUs in the sub-strata. Minimum allocation for each sub-stratum is 2.

3.10 Selection of FSUs:

For the rural sector, from each stratum x sub-stratum, required number of sample villages has been selected by Simple Random Sampling Without Replacement (SRSWOR).

For the urban sector, FSUs have been selected by using Simple Random Sampling Without Replacement (SRSWOR) from each stratum x sub-stratum.

Both rural and urban samples were drawn in the form of two independent sub-samples and equal number of samples has been allocated among the two sub rounds.

3.11 Selection of hamlet-groups/ sub-blocks - important steps

3.11.1 Criterion for hamlet-group/ sub-block formation: After identification of the boundaries of the FSU, it is first determined whether listing is to be done in the whole sample FSU or not. In case the approximate present population of the selected FSU is found to be 1200 or more, it is divided into a suitable number (say, D) of 'hamlet-groups' in the rural sector and 'sub-blocks' in the urban sector by more or less equalising the population as stated below.

approximate present population of the sample FSU no. of hg's/sb's to be formed

less than 1200	(no hamlet-groups/sub-blocks)	1
1200 to 1799		3
1800 to 2399		4
2400 to 2999		5
3000 to 3599		6
.....	and so on .	

For rural areas of Himachal Pradesh, Sikkim, Uttarakhand (except four districts Dehradun, Nainital, Hardwar and Udham Singh Nagar), Poonch, Rajouri, Udhampur, Reasi, Doda, Kistwar, Ramgarh, Leh (Ladakh), Kargil districts of Jammu and Kashmir and Idukki district of Kerala, the number of hamlet-groups are formed as follows:

approximate present population of the sample village no. of hg's to be formed

less than 600	(no hamlet-groups)	1
600 to 899		3
900 to 1199		4
1200 to 1499		5
1500 to 1799		6
.....	and so on .	

3.11.2 Formation and selection of hamlet-groups/ sub-blocks: In case hamlet-groups/ sub-blocks are to be formed in the sample FSU, the same is done by more or less equalizing population. While doing so, it is ensured that the hamlet-groups/ sub-blocks formed are clearly identifiable in terms of physical landmarks.

Two hamlet-groups (hg)/ sub-blocks (sb) are selected from a large FSU wherever hamlet-groups/ sub-blocks have been formed in the following manner - one hg/ sb with maximum percentage share of population is always selected and termed as hg/ sb 1; one more hg/ sb is selected from the remaining hg's/ sb's by simple random sampling (SRS) and termed as hg/ sb 2. Listing and selection of the households is done independently in the two selected hamlet-groups/ sub-blocks.

3.12 Formation of second stage strata and allocation of households

3.12.3 Schedule 18.2: Debt and Investment Survey (AIDIS):

Three SSS are formed both in rural and urban sector: (i) households indebted either to institutional agencies only or to both institutional and non-institutional agencies, (ii) households indebted to non-institutional agencies only and (iii) households without any indebtedness.

3.12.4 Allocation and selection of sample households: The total number of households to be surveyed in an FSU is given below for each schedule type:

Deviations from Sample Design

There was no deviation from the original sampling design.

Data Collection

Data Collection Dates	Visit 1: start 2013-01-01 Visit 1: end 2013-07-31 Visit 2: start 2013-08-01 Visit 2: end 2013-12-31
------------------------------	--

Data Collection Mode	Face-to-face [f2f]
-----------------------------	--------------------

Questionnaires

There are 19 blocks and two sub-blocks in the Visit 1 schedule. Since information on fewer items will be collected in Visit 2, the Visit 2 schedule contains only 9 blocks. The reference period which is printed in the block titles in Visit 1 is different from that in Visit 2.

Variables Description

Dataset contains 211 variable(s)

File : Visit 2_Block 1&2_ Identification of sample household and particulars of field operations

HHID: 'Primary key - unique identifier for a household'

Information	[Type= discrete] [Format=character] [Missing=*]
Statistics [NW/ W]	[Valid=108425 /-] [Invalid=0 /-]
Definition	HHID ('Primary key - unique identifier for a household') is combination of FSU Serial Number, Hamlet group/Sub-block no, Second Stage Stratum Number, household Number.

CentreCodeRndShift: Centre code, Round and Shift

Information	[Type= discrete] [Format=character] [Missing=*]
Statistics [NW/ W]	[Valid=108425 /-] [Invalid=0 /-]

Value	Label	Cases	Percentage
70A		9595	8.8%
70B		12098	11.2%
70C		15053	13.9%
70D		15553	14.3%
70E		15314	14.1%
70F		13778	12.7%
70G		2257	2.1%
70H		1434	1.3%
70N		23343	21.5%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

Vill_Blk_Slno: FSU Serial No.

Information	[Type= discrete] [Format=character] [Missing=*]
Statistics [NW/ W]	[Valid=108425 /-] [Invalid=0 /-]

Round: Round

Information	[Type= discrete] [Format=character] [Missing=*]
Statistics [NW/ W]	[Valid=108425 /-] [Invalid=0 /-]

Value	Label	Cases	Percentage
70		108425	100.0%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

Schedule: Schedule

Information	[Type= discrete] [Format=character] [Missing=*]
Statistics [NW/ W]	[Valid=108425 /-] [Invalid=0 /-]

Value	Label	Cases	Percentage
182		108425	100.0%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

Sample: Sample

Information	[Type= discrete] [Format=character] [Missing=*]
Statistics [NW/ W]	[Valid=108425 /-] [Invalid=0 /-]

Value	Label	Cases	Percentage
1	Central	108425	100.0%
2	State	0	

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

File : Visit 2_Block 1&2_Identification of sample household and particulars of field operations

Sector: Sector

Information [Type= discrete] [Format=character] [Missing=*]

Statistics [NW/ W] [Valid=108425 /-] [Invalid=0 /-]

Value	Label	Cases	Percentage
1	Rural	61651	56.9%
2	Urban	46774	43.1%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

State_Region: 'State-Region'
