NSS 47th Round Schedule 3.1 : Village Facilities Survey (July - December 1991) (NSS_VF 47-3.1 1991)

Overview	
Type	Living Standard Measurement-Village Facility Survey
Identification	IND-NSSO-47Rnd-Sch3.1-VF-1991
Version	Production Date: 2012-09-03 V 1.0: Re-organised anonymized dataset for public distribution
Series	<p>The National Sample Survey Organisation (NSSO) has been set up by the Government of India in 1950 to collect socio-economic data employing scientific sampling methods. The NSSO conducts regular surveys as part of its "rounds", each round being normally of a year's duration and covering more than one subject of study. The surveys are conducted through household interviews, using a random sample of households covering practically the entire geographical area of the country.</p> <p>The National Sample Survey (NSS) used to collect data on availability of various infrastructure facilities in the villages more or less regularly till the NSS 22nd round (July '67 to June '68). Again in 1991, a detailed survey on village facilities was conducted by the NSSO during its 47th round. The Governing Council of the NSSO decided to collect information on village facilities along with some information on availability of facilities for the disabled persons in the villages, as per recommendations of the Working Group for the 47th round.</p> <p>The field operations of the 47th NSS round commenced on 1st July 1991 and continued up to 31 Dec 1991. The field work for the survey was conducted, as usual, by the Field Operations Division of the Organisation. The collected data were processed by the Data Processing Division of NSSO and tabulated by the Computer Centre of Department of Statistics.</p>
Abstract	
<p>Through this schedule, it is aimed to collect information relating to availability of some general facilities to the villagers like education, Facilities for cultural activities and health and Facilities for disabled persons. If a facility is available in general to the villagers, it is considered as a facility. The required information has been obtained by contacting the village officials and / or other knowledgeable person(s). In case they were not aware of the existence of a particular facility, the nearest Block Development Officer or other related Agencies were contacted for collection of the relevant information.</p>	
Kind of Data	Sample survey data [ssd]
Unit of Analysis	Randomly selected Villages based on sampling procedure

Scope & Coverage

Scope

A large section of India's population lives in rural areas. It was thus pertinent to know the quality of life of the people in the villages, which in turn largely depended on the facilities available to the villages.

Also, policy interventions aimed at improving the quality of life in the villages demanded information on the facilities available to the people of rural India.

Information on the availability of various infrastructural facilities in the villages used to be collected by the National Sample Survey, more or less regularly, till the NSS 22nd round. Thereafter such information was collected only in

a few NSS rounds. During the NSS 47th round (July-December 1991), the main subject of which was 'Disability and Culture', a detailed survey on the facilities available to the villages was conducted.

The enquiry included the collection of information on availability of facilities to the disabled persons in the sample villages.

Keywords	Educational Facilities, Pre-Primary School;Primary School;Middle School;Secondary School;Higher Secondary School/Junior College, College with Degree Courses;Industrial Training Institute (ITI);, Distance of facility from the centre of Sample village, Non-formal Education Centre (NFEC);, Integrated Child Development Service Centre (Anganwadi/Balwadi);, Facilities for Disabled Persons, Integrated Educational Centre, Special School for the Blind, Special School for the Deaf and Dumb, Special School for the Mentally Retarded.;, Vocational Training Centre, Institution / Organization for the Rehabilitation of Disabled Persons, Mobile Rehabilitation Services, Pre-primary school/Primary school, Middle school, Secondary/Higher Secondary school, College with degree course
Topics	Education, Health, Infrastructure, Social Development
Geographic Coverage	Geographical coverage: The survey covered the whole of the Indian Union except (i) Leh and Kargil districts of Jammu & Kashmir, (ii) interior villages of Nagaland situated beyond five kilometres of the bus route and (iii) villages in Andaman and Nicobar Islands which remain inaccessible throughout the year.
Universe	The survey covered randomly selected Rural villages of the country.

Sampling
Sampling Procedure No documentation available.
Deviations from Sample Design There was no deviation from the original sampling design
Weighting Multiplier has been posted for sub-sample and combined using the Directory data as per multiplier layout.WGT_Combined and WGT_Sub_Sample may be applied for estimation. However, it has been observed

that estimate with the WGT_Combined turns out to be 6295688 which seems to be about 10 times more in comparison to Census 1991 ie 634,321. Therefore, Multiplier may be divided by 10 to get the correct figure.

Directory file and its layout are in the External Resources.

Data Collection	
Data Collection Dates	start 1991-07-01 end 1991-12-31
Data Collection Mode	Face-to-face [f2f]
Data Collection Notes	
The information on the facilities available to the villagers was collected from one or more knowledgeable persons of the village. In case there were more than one source, then the informant from whom the maximum information was collected was considered.	
Questionnaires	
Schedule 3.1 consists of the following blocks: Block 1: identification of sample village Block 2: particulars of field operation Block 3: distance from nearest facility Block 4: remarks by investigator Block 5: comments by supervisory officer(s) Block 3 is the main block of this schedule and is meant for recording the information relating to distance of specified facilities from the centre of the sample village. Block 1 is meant for recording the identification particulars of the sample village. Block 2, 5 and 6 are used for official purposes to record the particulars relating to field operations, Remarks of the investigators and those of the supervisory officer(s) respectively.	
Data Collector(s)	Field Office Division (NSSO) (FOD (NSSO)), Ministry of Statistics and PI, Govt. of India
Supervision	
Field Office Division of NSSO, Ministry of Statistics and PI.	

Data Processing & Appraisal	
Data Editing	
Data was collected as per the Questionnaire 3.1. But for processing purposes, a flat file was created using the identification particulars from Block 1 and Village facility information from Block 3. Data editing, scrutiny and validation were carried out as per the scrutiny checks and corrected manually.
