

Report No. 483(57/2.345/2)

Unorganised Service Sector in India 2001 - 2002

Characteristics of Enterprises

**NSS 57th round
(July 2001 - June 2002)**

**National Sample Survey Organisation
Ministry of Statistics and Programme Implementation
Government of India**

June 2003

Preface

National Sample Survey Organisation (NSSO) conducted an integrated survey of households and unorganised service sector enterprises during July 2001 to June 2002. The subjects covered were consumer expenditure, employment and unemployment and unorganised service sector enterprises. The survey was conducted using the enterprise / establishment level data obtained from the Economic Census 1998 as the frame for sampling of villages / urban blocks, to the extent possible.

The present report is the second of the two reports based on the survey on unorganised service sector enterprises conducted during 2001 – 02. It contains information on some characteristics like ownership type of enterprise, their location, maintenance of written accounts, registration status, months of operation, problems faced in running the enterprise, etc. of the unorganised service sector enterprises at the all India level for different industry groups and at the level of state / UT's for all the industry groups together.

Field Operations Division (FOD) of the organisation conducted the fieldwork of the survey and the data were processed and tabulated by the Data Processing Division (DPD) of the NSSO. Coordination and Publication Division (CPD) coordinated the overall survey activity. The Survey Design and Research Division (SDRD) of the NSSO developed the survey methodology and prepared the report. I am grateful to the members of the Governing Council of NSSO as well as members of the working group, editor of the report and officers of the Ministry of Statistics and Programme Implementation for their suggestions to improve the quality of the report.

I hope the report will be useful to the planners and policy makers. Comments and suggestions for improvement will be most welcome.

Section One

Introduction

1.1 The NSSO, since its inception in 1950, has played a major role in providing the socio-economic data needed- from all spheres of life-to formulate of a vibrant plan for social and economic development. In this endeavour, NSS has collected, *inter-alia*, a series of data on non-agricultural enterprises, particularly those belonging to the unorganised sector. In this series, information on unorganised service sector enterprises have been collected in the 57th round of NSSo, conducted during 2001-02.

1.1.1 In the early periods, the household-based non-agricultural activities, irrespective of their scale of operations, were covered in the surveys of NSSO. Subsequently, the need for segmentation of non-agriculture sector into organised and non-organised, and also into sectors of economic activity was felt necessary for the collection of meaningful data. The enterprises registered under Factories Act, 1948 (known as organised sector) and engaged in manufacturing activity, were then separately covered and surveyed by the Central Statistical Organisation. The non-household based units in the unorganised sector thus remained out side the coverage, primarily due to non-availability of a better frame and background information needed for formulating an efficient sampling design.

1.1.2 In order to meet the requirements of surveys on enterprises and others, a countrywide Economic Census (EC), the first of its kind, was undertaken in 1977 under the aegis of the Central Statistical Organisation (CSO). Following this census, small establishments and enterprises not employing any hired worker on a fairly regular basis (known as Own Account Enterprises (OAEs)) engaged in manufacturing and repairing activities were surveyed in 33rd round of NSS during 1978-79.

1.1.3 Subsequently, a series of Economic Censuses have been conducted by extending the scope of earlier Censuses during 1980 and 1990 followed by the enterprise surveys of NSSO during 1984–1985 (NSS 40th round), 1989–1990 (NSS 45th round), and 1994-1995 (NSS 51st round). The OAEs and Non-Directory Establishments (NDEs) were covered in NSS 40th and 45th round surveys, whereas the Directory Establishments (DEs) were surveyed separately by the CSO. However, in the 51st round, all the OAEs, NDEs and DEs engaged in manufacturing and repairing activities were covered by the NSS.

1.1.4 The latest EC, the fourth in the series, was conducted by the CSO during 1998. As a follow-up survey of this EC, a survey on unorganised manufacturing was conducted during the 56th round (July 2000-June 2001). In this survey, information from the 1998 EC was used for stratification and the EC list of villages and blocks was used as frame for selection of first stage units as far as possible. It may be worth mentioning that a survey on unincorporated proprietary and partnership enterprises, known as informal sector, was carried out along with the quinquennial surveys on 'Consumer Expenditure' and 'Employment & Unemployment' in NSS 55th round (July 1999-June 2000). The Population Census villages and UFS blocks were used as sampling frame in that round. The current survey, NSS 57th round, is on the unorganised service sector enterprises excluding trading and financial enterprises. The survey was carried out during July 2001 - June 2002 and the information was collected from the selected enterprises more or less on the lines of NSS 55th round. In this survey, the information of EC-'98 has been used for selection of units.

1.2 The Survey in Brief: As usual, NSSO conducted an integrated survey of enterprises and households in its 57th round during July 2001 to June 2002. The main focus of the survey was on the unorganised enterprises belonging to the service sector and the information was collected through Schedule 2.345 designed for the purpose. A copy of the schedule is given in Appendix C. In addition, survey on household consumer expenditure including some key characteristics on employment-unemployment was carried out during this period.

1.2.1 Objective of the Enterprise Survey: The main aim of the survey on unorganised service sector enterprises was to estimate size in terms of the total number enterprises, employment, fixed assets, operating expenses, receipts, value added, loans, gross value added per worker, etc. Information on other attributes like type of ownership, type of operation, number of months of operation, whether carrying out mixed/multiple activity, whether accounts maintained, etc. was also collected. The results pertaining to size, employment and economic indicators of the enterprises have been brought out in the first report*. This report, second in the series, presents the size and employment in brief, and the characteristics of the enterprises in terms of ownership, social group of owner, type of operation, months of operation, whether accounts maintained, nature of problems faced, etc.

* NSS Report no. 482: *Unorganised Service Sector in India: 200203 – Salient Features*

1.2.2 Unorganised Services Sector: The 57th round covered broadly all unorganised service sector enterprises engaged in the activities of hotels and restaurants (Tabulation Category H of NIC 98); transport, storage and communication (I); real estate, renting and business activities (K); education (M); health and social work (N) and other community, social and personal service activities (O).

1.2.2.1 The survey did not cover the service sector enterprises pursuing the activities of wholesale and retail trade, repair of motor vehicles, motorcycles and personal and household goods (G); financial intermediation (J); public administration and defence (L); private households with employed persons (P) and extra-territorial organisations and bodies (Q).

1.2.2.2 The different tabulation categories mentioned above were further sub-divided to form relatively uniform groups/sub-groups. The coverage of the different activities in the present round has been discussed in detail in Section Two of this report.

1.2.3 Geographical Coverage: The survey covered the whole of the Indian Union except (i) Leh and Kargil districts of Jammu & Kashmir, (ii) villages in Nagaland situated beyond 5 km of a bus route, (iii) inaccessible villages of Andaman and Nicobar Islands, and (iv) some of the villages and blocks (numbering less than 0.1% of the total) where EC-'98 could not be conducted. Thus the corresponding State/UT level estimates and the All-India results presented in this report relate to the areas under survey coverage.

1.2.4 Sample Design: A stratified sampling design was adopted for selection of the sample first-stage units (FSUs). The FSUs were villages (Panchayat wards in Kerala) in rural areas and UFS blocks in urban areas. For the survey on unorganised service sector enterprises the Ultimate Stage Units (USUs) were enterprises. Within an entire FSU, all big non-agricultural enterprises having 200 or more workers were separately listed (segment 9) and the schedule was canvassed in all the enterprises that were eligible for survey among them. Relatively larger FSUs were sub-divided into smaller parts called hamlet-groups in the rural and sub-blocks in the urban. Three hamlet-groups, one with maximum number of enterprises of a specific type (called segment 1) (details given in Appendix B) and two more at random (together called segment 2) were selected for the survey. The USUs were selected independently from each of these segments. A detailed discussion on sample design and estimation procedure followed in the survey is available in Appendix B of this report.

1.2.5 Sub round: The entire survey period (1st July 2001 to 30th June 2002) was divided into four sub-rounds of three months' duration each (Sub-round 1: July-September 2001, Sub-round 2: October-December 2001, Sub-round 3: January-March 2002, Sub-round 4: April-June 2002) and equal numbers of sample villages and blocks were allocated to each sub-round. Each FSU was surveyed during the sub-round period to which it was allocated. Within a particular sub-round, the field work was spread out evenly over different months to the extent possible.

1.2.6 Sample Size: A total of 15869 first stage units (6513 census villages and 9356 blocks of Urban Frame Survey) were selected for this survey. The number of sample villages and blocks allotted for survey and actually surveyed are given in Statement 1, and the number of enterprises surveyed in Statement 2, for different states. The number of enterprises surveyed for various tabulation categories is given in Statement 3 for all-India only.

1.2.7 Release of results: As mentioned earlier, the present report is on unorganised service sector enterprises (excluding Trade and Finance) based on the data collected through Schedule 2.345 in NSS 57th round. It discusses, among other things, the distinct characteristics of the enterprises including its size and employment in brief. Relevant concepts and definitions used in this survey are presented in Section Two. Major findings based on the survey data are discussed in Section Three. The detailed statistical tables are presented in Appendix A. Appendix B gives sample design and estimation procedure for the survey.

Description of NIC activity categories,

hotels – H1; restaurants – H2; Storage and warehouse - I1; mechanized road transport – I2; other transport and related activities - I3; communication - I4; real estate, renting and business activities – K; education – M; health and social work – N; other community social and personal service activities – O.

Section Two

Concepts and Definitions

2.1 For the purpose of survey on the unorganised service enterprises, several terms involving certain concepts and definitions were used in the survey. These are discussed below.

2.2 **Reference Period:** *Last month* was used as the reference period for collecting most of the data. Information on receipts and expenses as well as employment, emoluments, rent, interest and value added for the enterprises were collected for the last month only. *Last month referred to the last 30 days (preceding the date of survey) for perennial and casual enterprises irrespective of the number of days of operation. For seasonal enterprises also, last month referred to the last 30 days (preceding the date of survey), if they worked continuously for the last 30 days or more (including scheduled holidays) in the current season. Only for seasonal enterprises, which worked for less than 30 days in the current season, last month referred to an average month in the last working season. If some enterprise was unable to give information for the last 30 days and was able to give information for the last calendar month, figures for the same were taken. For enterprises which provided information from their books of accounts but were not able to provide information for the last month/last calendar month, average monthly values of the last accounting year were collected. In case of items "rent payable" and "interest payable", the monthly average based on yearly values were collected. For some of the items like value of fixed assets, amount of loan outstanding, etc., the reference period was 'as on the date of survey'. For other items like net additions to fixed assets, number of months operated, number of other economic activities pursued etc., the reference period was the 'last 365 days preceding the date of survey'.*

2.3 **Enterprise:** An enterprise was an undertaking engaged in the production and/or distribution of some goods and/or services meant mainly for the purpose of sale, whether fully or partly. An enterprise might be owned and operated by a single household or by several households jointly, or by an institutional body.

2.4 **Non-agricultural Enterprise:** All enterprises covered under Tabulation Categories 'A' and 'B' of NIC 1998 were "agricultural enterprises" while the

others covered under Tabulation Categories 'C' to 'Q' of NIC 1998 were "non-agricultural enterprises".

2.5 Own-account Enterprise: An own account enterprise (OAE) was an undertaking run by household labour, usually without any hired worker employed on a 'fairly regular basis'. By 'fairly regular basis' was meant the major part of the time when operation(s) of an enterprise was carried out during the reference period of last 365 days.

2.6 Establishment: Enterprises that employed **at least one hired worker** on a 'fairly regular basis' were called establishments. Paid or unpaid apprentices, paid household member/servant/resident worker in an enterprise were considered as hired workers. Establishments were further sub-divided into two classes: (i) Non-directory establishment and (ii) Directory establishment. An establishment employing less than six workers (household and hired workers taken together) was termed non-directory establishment (NDE). A directory establishment (DE) was an establishment which employed six or more workers (household and hired workers taken together).

2.7 Perennial Enterprise: Enterprises that were run more or less regularly throughout the year were called perennial enterprises.

2.8 Seasonal Enterprise: Enterprises that were usually run in a particular season or fixed months of a year were called seasonal enterprises.

2.9 Casual Enterprise: Enterprises that were run occasionally, for at least 30 days in total in the last 365 days, were called casual enterprises.

2.10 Household Enterprise: A household enterprise was one which was run by one or more members of a household or run jointly by two or more households on partnership basis irrespective of whether the enterprise was located in the premises of the household(s) or not. In other words, all proprietary and partnership enterprises were household enterprises.

2.11 Non-household Enterprise: Non-household enterprises were those which were institutional i.e. owned and run by the public sector (Central or State Government, local self-governments, local bodies, government undertakings, etc.), corporate sector, co-operative societies, other types of societies, institutions, associations, trusts, etc.

2.12 Unorganised Enterprise: The unorganized sector comprised the following types of enterprises:

(i) All the enterprises except units registered under Section 2m(i) and 2m(ii) of the Factories Act, 1948 and Bidi and Cigar Workers (condition of employment) Act, 1966.

(ii) All enterprises except those run by Government (Central, State, local bodies) /Public Sector Enterprises.

2.13 Worker: A worker was defined as one who participated either full time or part time in the activity of the enterprise. The worker might have served the enterprise in any capacity - primary or supervisory. He/she might or might not have received wages/salaries in return for his/her work incidental to or connected with the entrepreneurial activity. A worker need not mean that the same person was working continuously; it only referred to a position. Persons working for not more than half of the normal working hours of the enterprise on a fairly regular basis were considered as part time workers. Full time workers were those who work for more than half of the period of normal working hours of the enterprise on a fairly regular basis. Two part-time workers in an enterprise were counted as 2 and not 1.

2.14 Working Owner: The owner who personally worked in the proprietary or partnership enterprises on a fairly regular basis was termed working owner. In fact, in most of the own-account enterprises the owner himself/herself managed all activities of the enterprise without the help of anyone (on a fairly regular basis). In the case of partnership enterprises, if only one partner or some or all of the partners worked in the enterprise on a fairly regular basis then he/she/ they were considered as 'working owners'.

2.15 Hired Worker: A hired worker was a person employed directly or through any agency on payment of regular wage/salary in cash or kind. Apprentices, paid or unpaid, were treated as hired workers. Paid household workers, servants and resident workers of the enterprise were also considered as hired workers.

2.16 Other Worker/Helper: This included all persons belonging to the household of the proprietor or households of the partners who were working in or for the enterprise without regular salary or wages. Persons working as exchange labourer in the enterprise without salary or wages were also covered in this category. All unpaid household workers/helpers who were associated

with the activities of the enterprise during the reference month were placed in this category.

2.17 Fairly Regular Basis: The term 'fairly regular basis' refers to the major part of the time when operation(s) of an enterprise was carried out during the reference period.

2.18 Mixed Activity: There were enterprises, which carried out a number of activities simultaneously. If the accounts were not separable then the data pertained to the enterprise as a whole was collected and the enterprise was classified as having mixed activities and the activities of such enterprises are mixture of NIC's. The appropriate NIC in such cases was determined on the basis of **major** activity. Major activity refers to the activity, which yielded maximum income/turnover/employment. The above criteria was applied in the given order, i.e. income first, then turnover and then employment, to determine the major activity. The activities may be mixed at any level of NIC, but for the present survey an enterprise was considered to have mixed activity if it had multiple (at least two) activities at 2-digit level of NIC 1998 during the last 365 days.

2.19 Hotels: A hotel was an enterprise that provides lodging services with or without arrangements for meals, other prepared food and refreshments. Dharamshala type lodging places, private guest/rest houses, hostels, mess, and hostels attached to educational institutions, students homes, hostel for working girls, tourist lodges, etc. were also covered under hotels.

2.19.1 Hotel activities have been classified under NIC group 551. All hotels were covered in the survey provided they were run by private organisations. Similar facilities provided through workers employed exclusively for these specific activities by organisation like YMCA, Ramkrishna Mission etc., and also by other membership organizations like Lions Club, Rotary Club etc., were also covered under hotels. However, similar facilities if provided by Govt./PSU/local bodies/Statutory bodies (e.g. ISI, IIT, Universities, etc.) were *excluded* from the purview of this survey.

2.20 Restaurants: A restaurant was one which generally provide d eating and drinking services where prepared meals, food, refreshments and other snacks were sold for immediate consumption without any provision for lodging. Such establishments are variously known as restaurants, cafes, cafeterias, snack bars, lunch counters, refreshment stands, milk bars, canteens, etc. Bars and other drinking places were also treated as restaurants.

2.20.1 Restaurants are classified under NIC group 552. For the purpose of survey, canteens located in offices, factories, etc. were treated as restaurants if they were operated by private contractors. But departmental canteens run by government were *excluded* from the purview of this survey.

2.21 Storage & Warehousing: The operation of storage and warehouses on hire to the farm producer, dealer or trader, processor and manufacturing enterprises, including the general public, as an independent business was termed as storage and warehousing enterprise. Storage and warehousing services in respect of grains, other food articles, oilseeds and other agricultural commodities like cotton, jute and tobacco were also included. Further, refrigerated storage facilities on hire to other enterprises for potato, fruits, dairy products, fish and other food products and also refrigerated food locker on rental services chiefly delivered to individual households were included. While, storage of all manufactured products including textiles, machine tools apparatus and equipment were included, farm produce stored by the owner of the farm in his own godown or a dealer or a manufacturer storing his commodities in his own godown or warehouse were excluded.

2.21.1 Storage and Warehousing activities fall under NIC class 6302. In the present survey, establishments of Central Warehousing Corporation, State Warehousing Corporations and the warehouses of the Central and State Governments were *not included*. Lockers in commercial banks and in other type of enterprises for safe storage of precious belongings were also *excluded*.

2.22 Transport: Transport was defined as an activity that carried passengers and/or goods from one place to another as a business proposition. Supporting services incidental to transport such as packing, freighting, travel agency, etc. were included under transport enterprise.

2.22.1 Mechanised road transport, classified under NIC class 6021 and sub-classes 60221 and 60231, meant passenger transport by bus (including tramways), passenger transport by other motor vehicles, freight transport by motor vehicles or any other road transport by mechanised vehicle to qualify the activity as mechanised road transport.

2.22.2 Other transport and related activities mean transport of passengers and/or goods in land, *other than by mechanised road transport*. Activity of travel agency and tour operators, activities of other transport agency, supporting services incidental to transport such as packing, freighting, travel

agency etc. were also covered under other transport. The following activities were also covered: (i) hackney carriages, carriage by bullock-carts/ekka/tonga etc. (ii) transport by animals like horses, elephants, mules, camels, etc., (iii) transport by man including rickshaw-pullers, cart-operators, etc., (iv) all kinds of water transport, (v) supporting services to land transport like operation of highway bridges, toll roads, parking lots, etc. and (vi) supporting services to water transport like operation and maintenance of piers, docks, light house, loading and discharging vessels, etc. A household renting out transport vehicles to others and not operating directly with hired or household labour to render service to others was not considered as having transport enterprise. *Transport via pipeline and air transport were beyond the coverage of this survey. Thus, the activities covered in this survey fall under NIC codes 601, 60222, 60232, 61, 6301, 6303, 6304 and 6309.*

2.23 Communication: All enterprises that provided communication services were communication enterprises. This included courier services, ISD/STD/PCO booths, Voice Mail Services through computer networking, Video/fax services, phone plus services, voiced and non-voiced leased circuits, telex/FAX/data services through computer network, radio paging, audio services and activity of cable operators etc.

2.23.1 Communication, falling under NIC group 64, not owned by government, Public Sector undertakings and local bodies were covered in this survey. However, activities of the cellular service operators were outside the coverage of this survey, although their agencies were covered.

2.24 Real estate, Renting and Business Activities: Real estate activities included activities like: (i) purchase, sale, letting and operating of real estate i.e. residential/non-residential buildings, (ii) developing and sub-dividing real estate into lots, (iii) lessors of real property and (iv) real estate agents, brokers and managers engaged in renting, buying and selling, managing and appraising real estate on a contract or fee basis. *Letting out of an accommodation was not included except in case of real estate agents running such a business.* Renting of machinery and equipment was covered. A household hiring out machinery and equipment or household durables was also treated as an enterprise. All business activities classifiable under NIC 1998 codes 70 to 74 were covered in this survey.

2.25 Education: All educational institutions were covered under this category. Research and scientific services rendered by institutions and laboratories were also covered provided they satisfied the above criterion.

These might be engaged in research in biological, physical and social sciences. Meteorological institutes and medical research organisations were also included. Management training institutes, computer training centers, nursing schools, schools of music, drama, dance, fine arts, modeling, fashion designing, yoga and physical education and general coaching centers (e.g., for various competitive examinations) etc. were also covered under this activity.

2.25.1 In activities under education included in NIC group 80, all educational institutions *not recognized by Central/State/Local Govts./autonomous bodies like AICTE, IIT, University etc.* were covered. Similar facilities provided through workers employed exclusively for these specific activities by organization like YMCA, Ramkrishna Mission etc. and also by other membership organizations like Lions Club, Rotary Club etc. were also covered under education.

2.26 Health and Social Work: All enterprises engaged in health and medical services came under this activity, irrespective of the system of medicine. All dispensaries, clinics and consultation chambers run by doctors were included here. The activity also included activities of veterinary services including bird hospitals. For an employed doctor and para-medical person (such as midwife, dai, etc.) engaging in private practice, his/her private practice alone was considered as an enterprise. All kinds of health clubs were included in this activity.

2.26.1 All health and social work activities falling under NIC group 85, *other than those owned by government, public sector undertakings, local bodies* were under the purview of the present survey. Similar facilities provided through workers employed exclusively for these specific activities by organization like YMCA, Ramkrishna Mission, etc. and also by other membership organizations like Lions Club, Rotary Club, etc. were also covered under health and social work.

2.27 Other Community, Social and Personal Services: This included the activities like sewage and refuse disposal, other service activities like washing and cleaning of textile products, hairdressing, beauty parlors, funeral and related activities, massage saloons, sauna baths, activities of shoe shiners, porters, car park agents, etc; activities such as those of portrait and commercial photographic studios, etc. Palmists and astrologers were also included here.

2.27.1 The coverage of other community, social and personal service activities, covered under NIC groups 90 to 93, excluded the activities of trade unions, religious organisations, political organisations and other membership organisations. It may be noted that individuals serving as housemaids, cooks, gardeners, governesses, babysitters, chowkidars, night watchmen, etc. were, in general, outside the coverage of the present survey. However, if such activities were provided by some agencies against prescribed fees, those agencies were treated as enterprises under respective NIC codes. For example, an agency which supplies babysitters or nurses or night watchmen with some profit margin, was covered under this activity.

2.28 The different activities of unorganised service sector enterprises covered in the survey along with the corresponding NIC group/class/sub-class, as the case may be, are given in Statement 4. A group has been mentioned if all the activities under the group were covered. In some cases, all activities pertaining to a particular group were not covered. In those cases, the particular classes under survey are mentioned in the statement. If some activities under a class were excluded, only the sub-classes under coverage have been mentioned. In a few cases, where only a part of the activities described in a sub-class were covered, the statement includes that part only.

Statement 4: Activities covered in the survey and their NIC group / class / sub-class

NIC-1998 codes	description of activity
	hotel
551	Hotels, camping sites and other provision of short-stay accommodation (restaurant facilities operated in connection with the provision of lodging remain classified in this group. Also included are the operation of sleeping cars when carried on by separate units)
	restaurant
552	Restaurants, bars and canteens (sales through vending machines is not classified here)
	storage and warehousing
6302	Storage and warehousing (includes cold storage, general merchandise warehouses and warehousing of furniture, automobiles, gas and oil, chemicals, textiles etc. Also included is storage of goods in foreign trade zones)
	mechanised road transport
6021	scheduled passenger land transport other than transport via railways (Includes activities providing regular urban, suburban or inter urban transport of passengers on scheduled routes, other than inter urban railway transport. They may be carried out with motor bus, tramway, trolley bus,

Statement 4: Activities covered in the survey and their NIC group / class / sub-class

NIC-1998 codes	description of activity
	underground and elevated railways. Also included are the operation of school buses, town-to-airport/station lines, sightseeing buses, aerial cableways etc.)
60221	other non-scheduled passenger land transport by motor vehicles
60231	freight transport by motor vehicles

Continued

other transport and related activities	
601	non mechanised transport activities related to transport via railways
60222	other non-scheduled passenger land transport, other than by motor vehicles (i.e. by bullock carts, tongas and cycle rickshaws etc.)
60232	freight transport other than by motor vehicles (i.e. by man or animal drawn vehicles such as bullock carts, cycle rickshaws and the like)
61	water transport
6301	cargo handling
6303	other supporting transport activities
6304	activities of travel agencies and tour operators, tourist assistance activities n.e.c. (Includes furnishing travel information, advice and planning, arranging tours, accommodation and transportation for travellers and tourists, and furnishing tickets etc. Also included are tourist assistance activities, such as carried on by tourist guides)
6309	activities of other transport agencies (includes forwarding of freight, organisation or arrangement of transport on behalf of the shipper or consignee, receiving and acceptance of freight, transportation document preparation, consolidation and break bulk of freight, freight brokerage, custom house brokerage, bill auditing and freight rate information, brokerage for ship and aircraft space, packing and crating and unpacking and de-crating, weighing and sampling of freight etc.)
communication	
64	post and telecommunications
real estate, renting and business activities	
70	real estate activities
71	renting of machinery and equipment without operator and of personal and household goods
72	computer and related activities
73	research and development
74	other business activities

Statement 4: Activities covered in the survey and their NIC group / class / sub-class

NIC-1998 codes	description of activity
	education
80	education
	health and social work
85	health and social work
	Other Community, Social And Personal Service Activities
90	sewage and refuse disposal, sanitation and similar activities
911	activities of business, employers and professional organisations
9191	activities of religious individuals who provide services directly to worshippers
92	recreational, cultural and sporting activities
93	other service activities

n.e.c. – not elsewhere classified

2.29 Non-profit Institutions (NPIs): Non-profit institutions are legal or social entities created for the purpose of producing goods and services whose status does not permit them to be a source of income, profit or other financial gain for the units that establish, control or finance them. In practice, their productive activities are bound to generate either surpluses or deficits but any surpluses they happen to make cannot be appropriated by other institutional units. The articles of association by which they are established are drawn up in such a way that the institutional units which control or manage them are not entitled to a share in any profits or other income which they receive. For this reason, they are frequently exempted from various kinds of taxes. The objectives of NPIs created by other institutional units - whether persons, corporations, or government - are varied. For example, NPIs may be created to provide services for the benefit of the persons or corporations who control or finance them; or they may be created for charitable, philanthropic or welfare reasons to provide goods or services to other persons in need; or they may be intended to provide health or education services for a fee, but not for profit; or they may be intended to promote the interests of pressure groups in business or politics; etc. Although they may provide services to groups of persons or institutional units, they are, by convention, deemed to produce only individual services and not collective services.

Section Three

Summary of Findings

3.1 The first report on unorganised service sector based on data collected through NSS 57th round, viz. “Unorganised service sector in India, 2000-2001: Salient Features” contains estimates of some parameters like number of enterprises, workers, gross value addition, fixed assets and outstanding loans, etc. The present report, the second in the series, contains estimates of some characteristics of the enterprises engaged in service activities like type of enterprise (ownership), their location, maintenance of written accounts, registration status, months of operation, problems faced, etc. A summary of these results is presented and discussed in this section. Detailed tables are given in Appendix A, which provides estimates separately for the rural, urban and for both the areas combined at the all-India and State/UT level. In addition, information for the ‘Own Account Enterprises (OAEs)’ and ‘establishments’ have been presented separately. The marginal totals and the sum of the proportions presented in various detailed tables may, in some cases, differ slightly due to their rounding off.

3.2 The discussions in this section are focussed mainly on the results at the all-India level with its rural-urban features. The State/UT level estimates have then been examined to study the variability across the regions of the country. For this purpose 19 major States have been considered and these have been identified on the basis of number of enterprises and workers engaged in such enterprises of the service sector. The ‘major states’ are (names in abbreviated form in brackets): Andhra Pradesh (AP), Assam (ASM), Bihar (BHR), Chhattisgarh (CTG), Delhi (DEL), Gujarat (GUJ), Haryana (HAR), Jammu and Kashmir (J&K), Jharkhand (JRK), Karnataka (KTK), Kerala (KER), Madhya Pradesh (MP), Maharashtra (MAH), Orissa (ORS), Punjab (PUN), Rajasthan (RAJ), Tamil Nadu (TN), Uttar Pradesh (UP), Uttaranchal (UTC) and West Bengal (WB).

3.3 The term ‘enterprise’ is used in general to represent OAEs and establishments together. In the statements, ‘all’ is used to denote all the enterprises taken together. A “-” has been used in the statements and tables if no enterprise was surveyed in that particular level of disaggregation. On the other hand, the figure “0” appears in some levels of disaggregation when the estimated figure is very low and has become 0 due to rounding off the figures.

3.4 It needs to be mentioned that the estimates provided at lower levels of disaggregation in this report may be used with caution keeping in view the

number of sample enterprises surveyed at that particular level. For example, while using the disaggregated estimates for any state/UTs, an NIC '98 division or enterprise type, the corresponding number of enterprises surveyed needs to be kept in mind.

3.5 In the survey, the information was collected from 2.44 lakhs enterprises engaged in the activities of the service sector spread over the entire country. About 38 per cent of these enterprises were located in the rural sector. Moreover, 70 per cent of the total surveyed enterprises were OAEs.

3.5 Estimated number of enterprises: Before looking into the various characteristics of the enterprises in the service sector, it is essential to know the extent of their presence in the economy as a whole as well as in different activities as obtained from the survey. During 2001-02, about 1.45 crore* enterprises in unorganised segment of the economy were engaged in the service sector activities excepting those in trading and finance. While about 58 per cent of such enterprises were located in rural areas, 42 per cent were in urban areas. The break-up of these estimates are shown in Statement 5. The distribution of these enterprises by enterprise type, i.e. OAE and establishments, and others has already been discussed at length in our earlier report (Para 2.3.1, No. 482) on the subject. For the benefit of the study of various correlates of these enterprises, some such distributions are placed here again. Statement 6 shows the percentage distribution of enterprises over various activities of the enterprises belonging to service sector (NIC) and the percentage distribution of all the enterprises over the various States and UTs have been presented in Statement 7. These Statements have already been presented and discussed in NSS Report no. 482. They also form a basis of the subsequent discussions of this report. The percentage distribution of enterprises in the service sector by enterprise type is also shown in Chart1 for rural and urban areas. The observations made on these statements are, however, not repeated here.

Statement 5: Estimated number of enterprises (in '000) by enterprise type

3.7 Estimated number of workers: A worker, for the purpose of survey, was defined as one who participated, on a fairly regular basis, either for full time or part time in the activity of the enterprise in any capacity - primary or supervisory. The share of workers in various activities in the service sector has been given in Statements 8.

3.7.1 In India, about 2.66 crore persons worked in the enterprises belonging to the unorganised service sector, the rural and urban shares in employment being 53 and 47 per cent, respectively. The pattern observed in terms of number of workers in rural and urban sectors resembles the one observed in respect of the number of enterprises. Also, the distribution of workers over the sectors of activity follows, to some extent, a pattern similar to that of the number of enterprises. These results have also been discussed in our earlier report. It can be seen that the proportion of workers engaged in the enterprises belonging to the '*transport, storage and communication (I)*' (27 %) was the highest followed by '*other community, social and personal services(O)*' (20 %), and '*hotels and restaurants(H)*' (19 %) activities.

3.8 Type of ownership of enterprises: One of the principal characteristics of an enterprise is the kind of ownership it has and which, in turn, indicates the levels of entrepreneurship of the persons running the enterprise. Statement 9 gives the percentage distribution of enterprises by type of ownership of the enterprise separately for rural, urban and combined sectors. The same distribution is also shown in Chart 2. A large proportion (about 97%) of service sector enterprises was proprietary type, i.e. owned by a single household. Only 8 per cent of the owner proprietors were females and the rest males. The share was more in favour of females in the urban areas. In the urban areas, the share was 10 % for females and 90 % for males. The difference is more marked in the case of establishments than in the OAEs. Thus in the service sector, though about 18% of the total workers were female workers, only about 8 % of the proprietary enterprises were run by female owners. Of the total enterprise, only about 2% were operated on a partnership basis.

Chart 2: Percentage distribution of enterprises by type of ownership for each enterprise type

3.8.1 The corresponding distribution of enterprises (all types combined) by type of ownership is given in Statement 10 separately for rural and urban areas of each State/UT. There is a similarity in the distributions across the States with a very high percentage of proprietary enterprises and of them, a majority of the owners being male. Among the major States, more than 95% of the service enterprises in Bihar, Chhattisgarh and Uttaranchal were run by male proprietors in the rural areas. Andhra Pradesh, Kerala and Tamil Nadu had more than 10% of the enterprises with female proprietors. In the urban areas, the percentage of enterprises that were owned by male proprietors, were the maximum in Chhattisgarh and Bihar (about 94%) followed by Orissa (92%). It was in States like Kerala (14%) and West Bengal (13 %) that the female proprietors were in larger proportions. Noticeably, in the north-eastern States where the female headed households, generally, are in large proportions, the proportions of female proprietors were also high as compared to the other States and UTs.

3.9 Nature of operation: All the enterprises in the unorganised sector do not generally operate throughout the year. The number of months of operation of an enterprise largely depends on the type of activity it carries out. A small section of enterprises operate only in seasons when the raw materials for the enterprise are available or certain services are in demand in the season. Broadly, an enterprise may operate more or less throughout the year or in seasons or intermittently throughout the year and accordingly they are termed as perennial, seasonal and casual enterprises, respectively. These terms have been clearly defined in Section Two of the report. It is in Statement 11 that the distribution of enterprises by the nature of operation of the enterprise is given. About 98% of the total enterprises were perennial that operated throughout the year. The seasonal and casual enterprises together constituted only 1 to 2% of the total enterprises. The distributions in respect of nature of operation by the service enterprises do not differ significantly between rural and urban, or between OAE and establishments.

Statement 11: Percentage distribution of enterprises by nature of operation separately for each enterprise type and sector

3.10 Location of the enterprises: An important feature of the unorganised enterprises is that a large section of the enterprises of this sector do not have any fixed location. They operate as street vendors or as mobile market. On the other hand, many of them, particularly the OAEs, run their enterprises within the household premises. It can be seen from Statement 12 that of all enterprises, 68% run the business at fixed locations either within the household premises or in an outside location. Note that around 3% of the enterprises operated under the sky without any structure but had a fixed location. Moreover, about 32% operated their business without any fixed location. They had the characteristics of street vendors i.e. those who operate on the streets or mobile market. The corresponding percentage was less in the case of establishments (15%) as compared to the OAEs (36%). The percentage distribution of enterprises by their location at the national level is also shown

in Chart 3. The estimates for the States/UTs are given in Statement 13 taking all the types of enterprises together. So far as the enterprises located within the household premises is considered, the proportion was highest in Karnataka (49 %) among the rural areas of major states and in Bihar (31 %) among the urban areas of major states.

3.11 **Non-profit institutions:** The information on whether the service enterprise netted was a Non-Profit Institution (NPI) or not, was collected for the first time during this survey. The definition of NPIs is given in Section Two. The presence of NPI at the national level for the different sectors as well as enterprise type is presented in Statement 14. The NPIs had a negligible presence among the OAEs (less than 1%) and their presence among establishments was 4%. The overall percentage of NPIs was around 1% in the service sector. The corresponding estimates for the States/UTs are given in Statement 15.

rural	0.6	6.0	1.3
urban	0.4	3.0	1.0
rural + urban	0.6	4.3	1.2

3.12. **Maintenance of accounts:** Another feature of the unorganised enterprise is that most of them do not maintain written accounts of goods and services they produce. The information collected on this aspect has been presented in Statement 16 which gives percentage of service enterprises that maintained written accounts. Note that for the purpose of survey an enterprise was considered to have maintained accounts if it had maintained usable books of accounts and made them available to the investigator during canvassing of the schedule. A small proportion (2%) of service sector enterprises reported to have maintained accounts. This proportion was nearly 1% for the OAE, which form a majority of the service enterprises, and 8% for the establishments. The proportion of enterprises maintaining accounts was more in urban areas as compared to the rural areas. The state-wise variations in this regard may be seen in Statement 17.

3.13 Status of registration: Enterprises in the unorganised sector usually do not get themselves registered with the appropriate authorities. The distribution of service enterprises by their status of registration (under/with any Act/Authority) has been given in Statement 18. A good proportion (about 39%) of the total enterprises were registered with some registration agency. The percentage of OAEs registered was 33% whereas it was 68% in the case of establishments. The overall proportion of registered enterprises was higher in urban areas as compared to the rural areas and also, among the establishments than OAEs. State-wise results are given in Statement 28. The percentage of enterprises registered with/under any Act/Authority in the major States is shown in Chart 4 for the rural and urban areas.

3.15 Distribution by type of registration with/under any act/authority: For the enterprises whether they were registered under/with any Act/authority. The percentage of such enterprises registered with any registration agency is given in Statement 21 for each type of industry. Most of the enterprises engaged in '*mechanised road transport*' activity (93%) were registered. Other activities with relatively high incidence of registration were those in '*hotels and restaurants*' (81%), '*communication*' (67%) and '*health and social work*' (63%). On the other hand, only 9% of the enterprises in '*other community social and personal service activities*' reported registration with/under some Act. The prevalence of registration was more among the enterprises in the urban sector and higher among establishments than the OAEs. Overall, the OAEs in '*education*' have the lowest proportion of registrants (about 4%).

Description of NIC activity categories:

hotels – H1; restaurants – H2; Storage and warehouse - I1; mechanized road transport – I2; other transport and related activities - I3; communication - I4; real estate, renting and business activities – K; education – M; health and social work – N; other community social and personal service activities – O.

3.16 Specific problem faced in operation: Information on different types of problems faced by the enterprises in carrying out their day-to-day operation was collected. Provisions were made for recording up to two types of problems faced. Statement 22 gives the percentage of enterprises that faced the specific problem. About 33% of all enterprises did not face any specific problem in their day-to-day operation. 'Competition from other units' (33%) and 'shortage of capital' (23%) were the two main problems faced by the enterprises. The 'competition from other units' was the dominant problem in the urban areas (40%) as compared to the rural areas (28%).

3.17 Working on contract: In many cases, the enterprises in this segment of economy might be working as per the orders from a bigger unit. In such cases certain conditions like on the sale of product, mode of payment, supply of raw material etc. are put by the contractor or master unit. The percentage of enterprises under such contract is given in Statement 23. Only about 2% of the total enterprises in the service sector had undertaken at least some work on contract basis. The percentage seems to be little higher for OAEs than for the establishments. The rural-urban differentials are almost negligible.

Statement 23: Percentage of enterprises working on contract by enterprise type

all-India combined sector	all activities

rural	1.7	0.4	2.1
urban	1.6	0.9	2.4
rural + urban	1.7	0.6	2.2

3.18 Enterprises receiving assistance: Sometimes the enterprises receive some kind of assistance either from the Government or from non-govt. agencies or from individual persons in running their business. Kinds of assistance include loans, subsidies, machines/equipment, training, marketing assistance and procurement of raw materials. Provisions were made in the schedule for recording information on two such kinds of assistances received. The beneficiary enterprises have been analysed by type of assistance received in Statement 24. Only about 13 % of the enterprises had reported as receiving assistance of any kind. About 8 % of enterprises received assistance in the form of loans. Overall, there were no marked rural-urban differentials in the receipt of assistance; the establishments had, however, received more assistance as compared to the OAEs.

3.19 Number of months operated: The distribution of enterprises by number of months of operation during the last 365 days is given in Statement 25. As expected, about 90% of the perennial enterprises had operated for more than 9 months during the last 365 days. About 75% of the seasonal enterprises had operated for 6 months or less during the period. As for the casual enterprises, their distribution over the number of months of their operation was more or less even. However, the enterprises in the urban areas operated for a relatively longer duration than those in the rural areas.

3.20 Other economic activities undertaken: Many of the enterprises in the unorganised sector carry out different activities simultaneously with the main activity and operate them at a low level. Information on the number of economic activities carried out by the entrepreneurs simultaneously with the main activity or at different point of time was collected. These include economic activities such as self employment in agriculture, wage earnings, etc. The distribution of enterprises by number of other economic activities undertaken during the last 365 days is given in Statement 26. An estimated 57% of the enterprises did not undertake any additional activity during the last 365 days. Thus, as high as 43% of the enterprises, undertook 1 or more additional activities. However, a majority of them undertook only 1 additional activity. The percentage was higher for the rural areas than their counterparts in the urban areas. Also, as expected, taking up of additional activities is seen to be more in the case of OAE than establishments.

Statement 26: Percentage distribution of enterprises by number of other economic activities undertaken during the last 365 days, separately for each enterprise type

all-India
combined

3.21 Growth status of the enterprise over last three years: Information was sought from the owners of the enterprises on their impression about the growth of the enterprise over the last three years. A summary of this information on the status of the enterprise over last three years is given in Statement 27. About 17% of the entrepreneurs felt that their business activities have expanded over the three years preceding the date of survey, while about 13% entrepreneurs felt just the reverse i.e. they felt that their business has shrunk over the last three years. Entrepreneurs that felt that their enterprises were stagnant in respect to their growth during the last three years were to the tune of about 54%. The impression of 'stagnation' appears to be more in the case of OAEs than that of the 'establishment'. The proportion of enterprises with expanding growth status (all enterprise types together) for each State/UT is given in Statement 28.

Statement 27: Percentage distribution of enterprises by growth status over the last three years, separately for each enterprise type

** 'all' include the not recorded cases.

3.22 Social group of owner: Information collected on the social group of the owner / partner of the enterprise for the proprietary and partnership enterprises has been summarised in Statement 29. As a whole, about 60% of the proprietary or partnership service sector enterprises were owned by persons belonging to scheduled tribes and castes and other backward classes. This proportion was more in case of OAEs (64%) than establishments (41%). Again, OAEs in the rural sector had a better representation of entrepreneurs from the backward classes.

Appendix B

Coverage, Sample Design & Estimation Procedure

Sample Design and Estimation Procedure

1. Introduction

1.1 The National Sample Survey (NSS) started its fifty-seventh round from 1st July 2001, which continued till June 2002. In this round data on economic and operational characteristics of unorganised enterprises in service sector (excluding trade and finance), besides data on household consumer expenditure and employment-unemployment were collected.

2. Subject Coverage

The 57th round of NSS covered all own account enterprises (OAEs) and establishments of **unorganised** service sector (excluding trade and finance). For the purpose of this round, the **unorganised sector** comprised the following types of enterprises: (a) All the enterprises except units registered under section 2m(i) and 2m(ii) of Factories act, 1948 and Bidi and Cigar workers (condition of employment) act 1966 and (b) All enterprises except those run by Government (Central, State, Local bodies)/Public Sector Enterprises.

2.1 Further break up of the coverage is given below in order to facilitate the correspondences with the sub-strata and Broad Activity Groups (BAGs) referred to in the later part of this appendix:

BAG	activity	NIC'98 code
1	storage & warehousing	6302
2	hotels	551
3	post & telecommunications	64
4	mechanised road transport	6021, 60221, 60231
5	real estate, renting and business activities	70-74
6	health and social work	85
7	restaurants	552
8	education	80
9	other community, social and personal service activities & other transport	601, 60222, 60232, 61, 6301, 6303, 6304, 6309, 90, 911, 92, 93

In addition, the annual consumer expenditure enquiry including some key characteristics of employment-unemployment was also carried out on a sample of four households in each sample FSU.

2.2 Geographical coverage: The survey covered the whole of the Indian Union *except* (i) Leh and Kargil districts of Jammu & Kashmir, (ii) interior villages of Nagaland situated beyond five kilometres of the bus route and (iii) villages in Andaman and Nicobar Islands which remain inaccessible throughout

the year and (iv) 202 villages and 11 UFS blocks where EC '98 work could not be conducted.

2.3 Period of survey and work programme: The survey period of this round was divided into four sub-rounds of three months duration each as follows:

sub-round 1:	July-September 2001
sub-round 2:	October-December 2001
sub-round 3:	January-March 2002
sub-round 4:	April-June 2002

As far as possible, equal number of sample FSUs were allotted for survey in each of the four sub-rounds to ensure uniform spread of sample FSUs over the entire round. Attempt was made to cover each such FSU during the sub-round to which it was allotted. *Because of the arduous field conditions, this sub round restriction may not apply in Andaman and Nicobar Islands, Lakshadweep, rural areas of Arunachal Pradesh and Nagaland.*

2.4 Schedules of enquiry: The following table lists the schedules of enquiry canvassed in the 57th round:

Schedule 0.0;	List of Households and Non-agricultural Enterprises
Schedule 2.345:	Unorganised Services (excluding trade and finance)
Schedule 1.0:	Household Consumer Expenditure

3. Sample Design

3.1 A stratified multi-stage design was followed for this survey. The first stage units (FSUs) were villages (Panchayat wards for Kerala) / UFS blocks (*wards for 61 towns of Karnataka where UFS blocks were not used during EC '98 work [hereinafter referred to as 61 towns of Karnataka]*) and the ultimate stage units (USUs) were *enterprises* and *households*. For larger FSUs requiring hamlet-group (hg)/sub-block (sb) formation, another stage was the selection of hg's/sb's.

3.2 *Sampling frame:* List of Economic Census 1998 (EC '98) villages (Panchayat wards for Kerala) / UFS blocks (wards for 61 towns of Karnataka) was taken as the sampling frame for FSUs.

3.3 *Formation of strata:*

- Special stratum:** One *special* stratum for Rural and Urban sector each was formed at the State / UT level consisting of all the FSUs of the State / UT (i) having at least one big unit of an activity under coverage on the basis of its number of workers or (ii) having large number of workers engaged in the same activity as in (i). The cut-off points for identifying these FSUs are given below:

activity	at least one big unit in an FSU with no. of workers	total number of workers in an FSU
1. storage & warehousing	200	300
2. hotels	200	350
3. post & telecommunications	200	250
4. mechanized road transport	250	400
5. real estate, renting and business activities	300	750
6. health and social work	500	550
7. restaurants	300	350
8. education	300	550
9. other community, social and personal service activities & other transport	400	700

All the FSUs of the special strata were surveyed. The stratum number for special stratum was given as 9 for each State or UT.

b) **General strata** (hereafter, stratum will refer to **general stratum** unless otherwise mentioned) was formed from the remaining FSUs in the following manner.

Rural: In the rural areas each NSS region was treated as a stratum.

Urban: In the urban areas, strata were formed within an NSS region as under:

- (i) towns with population (P) less than or equal to 10 lakhs and
- (ii) each town with $P > 10$ lakhs.

as per Population Census 1991.

However, at the selection stage all towns of a NSS region with $P > 10$ lakhs were inadvertently clubbed together to form a single stratum and due to this some cities viz. Ludhiana, Lucknow, Kanpur, Mumbai and Kalyan were not treated as separate strata. Further, while classifying the towns, Agra and Madurai were treated as cities with $P > 10$ lakhs, although P was less than 10 lakhs for these cities as per 1991 census.

3.4 Sub-stratification: After leaving out the FSUs constituting the special strata at State/UT level, the *remaining* FSUs of a stratum were grouped into a number of sub-strata as described below:

sub-stratum 1: all FSUs having at least one establishment (i.e. enterprise with at least one hired worker) of Storage and Warehousing.

sub-stratum 2: all FSUs, excluding those in the already formed sub-stratum 1, having at least one establishment of Hotel.

sub-stratum 3: all FSUs, excluding those in the already formed sub-strata, having at least one establishment of Post and Telecommunications

- sub-stratum 4: all FSUs, excluding those in the already formed sub-strata, having at least one establishment of Mechanized road transport .
- sub-stratum 5: all FSUs, excluding those in the already formed sub-strata, having at least one establishment of Real Estate, Renting & Business Activities (i.e. Tabulation category K of NIC '98).
- sub-stratum 6: all FSUs, excluding those in the already formed sub-strata, having at least one establishment of Health & Social Work (i.e. Tabulation category N of NIC '98).
- sub-stratum 7: all FSUs, excluding those in the already formed sub-strata, having at least one establishment of Restaurant.
- sub-stratum 8: all FSUs, excluding those in the already formed sub-strata, having at least one establishment of Education (i.e. Tabulation category M of NIC '98).
- sub-stratum 9: all FSUs, excluding those in the already formed sub-strata, having at least one establishment of Other Community, Social and Personal Service Activities (i.e. Tabulation category O of NIC '98) & other transport.
- sub-stratum 10: all FSUs, excluding those in the already formed sub-strata, having at least one own account enterprise (OAE) i.e. enterprise with no hired worker in any one of the Tabulation categories H, I, K, M, N, O of NIC '98.
- sub-stratum 11: rest of FSUs of the stratum.

Although there was no sub-stratification in case of special strata, a sub-stratum number (between 1 and 9) was assigned for operational convenience for the FSUs of stratum 9 also.

3.5 Total sample size (FSUs):

A total of 15869 FSUs were allocated for survey for the central sample in this round. The corresponding figure for state sample was 17291. All states and UTs (except A & N Islands, Dadra & Nagar Haveli and Lakshadweep) participated at least on an equal matching basis. The distribution of FSUs allotted in the central sample and the number of sample enterprises captured in the survey are given in Statement 0 and 1 of Section One of this report for different states/UTs.

3.6 Allocation of total sample to States and UTs:

The total sample FSUs allocated to the States and UTs was broadly in proportion to number of workers in unorganised sector enterprises engaged in the activities under coverage of NSS 57th round as per EC '98. (Hereafter, "**workers**" will mean **workers in unorganised sector enterprises engaged in the activities under coverage of NSS 57th round as per EC '98**). This was done according to the availability of investigators ensuring more or less uniform workload.

3.7 Allocation of State/ UT level sample to Rural and Urban sectors:

State/UT level sample size was allocated to rural and urban sectors in proportion to the total number of workers.

3.8 Allocation of Rural/Urban sector level sample to strata/ sub-strata:

Rural/Urban allocation was further allocated to the various strata in proportion to the total number of workers. The allocation among the constituent sub-strata of a stratum was also done in proportion to the total number of workers with weights 4 for sub-stratum 1; 3 for sub-strata 2, 4, 5, 7 and 9; 2 for sub-strata 3 & 6 and 1 for sub-strata 8,10 & 11. For sub-stratum 11, size is taken as 1 for each FSU. (The weights for allocation of sample FSUs among sub-strata in a stratum were taken to be inversely proportional to the total number of FSUs in those sub-strata).

As far as possible, a minimum allocation of 4 FSUs was made for a sub-stratum provided there were at least 4 FSUs in the sub-stratum. In case there were less than 4 FSUs in a sub-stratum, all the FSUs were allocated and surveyed.

Wherever possible, allocation to sub-strata was adjusted to a multiple of 4 so that it became possible to allocate equal as well as even number of FSUs to each sub-stratum in a semi-round (six monthly) to get semi-round wise estimates.

3.9 Selection of FSUs:

FSUs were selected from sub-strata 1 - 10 by circular systematic sampling (CSS) with probability proportional to size (PPS), size being the number of workers in the FSU. For sub-stratum 11, FSUs were selected by CSS with equal probability.

The samples were drawn from each sub-stratum in the form of two independent equal sub-samples. However, for sub-strata 1-10, a little modification in the usual procedure for CSS PPS scheme was made at the selection stage so that repetition of FSU within a sub-sample or between sub-samples could be avoided. The modification was as follows:

In any cycle of CSS, if the selected FSU was found to be already present in the sample (either in the first or in the second sub-sample), it was skipped and next cycle was executed by adding the sampling interval in order to select a fresh FSU. As a result, all the selected FSUs in the two sub-samples taken together were distinct for the sub-stratum. In some sub-strata where there were some big-sized FSUs, the procedure did not result in selection of required number of distinct FSUs because a situation was encountered where the sample FSUs were repeated again and again even after adding the sampling interval. In a few such cases, where fresh FSU was not found even after 20 cycles, the first unselected FSU obtained by scanning the sub-stratum from the top of the frame was selected. The selection of samples for 1st sub-sample was completed first and then the 2nd sub-sample FSUs were drawn. *It may be noted that in view of the above modification, the two sub-samples are no more independent.*

In case of stratum 9 and also in cases of the sub-strata having total number of FSUs as 1 or 3, all the FSUs were allocated to sub-sample 1 only. Wherever States and UTs participated on equal matching basis, a combined sample of state and central sample at the sub-stratum level was drawn. Odd numbers were assigned to central sample and even numbers to state sample. In case of unequal matching, central and state samples were selected independently although resulting in repetition of central and state sample in some cases.

3.10 Selection of USUs within the selected FSU:

3.10.1 *Formation of segment 9 within FSU:* After determining the boundaries of the sample FSU, all big non-agricultural enterprises having 200 or more workers in the entire FSU and having operated at least one day during last 365 days preceding the day of survey (hereinafter to be called as big enterprises for brevity) were listed. All the listed big enterprises constituted segment 9 of the selected FSU. All big enterprises under coverage listed in segment 9 were surveyed separately in addition to required number of smaller enterprises under coverage in the other segments of the selected FSU as per normal procedure.

3.10.2 *Formation of hamlet-groups/sub-blocks:* Having constituted segment 9 as stated above, hamlet-groups/sub-blocks (hg's / sb's) were formed in large FSUs by considering the approximate population (P) or approximate number of non-agricultural enterprises (E). Number of hg's/sb's formed as per the two criteria is indicated below:

value of P	no. of hg's/sb's to be formed in the FSU as per population criterion	value of E	no. of hg's/sb's to be formed in the FSU as per enterprise criterion
0 - 1200	1 @	0 - 120	1 @
1201 - 1600	4	121 - 160	4
1601 - 2000	5	161 - 200	5
2001-2400	6	201 - 240	6
2401 -2800	7	241 - 280	7
	(and so on)		(and so on)

@ no. of hg's/sb's = '1' means the whole FSU is to be considered for listing

For rural areas of Himachal Pradesh, Sikkim and Poonch, Rajouri, Udhampur and Doda districts of Jammu & Kashmir, number of hg's formed in the village as per population criterion was: 1 for $P \leq 600$, 4 for $601 \leq P \leq 800$, 5 for $801 \leq P \leq 1000$, 6 for $1001 \leq P \leq 1200$ and so on. For enterprise criterion, procedure was same for the above areas.

The number (D) of hamlet-groups (hg's)/ sub-blocks (sb's) **actually** formed in the sample FSU was equal to the **higher** of the two values as per population and enterprise criteria.

In the case of 61 towns of Karnataka where wards were the FSUs, there was departure from the above procedure. Here D was taken as the number of UFS blocks within the selected ward. Only two out of the D number of UFS blocks within the sample FSU were to be selected: one satisfying some specific criterion as described in para 3.10.3 and the other by simple random sampling (SRS) from the remaining constituent UFS blocks. The UFS block so selected with SRS was however divided into a number (D') of sub-blocks if it satisfied the criterion of sub-block formation. Two sub-blocks were selected from D' sub-blocks. If there were only two blocks, one satisfying some specific criterion was selected and the other automatically. If the latter block satisfied the criterion of sb formation it was divided into a number (say, D') of sub-blocks and two sub-blocks were selected from there. If there was only one block, this was selected automatically.

In case hg's/sb's were formed in the sample FSU, the same was always done by more or less **equalising** the population

3.10.3 *Formation of segments 1 and 2:* After formation of hg / sb in the large FSUs, three hg's / sb's were selected for survey according to the procedure given below:

Case I: For FSUs belonging to sub-strata 1to9: The hg/sb having maximum number of establishments or OAEs belonging to the sub-stratum specific activity (e.g. storage & warehousing activity for sub-stratum 1, hotel activity for sub-stratum 2 and so on) in the FSU was selected with certainty (i.e. with probability 1) and designated as *segment 1*. If in a particular FSU the sub-stratum specific establishments/OAEs were not available, then formation of segment 1 was decided on the basis of maximum number of establishments or OAEs belonging to activities specified in sequential order of other sub-strata. To begin with, the next higher numbered sub-stratum was considered. If establishments or OAEs belonging to the activity specific for this sub-stratum were available in the FSU under consideration, then segment 1 was formed on the basis of these units. But if establishments/OAEs of that activity were also not available, then those belonging to the specific activity of the next higher numbered sub-stratum were considered and so on till sub-stratum 9 was reached. If sub-stratum 9 specific activity was also not available, then the exercise was done with sub-stratum 1, sub-stratum 2 and so on. If no establishments/OAEs belonging to any of the activities 1 to 9 under survey coverage was available in the FSU, then hg/sb with maximum percentage share of population was selected with certainty and marked as segment 1.

Case II: For FSUs belonging to sub-strata 10 & 11: The hg/sb having maximum number of enterprises was selected with certainty and designated as *segment 1*. If no establishment/OAE belonging to any of the activities under survey coverage was available in the FSU, then hg/sb with maximum percentage share of population was selected for survey with certainty and marked as segment 1.

Two more hg's/sb's were to be selected for survey from the remaining (D - 1) hg's/sb's of the sample FSU with equal probability following the method of circular systematic sampling. These two hg's/sb's together constituted *segment 2*.

For selected wards of 61 towns of Karnataka, constituent UFS blocks were listed first and then two UFS blocks were selected: one having maximum number of sub-stratum specific establishments or OAEs as per the procedure described above was selected with probability 1 and labelled as segment 1. Another UFS block was selected with SRS out of the remaining (D-1) blocks and labelled as segment 2 if no sub-block formation was necessary in that block according to the criteria for sub-block formation. If the UFS block selected with SRS was large, then it was divided into D' number of sub-blocks as per the procedure of sub-block formation. Then two sub-blocks were selected by circular systematic sampling with equal probability. These two together constituted segment 2. If there were only two UFS blocks, one having maximum number of sub-stratum specific establishments or OAEs was selected with probability 1 and labelled as segment 1 and the other was automatically selected and labelled as

segment 2. If the latter block satisfied the criterion of sb formation it was divided into a number (D) of sub-blocks and two sub-blocks were selected there from by circular systematic sampling with equal probability to form segment 2. If there was only one block, that was selected with probability 1 and labelled as segment 1.

FSUs not undergoing hg/sb formation were identified as segment 1 for the purpose of processing.

However segment 1 excluded enterprises belonging to segment 9. Formation of segment 9 was altogether different from that of segments 1 and 2.

3.10.4 Stratification of enterprises: In each segment of the sample FSU, *eligible enterprises under coverage* (hereinafter to be called enterprises only for brevity) were divided into nine Broad Activity Groups (BAGs) as under:

BAG 1: Storage and Warehousing

BAG 2: Hotel

BAG 3: Post and Telecommunications

BAG 4: Mechanized Road Transport

BAG 5: Real Estate, Renting & Business Activities (i.e. Tabulation category

K of NIC '98)

BAG 6: Health & Social Work (i.e. Tabulation category N of NIC '98)

BAG 7: Restaurant

BAG 8: Education (i.e. Tabulation category M of NIC '98)

BAG 9: Other Community, Social and Personal Service Activities (i.e. Tabulation category O of NIC '98) and other transport

Under each BAG, the enterprises were divided again into two types viz. 'OAEs' and 'establishments'. As there were two segments (excluding segment 9 where all enterprises were surveyed), two enterprise types and nine BAGs, there was a maximum of 36 combinations (segment x BAG x enterprise type) in all for FSUs with hg/sb formation. For FSUs without hg/sb formation there was, however, a maximum of 18 combinations (BAG x enterprise type).

3.10.5 Number of enterprises selected: For FSUs with hg/sb formation there were 36 combinations (segment x BAG x enterprise type) and for FSUs without hg/sb formation there were 18 combinations (BAG x enterprise type). One enterprise was allocated to each combination for the FSUs with hg/sb formation and two enterprises were allocated to each combination for the FSUs without hg/sb formation. In a sample FSU, a maximum of 18 OAEs and 18 Establishments (i.e. a maximum of 36 enterprises) were surveyed from the segments 1 and 2 together subject to the condition that a maximum of 8 enterprises were surveyed from any particular combination. In addition, all enterprises were surveyed from segment 9.

3.10.6 Selection of enterprises: Enterprises were selected from each combination with SRSWOR for detail enquiry.

4. Estimation Procedure

4.1 Notations:

s = subscript for s -th stratum ($s = 9$ for special stratum and $s \neq 9$ for general strata)

t = subscript for t -th sub-stratum of a general stratum ($t = 1, 2, \dots, 11$)

m = subscript for sub-sample ($m = 1, 2$)

i = subscript for i -th FSU [village (panchayat ward) / block (ward)]

u = subscript for a segment ($u = 1, 2$ or 9)

j = subscript for j -th Broad Activity Group (BAG) ($j = 1, 2, \dots, 9$)

k = subscript for k -th enterprise type ($k = 1, 2$)

l = subscript for l -th sample enterprise under a particular BAG X enterprise type for Sch 2.345 and l -th sample household for Sch 1.0

D = total number of hg's/sb's formed in the sample village (panchayat ward)/block and equal to number of blocks in the selected ward in case 61 towns of Karnataka

D' = total number of sb's formed in the randomly selected block of sample wards belonging to 61 towns of Karnataka

D^* = $(D - 1)$ if the FSU belongs to 61 towns of Karnataka and $D' = 1$,

= $(D - 1) \times (D' / 2)$ if the FSU belongs to 61 towns of Karnataka and $D' > 1$ and

= $(D - 1) / 2$ for other cases

N = total number of FSUs in special stratum/stratum/sub-stratum

Z = total size of a general stratum/sub-stratum (= sum of sizes for all the FSUs of a general stratum/sub-stratum)

z = size of sample village/block/ward used for selection.

n' = number of sample village/blocks allotted for a particular sub-sample.

n = number of surveyed (including zero cases but excluding casualty) sample village/block/ward belonging to a general stratum/sub-stratum for a particular sub-sample.

p = inclusion probability for the sample FSUs of sub-sample 1

p' = inclusion probability for the sample FSUs of sub-sample 2 given sub-sample 1

E = total number of enterprises listed for a particular BAG \times enterprise type in a segment of a sample FSU

e = number of enterprises surveyed for a particular BAG \times enterprise type in a segment of a sample FSU

x, y = observed value of characteristics x, y under estimation

\hat{X}, \hat{Y} = estimate of population total X, Y for the characteristics x, y

Under the above symbols,

$y_{stmiujkl}$ = observed value of the characteristic y for the l -th enterprise of the k -th type in the j -th BAG in the u -th segment ($u = 1, 2$ or 9) of the i -th FSU belonging to the m -th sub-sample for the t -th sub-stratum of the s -th stratum.

However, for ease of understanding, we have suppressed a few symbols in following paragraphs where they are obvious.

4.2 Formulae for estimation of aggregates for a particular sub-sample and stratum/sub-stratum in rural/urban sector:

Schedule 2.345:

(a) Estimation formula for stratum 9:

For an enterprise selected in a particular BAG \times Enterprise type:

$$\hat{Y} = \sum_{i=1}^N \left[\sum_{l=1}^{E_{i9}} y_{i9l} + \frac{E_{i1}}{e_{i1}} \sum_{l=1}^{e_{i1}} y_{i1l} + D_i^* \times \frac{E_{i2}}{e_{i2}} \sum_{l=1}^{e_{i2}} y_{i2l} \right]$$

(b) Estimation formulae for general strata:

(i) For sub-stratum 1 to10:

For enterprises selected in a particular BAG \times Enterprise type:

1) for sub-sample 1:

$$\hat{Y}_m = \sum_{i=1}^{Nm} \frac{1}{p_{mi}} \left[\sum_{l=1}^{E_{i9}} y_{i9l} + \frac{E_{i1}}{e_{i1}} \sum_{l=1}^{e_{i1}} y_{i1l} + D_i^* \times \frac{E_{i2}}{e_{i2}} \sum_{l=1}^{e_{i2}} y_{i2l} \right], \quad (m = 1)$$

2) for sub-sample 2:

$$\hat{Y}_m = A + B, \quad (m = 2)$$

where

$$A = \sum_{i=1}^{Nm} \left[\sum_{l=1}^{E_{i9}} y_{i9l} + \frac{E_{i1}}{e_{i1}} \sum_{l=1}^{e_{i1}} y_{i1l} + D_i^* \times \frac{E_{i2}}{e_{i2}} \sum_{l=1}^{e_{i2}} y_{i2l} \right], \quad (m = 1)$$

and

$$B = \sum_{i=1}^{Nm} \frac{1}{p'_{mi}} \left[\sum_{l=1}^{E_{i9}} y_{i9l} + \frac{E_{i1}}{e_{i1}} \sum_{l=1}^{e_{i1}} y_{i1l} + D_i^* \times \frac{E_{i2}}{e_{i2}} \sum_{l=1}^{e_{i2}} y_{i2l} \right], \quad (m = 2)$$

(ii) For sub-stratum 11:

For enterprises selected in a particular BAG \times Enterprise type:

$$\hat{Y}_m = \frac{N}{n_m} \sum_{i=1}^{n_m} \left[\sum_{l=1}^{E_{i9}} y_{i9l} + \frac{E_{i1}}{e_{i1}} \sum_{l=1}^{e_{i1}} y_{i1l} + D_i^* \times \frac{E_{i2}}{e_{i2}} \sum_{l=1}^{e_{i2}} y_{i2l} \right]$$

(c) For the s^{th} stratum:

for j^{th} BAG and k^{th} enterprise type:

$$\hat{Y}_{sjk} = \sum_{t=1}^{11} \hat{Y}_{stjk}$$

(d) Estimate for j^{th} BAG for the s^{th} stratum:

$$\hat{Y}_{sj} = \sum_{k=1}^2 \hat{Y}_{sjk}$$

(e) Estimate for k^{th} enterprise type for the s^{th} stratum:

$$\hat{Y}_{sk} = \sum_{j=1}^9 \hat{Y}_{sjk}$$

(f) Estimate for all BAGs and all enterprise type for the s^{th} stratum:

$$\hat{Y}_s = \sum_{j=1}^9 \sum_{k=1}^2 \hat{Y}_{sjk}$$

4.3 Overall estimate for aggregates:

Overall estimate for aggregates for a sub-stratum of a general stratum (denoted by \hat{Y}_{st}) based on two sub-samples was obtained as

$$\hat{Y}_{st} = \frac{1}{2} \sum_{m=1}^2 \hat{Y}_{stm}$$

and that for a general stratum (denoted by \hat{Y}_s) was

$$\hat{Y}_s = \sum_{t=1}^{11} \hat{Y}_{st}$$

4.4 Overall estimate of aggregates at Region/State/UT/all-India level:

The overall estimate \hat{Y} at the Region level was obtained by summing the stratum estimates \hat{Y}_s over all strata ($s \neq 9$) belonging to the Region and the estimates obtained from the FSUs of the stratum 9 belonging to that region.

The overall estimate \hat{Y} at the State/ UT/ all-India level was obtained by summing the stratum estimates \hat{Y}_s over all strata belonging to the State/ UT/ all-India i.e.

$\hat{Y} = \hat{Y}_9 + \sum_s \hat{Y}_s$ where \hat{Y}_9 was the estimate of the aggregate from stratum 9.

4.5 Estimates of ratios:

Let \hat{Y} and \hat{X} be the overall estimate of the aggregates Y and X for two characteristics y and x respectively at the Region/State/UT/all-India level.

Then the combined ratio estimate (\hat{R}) of the ratio ($R = \frac{Y}{X}$) was obtained as

$$\hat{R} = \frac{\hat{Y}}{\hat{X}}$$

4.6 Semi-round estimates: Semi-round estimates of a characteristic may be obtained from allotted FSUs of that semi-round. Since for the sub-strata with $N_s = 1$ FSUs were allotted to semi-round 1 only, estimates for semi-round 2 for these sub-strata were the same as those of semi-round 1.

However, for stratum 9, all FSUs were surveyed and distribution of these FSUs over the two semi-rounds were made keeping in view the workload of the field staff over sub-rounds/semi-rounds. Thus, in neither of the semi-rounds, stratum 9 was surveyed completely. The estimate of the aggregate for stratum 9 for semi-round 1 was, therefore, obtained as $\hat{Y}_9 \times \frac{N}{n}$ where \hat{Y}_9 was the estimate obtained from the FSUs of the semi-round 1, N is the total number of FSUs in the frame of stratum 9 and n was the number of FSUs surveyed in stratum 9 in semi-round 1. At the end of semi-round 2, complete stratum 9 estimates was available and therefore no adjustments was necessary. However, if there were still some FSUs not surveyed, then adjustment was made by multiplying with N/n as in case of semi round 1.
