

Report No. 525(62/2.2/2)

**Unorganised Manufacturing Sector In India
- Employment, Assets and Borrowings**

**NSS 62nd Round
(July 2005-June 2006)**

सत्यमेव जयते

**National Sample Survey Organisation
Ministry of Statistics and Programme Implementation
Government of India
January 2008**

PREFACE

National Sample Survey Organisation (NSSO) conducted an integrated survey of households and unorganised manufacturing enterprises in the 62nd round of NSS during July 2005 - June 2006. The subjects covered were household consumer expenditure, employment and unemployment and certain characteristics of unorganised manufacturing enterprises. The present report is the second one in a series of three reports being brought out based on the survey on unorganised manufacturing enterprises. The first report contained information on various operational characteristics of enterprises like location of enterprise, nature of operation, maintenance of accounts etc. in detail. The present report provides information on employment, assets & borrowings of unorganised manufacturing enterprises at all India level for different industry groups and at the level of States / UTs for all the industry groups taken together.

Chapter One of the report is introductory. Chapter Two deals with concepts and definitions. Chapter Three of the report gives the summary of the findings. Detailed tables based on the survey are given in Appendix A. The sample design and estimation procedure are given in Appendix B. Facsimile of schedule canvassed during the survey is given in Appendix C.

Survey Design and Research Division of NSSO developed the sample design and survey instruments and also prepared the report. The Field Operations Division of NSSO carried out the fieldwork and the Data Processing Division of NSSO handled the data processing and tabulation work. The Coordination and Publication Division of NSSO coordinated various activities pertaining to the survey.

I am grateful to the Chairman and Members of the then Governing Council of NSSO and also the Chairman and Members of the Steering Committee and Working Group for the NSS 62nd round for their technical guidance at various stages of survey work. I convey my special thanks to Chairman and members of the National Statistical Commission and also to the Editor of the report for their valuable advice in finalizing the report. I am grateful to all Officers and Staff Members of this Ministry who were associated with the survey for their contribution. Special thanks are also due to the informants who provided the requisite information during data collection in the survey.

I hope this report will be useful to planners, policy makers and researchers. Comments and suggestions for improvement will be most welcome.

New Delhi
January, 2008

(S.K.Sinha)
Director General & Chief Executive Officer
National Sample Survey Organisation

Appendix C	Facsimile of Schedule 2.2	C 1- C 8

Appendix A

Table no.	Table description	Page
1	Number of first stage units allotted and surveyed by State/UT	A 1
2	Number of workers engaged in enterprises by nature of employment and gender for each industry and for each States/UTs	A 2-A 25
3	Number of workers by type of worker and gender for each industry and for each States/UTs	A 26-A 49
4	Number of workers by enterprise type for each industry and for each States/UTs	A 50-A 64
5	Annual emoluments (in Rs.) per hired worker by enterprise type for each industry and for each States/UTs	A 65-A 70
6	Market value (in Rs) of fixed assets as on date of survey per enterprise (owned and hired) by type of asset for each industry and for each States/UTs	A 71-A 118
7	Net additions to fixed assets during the reference year (in Rs) and annual rent payable per enterprise by type of asset for each industry and for each States/UTs	A 119-A 154
8	Fixed assets and outstanding loans per enterprise (in Rs.) as on date of survey for each industry and for each States/UTs	A 155-A 178
9	Outstanding loans on the last date of the reference year (in Rs.) and annual interest payable per enterprise (in Rs.) by source agency of loan for each industry and for each States/UTs	A 179-A 226

भारत में असंगठित विनिर्माण क्षेत्रक - रोजगार, परिसम्पत्तियां
और ऋण (जुलाई 2005 - जून 2006)

मुख्य परिणाम

(यह सर्वेक्षण 4798 ग्रामों और 5125 नगरीय खंडों में किया गया। समस्त भारत में कुल मिलाकर 82897 उद्यमों का सर्वेक्षण किया गया।)

- यह आकलित किया गया है कि 2005-06 के दौरान असंगठित विनिर्माण उद्यमों में कुल 36442799 (ग्रामीण-23458286; नगरीय 12984514) कामगार कार्यरत थे।
- भारत में असंगठित विनिर्माण उद्यमों के कामगारों की आकलित संख्या में से पश्चिम बंगाल का हिस्सा (15%) सर्वोच्च था।
- किराये के कामगार कुल कामगारों का 24% बनाते थे।
- कुल कामगारों का लगभग 82% पूर्णकालिक कामगार थे।
- कुल कामगारों का लगभग 38% महिला कामगार थे।
- असंगठित विनिर्माण उद्यमों में सभी कार्यरत स्वामियों में से लगभग 39% महिलायें थीं।
- राज्य स्तर पर, मणिपुर के महिला कामगारों का प्रतिशत (74.4%) सर्वोच्च था।
- स्वामित्वाधीन अचल परिसम्पत्तियों का मूल्य रु. 58166 प्रति उद्यम पाया गया।
- अचल परिसम्पत्तियों (स्वामित्वाधीन+किराये की) का मूल्य रु. 83780 प्रति उद्यम पाया गया।
- स्वामित्वाधीन कुल अचल परिसम्पत्तियों में 'भूमि और भवन' का हिस्सा (70%) प्रमुख था।
- किराये की कुल अचल परिसम्पत्तियों में 'भूमि और भवन' का हिस्सा (98%) प्रमुख था।
- 'भूमि और भवन' के अलावे, स्वामित्वाधीन अचल परिसम्पत्तियों में अगला महत्वपूर्ण हिस्सा 'संयंत्र और मशीनरी' (21%) का था।
- बकाये ऋण का मूल्य रु. 12548 प्रति उद्यम था।
- 2005-06 के दौरान असंगठित विनिर्माण उद्यमों को ऋण देने वालों में केन्द्रीय और राज्य स्तरीय मियादी ऋणदायी संस्था, बैंक और अन्य सोसाइटियों का प्रतिशत (49%) सर्वोच्च था।
- ऋण देने वाली सभी एजेंसियों में बकाये ऋण के प्रतिशत के रूप में ब्याज साहूकारों के लिए उच्चतम (27%) था।

**Unorganised manufacturing sector in India- Employment, Assets and Borrowings
(July 2005-June 2006)
Highlights**

(The survey was conducted in 4798 villages and 5125 urban blocks. A total of 82897 enterprises were surveyed all over India.)

- A total of 36442799(rural-23458286; urban-12984514) workers were estimated to be working in unorganised manufacturing enterprises during 2005-06.
- West Bengal had the highest share (15%) of estimated number of workers of unorganised manufacturing enterprises in India.
- Hired workers constituted 24% of total workers.
- About 82% of total workers were full-time workers.
- About 38% of total workers were female workers.
- About 39% of all working owners in unorganised manufacturing enterprises were females.
- At the state level, Manipur had the highest percentage of (74.4%) of female workers.
- Per enterprise value of fixed assets owned is Rs.58166.
- Per enterprise value of fixed assets (owned+ hired) is Rs.83780.
- 'Land & Building' had the dominant (70%) share of total fixed assets owned.
- 'Land & Building' had the dominant (98%) share of total fixed assets hired.
- Apart from 'land and building', 'plant and machinery' (21%) had the next significant share in the total fixed assets owned.
- Per enterprise value of outstanding loan is Rs.12548.
- Central and state level term lending institution, banks and other societies provided the highest percentage (49%) of loans to unorganised manufacturing enterprises during 2005-06.
- Interest as a percentage of outstanding loan was the highest (27%) for moneylenders among all agencies providing loan.

Chapter One

Introduction

1.1 Brief history

1.1.1 An all-India survey on unorganised manufacturing enterprises was carried out by the National Sample Survey Organisation (NSSO) as a part of the 62nd round of National Sample Survey (NSS) during July 2005 – June 2006. The other subjects of enquiry, which formed part of this round, were annual surveys on household consumer expenditure and employment-unemployment.

1.1.2 Manufacturing sector is one of the important sectors of industry in the Indian economy. As per the latest available National Accounts Statistics¹, during 2006-07, the manufacturing sector had a share of about 16% in the GDP at factor cost. For the purpose of data collection, manufacturing sector has been broadly sub-divided into two categories i.e. organised and unorganised. While data for organised manufacturing sector are collected through Annual Survey of Industries (ASI), the same for unorganised manufacturing sector are collected periodically through sample surveys as follow-up surveys of Economic Censuses (EC). The unorganised manufacturing sector has roughly about one-third share in the total contribution by the manufacturing sector in the GDP.

1.1.3 Recognizing the importance of the unorganised manufacturing sector in terms of its share in GDP as well as in total employment, NSS has taken up this subject in many of its rounds. That way collection of data on unorganised manufacture has a long history in the NSS. In fact, the very first round of NSS had small-scale manufacturing and handicrafts as one of its subjects of enquiry. Thereafter, data on small-scale manufacture were collected also in the NSS rounds 3-10, 14, 23 and 29. These surveys used the list of villages from Population Census and list of census enumeration blocks, or lists of Urban Frame Survey (UFS) blocks of NSSO subject to their availability, as the sampling frame for selection of villages / urban blocks.

1.1.4 A review of the surveys conducted by NSSO in the initial rounds mentioned above indicated that a better sampling frame was necessary to generate more accurate statistics of the unorganised sector. The need for auxiliary information on areas of concentration of enterprises for stratification purpose was strongly felt for developing more efficient sampling designs. This demand ultimately culminated in the conduct of periodic Economic Censuses (EC), which provided the frame for the follow-up surveys on non-agricultural enterprises including those engaged in unorganised manufacturing.

1.1.5 With the launching of the EC in 1977 (*five ECs have been conducted so far*), the follow-up surveys of EC on unorganised manufacturing generally used the village and block level information on number of enterprises/workers as per the EC for selection of villages and urban blocks in the follow-up surveys. The approach of data collection from

¹ Press Note, 31st May 2007, Central Statistical Organisation

enterprises was also changed from the 'household approach' used earlier (i.e. prior to the launching of EC) to the 'site approach' whenever such sites existed. So far NSS has conducted six follow-up surveys of EC through rounds 33rd (1978-79), 40th (1984-85), 45th (1989-90), 51st (1994-95), 56th (2000-01), and 62nd (2005-06) with unorganised manufacture as the main subject of enquiry. In the 62nd round of NSS, area frame thrown up by the latest EC (1998) was however used only partially because the frame was considered to be old. However, for 27 cities having a population of one million or more (as per Census 2001) which are likely to have a substantial share in the total number of unorganised manufacturing enterprises in the country, a decision was taken to make use of the list of urban blocks giving count of number of enterprises/workers at the block level as per EC 1998 as the sampling frame for stratification and selection of urban blocks. For the remaining towns/cities, latest lists of UFS blocks were used as the sampling frame². In case of rural areas, list of villages (or *panchayat wards* in case of Kerala) of Census 2001 served as the sampling frame for selection of villages as the first-stage units (FSUs).

1.2 Scope of the survey and sample design in brief

1.2.1 The term 'unorganised manufacturing' under the coverage of 62nd round basically referred to all manufacturing enterprises, which were not under the coverage of ASI. All government and public sector undertakings were also outside the coverage of the survey. In terms of National Industrial Classification (NIC) 2004 codes, the 62nd round survey on unorganised manufacture covered the NIC 2-digit codes 15-37. In addition, enterprises engaged in cotton ginning, cleaning and baling (NIC 2004 code 01405) were also covered under the survey (see *Table 0 at the end of this chapter for the NIC codes under coverage along with their descriptions*). It is to be noted that only those manufacturing enterprises, which operated for at least 30 days (15 days for seasonal enterprises) during the last 365 days preceding the date of survey, were eligible for survey.

1.2.2 The survey covered the whole of the Indian Union except (i) Leh and Kargil districts of Jammu & Kashmir, (ii) interior village of Nagaland situated beyond five kilometres of bus route and (iii) villages of Andaman and Nicobar Islands which remain inaccessible throughout the year. All the sample FSUs of the districts Poonch and Rajouri of the state of Jammu and Kashmir became casualty. Thus, the estimates for Jammu and Kashmir as well as for all-India do not include these areas.

1.2.3 As stated earlier, the fieldwork for the 62nd round was carried out during July 2005 to June 2006. The entire survey period was divided into four sub-rounds of three months each. In each of these sub-rounds, equal number of sample villages/urban blocks was allotted for survey with a view to ensuring uniform spread of fieldwork over the entire survey period. All efforts were made to complete the fieldwork in a sample village/block during the sub-round period to which it was allotted.

² It is to be noted that UFS blocks do not provide information on number of enterprises/workers at the UFS block level. But information on whether any UFS block of the town/city is located in 'industrial area', 'bazar/business area', etc. is available. This information was utilized for stratification/selection of sample UFS blocks (see Appendix B for details).

1.2.4 One salient feature of the sample design adopted during the 62nd round was the use of list frame in order to capture sufficient number of relatively ‘bigger’ manufacturing units under the coverage of the survey. It was presumed that even within the unorganised manufacturing sector, there would be some very ‘big’ non-ASI manufacturing units whose contribution to gross value added was expected to be substantial. Thus, with a view to improving the overall estimate of gross value added per worker, total number of workers, total input, total output, etc., a **dual frame** approach was considered appropriate for sampling purposes. A list of 8,000 big non-ASI manufacturing enterprises³ for the urban sector only was prepared as per the data of the census of manufacturing enterprises conducted by Development Commissioner of Small Scale Industries (DCSSI) in 2003. This list served as the list frame. All these units in the list frame were considered for survey without resorting to any sampling. For the coverage of all other unorganised manufacturing enterprises in the universe (i.e. other than 8,000 enterprises featuring in the list frame), an area frame approach was followed for sampling units in stages. It is worthwhile to mention that this dual frame approach was experimented for the first time in the 62nd round.

1.2.5 In the area frame approach, the list of all the villages (*panchayat wards* in case of Kerala) / urban blocks of the country served as the sampling frame of FSUs (also see paragraph 1.1.5). The first stage units (FSUs) were villages (*panchayat wards* in case of Kerala) in the rural sector and urban blocks in the urban sector. The ultimate stage units were unorganised manufacturing enterprises in both the sectors. However, in case of large FSUs requiring hamlet-group (hg) / sub-block (sb) formation, one intermediate stage in the sampling involved the selection of two hg’s / sb’s from each FSU out of a minimum of three hg’s/sb’s formed in the FSU. Of these two selected hg’s/sb’s, one was selected with probability ‘1’ (termed as segment 1) and another one (termed as segment 2) was selected from among the remaining hg’s/sb’s of the FSU at random. The hg/sb selected with certainty (i.e. segment 1) was the hg/sb having maximum number of directory manufacturing establishments (DMEs) (*or with maximum number of non-directory manufacturing establishments (NDMEs) if there was no DME, or with maximum number of own account manufacturing enterprises (OAMEs) if there was no DME/NDME, or with maximum population if there was no DME/NDME/OAME⁴ in the entire FSU*). Smaller FSUs without any hg/sb formation were identified/categorized as segment 1 for the purpose of survey (segment 2 does not exist for such FSUs). As regards the first stage stratification, two basic strata were formed within each district of a State/UT: rural stratum comprising all rural areas of the district and urban stratum consisting of all urban areas of the district. However, each city with a population of one million or more as per Census 2001 was invariably treated as a separate stratum by itself. For details of stratification, sub-stratification and selection of sample FSUs, reference may be made to Appendix-B of this Report.

1.2.6 For each of segments 1 and 2 of the selected sample FSUs, a frame of eligible manufacturing enterprises was prepared by the field investigators by visiting each and

³ For definition of such ‘big’ enterprises, refer to Appendix-B of this report.

⁴ see Chapter Two for definitions of DME, NDME and OAME.

every house/household within the selected geographical area. While doing so, if any enterprise of the list frame was encountered, care was taken not to list it again within segment 1 or 2 as a part of the area sample / area frame to guard against duplication of enterprises between the two types of frames. Listing and sampling of enterprises in the area frame was independent for each of segments 1 and 2. In this context, it may be mentioned that for each selected FSU of rural *sub-strata* 1 and 2 only⁵ (see Appendix B for composition of these two sub-strata), segment 9 was also carved out within the FSU, which comprised top 10 big non-ASI registered SSI manufacturing units⁶ located within the boundaries of the entire FSU. The list of such units for selected FSUs was made available to the field investigators in order to facilitate formation of segment 9. Respective frames of segments 1 and 2 in these FSUs excluded the units listed under segment 9.

1.2.7 All the eligible enterprises listed under each of segments 1, 2 and 9 were stratified into 2 broad second-stage strata by enterprise type i.e. OAME & NDME/DME. Each of these two broad second-stage strata was further divided into 3 broad manufacturing groups (BMG) i.e. BMG 1, BMG 2 and BMG 3. BMG 1 comprised eligible enterprises belonging to NIC codes 15 and 20. BMG 2 consisted of eligible enterprises belonging to NIC Codes 23, 27, 30-35 and 01405 while all other eligible enterprises belonging to the rest of the NIC codes under coverage formed BMG 3. Thus within a segment for any given sample FSU, six ultimate second-stage strata were formed by jointly considering the broad second-stage strata and BMG. A total of 12 manufacturing enterprises – two from each ultimate second-stage stratum – were selected for detailed enquiry. In case of shortfall of enterprises in the frame of any particular second-stage stratum, compensation was made by selecting additional samples from other second-stage strata so that a total of 12 enterprises were selected from each FSU for detailed enquiry.

1.2.8 Design-based estimates of aggregates for any selected survey characteristic were obtained separately for list frame and area frame. Finally these two sets of estimates were added to get the pooled aggregate estimate for the combined frame. In this report, discussion will be focused on the pooled estimate based on two types of frames used in the survey.

1.3 Items of information and method of data collection

1.3.1 Schedule 2.2 was designed for collection of data from the manufacturing enterprises. The schedule was organized into 15 blocks. The format of the schedule is placed as Appendix C of the report. The items of information collected through different blocks of the schedule included the following:

- Particulars of operation and background information of the enterprise
- Principal operating expenses
- Other operating expenses
- Principal receipts

⁵ Rural sub-strata 1 and 2 consisted of villages having 'big' non-ASI registered SSI manufacturing units as per the DCSSI's census/survey in 2003.

⁶ See Appendix B for details including definition for bigness.

- Other receipts
- Gross value added
- Employment particulars
- Compensation to workers
- Fixed assets owned and hired
- Loan outstanding

1.3.2 The above items of information from any enterprise were collected either from books of accounts of the sample enterprises or through oral enquiry depending upon whether the enterprises maintained books of accounts or not. Reference periods used for various items of information are discussed in Chapter Two.

1.4 Sample size and its limitation

1.4.1 Out of 8,000 enterprises selected from the list frame, data could be collected from only 2,260 enterprises (for state/UT wise distribution of allotted and surveyed numbers of enterprises as per the list frame, reference may be made to columns 8 and 9 of Table 1 of Appendix A). Thus a large percentage (72%) of the list frame enterprises were not surveyed. Among these enterprises the majority (around 70%) belonged to the category of “Government/public sector undertaking/ASI units”, which were not under the coverage of 62nd round. Another 18% of the enterprises were found to be either non-operative or not traceable. In the area frame, 80,637 enterprises (42,050 from rural India and 38,587 from urban India) spread over 4,798 villages and 5,125 urban blocks across the country were surveyed. It is worthwhile to mention here that even though a large percentage of list frame enterprises were not surveyed, theoretically the surveyed enterprises netted through the list frame and area frame represented the whole universe of the unorganised manufacturing sector. The estimation procedure developed for the purpose (see Appendix B) also ensured this. The estimation procedure developed for the purpose (see Appendix B) also ensured this. As regards segment 9, it was formed only in substrata 1& 2 of rural sector. At all-India level, 462 villages were allotted to sub-stratum 1 and 856 villages to sub-stratum 2. For sub-stratum 2, eight villages became casualty. Only in 241 villages (52% of surveyed villages) of sub-stratum 1 and 549 villages (65% of surveyed villages) of sub-stratum 2, an eligible enterprise was available for survey in segment 9, although for each of such allotted FSUs, a list of at least a few enterprises was made available to field offices for survey through segment 9. For FSUs where at least one eligible enterprise was available in segment 9, at all-India level 1,659 segment 9 enterprises were listed out of which data could be collected from 1,377 enterprises.

1.4.2 Thus, altogether a total of 82,897 unorganised manufacturing enterprises considering both list frame and area frame were surveyed. In the appendix tables, although estimates are presented at disaggregated level i.e. sector (rural/urban/combined) x enterprise type (OAME/NDME/DME/All) by NIC code (for all-India) or by state/UT, sample size at the ultimate level of disaggregation may sometimes be very small. The users are advised to look at the related sample size while using the survey results particularly at the disaggregated level.

1.5 Plan of release of reports

1.5.1 There are three reports based on the data collected through the survey on unorganised manufacturing enterprises. The first report mainly dealt with various operational characteristics of the enterprises. The present one is the second in the series. This report primarily deals with employment details, annual emoluments per hired worker, fixed capital and borrowings of the unorganised manufacturing and repairing enterprises in India during 2005-06. The last one is on details of input, output and value added by the unorganised manufacturing sector.

1.6 Layout of the present report

1.6.1 The report contains three Chapters (including the present introductory one) and three Appendices. Chapter two deals with the concepts and definitions of various terms used in the survey on unorganised manufacturing. Chapter three discusses the main findings of the survey based on the data collected through central sample i.e. data collected by the field staff of NSSO. Detailed tables are presented in **Appendix A**. The sample design and estimation procedure are given in **Appendix B**. A facsimile of the schedule of enquiry used in the survey is given in **Appendix C**.

**Table 0: Description of manufacturing activities under the survey coverage of NSS
62nd round**

Division	Description
01405	Cotton ginning, cleaning and baling
15	Manufacture of Food Products and Beverages
16	Manufacture of Tobacco Products
17	Manufacture of Textiles
18	Manufacture of Wearing Apparel; Dressing and Dyeing of Fur
19	Tanning and Dressing of Leather; Manufacture of Luggage, Handbags, Saddlery, Harness and Footwear
20	Manufacture of Wood and Products of Wood and Cork, Except Furniture; Manufacture of Articles of Straw and Plating Materials
21	Manufacture of Paper and Paper Products
22	Publishing, Printing and Reproduction of Recorded Media
23	Manufacture of Coke, Refined Petroleum Products and Nuclear Fuel
24	Manufacture of Chemicals and Chemical Products
25	Manufacture of Rubber and Plastics Products
26	Manufacture of Other Non-Metallic Mineral Products
27	Manufacture of Basic Metals
28	Manufacture of Fabricated Metal Products, Except Machinery and Equipment
29	Manufacture of Machinery and Equipment Not Elsewhere Classified.
30	Manufacture of Office, Accounting and Computing Machinery
31	Manufacture of Electrical Machinery and Apparatus Not Elsewhere Classified.
32	Manufacture of Radio, Television and Communication Equipment and Apparatus
33	Manufacture of Medical, Precision and Optical Instruments, Watches and Clocks
34	Manufacture of Motor Vehicles, Trailers and Semi-Trailers
35	Manufacture of Other Transport Equipment
36	Manufacture of Furniture; Manufacturing Not Elsewhere Classified.
37	Recycling

Chapter Two

Concepts and Definitions

2.1 Enterprise: An enterprise is an undertaking engaged in the production and / or distribution of some goods and / or services meant mainly for the purpose of sale, whether fully or partly. An enterprise may be owned and operated by a single household or by several households jointly on a partnership basis, or by an institutional body.

2.2 Manufacturing Enterprise: A manufacturing enterprise is a unit engaged in the physical or chemical transformation of materials, substances or components into new products. It covers units working for other concerns on materials supplied by them. Also included are units primarily engaged in maintenance and repair of industrial, commercial and similar machinery & equipment, which are, in general, classified in the same class of manufacturing as those specialising in manufacturing the goods.

2.3 Unorganised Manufacturing Enterprise: The unorganised manufacturing sector for the present survey consists of following types of enterprises:

- (i) All manufacturing enterprises except those registered under section 2m(i) and 2m(ii) of Factories Act, 1948 and Bidi and Cigar Workers (conditions of employment) Act, 1966.
- (ii) All manufacturing enterprises except those run by Government (Central Government, State Governments, Local Bodies) / Public Sector Enterprises.

2.4 Household Enterprise: A household enterprise is one which is run by one or more members of a household or run jointly by two or more households on partnership basis irrespective of whether the enterprise is located in the premises of the household(s) or not. In other words, all proprietary and partnership enterprises are household enterprises.

2.5 Non-household Enterprise: Non-household enterprises are those which are institutional i.e. owned and run by the public sector (Central or State Government, local self-governments, local bodies, government undertakings, etc.), corporate sector, co-operative societies, other type of societies, institutions, associations, trusts, etc. Non-household enterprises covered under public sector were not included in the current survey.

2.6 Own-account Enterprise: An enterprise, which is run without any hired worker employed on a fairly regular basis⁷, is termed as an own account enterprise. If such an enterprise is engaged in manufacturing and/or repairing activities, it is termed as Own Account Manufacturing Enterprise (OAME).

2.7 Establishment: An enterprise which is **employing at least one hired worker** on a fairly regular basis is termed as establishment. Paid or unpaid apprentices, paid household

⁷ "fairly regular basis" means the major part of the period when operation(s) of an enterprise are carried out during a reference period.

member/servant/resident worker in an enterprise are considered hired workers. Establishments have further been categorised into two types: non-directory and directory.

2.8 Non-directory Establishment: An establishment employing less than six workers (household and hired workers taken together) is termed non-directory establishment. If such an establishment is engaged in manufacturing activities, it is termed Non-Directory Manufacturing Establishment (NDME).

2.9 Directory Establishment: A directory establishment is one which has employed six or more workers (household and hired workers taken together). If such an establishment is engaged in manufacturing activities, it is termed Directory Manufacturing Establishment (DME).

2.10 Perennial Enterprise: Enterprises, which usually operate more or less regularly throughout the year, are called perennial enterprises.

2.11 Seasonal Enterprise: Seasonal enterprises are those which are usually run during a particular season or fixed months of a year.

2.12 Casual Enterprise: Casual enterprises are those which operate occasionally (may be disjoint periods of time throughout the year) but total number of days operated in the last 365 days is 30 days or more.

2.13 Reference Period: The reference period for recording details of various items depended primarily on whether the enterprise under survey could provide information from their books of accounts, or they could provide information orally.

Case 1: Enterprises that provided information by recollection

2.13.1 Here, three kinds of reference periods were used to collect data in different blocks of the schedule viz. *reference month*, *reference year* and *last date of the reference month*.

2.13.2 **Reference Month:** This reference period was used to collect data on various receipts and expenses as well as value added, employment, emoluments, rent and interest payments for the enterprises providing oral information.

For perennial and casual enterprises, 'Reference Month' referred to the last 30 days (preceding the date of survey) *irrespective of the number of days of operation*.

For seasonal enterprises, consider the following two cases-

- **Case 1: Working continuously for 30 days or more (including scheduled holidays) in the current season:** - '*Reference Month*' referred to the last 30 days (preceding the date of survey).
- **Case 2: Worked for less than 30 days in the current season:** - '*Reference Month*' referred to an average month in the last working season.

If an enterprise was unable to provide information for the last 30 days, but could provide it for the latest completed calendar month, this calendar month was considered as '*Reference Month*'.

2.13.3 '*Reference Year*': For items like net additions to fixed assets owned, number of months operated, number of other economic activities pursued etc., data were collected for the entire '*Reference Year*'. It was last 365 days preceding the date of survey, if 'reference month' of that enterprise was 'last 30 days'. For the enterprises where 'reference month' was 'last calendar month', 'reference year' was last 12 calendar months taken together. For seasonal enterprises of case 2 above (i.e., seasonal enterprises which had operated for less than 30 days during the current season), '*Reference Year*' was a continuous period of 365 days starting from the first day of the corresponding working season.

2.13.4 '*Last date of the reference month*': For some of the items like value of fixed assets, amount of loan outstanding, etc., the reference period used was as follows:

It was last date of the 'Reference Month', which was the same as the last date of the 'Reference Year'. However, opening stock of semi-finished goods manufactured, opening stock of goods traded were collected for the beginning of the first day of the 'Reference Month'.

Case 2: Enterprises provided data from their books of accounts

2.13.5 In this case, two kinds of reference periods were used to collect data in different blocks of the schedule, 'Reference Year' and 'last date of the reference year'.

2.13.6 *Reference Year*: This was the last completed accounting year of the enterprise under survey. Various receipts, expenses, value added as well as employment, emoluments, rent, interest, net additions to fixed assets owned, for the enterprises were recorded for the last completed accounting year.

2.13.7 '*as on first/ last date of reference year*': For some of the items like value of fixed assets, amount of loan outstanding, etc., this reference period was used. It was last date of the 'Reference Year'. For items like opening stock of semi-finished goods manufactured, opening stock of goods traded, the beginning of the first date of the reference year was the point of reference

2.14 **Worker**: A worker is defined as one who participates either full time or part time in the activity of the enterprise. The worker may serve the enterprise in any capacity - primary or supervisory. He/she may or may not receive wages / salaries in return to his / her work incidental to or connected with the enterprise activity. A worker need not mean that the same person is working continuously; it only refers to a position. Persons working for less than or equal to half of the normal working hours of the enterprise on a fairly regular basis are considered as part time workers. Full time workers are those who work for more than half of the period of normal working hours of the enterprise on a fairly regular basis. Two part-time workers in an enterprise are counted as 2 and not 1.

2.15 Working Owner: The owner who personally works in the proprietary or partnership enterprises on a fairly regular basis is called working owner. In fact, in most of the own-account enterprises the owner himself/ herself manages all activities of the enterprise without the help of anyone (on a fairly regular basis). In the case of partnership enterprises, if only one partner or some of the partners or all the partners work in the enterprise on a fairly regular basis then they are considered as ‘working owners’.

2.16 Hired Worker: A hired worker is a person employed directly or through any agency on payment of regular wage / salary in cash or kind. Apprentices, paid or unpaid, are treated as hired workers. Paid household workers, servants and resident workers of the enterprise are also considered as hired workers.

2.17 Other Worker / Helper: This includes all persons belonging to the household of the proprietor or households of the partners who are working in or for the enterprise without regular salary or wages. Persons working as exchange labourer in the enterprise without salary or wages are covered in this category. All unpaid household workers / helpers who are associated with the activities of the enterprise during the reference month are considered in this category.

2.18 Mixed Activity: There are enterprises that carry out a number of activities simultaneously. For example, a bakery may also sell cold drinks, a rice mill may sell sugar, a factory may run a hospital in its premises, etc. Each such activity was treated as a separate enterprise if information for them was separately available. If the accounts were not separable then the data pertained to the enterprise as a whole and the enterprise was classified as having mixed activities and the activities of such enterprises are a mixture of NIC’s. The activities may be mixed at any level of NIC, but for the present survey an enterprise was considered to have mixed activities if its activities were different at 2-digit level of NIC-2004. The appropriate NIC in such cases was determined on the basis of **major** activity. Major activity refers to the activity which yielded maximum income/turnover/employment. The above criteria were applied in the given order, i.e., income first, then turnover and then employment, to determine the major activity.

2.19 Multiple Activity: Since many of the entrepreneurs belonging to the unorganised sector operate at small or marginal levels, the phenomenon of carrying out more than one activity simultaneously or at different points of time is quite prevalent. If the activities were carried out at one point of time at the same location and the information was not separately available, then it was taken as “mixed activity”. Carrying out of more than one economic activity by the entrepreneur during the reference year is called multiple activities. *It differs from mixed activities in the sense that former is with respect to the entrepreneur whereas the latter is with respect to the enterprise.* However, an entrepreneur of a manufacturing enterprise manufacturing woollen garments before winter and cotton clothes before summer will not be considered as carrying out multiple activities. Some examples of multiple activities are: i) a person carrying out agricultural activity at sowing / harvesting season and doing carpentry at the same time or at other times, ii) a lady working as regular wage / salary earner and also running a tailoring shop

in the evening, etc iii) A household servant is making paper envelopes in free time, iv) An agricultural worker engaged in handicraft making during non-harvesting season of the year.

2.20 Working on Contract: The enterprises in the unorganised sector are mainly small units. In many cases, the enterprises are seen to be working as per orders from a bigger unit. In such cases, certain conditions are put on the servicing unit by the contractor or master unit. Conditions may pertain to sale of products, supply of raw materials, mode of payment etc. In many cases, the contractor specifies the design of the product to the servicing unit e.g. garment manufacturing, shoe manufacturing etc. If the surveyed enterprise had undertaken any work on contract during the reference year, it was considered as 'enterprises working on contract'.

2.21 Fixed Assets: Assets held for the purpose of producing or providing goods or services and not for resale in the normal course of entrepreneurial activities are classified as fixed assets. These cover all goods, new or used, that have a normal economic life of more than one year from the date of purchase.

2.22 Land and Building: **Land** means the land on which the enterprise is accommodated together with the surrounding area, which is used for the enterprise. This also includes improvement to land. However, if only a portion of the land belonging to the residence of a household is utilised for the enterprise, only that portion of the land is considered as capital assets for the enterprise. Land owned with permanent heritable possession with or without right to transfer the title comes under this category. Land held on long-term lease, say, 30 years or more, is also treated as land owned. **Building** is the structure, where activities of the enterprise are undertaken. This also includes all other structures like shed, house, portions of a house or other structure, building under construction and other conveniences in which the activities of the enterprise are carried out. This also includes other constructions such as passage, wall, water tank, sewerage, tube-well, etc.

2.23 Plant and Machinery: Plant generally means an assembly of machinery / equipment / devices installed for the operation of entrepreneurial activities. Machinery means an implement or mechanical device used in the entrepreneurial activities. These are assets of durable nature and can be easily identified.

2.24 Transport Equipment: All vehicles, power-driven or man / animal-driven, used for transporting persons, goods and materials by the enterprise in connection with its activity are covered in this category. Animals, if used for drawing vehicles or carrying loads, will be treated as part of transport equipment.

2.25 Tools and Other Fixed Assets: Tools refer to small loose implements, generally held in hand for operation and having normal life of more than one year. Other fixed assets refer to other durable equipment which are used for the entrepreneurial activity either directly or indirectly. These include furniture, fixtures, laboratory equipment, office equipment etc. Livestock used in oil-mill is also covered under this category.

2.26 Net additions to fixed assets during the last 365 days: Net addition to fixed assets was obtained by subtracting depletion of assets from the additions made during the last 365 days. Addition to the fixed assets could be made through purchase (new or used) or through own construction. Improvements on land, new construction of building, shed, structure, as well as assets produced on own account during the last 365 days were considered as additions to the fixed assets. Depletion of assets was obtained by considering the assets sold and discarded during the last 365 days. The value of assets disposed of in any manner other than sale, were treated as value of assets discarded. Besides obsolescence (gone out of use) of an asset, this included loss due to theft, damage, accident etc.

2.27 Loan: Any borrowing in cash or kind to be repaid in cash or kind is treated as loan. Loans taken for the purpose of utilising the same in the entrepreneurial activities of an enterprise were considered as loan even if such loans were used for other purposes. On the other hand, loans taken for other purposes but ultimately used in the enterprise were excluded.

2.28 Operating Expenses: The total of values of raw materials, electricity, fuel, lubricants and auxiliary materials consumed; cost of maintenance, services purchased and other expenses incurred during the reference period by an enterprise was considered as 'operating expenses'.

2.29 Receipts: The sale value of products and by-products manufactured by an enterprise together with the value of services rendered to other concerns and other receipts incidental to entrepreneurial activities are considered as 'total receipts'.

2.30 Gross Value Added: Gross value added is taken as additional value created by the process of production of an enterprise to the economy. Gross value added is calculated by deducting 'total operating expenses' from the total value of 'total receipts' during the reference period.

Chapter Three

Summary of findings

3.1 Introduction: This report, the second in the series of three reports from the survey, focuses mainly on employment, fixed capital and borrowings of the unorganised manufacturing and repairing enterprises in India during 2005-06. The first report dealing with operational characteristics of enterprises also covered employment particulars but these are discussed here in more detailed categorisation.

3.1.1 This chapter contains a summary of the results. Detailed tables are given in Appendix A for rural and urban areas and for both areas combined at all India and State / UT levels and by different types of industries. These tables give information relating to Own Account Manufacturing Enterprises (OAMEs), Non-Directory Manufacturing Establishments (NDMEs), Directory Manufacturing Establishments (DMEs) as well as on all types of enterprises taken together. In some cases, the figures for totals and proportions presented in detailed tables may vary marginally due to rounding off. The figures presented in this report are based on 'central sample' i.e. data collected by the field staff of National Sample Survey Organisation.

3.1.2 A few important characteristics as estimated in this round as well as the preceding two rounds i.e. 56th (2000-01) & 51st (1994-95) have been presented in this report to show the extent of change over the different survey periods. Although, the coverage of manufacturing and repairing enterprises differed to some extent in the three rounds, they are unlikely to bring any serious distortion in comparing estimates of rates and proportions presented in this report. However, the difference in coverage is summarised below:

3.1.3 Coverage of manufacturing and repairing enterprises in 62nd round & 56th round identical except that "While-you-wait" services under printing of textiles (NIC-98 code 1712) and engraving of metals (NIC-98 code 2892) now classified in NIC-2004 under repair of personal and household goods (NIC-2004 code 52609) were covered in 56th round but not in 62nd round.

Some examples of "While-you-wait" services are:

- i) Households giving new/ old clothes to a shop for block printing, embroidery, etc.
- ii) shop-owners writing name-plates, etc. on metal,
- iii) Boutique shops purchasing *sarees* and doing art-work either themselves or through outsourcing before sale, etc.

3.1.4 Coverage of manufacturing and repairing enterprises in 56th round & 51st round differed in respect of the following activities:

a) activities covered in 51st round but not in 56th round:

- Repair and maintenance of computers and computer based systems (NIC 1987 or NIC 87 code 3941), ii) Repair of office, computing and accounting machinery other than

computers and computer based systems (NIC 87 code 3942), iii) Repair of heavy motor vehicles (NIC 87 code 398), iv) Repair of household electrical appliances (NIC 87 code 971), v) Repair of TV, VCR, radio, transistor, tape-recorder and other electronic appliances (NIC 87 code 972), vi) Repair of watches, clocks and jewellery (NIC 87 code 973), vii) Repair of motor vehicles and motor cycles except trucks, lorry and other heavy vehicles (NIC 87 code 974), viii) Repair of bicycles and cycle rickshaws (NIC 87 code 975) and ix) Repair enterprises not elsewhere classified (NIC 87 code 979).

b) Cotton ginning, cleaning and baling (NIC 98 code 01405) was covered in 56th round but not in 51st round.

3.1.5 All the above-mentioned repairing activities were categorised under ‘**Services sector (DIV. 50-93)**’ in NIC 1998 & NIC 2004, which were respectively followed in 56th round and 62nd round. It may be mentioned that both in 56th round and 62nd round, the survey on unorganised manufacturing enterprises covered only industries belonging to NIC Divisions 15-37 as well as NIC code 01405.

3.1.6 So if we now compare the coverage of 51st round and 62nd round, it is apparent that the above repairing activities were covered in 51st round but not in 62nd round. Also Cotton ginning, cleaning and baling (NIC 2004 code 01405) was covered in 62nd round but not in 51st round. It may be mentioned that repairing activities other than those mentioned above, which were included in NIC 2004 Div. 15 to 37, were covered in 62nd round and also those repairing activities barring the above mentioned ones, which were included in NIC 1998 Div. 15 to 37, were covered in 56th round.

3.2 Number of first stage units surveyed: In the 62nd round survey, a total of 9923 first stage units were surveyed in the central sample, of which 4798 were villages and 5125 UFS blocks). **Statement 1** gives the distribution of the number of sample villages and blocks allotted for survey and actually surveyed in different states.

3.3 Number of enterprises surveyed: Before looking into the various characteristics of the enterprises estimated from the survey, it is worthwhile to know the number of enterprises surveyed in the 62nd round. **Statement 2** gives information on the number of enterprises surveyed state-wise for rural, urban and both sectors combined for the country. A total of 82897 (including 2260 list frame enterprises located in urban areas) enterprises were surveyed all over India. About 51% of these enterprises were in rural India and the remaining 49% were in urban India. List frame enterprises constituted only 5.5% of urban enterprises surveyed, the rest 94.5% being area frame enterprises. Maximum number of enterprises (both list frame and area frame enterprises) surveyed was in Uttar Pradesh (9.95%) followed by West Bengal (7.97%), Tamil Nadu (7.95%), Andhra Pradesh (7.93%) and Maharashtra (7.76%). However, the highest percentage of list frame enterprises surveyed was in Maharashtra (21.1%) followed by Uttar Pradesh (10.9%), Haryana (9.8%), Rajasthan (8.7%), Tamil Nadu (8.6%).

3.3.1 While discussing the results and graphs the term ‘major States’ are mentioned in some places. These ‘major States’ and their names in abbreviated forms (in brackets) are: Andhra Pradesh (AP), Assam (ASM), Bihar (BHR), Gujarat (GUJ), Haryana (HAR), Jammu and Kashmir (J&K), Karnataka (KTK), Kerala (KER), Madhya Pradesh (MP), Maharashtra (MAH), Orissa (ORS), Punjab (PUN), Rajasthan (RAJ), Tamil Nadu (TN), Uttar Pradesh (UP), West Bengal (WB), Jharkhand (JRK), Chhatisgarh (CTG) and Uttaranchal (UTC).

See Appendix Table 2 for more detail.

3.5 Statement 3A gives the estimated number of OAMEs and establishments (NDME & DME) separately for rural, urban and combined sectors of the country. As expected, OAMEs dominated the unorganised manufacturing enterprises in rural, urban and combined sectors of the country. **Chart 1** gives the percentage of OAMEs, NDMEs and DMEs in total number of enterprises. The share of OAMEs is about 86%, the remaining 14% being establishments. The share of NDMEs and DMEs were respectively 10% and 4% in total number of enterprises.

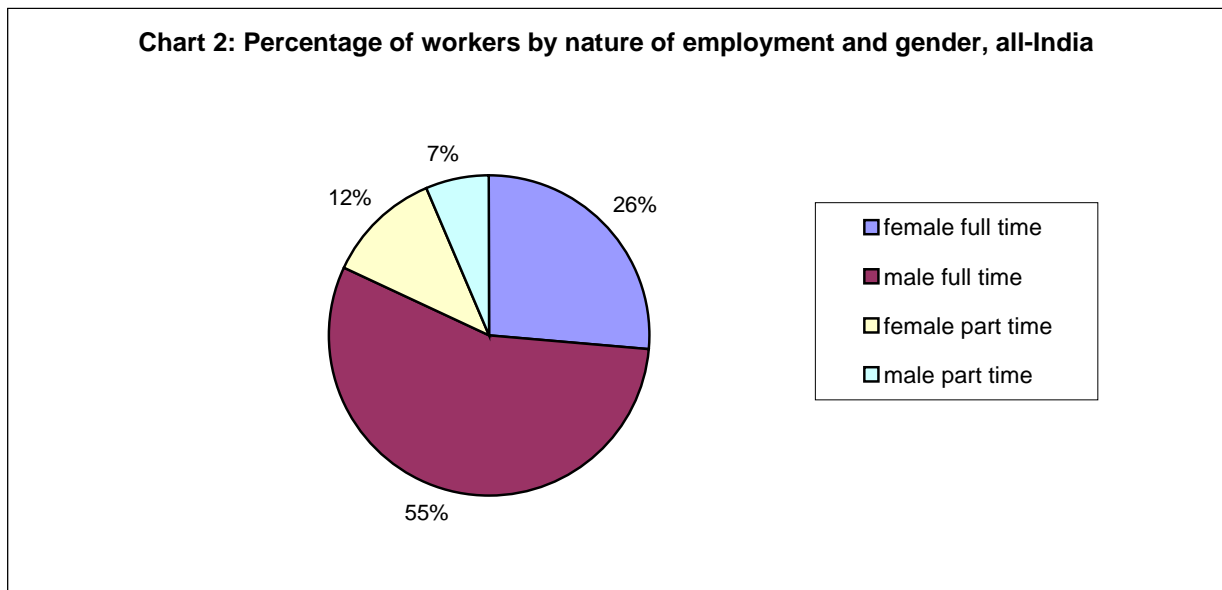

Statement 3A: Estimated number of enterprises categorised by enterprise type and sector at all-India level			
enterprise type	estimated number of enterprises		
	rural	urban	all-India
OAME	11108720	3504186	14612907
Establishments			
• NDME	745269	1025013	1770282
• DME	274277	413355	687632
• Total	1019546	1438368	2457914
All	12128266	4942554	17070820

3.6 Statement 4 gives the estimated number of workers engaged in unorganised manufacturing enterprises by nature of employment and gender. It is seen that males had outnumbered females in respect of full-time workers. However, females had outnumbered males in respect of part-time workers. Proportion of male workers in unorganised manufacturing enterprises was 62%, the remaining 38% being female workers. **Chart 2** gives the percentage of full-time and part-time workers categorised by male and female. Percentages of full-time male and full-time female workers were respectively 55% and 26% whereas percentages of part-time male and part-time female workers were 7% and 12% respectively.

Statement 4: Number of workers by nature of employment and gender for each enterprise type										
sector	enter- prise type	number of workers

See Appendix Table 2 for more detail.

See Appendix Table 2 for more detail.

3.7 Statement 5 provides certain key information at all-India level over the last three rounds relating to survey on unorganised manufacturing enterprises. It is seen that though estimated number of enterprises in rural areas went up from the period 1994-95 to 2005-06, the same in urban areas declined from the period 2000-01 to 2005-06. Also both for rural and urban areas, estimated number of workers went up from 1994-95 to 2000-01 and then registered a decline in 2005-06. However, average number of workers per enterprise showed a declining trend during the period from 1994-95 to 2005-06 both for rural areas and all-India, though for urban areas it was marginally higher in 2005-06 as compared to 2000-01.

Statement 5: Summary information over the last three rounds at all-India level				
		51st round (1994-95)	56th round (2000-01)	62nd round (2005-06)
(1)	(2)	(3)	(4)	(5)

* Figures of 51st round not strictly comparable with 56th round & 62nd round due to coverage differences mentioned in para 3.1.2- 3.1.6.

@ excluding 2260 list frame enterprises

3.8 Statement 5A gives the estimated number of workers in descending order in States / Uts. It is seen that West Bengal had the highest share (15%) of workers in unorganised manufacturing enterprises of the country closely followed by Uttar Pradesh (14%). About 55% of all workers were concentrated in five states of West Bengal, Uttar Pradesh, Tamil Nadu, Andhra Pradesh, Maharashtra. Here OAMEs had significantly contributed to total number of workers in the top state West Bengal, its percentage being 72%. In contrast, Uttar Pradesh, which had more number of workers in establishments than West Bengal, had lower number of workers in OAMEs. However, Maharashtra had highest share (13%) of total number of workers of all the establishments of all states.

Statement 5A: Estimated number of workers in descending order in different States/UT,				
State/UT	estimated number of workers			% share
	OAME	Establishment	All (in descending order)	
West Bengal	3980082	1513751	5493833	15.08

all-India	23687294	12755505	36442799	100

See Appendix Table 3 for more detail.

3.9 Statement 6 gives the estimated number of workers by type of worker. It is seen that 64% of all workers in unorganised manufacturing enterprises in the country were in rural areas and the remaining 36% workers belonged to urban areas. Share of hired workers in total number of workers in rural India, urban India and all-india were 16%, 40%, & 24% respectively. **Statement 7** presents the estimated number of workers and hired workers as revealed in the last three surveys. It is seen from the statement that share of hired workers showed an increasing trend from 1994-95 to 2005-06 for all sectors i.e. rural, urban and all-India. It is seen from **Statement 7A** that five states had a share of more than 50% of all workers in unorganised manufacturing enterprises in all the three survey periods. The rankings of top five states in terms of number of workers had remained the same in 2000-01 and 2005-06. The presence of Orissa in place of Maharashtra in 1994-95 appears to be an aberration.

Statement 6: Number of workers by type of worker separately for rural, urban and combined sectors.				
Sector	number of workers			
	working owners (in '00)	hired workers (in '00)	other workers (in '00)	total workers (in '00)
(1)	(2)	(3)	(4)	(5)

	A.P	7.68	MAH	8.02	MAH	7.96
	Total	56.75	Total	56.58	Total	54.86

3.10 Statement 7B presents the total number of workers and percentage of worker categorised by nature of employment over the last three rounds. It reveals that share of full-time workers in total employment had gradually gone down from 89% to 82% and share of part-time workers in total employment had correspondingly gone up 11% to 18% in the period from 1994-95 to 2005-06.

3.11 Statement 7C presents the total number of workers categorised by type of workers and percentage of worker over the last two rounds. Here the comparison is restricted to 62nd and 56th rounds because in 51st round workers were not categorised in the same manner. It reveals that proportion of working owners, hired workers and other workers in total employment had remained constant in 2000-01 and 2005-06. Roughly, half of all workers were working owners while the remaining half were equally distributed between hired workers and ‘other workers’ i.e. unpaid family members and helpers.

Statement 7B: Total number of workers categorised by nature of employment and percentage of workers by nature of employment over the last three rounds						
NSS round	Full-time workers		Part-time workers		Total workers	
	number (in '00)	% to total workers	number (in '00)	% to total workers	number (in '00)	% to total workers

Statement 7C: Total number of workers categorised by type of worker and percentage of workers by type of worker over the last two rounds								
NSS round	Working owners		Hired workers		Other workers		Total workers	
	number (in '00)	% to total workers	number (in '00)	% to total workers	number (in '00)	% to total workers	number (in '00)	% to total workers
56th round (2000-01)	199667	53	83459	23	87682	24	370808	100
62nd round (2005-06)	187160	52	88647	24	88620	24	364428	100

51st round not compared because of different categorisation of type of workers.

Source: Appendix Table 3, NSS Report No.479

3.12 Percentage of workers by gender: Statement 8 gives the proportion of workers by gender in different industries separately for rural, urban and combined sector. At all India level, 'manufacture of food products and beverages (Ind. Div. 15)' had engaged the highest number of workers. Nearly 38 % of all workers were females with corresponding figures of 44 % in rural areas and 27 % in urban areas. Manufacture of tobacco products (Ind. Div. 16) had the highest proportion (76 %) of female workers followed by manufacture of chemicals and chemical products (Ind. Div. 24) (70 %) at the all-India level. In rural areas, Manufacture of Paper and Paper Products (Ind. Div. 21) had the highest proportion of female workers (82 %) whereas in urban areas Manufacture of tobacco products (Ind. Div. 16) had the highest proportion of female workers (75 %).

Statement 8: Percentage of workers by gender in different industries and sector

For description of industries please see Table 0 at page 7.
See Appendix table 2 for more detail.

3.13 Statement 9 gives estimated total workers and percentage of female workers in different industries in the last two surveys. It is seen that at all-India level employment in unorganised manufacturing enterprises dropped by nearly 2%. Also employment dropped by 7 % from nearly 68 lakhs in 2000-01 to nearly 63 lakhs in 2005-06 in ‘manufacture of food products and beverages (Ind. Div. 15)’, which engaged the highest number of workers in the two survey periods. ‘Manufacture of wood and products of wood and cork, except furniture and manufacture of articles of straw and plating materials (Ind. Div. 20)’ also recorded a significant fall (22%) in employment from nearly 52 lakhs in 2000-01 to nearly 40 lakhs in 2005-06. It may be mentioned that high percentage increase in employment in the particular industry ‘Manufacture of office, accounting and computing machinery (Ind. Div. 30)’ is due to the fact that rural employment in the industry was almost nil in both survey periods (vide Report 479 and Statement 8) but employment rose sharply in urban areas from nearly 1,000 to 10,000. However, percentage of female workers registered a significant increase from 69% to 76% in ‘manufacture of tobacco products (Ind. Div. 16)’, which had the highest proportion of female workers, in both survey periods. At all-India level, proportion of female employees increased from 34% in 2000-01 to 38% in 2005-06.

Statement 9: Estimated total workers and percentage of female workers in different industries in the last two surveys.

Source: NSS Report no. 479, Statement 8

3.14 Statement 10 gives the proportion of workers by gender in different States/ Uts separately for rural, urban and combined sector. Among the major states, Andhra Pradesh (51.6 %) had the highest proportion of female workers followed by Karnataka (51.1 %), Kerala (50.2%) & Tamil Nadu (48.9 %), Orissa (47.2%). In rural areas, top five major states having the highest proportion of female workers were Tamil Nadu (56.2 %), Andhra Pradesh (55.7 %), Karnataka (54.5 %) & West Bengal (53.1 %) Kerala (51.2%). In urban areas, top five major states having the highest proportion of female workers were Kerala(47.6%), Karnataka(44.6%) & Andhra Pradesh (42.7 %), Tamil Nadu (40.7%) & Madhya pradesh(38.3%).

See Appendix Table 2 for more detail.

3.15 Statement 11 gives the percentage distribution of workers by gender in different categories of workers, viz, working owner, hired worker and other worker considering all types of enterprises for all sectors combined. At all India level, 39 % of the working owners were female. About 59 % of the unpaid household workers / helpers and exchange labourers working for the enterprise without regular salary or wages, referred to as other workers, were found to be female whereas the proportion of hired female workers (15%) was much lower than for the other two categories of workers. The highest proportion of female working owners (83.9%) was found in Manipur followed by Karnataka(57.6%), Kerala(57.4%) and Andhra Pradesh (52.0%). Highest proportion of female hired workers among all State / UT s was noticed in Kerala (36.6%).

3.16 Statement 12 gives annual emoluments per hired worker by enterprise type for each industry. It revealed that for all NDMEs and DMEs combined, 'manufacture of basic metals (Ind. Div. 27)' had the highest annual emoluments per hired worker for rural areas. For urban areas, 'manufacture of machinery and equipment n.e.c. (Ind. Div. 29)' paid the highest emoluments per hired worker for all NDMEs and DMEs combined. At the all-India level also, 'manufacture of machinery and equipment n.e.c. (Ind. Div. 29)' paid the highest emoluments per hired worker for all NDMEs and DMEs combined. In general, DMEs paid more emoluments per hired worker than NDMEs. However, the difference was very significant for 'manufacture of tobacco products (Ind. Div. 16)'.

See Appendix Table 5 for more detail.

3.17 Statement 13 gives annual emoluments per hired worker by enterprise type for each state. It reveals that among the major states, Chhatisgarh followed by Haryana had the highest annual emoluments per hired worker for rural areas for all NDMEs and DMEs combined and correspondingly for urban areas, Maharashtra followed by Gujarat paid the highest emoluments per hired worker. For both sectors combined also, Maharashtra paid the highest emoluments per hired worker among the major states for all NDMEs and DMEs combined.

See Appendix Table 5 for more detail.

3.18 Fixed assets: Fixed assets mean assets of an enterprise in the form of land, building, other construction, plant & machinery, transport equipment, tools and other fixed assets (new or used) that have a normal economic life of more than one year from the date of acquisition, i.e., through outright purchase/hire purchase/loan/ mortgage and / or construction. Only the assets which were held by the enterprise for the purpose of producing goods or providing services and not held for resale in the normal course of business were considered.

3.19 Statement 14 presents the estimated value of total fixed assets owned per enterprise and total fixed assets hired per enterprise for different enterprise types. At all India level, the estimated market value of owned assets per enterprise was estimated as Rs.58166 and that of hired assets was Rs.25614. The market value of owned assets per enterprise in rural areas was about 27% of that in the urban areas. In rural areas hired assets constituted about 15% of total assets used by unorganised manufacturing enterprises. In urban areas, however, about 38% of total assets used was hired assets. At all India level, hired assets had a share of 30% of total assets used in unorganised manufacturing enterprises.

3.20 Statement 15 presents the estimated value by enterprise types of total fixed assets owned per enterprise over the last three survey periods. All value figures are at current prices. It is seen that percentage growth of fixed assets owned per enterprise were the highest for DMEs followed by NDMEs and OAMEs both for the period from 2000-01 to 2005-06 and also the period from 1994-95 to 2000-01.

Statement 14: Market value (Rs.) of fixed assets per enterprise during 2004-05 by enterprise type						
enterprise type	Value of fixed assets per enterprise					
	rural		urban		all-India	
	owned	hired	owned	hired	owned	hired
(1)	(2)	(3)	(4)	(5)	(6)	(7)

all	32975	5757	119980	74341	58166	25614

See Appendix Table 6 for more detail.

Statement 15: Per enterprise market value (Rs.) of fixed assets owned by enterprise types in the last three survey periods.					
enterprise type	51 st round (1994-95)	56 th round (2000-01)	62 nd round (2005-06)	% change from 51 st to 56 th	% change from 56 th to 62 nd
(1)	(2)	(3)	(4)	(5)	(6)
OAME	11512	19342	24646	68	27
NDME	65027	114445	152196	76	33
DME	201545	378014	528423	87	40
all	25990	42535	58166	64	37

See Appendix Table 6, NSS Report No.479, and NSS Report No.435.

3.21 Statement 16 gives the percentage distribution of estimated market value of fixed assets per enterprise as on date of survey by type of assets for enterprise type. It reveals that 'land and building' was the major constituent of fixed assets used in unorganised manufacturing enterprises. It covered about 70% of total owned assets of all enterprises and 98% of hired assets of the same. Besides 'land and building', 'plant and machinery' (21%) was the only item having noteworthy share in the total fixed assets owned and this holds good for enterprises in both rural and urban areas. All remaining fixed assets including 'software and hardware' constituted 9% of total owned fixed assets of all enterprises.

3.22 Statement 17 gives the percentage share of different items of owned fixed assets over the last three rounds. It is seen that while proportionate share of 'land and building' had shown an increasing trend over the three survey periods, share of 'plant and machinery' had shown a declining trend.

Statement 16: Percentage distribution of per enterprise estimated market value of owned and hired fixed assets as on date of survey by type of assets for enterprise type										
Enter- prise type	for fixed assets on date of survey									
	percentage to total owned					percentage to total hired

Statement 17 : Percentage distribution of estimated per enterprise market value of owned fixed assets as on date of survey by type of assets over the last three survey periods					
NSS round	land and building	plant and machinery	Transport equipment	tools and all other	all
51st (1994-95)	64.5	25.4	3.3	6.8	100.0
56th (2000-01)	68.5	22.9	4.1	4.5	100.0
62nd (2005-06)	69.8	21.4	4.6	4.2	100.0

Source: Appendix Table 6, NSS Report No.479, and NSS Report No.435.

3.23 Statement 18 gives per enterprise fixed assets owned, net addition to fixed assets industry-wise in descending order. It reveals that ‘manufacture of other transport equipment’ (Ind. Div. 35) had highest fixed assets owned per enterprise. However, Manufacture of Medical, Precision and Optical Instruments, Watches and Clocks’ (Ind. Div. 33) had the highest percentage (19%) of ‘net addition to owned fixed assets’ per enterprise to ‘total fixed assets owned’ per enterprise.

Statement 18: Industry-wise per enterprise fixed assets owned, net addition to fixed assets owned and percentages of net addition to fixed assets owned.			
Industry division (NIC 2004)	fixed assets owned (in descending order) as on the date of survey (Rs.)	net addition to owned fixed assets during last 365 days (Rs.)	Col. 4 = (Col. 3÷Col.2) x 100

For description of industries please see Table 0 at page 7.

See Appendix Tables 6 & 7 for more detail.

3.24 Statement 19 gives per enterprise fixed assets owned and net addition to fixed assets state-wise in descending order. It reveals that among the major states Haryana had the highest fixed assets owned per enterprise. However, Uttaranchal had the highest 'net addition to owned fixed assets' per enterprise among major states. It had the highest percentage (12%) of 'net addition to owned fixed assets' per enterprise to 'total fixed assets owned' per enterprise.

Statement 19: State-wise fixed assets owned, net addition to fixed assets owned and percentages of net addition to fixed assets owned.			
State/UT	fixed assets owned per enterprise (in descending order) as on the date of survey (Rs.)	net addition to fixed assets owned per enterprise during last 365 days (Rs.)	Col. 4 = (Col. 3÷Col.2) x 100

See Appendix Tables 6 & 7 for more detail.

3.25 Statement 20 gives outstanding loan per enterprise as on the last date of the reference year by State/UTs in descending order. It is seen that among the major states Maharashtra had the highest outstanding loan per enterprise followed by Haryana, Kerala Chhattisgarh, Uttaranchal. However, lowest outstanding loan was reported from Bihar followed by Jharkhand , Assam, Orissa, Andhra Pradesh.

Statement 20: Outstanding loans per enterprise (in Rs.) as on last date of reference year for State/UTs			
State/UTs	Outstanding loans per enterprise

See Appendix Table 8 for more detail.

3.26 Charts 3 & 4 give comparative pictures of outstanding loan per enterprise (Rs.'000) in 56th round and 62nd round. It is seen that Bihar had the lowest outstanding loan per enterprise followed by Jharkhand in both 2000-01 and 2005-06. However, top two states having the highest outstanding loan per enterprise were Maharashtra & Kerala in 2000-01 and Maharashtra & Haryana in 2005-06.

Source: NSS Report No. 477 and Statement 20.

3.27 Statement 21 gives the percentage share of outstanding loan per enterprise by source of loan separately for each enterprise type and sector. Here 'other institutional agencies' include agencies like Khadi and Village Industries Commission (KVIC), Life Insurance Corporation (LIC), Chit Funds etc. not covered under column 2. It is seen from **Statement 21** that mainly central and state level term lending institution, banks and other societies provided loans to unorganised manufacturing enterprises. About 49% of total loan of all enterprises was provided by the above-mentioned agencies. Moneylenders had significant share of loan advanced to OAMEs in respect of rural, urban and combined sectors, the percentages being respectively 26%, 12% & 18%. For OAMEs, borrowings made from friends and relatives were also noteworthy. In respect of rural, urban and combined sectors, these percentages were 18%, 11% and 14% respectively. Also, the agency 'others' not covered under cols. 2 to 7 disbursed loans significantly in urban areas. At all-India level, DMEs (59%) availed of higher credit facilities from government financial agencies than NDMEs (28%) & OAMEs (39%).

Statement 21: Percentage distribution of outstanding loan per enterprise by source of loan by enterprise type separately for each sector and for all sector combined								
Ent. type	agency from which loan is taken							
	central and state level term lending institution, banks and other societies	other institutional agencies	money lenders	business partner	supplier / contractor	friends and relatives	others	all

See Appendix Table 9 for more detail.

3.28 Statement 22 shows percentage of annual interest payable on loan amount per enterprise by each source agency of loan. Interest was the highest for moneylenders i.e. moneylenders charged more interest on loan advanced than central and state level term lending institution, banks and other societies. It can be seen from **Statement 21** that highest outstanding loan advanced was from central and state level term lending institution, banks and other societies but its percentage of interest payable to total outstanding loan per enterprise was less than that of moneylenders. It may be mentioned here that high percentage values recorded for certain industry x agency of loan combination were due to the fact that outstanding loan as on the last date of the reference year could be sometimes smaller than annual interest payable during the reference period.

Statement 22: 'Annual interest payable as a percentage of loan amount outstanding' per enterprise by agency of loan and industry for all sector combined								
industry (NIC 2004)	agency from which loan is taken

For description of industries please see Table 0 at page 7.

See Appendix Table 9 for more detail.

3.29 Statement 23 shows comparative percentages of annual interest payable on loan amount per enterprise by each source agency of loan in the last two survey periods. It reveals that moneylenders charged highest interest rates on loans advanced not only in 2005-06 (29%) but also in 2000-01 (26%). Also the interest rates charged by moneylenders were significantly higher than other agencies both in 2005-06 and 2000-01. However, for most of the agencies annual interest receivable as a percentage of outstanding loans registered a fall in 2005-06 when compared with 2000-01.

Statement 23: 'Annual interest payable as a percentage of loan amount outstanding' per enterprise by agency of loan for all sector combined over last two rounds.								
NSS round	agency from which loan is taken							
	central and state level term lending institution, banks and other societies	other institutional agencies	money lenders	business partner	supplier / contractor	friends and relatives	others	all
56 th round (2000-01)	15.9	15.8	25.5	14.0	8.6	X	19.5	16.5
62 nd round (2005-06)	16.8	14.9	26.7	13.2	7.2	X	11.2	14.7

51st round not compared because of non-availability of data of interest component.

3.30 Statement 24 presents the all-India estimates of important characteristics at a glance.

Statement 24: Important characteristics (all-India) over the last three rounds at a glance.

Appendix B
Coverage, Sample Design,
Estimation Procedure

Coverage, Sample Design and Estimation Procedure

1.0 Introduction:

1.0.1 The National Sample Survey (NSS), set up by the Government of India in 1950 to collect socio-economic data employing scientific sampling methods started its sixty-second round from 1st July, 2005. The survey continued upto 30th June 2006.

1.0.2 Following the first Economic Census 1977, small establishments and enterprises not employing any hired worker [and henceforth called 'own account enterprises' (OAEs)] engaged in manufacturing and repairing activities were surveyed on sample basis in the thirty-third round of NSS during 1978-79.

1.0.3 As a follow-up to the second Economic Census 1980, own account enterprises and Non-directory Establishments engaged in manufacturing and repairing activities (i.e., OAMEs and NDMEs respectively) were surveyed in the fortieth and forty-fifth rounds of NSS during July 1984-June 1985 and July 1989-June 1990 respectively. The Directory Manufacturing Establishments (DMEs) were surveyed during October 1984-September 1985 and October 1989 to September 1990 respectively by a group of special staff (Assistant Superintendents only) of the Field Operations Division (FOD) of the NSSO under the technical direction of the CSO.

1.0.4 As a follow-up to the third Economic Census 1990, the first *integrated* survey on unorganised manufacturing and repairing enterprises covering OAMEs, NDMEs and DMEs was undertaken during the fifty-first round of NSS (July 1994-June 1995).

1.0.5 Following this, two other surveys were undertaken – (i) Special Enterprise Survey on enterprises in the unorganised sector during the period August 1998 to June 1999 and (ii) Informal sector enterprises as part of NSS 55th round during July 1999 to June 2000. Manufacturing sector was part of coverage in both these surveys.

As a follow up of fourth Economic Census 1998, survey of manufacturing enterprises in the unorganised sector was conducted in the 56th round of NSS during July 2000 to June 2001.

1.1 **Subject Coverage:** The 62nd round (July 2005 - June 2006) of NSS was earmarked for survey on (i) **unorganised** manufacturing enterprises under the two-digit codes 15 to 37 (Section 'D') of NIC-2004 and enterprises under cotton ginning, cleaning and baling (NIC-2004, code 01405), (ii) annual survey of consumer expenditure and (iii) survey on employment – unemployment.

Following activities have been classified under Manufacturing (NIC –2004 Section D):

<u>Division</u>	<u>Description</u>
15	Manufacture of Food Products and Beverages
16	Manufacture of Tobacco Products
17	Manufacture of Textiles
18	Manufacture of Wearing Apparel; Dressing and Dyeing of Fur
19	Tanning and Dressing of Leather; Manufacture of Luggage, Handbags, Saddlery, Harness and Footwear
20	Manufacture of Wood and of Products of Wood and Cork, Except Furniture; Manufacture of Articles of Straw and Plaiting Materials
21	Manufacture of Paper and Paper Products

<u>Division</u>	<u>Description</u>
22	Publishing, Printing and Reproduction of Recorded Media
23	Manufacture of Coke, Refined Petroleum Products and Nuclear Fuel
24	Manufacture of Chemicals and Chemical Products
25	Manufacture of Rubber and Plastics Products
26	Manufacture of Other Non-Metallic Mineral Products
27	Manufacture of Basic Metals
28	Manufacture of Fabricated Metal Products, Except Machinery and Equipment
29	Manufacture of Machinery and Equipment N.E.C.
30	Manufacture of Office, Accounting and Computing Machinery
31	Manufacture of Electrical Machinery and Apparatus N.E.C.
32	Manufacture of Radio, Television and Communication Equipment and Apparatus
33	Manufacture of Medical, Precision and Optical Instruments, Watches and Clocks
34	Manufacture of Motor Vehicles, Trailers and Semi-Trailers
35	Manufacture of Other Transport Equipment
36	Manufacture of Furniture; Manufacturing N.E.C.
37	Recycling

Thus survey on **unorganised** manufacturing enterprises covered:

- (a) Manufacturing enterprises not registered under Sections 2m(i) and 2m(ii) of the Factories Act, 1948
- (b) Manufacturing enterprises registered under Section 85 of Factories Act, 1948
- (c) Non-ASI enterprises engaged in cotton ginning, cleaning and baling (NIC- 2004, code 01405)
- (d) Non-ASI enterprises manufacturing bidi and cigar (those registered under bidi and cigar workers (condition of employment) Act, 1966 as well as those un-registered)

and excluded:

- (a) Repairing enterprises not falling under Section 'D' of NIC- 2004
- (b) Departmental units such as Railway Workshops, RTC Workshops, Government Mint, Sanitary, Water supply, Gas, Storage, etc. in line with ASI coverage
- (c) Units covered under ASI
- (d) Public Sector Units

1.2 Geographical coverage: The survey covered the whole of the Indian Union *except* (i) Leh (Ladakh) and Kargil districts of Jammu & Kashmir, (ii) interior villages of Nagaland situated beyond five kilometres of the bus route and (iii) villages in Andaman and Nicobar Islands which remain inaccessible throughout the year.

1.3 Period of survey and work programme: The period of survey was of one year duration starting on 1st July 2005 and ending on 30th June 2006. The survey period of this round was divided into four sub-rounds of three months' duration each to spread the survey workload uniformly. The sub-rounds were as follows:

- sub-round 1 : July - September 2005
- sub-round 2 : October - December 2005
- sub-round 3 : January - March 2006
- sub-round 4 : April - June 2006

Because of the arduous field conditions, sub-round restriction was not strictly enforced in Andaman and Nicobar Islands, Lakshadweep, rural areas of Arunachal Pradesh and Nagaland.

1.4 Schedules of enquiry: During this round, the following schedules of enquiry were canvassed:

Schedule 0.0	: list of households and non-agricultural enterprises
Schedule 2.2	: manufacturing enterprises
Schedule 1.0	: consumer expenditure
Schedule 10	: employment and unemployment

1.5 Participation of States: In this round all the States and Union Territories except Andaman & Nicobar Islands, Dadra & Nagar Haveli and Lakshadweep participated at least on an equal matching basis. The following was the matching pattern of the participating States/ UTs.

Nagaland (U)	: triple
J & K, Manipur & Delhi	: double
Goa, Maharashtra (U), Kerala	: one and half
Remaining States/ UTs	: equal

2 Sample Design

2.1 Outline of sample design: Two frames were used for the 62nd round survey viz. List frame and Area frame.

2.1.2 List frame: This was used only for urban sector and that too for selection of manufacturing enterprises only. For unorganised manufacturing enterprises, a list of about 8000 big non-ASI manufacturing units in the urban sector prepared on the basis of the data of the census of manufacturing enterprises conducted by Development Commissioners of Small Scale Industries (DCSSI) in 2003 was used as list frame.

The 'big' DCSSI units in the urban sector had been identified by the criteria given below:

- (1) From the list of registered SSI units, units not registered under sections 2m(i) or 2m(ii) of Factories Act, 1948 and belonging to NIC '98 codes 01405, 15 – 37 were considered.
- (2) Out of the above units, the units whose gross value of output in 2001 were more than 6 times the average output (Rs. 14,32,314) of all urban SSI units were separated out.
- (3) From the above units, those with 6 or more workers were identified as the big units for list frame. About 8000 such units constituted the list frame.

All these units in the list frame were to be surveyed and there was not any sampling for list frame. To avoid duplication, these units were excluded from the list of enterprises prepared in the selected urban blocks/villages drawn from the area frame. There was no sub-round restriction for the list frame units.

All the enterprises in the list frame are common to both central and state samples.

2.1.3 Area frame: This was adopted for both rural and urban sectors. The list of villages as per census 2001 (for Manipur, 1991 census was used since 2001 census list was not available) was used as frame for the rural sector and the latest available list of UFS blocks was used as frame in the urban sector. However, EC-98 was used as frame for the 27 towns with population 10 lakhs or more (as per Census 2001).

A stratified multi-stage design had been adopted for the 62nd round survey. The first stage units (FSU) were the 2001 census (for Manipur, 1991 census) villages (Panchayat wards in case of Kerala) in the rural sector and Urban Frame Survey (UFS) blocks in the urban sector. The ultimate stage units (USU) were households/ unorganised-manufacturing enterprises (OAME/ NDME/ DMEs), in both the sectors. In the case of large villages/ blocks requiring hamlet-group (hg)/ sub-block (sb) formation, one intermediate stage was the selection of two hgs/ sbs from each FSU.

2.1.4 Stratification: Within each district of a State/ UT, two basic strata were formed:

i) rural stratum comprising of all rural areas of the district and (ii) urban stratum comprising of all the urban areas of the district. However, if there were one or more towns with population 10 lakhs or more as per population census 2001 in a district, each of them also formed a separate basic stratum and the remaining urban areas of the district was considered as another basic stratum. There are 27 towns with population 10 lakhs or more at all-India level as per census 2001.

2.1.5 Sub-stratification for area frame:

2.1.5.1 Rural sector:

Development Commissioner of Small Scale Industries (DCSSI) conducted a survey of all Small Scale Industries (SSI) units in 2003 covering all registered SSI units on a census basis and other SSI units on a sample basis. 9306 villages having a 'big' non-ASI registered SSI manufacturing unit as per DCSSI census had been identified by matching the identification particulars of census 2001 with those of DCSSI census.

'Big' DCSSI unit, on the basis of which villages had been identified, satisfied the conditions:

- (a) It was a registered SSI unit in rural area as per DCSSI census belonging to NIC '98 codes 01405, 15 – 37 and it was not registered under sections 2m(i) or 2m(ii) of Factories Act, 1948 and
- (b) It had 6 or more workers.

A subset of these 9306 villages having 'bigger' non-ASI registered SSI manufacturing unit had been considered for formation of a separate sub-stratum (termed as sub-stratum 1). The 'bigger' registered SSI units were those which, in addition to fulfilling the criteria (a) and (b) above, satisfied the criteria:

- (c) The SSI unit had gross value of output in 2001 more than the average output (Rs. 7,52,159) of rural SSI units identified in (a) and (b) above and
- (d) The SSI unit had 11 or more workers and

- (e) The output of the SSI unit had been continuously increasing over the last three years between 1999 and 2001.

Sub-stratum 1 villages had been identified at the State/ UT level after arranging the above villages in descending order of total of gross output of the bigger registered SSI units in the village during these three years and selecting the required number of them from the top.

Obviously, the district containing any such villages had sub-stratum 1. The total number of such sub-stratum 1 villages at all-India level was 462.

2.1.5.2 Sub-stratification of rural areas of each district comprised the following:

sub-stratum 1: The villages in the district which belonged to the list of 462 villages.

sub-stratum 2: The villages in the district which were not in sub-stratum 1 but belonged to the set of 9306 villages.

sub-stratum 3, 4, 5, ... : Remaining FSUs of the district were first arranged in ascending order of census 2001 population. Then $n/2$ sub-strata, n being the stratum allocation excluding the allocations for sub-strata 1 & 2, were formed in such a way that each sub-stratum had more or less equal population.

Sub-strata 1 & 2 were not formed in Kerala. Also sub-strata 1/ sub-strata 2 were not formed for some smaller States/ UTs.

2.1.5.3 **Urban sector:**

(a) For the 27 cities where EC-98 frame was used: Two sub-strata were formed within each stratum based on EC-98 information as under:

sub-stratum 1: all FSUs (i.e. UFS blocks as per the EC-98) with at least one DME or NDME in the unorganised sector.

sub-stratum 2: remaining FSUs.

(b) For towns where latest phase of UFS were used: Two sub-strata were formed as follows:

sub-stratum 1: all FSUs (i.e. UFS blocks as per the latest UFS) identified as Industrial Area (IA) or Bazar Area (BA) or Slum Area (SA).

sub-stratum 2: remaining FSUs

2.1.6. **Total sample size:** 9997 FSUs (rural & urban combined) for area frame and 8000 manufacturing units for list frame (urban only) were allocated at all-India level for central sample on the basis of investigator strength. For state sample 10518 FSUs were allocated for area frame. List frame units for the state sample were the same as those in the central sample.

2.1.7 **Allocation of samples to rural & urban sector:** The allocation between rural and urban sectors had been made in proportion to the number of unorganised non-agricultural workers as per EC-98.

2.1.8 **Allocation of total samples to States and UTs:** The total (all-India) rural/ urban sample size had been allocated to different States and UTs in proportion to number of unorganised non-

agriculture workers as per EC-98 subject to the availability of investigators ensuring more or less uniform work-load.

2.1.9 Allocation to strata: Within each sector of a State/ UT, the respective sample size were allocated to the different strata in proportion to the stratum population as per census 2001.

2.1.10 Allocation to sub-strata:

2.1.10.1 Rural sector: 462 FSUs of sub-stratum 1 were allocated to the districts where these FSUs were located. For each sub-stratum 2, maximum allocation was 4. A set of 856 FSUs in the central sample and 796 samples in the state sample were selected at all-India level for sub-stratum 2. Minimum allocation for sub-stratum 3 and above was 2.

2.1.10.2 Urban sector: For 27 million plus cities in the urban sector, stratum allocations were distributed over the sub-strata in proportion to the number of non-agricultural workers in the unorganised sector as per EC '98. For other towns, stratum allocation was divided among the sub-strata in proportion to number of FSUs in the sub-strata with double weightage to sub-stratum 1. Minimum sub-stratum allocation was 2.

2.1.11 Selection of FSUs: Samples were drawn in the form of two sub-samples in each stratum \times sub-stratum. However, all the FSUs of sub-stratum 1 in rural sector were in sub-sample 1. Similarly, all list frame units in urban sector were considered in sub-sample 1 only.

All the FSUs of sub-stratum 1 in rural sector were common to both central and State samples.

2.1.11.1 Rural sector:

- (a) sub-stratum 1: All 462 FSUs were surveyed.
- (b) sub-stratum 2: FSUs were selected with PPSWR where size was number of non-ASI registered SSI DME units in the village.
- (c) sub-stratum 3, 4, 5,: FSUs were selected by PPSWR with size as population as per census 2001.

2.1.11.2 Urban sector:

(a) **For 27 million plus cities:** FSUs were selected by PPSWR with the *number of manufacturing workers* in the *unorganised sector as per EC '98* as size. The number of manufacturing workers was taken as 1 for those blocks where there were no unorganised manufacturing enterprises. However, some manufacturing enterprises had been found to have large number of workers as per EC- 98 frame even though they were in the unorganised sector. Some adjustment to the size of workers for such enterprises were, therefore, made before calculating the size of FSUs. For this purpose, any unorganised manufacturing enterprise having more than 200 workers was deemed to have a size equal to 200. Enterprise sizes were thereafter added up to get the FSU size and sub-stratum/ stratum size.

(b) **For other cities/ towns:** FSUs were selected by SRSWOR.

2.1.12 Formation of segment 9: Segment 9 was formed in the selected sample FSUs of rural sub-strata 1 & 2 of each stratum. It comprised only the big non-ASI registered SSI manufacturing unit(s) in the village as per DCSSI census on the basis of which the villages had been identified. The names of such units in the selected sample FSUs were supplied to field offices. If any such unit was found to be eligible for ASI, it was not be covered under segment 9. If there was a change

in the status of the enterprise from DME to NDME or OAME, it was still considered eligible enterprise belonging to segment 9. Only top 10 eligible enterprises in terms of number of workers constituted segment 9.

2.1.13 Selection of hamlet-groups/ sub-blocks/ households/ enterprises - important steps

2.1.13.1 Criterion for hamlet-group/ sub-block formation: Large villages/blocks were divided into a suitable number (say, D) of 'hamlet-groups' in the rural sector and 'sub-blocks' in the urban sector. For this, approximate present population (P) and approximate total number of non-agricultural enterprises (E) for the whole FSU were ascertained first from knowledgeable persons. Depending upon the values of 'P' and 'E', it was divided into a suitable number (say, D) of 'hamlet-groups' in the rural sector and 'sub-blocks' in the urban sector as stated below.

population (P)	no. of hgs/ sbs to be formed	no. of non-agricultural enterprises (E)	no. of hgs/ sbs formed
less than 1200	1	less than 120	1
1200 - 1799	3	120 - 179	3
1800 - 2399	4	180 - 239	4
2400 - 2999	5	240 - 299	5
and so on	...	and so on	...

However, while considering enterprise criteria, segment 9 enterprises, if any, were excluded i.e. the value of 'E' was adjusted in respect of the number of enterprises in segment 9. For rural areas of Himachal Pradesh, Sikkim and Poonch, Rajouri, Udhampur, Doda districts of Jammu and Kashmir and Idukki district of Kerala, the number of hamlet-groups were formed as follows.

approximate present population of the sample village	no. of hgs to be formed
less than 600 (no hamlet-groups)	1
600 to 899	3
900 to 1199	4
1200 to 1499	5
.....and so on	

For enterprise criterion, procedure was not changed for the above areas.

The higher of the two values as per population and enterprise criteria was accepted as the number of hgs/ sbs to be actually formed. Hamlet-groups/ sub-blocks were formed by more or less equalizing population. Out of all hg's/ sb's formed in the FSU, two hg's/ sb's were selected for listing in the following manner - one with the maximum number of DMEs (or with maximum number of NDME if there was no DME or with maximum number of OAMEs if there was no DME/ NDME in the FSU or with maximum percentage share of population if there was no manufacturing enterprise in the entire FSU) was always selected and termed as **Segment 1**; one more hg/ sb was selected *randomly* and termed as **Segment 2**.

2.1.14 Listing of households/ enterprises and formation of their frame: Having determined the area(s) to be considered for listing, the next step was to list all the households and non-agricultural enterprises (NAEs). Although all non-agricultural enterprises were to be listed, only the

unorganised manufacturing enterprises under Industry Division 15 to 37 and NIC code 01405 (cotton ginning, cleaning and baling) as per NIC-2004 were covered. Thus, manufacturing enterprise registered under Sec. 2m(i) & 2m(ii) of the Factories Act, 1948 or Bidi and Cigar workers (conditions of employment) Act 1966 under the coverage of ASI or Govt. manufacturing enterprise/ PSU were not considered for survey. Further, only those manufacturing enterprises which operated for at least 30 days (15 days for seasonal enterprises) during the reference year (i.e. last 365 days preceding the date of survey) qualified for survey. Such enterprises will hereafter be referred to as '**eligible enterprises**'. Listing of households as well as eligible enterprises for the purpose of sample selection were independent for segments 1 & 2.

2.1.15 Formation of Second Stage Strata and allocation of enterprises for schedule 2.2:

All the eligible enterprises listed in the selected village/ block/ segment were stratified into two broad second stage strata by enterprise type OAME and NDME/ DME. Each of these two broad second-stage strata was divided into 3 second-stage strata by *Broad Manufacturing Group (BMG)* i.e. *BMG 1, BMG 2 & BMG 3*. Thus there were a maximum of 6 second-stage strata [SSS 1: (OAME x BMG 1), SSS 2: (OAME x BMG 2), SSS 3: (OAME x BMG 3), SSS 4: (NDME/ DME x BMG 1), SSS 5: (NDME/ DME x BMG 2) and SSS 6: (NDME/ DME x BMG 3)] in each segment.

The three BMGs were to be formed after classifying the unorganized manufacturing enterprises as per NIC-2004 as follows:

BMG	NIC-2004 codes
1	15 to 20
2	23, 27, 30 to 35, 01405
3	rest of NIC codes under Section 'D'

The composition of SSS and number of enterprises allocated for schedule 2.2 in each FSU was as follows (excluding DMEs in segment 9).

enterprise type	BMG	SSS no.	number of enterprises to be surveyed for schedule 2.2	
			without hg/ sb formation	with hg/ sb formation (for each segment)
OAME	1	1	2	1
	2	2	2	1
	3	3	2	1
NDME/ DME	1	4	2	1
	2	5	2	1
	3	6	2	1

From each SSS the sample enterprises for schedule 2.2 were selected by SRSWOR.

3. Estimation Procedure

3.1 Notations:

s = subscript for s-th stratum

t = subscript for t-th sub-stratum

m = subscript for sub-sample (m = 1, 2)

i = subscript for i-th FSU [village (panchayat ward) / block]

d = subscript for a segment (d = 1, 2, 9)

j = subscript for j-th second stage stratum in an FSU/ segment (j = 1, 2, 3, 4, 5 or 6)

k = subscript for k-th sample household/enterprise under a particular second stage stratum within an FSU/ segment

D = total number of hamlet-groups/sub-blocks formed in the sample village (panchayat ward) / block

$D^* = 1$ if $D = 1$

= (D – 1) for FSUs with $D > 1$

N = total number of FSUs in any urban sub-stratum belonging to the towns other than million plus cities

Z = total size of a rural sub-stratum or urban sub-stratum of million plus cities (= sum of sizes for all the FSUs of a sub-stratum)

z = size of sample village/block used for selection.

n = number of sample village / block surveyed including zero cases but excluding casualty for a particular sub-sample and sub-stratum.

H = total number of households listed in a second-stage stratum of a village/block/ segment of sample FSU

h = number of households surveyed in a second-stage stratum of a village/block/ segment of sample FSU

E = total number of enterprises listed in a second-stage stratum of a village/block/ segment of sample FSU

e = number of enterprises surveyed in a second-stage stratum of a village/block/ segment of sample FSU

x, y = observed value of characteristics x, y under estimation

\hat{X} , \hat{Y} = estimate of population total X, Y for the characteristics x, y

Under the above symbols,

$y_{stmidjk}$ = observed value of the characteristic y for the k-th household in the j-th second stage stratum of the d-th segment (d = 1, 2, 9) of the i-th FSU belonging to the m-th sub-sample for the t-th sub-stratum of s-th stratum;

However, for ease of understanding, a few symbols have been suppressed in following paragraphs where they are obvious.

3.2A Formulae for estimation of aggregates for a particular sub-sample and stratum in case of Area Frame:

3.2A.1 Rural:

(a) Estimation formula for a sub-stratum 1 of a stratum:

(i) For enterprises selected in j-th second stage stratum:

$$\hat{Y}_j = \sum_{i=1}^{n_j} \left[\sum_{k=1}^{e_{i9j}} y_{i9jk} + \frac{E_{i1j}}{e_{i1j}} \sum_{k=1}^{e_{i1j}} y_{i1jk} + D_i^* \times \frac{E_{i2j}}{e_{i2j}} \sum_{k=1}^{e_{i2j}} y_{i2jk} \right]$$

(ii) For all selected enterprises:

$$\hat{Y} = \sum_j \hat{Y}_j$$

(b) Estimation formula for sub-stratum 2 of a stratum:

(i) For enterprises selected in j-th second stage stratum:

$$\hat{y}_j = \frac{Z}{n_j} \sum_{i=1}^{n_j} \frac{1}{z_i} \left[\sum_{k=1}^{e_{i9j}} y_{i9jk} + \frac{E_{i1j}}{e_{i1j}} \sum_{k=1}^{e_{i1j}} y_{i1jk} + D_i^* \times \frac{E_{i2j}}{e_{i2j}} \sum_{k=1}^{e_{i2j}} y_{i2jk} \right]$$

(ii) For all selected enterprises:

$$\hat{Y} = \sum_j \hat{Y}_j$$

Note: For segment 9, an adjustment may be necessary if $E \neq e$ for a second-stage stratum due to casualty at the detailed enquiry stage. In that case, contribution of segment 9 (i.e. $\sum_{k=1}^{e_{i9j}} y_{i9jk}$) may be

replaced by $\frac{L_{i9j}}{e_{i9j}} \sum_{k=1}^{e_{i9j}} y_{i9jk}$, where $L_{i9j} =$ (number of list frame enterprises of segment 9 with survey code 1) + (number of list frame enterprises of segment 9 with survey code 3 and reason for casualty codes 3 & 9).

$L_{i9j} = e_{i9j}$ if there is no casualty or there is casualty but with reason for casualty code as 1 or 2.

(c) Estimation formula for a sub-stratum other than sub-strata 1 & 2 of a stratum:

(i) For enterprises selected in j-th second stage stratum:

$$\hat{y}_j = \frac{Z}{n_j} \sum_{i=1}^{n_j} \frac{1}{z_i} \left[\frac{E_{i1j}}{e_{i1j}} \sum_{k=1}^{e_{i1j}} y_{i1jk} + D_i^* \times \frac{E_{i2j}}{e_{i2j}} \sum_{k=1}^{e_{i2j}} y_{i2jk} \right]$$

(ii) For all selected enterprises:

$$\hat{Y} = \sum_j \hat{Y}_j$$

3.2A.2 Urban:

(a) Estimation formula for a sub-stratum of million plus cities:

(i) For enterprises selected in j-th second stage stratum:

$$\hat{Y}_j = \frac{Z}{n_j} \sum_{i=1}^{n_j} \frac{1}{z_i} \left[\frac{E_{i1j}}{e_{i1j}} \sum_{k=1}^{e_{i1j}} y_{i1jk} + D_i^* \times \frac{E_{i2j}}{e_{i2j}} \sum_{k=1}^{e_{i2j}} y_{i2jk} \right]$$

(ii) For all selected enterprises:

$$\hat{Y} = \sum_j \hat{Y}_j$$

(b) Estimation formula for a sub-stratum of other strata:

(i) For enterprises selected in j-th second stage stratum:

$$\hat{Y}_j = \frac{N}{n_j} \sum_{i=1}^{n_j} \left[\frac{E_{i1j}}{e_{i1j}} \sum_{k=1}^{e_{i1j}} y_{i1jk} + D_i^* \times \frac{E_{i2j}}{e_{i2j}} \sum_{k=1}^{e_{i2j}} y_{i2jk} \right]$$

(ii) For all selected enterprises:

$$\hat{Y} = \sum_j \hat{Y}_j$$

3.2A.3 Estimate for a stratum:

$$\hat{Y}_s = \sum_t \hat{Y}_{st}$$

3.2A.4 Overall Estimate for Aggregates for Area Frame:

Overall estimate for aggregates for a stratum (\hat{Y}_s) based on two sub-samples is obtained as:

$$\hat{Y}_s = \frac{1}{2} \sum_{m=1}^2 \hat{Y}_{sm}$$

3.2A.5 Overall Area Frame Estimate of Aggregates at State/UT/all-India level:

The overall estimate \hat{Y} at the State/ UT/ all-India level is obtained by summing the area frame estimates (\hat{Y}_s) of stratum over all strata belonging to the State/ UT/ all-India.

3.2B Estimates from List Frame enterprises in urban sector:

$$Y = \frac{L}{L'} \sum_{l=1}^{L'} y_l,$$

where

L = (number of list frame enterprises with survey code 1) + (number of list frame enterprises with survey code 3 and reason for casualty codes 3 & 9 in item 20, block 1, schedule 2.2)

L' = (number of list frame enterprises with survey code 1 in item 19, block 1, schedule 2.2)

Estimate may be generated for any domain e.g. district, State, All-India as well as for any NIC category, Division, Group etc., by restricting L, L' to that particular domain.

If there is no casualty or there is casualty but with reason for casualty code as 1 or 2 in item 20, block 1, schedule 2.2, then L = L'.

3.3 Overall Estimate of Aggregates at State/UT/all-India level in the urban sector:

The overall estimate \hat{Y} at the State/ UT/ all-India level for urban sector for the schedule 2.2 is obtained by summing the area frame estimates and list frame estimates of aggregates for the State/ UT/ all-India.

3.4 Estimates of Ratios:

Let \hat{Y} and \hat{X} be the overall estimate of the aggregates Y and X (sum of area frame and list frame estimates) for two characteristics y and x respectively at the State/ UT/ all-India level.

Then the combined ratio estimate (\hat{R}) of the ratio ($R = \frac{Y}{X}$) will be obtained as

$$\hat{R} = \frac{\hat{Y}}{\hat{X}}.$$

3.5 Estimates of Error: There is no sampling for the list frame enterprises since it was the census of all units. The variance will comprise only that due to area frame units. The estimated variances of the estimates will be as follows:

3.5.1 For aggregate \hat{Y} :

$$V\hat{a}r(\hat{Y}) = \sum_s V\hat{a}r(\hat{Y}_s)$$

where $V\hat{a}r(\hat{Y}_s)$ are as given below.

3.5.1.1 For strata with PPSWR selection at first stage:

$$V\hat{a}r_{ppswr}(\hat{Y}_s) = \left[\sum_t \frac{1}{n_{st}(n_{st}-1)} \sum_{i=1}^{n_{st}} \left(\frac{Z_{sti} \hat{Y}_{sti}}{z_{sti}} - \hat{Y}_{st} \right)^2 \right],$$

where $\hat{Y}_{sti} = \sum_j Y_{stij}$ and

$$\hat{Y}_{stij} = \left[\sum_{k=1}^{e_{sti9j}} y_{sti9jk} + \frac{E_{sti1j}}{e_{sti1j}} \sum_{k=1}^{e_{sti1j}} y_{sti1jk} + D_{sti}^* \times \frac{E_{sti2j}}{e_{sti2j}} \sum_{k=1}^{e_{sti2j}} y_{sti2jk} \right]$$

3.5.1.2 For strata with SRSWOR selection at first stage:

$$Var_{srswor}(\hat{Y}_s) = \sum_t \frac{1}{4} (\hat{Y}_{st1} - \hat{Y}_{st2})^2,$$

where \hat{Y}_{st1} and \hat{Y}_{st2} are the estimates for sub-sample 1 and sub-sample 2 respectively for stratum 's' and sub-stratum 't'.

3.5.2 For ratio \hat{R} :

$$M\hat{S}E(\hat{R}) = \frac{1}{(\hat{X})^2} \left[\sum_s M\hat{S}E_s(\hat{R}) + \sum_{s'} M\hat{S}E_{s'}(\hat{R}) \right]$$

where s, s' indicate respectively the strata with PPSWR and SRSWOR selection at first stage.

3.5.2.1 For strata with PPSWR selection at first stage:

$$M\hat{S}E_s(\hat{R}) = \sum_t \frac{1}{n_{st}(n_{st}-1)} \sum_{i=1}^{n_{st}} \left[\frac{Z_{sti}}{z_{sti}} (\hat{Y}_{sti} - \hat{R}\hat{X}_{sti}) - (\hat{Y}_{st} - \hat{R}\hat{X}_{st}) \right]^2$$

where

$$\hat{Y}_{sti} = \sum_j \hat{Y}_{stij}, \quad \hat{X}_{sti} = \sum_j \hat{X}_{stij},$$

$$\hat{Y}_{stij} = \left[\sum_{k=1}^{e_{sti9j}} y_{sti9jk} + \frac{E_{sti1j}}{e_{sti1j}} \sum_{k=1}^{e_{sti1j}} y_{sti1jk} + D_{sti}^* \times \frac{E_{sti2j}}{e_{sti2j}} \sum_{k=1}^{e_{sti2j}} y_{sti2jk} \right]$$

and

$$\hat{X}_{stij} = \left[\sum_{k=1}^{e_{sti9j}} x_{sti9jk} + \frac{E_{sti1j}}{e_{sti1j}} \sum_{k=1}^{e_{sti1j}} x_{sti1jk} + D_{sti}^* \times \frac{E_{sti2j}}{e_{sti2j}} \sum_{k=1}^{e_{sti2j}} x_{sti2jk} \right]$$

3.5.2.2 For strata with SRSWOR selection at first stage:

$$M\hat{S}E_{s'}(\hat{R}) = \sum_t \frac{1}{4} \left[(\hat{Y}_{s't1} - \hat{Y}_{s't2})^2 + \hat{R}^2 (\hat{X}_{s't1} - \hat{X}_{s't2})^2 - 2\hat{R} (\hat{Y}_{s't1} - \hat{Y}_{s't2}) (\hat{X}_{s't1} - \hat{X}_{s't2}) \right]$$

where $\hat{Y}_{s't1}$ and $\hat{Y}_{s't2}$ are the estimates for sub-sample 1 and sub-sample 2 respectively for stratum 's' and sub-stratum 't'.

3.6 Estimates of RSE:

$$R\hat{S}E(\hat{Y}) = \frac{\sqrt{V\hat{a}r(\hat{Y})}}{\hat{Y}} \times 100$$

$$R\hat{S}E(\hat{R}) = \frac{\sqrt{M\hat{S}E(\hat{R})}}{\hat{R}} \times 100$$

3.7 Multipliers for Area frame enterprises:

The formulae for multipliers for a sub-sample and schedule type are given below:

sch type	sector	sub-stratum	formula for multipliers		
			segment 9	segment 1	segment 2
2.2	rural	1	$\frac{L_{stmi9j}}{e_{stmi9j}}$	$\frac{E_{stmi1j}}{e_{stmi1j}}$	$D_{stmi}^* \times \frac{E_{stmi2j}}{e_{stmi2j}}$
		2, 3	$\frac{Z_{st}}{n_{stm}} \times \frac{1}{z_{stmi}} \times \frac{L_{stmi9j}}{e_{stmi9j}}$	$\frac{Z_{st}}{n_{stmj}} \times \frac{1}{z_{stmi}} \times \frac{E_{stmi1j}}{e_{stmi1j}}$	$\frac{Z_{st}}{n_{stmj}} \times \frac{1}{z_{stmi}} \times D_{stmi}^* \times \frac{E_{stmi2j}}{e_{stmi2j}}$
	urban	1, 2 (of EC-98 frame)		$\frac{Z_{st}}{n_{stmj}} \times \frac{1}{z_{stmi}} \times \frac{E_{stmi1j}}{e_{stmi1j}}$	$\frac{Z_{st}}{n_{stmj}} \times \frac{1}{z_{stmi}} \times D_{stmi}^* \times \frac{E_{stmi2j}}{e_{stmi2j}}$
		1, 2 (of UFS frame)		$\frac{N_{st}}{n_{stmj}} \times \frac{E_{stmi1j}}{e_{stmi1j}}$	$\frac{N_{st}}{n_{stmj}} \times D_{stmi}^* \times \frac{E_{stmi2j}}{e_{stmi2j}}$

Note: (i) For estimating any characteristic for any domain not specifically considered in sample design, indicator variable may be used.

(ii) Multipliers have to be computed on the basis of information available in the listing schedule irrespective of any misclassification observed between the listing schedule and detailed enquiry schedule.

(iii) For estimating number of villages possessing a characteristics, $D_{stmi}^* = 1$ in the relevant multipliers and there will be only one multiplier for the village.

(iv) L_{i9j} = (number of list frame enterprises of segment 9 with survey code 1) + (number of list frame enterprises of segment 9 with survey code 3 and reason for casualty codes 3 & 9) in i-th FSU and j-th second-stage stratum of m-th sub-sample of t-th sub-stratum belonging to s-th stratum.'

4. Treatment for zero cases, casualty cases etc.:

4.1 While counting the number of FSUs surveyed (n_{stm}) in a sub-stratum, all the FSUs with survey codes 1 to 6 in schedule 0.0 will be considered. In addition, if no SSU is available in the frame for a particular schedule then also that FSU will be treated as surveyed in respect of that schedule. However, if the SSUs of a particular schedule type are available in the frame of the FSU but none of these could be surveyed then that FSU has to be treated as casualty and it will not be treated as surveyed in respect of that schedule.

NSS Report No. 525: Unorganised Manufacturing sector in India, 2005-06: Employment, Assets and Borrowings.

4.2 *Casualty cases*: FSUs with survey code 7 as per schedule 0.0 are treated as casualties. In addition to this, an FSU, although surveyed, may have to be treated as casualty for a particular schedule type and a particular *second stage stratum* as given in the following para:

4.2.1 FSUs with survey codes 1 and 4 as per schedule 0.0 having number of households in the frame of j-th second stage stratum greater than 0 but number of households surveyed according to data file, considering both segments together, as nil (i.e. $H_{i1j} + H_{i2j} > 0$ but $h_{i1j} + h_{i2j} = 0$) will be taken as casualties for j-th second stage stratum.

4.2.2 Similarly, FSUs with survey codes 1 and 4 as per schedule 0.0 having number of enterprises in the frame of j-th second stage stratum greater than 0 but number of enterprises surveyed according to data file, considering all three segments together, as nil (i.e. $E_{i9j} + E_{i1j} + E_{i2j} > 0$ but $e_{i9j} + e_{i1j} + e_{i2j} = 0$) will be taken as casualties for j-th second stage stratum

All the FSUs with survey codes 1 to 6 as per schedule 0.0 minus the number of casualties as identified above will be taken as the number of surveyed FSUs (n_{stmj}) for that sub-stratum \times second stage stratum.

4.2.3 When casualty for j-th second stage stratum occurs for a particular segment but not for the other segment, the FSU will not be treated as casualty but some adjustments in the value of H and E for the other segment will be done as follows:

- (i) Suppose for segment 1, $H_{i1j} > 0$ but $h_{i1j} = 0$ while for segment 2, $H_{i2j} > 0$ and $h_{i2j} > 0$. In that case $D_i^* \times H_{i2j}$ will be replaced by $(H_{i1j} + D_i^* \times H_{i2j})$ in the formula for multiplier of segment 2.
- (ii) Suppose for segment 1, $H_{i1j} > 0$ and $h_{i1j} > 0$ while for segment 2, $H_{i2j} > 0$ but $h_{i2j} = 0$. In that case H_{i1j} will be replaced by $(H_{i1j} + D_i^* \times H_{i2j})$ in the formula for multiplier of segment 1.

Adjustments may be made in the multipliers for schedule 2.2 if similar situation arises for enterprises. However, segment 9 need not be clubbed with segment 1 or segment 2 if segment 9 enterprises are surveyed but no enterprises could be surveyed from segments 1 / 2.

It may be noted that n_{stmj} would be same for segments 1 & 2 of an FSU.

5. Treatment in cases of void second-stage strata/sub-strata /strata/NSS region at FSU or household level

5.1 A sub-stratum may be void because of the casualty of all the FSUs belonging to the sub-stratum. This may occur in one sub-sample or in both the sub-samples. If it relates to only one sub-sample, then estimate for the void sub-stratum may be replaced with the estimate as obtained from the other sub-sample for the same sub-stratum.

5.2 When a sub-stratum is void in both the sub-samples, the following procedure is recommended:

Case(I): Sub-stratum void cases at FSU levels (i.e. all FSUs having survey code 7):

- i) If one of the rural sub-strata 3, 4, 5, ..., etc. is void then it may be merged with a sub-stratum having the next higher population size class of villages within the same district. Sub-stratum 3 may be merged with sub-stratum 4, sub-stratum 4 with sub-stratum 5 and so on. If last sub-stratum is void, it will be merged with the previous sub-stratum.
- ii) If sub-stratum 1 and/or sub-stratum 2 are void, SDRD may be consulted for necessary guidelines
- (iii) If an urban sub-stratum is void then it may be merged with the sub-stratum with the other sub-stratum of the same stratum.
- iv) If all the sub-strata in a district are void, it may be excluded from the coverage of the survey. The state level estimates will be based on the estimates of districts for which estimates are available and remarks to that effect may be added in appropriate places.

Case (II): Stratum void case at second stage stratum level (i.e. all the FSUs are casualties for a particular second stage stratum):

An FSU may be a casualty for a particular *second stage stratum* although survey code is not 7. If all the FSUs of a sub-stratum become casualties in this manner for a particular *second stage stratum*, the sub-stratum will become void. In such cases, sub-strata will be merged with other sub-strata for all the second stage strata as in *Case (I) above*.

However, if whole district/stratum becomes void in this manner for a particular second stage stratum, adjustment for this type of stratum void case may be done according to the following guidelines.

The adjustment will be made involving other strata (within NSS region) of the State/U.T. Suppose A, B, C and D are the four strata in the State/UT/Region and stratum C is void for j-th *second stage stratum*. If \hat{Y}_{aj} , \hat{Y}_{bj} and \hat{Y}_{dj} are the aggregate estimates for the strata A, B and D respectively, then the estimate \hat{Y}_{cj} for stratum C may be obtained as

$\left(\frac{\hat{Y}_{aj} + \hat{Y}_{bj} + \hat{Y}_{dj}}{Z_a + Z_b + Z_d} \times Z_c \right)$ where Z_a , Z_b , Z_c and Z_d are the sizes of strata A, B, C and D respectively.

5.3 It may be noted that sub-round wise allocations of sample FSUs in 62nd round were not equal for all the sub-rounds. Sub-round wise estimates may not be comparable and hence they may not be attempted.

NATIONAL SAMPLE SURVEY ORGANISATION
SOCIO-ECONOMIC SURVEY
SIXTY-SECOND ROUND: JULY 2005 – JUNE 2006**

SCHEDULE 2.2: MANUFACTURING ENTERPRISES

[0] descriptive identification of sample enterprise	
1. state / u.t.:	6. ward /inv. unit / UFS block:
2. district:	7. name of owner:
3. tehsil / town*:	8. name of informant:
4. village name:	9. name and address of the enterprise:
5. serial no. of hamlet:	

[1] identification of sample enterprise								
item no.	item	code			item no.	item	code	
1.	serial number of sample village/block (area frame) / enterprise (list frame)					12.	stratum	
						13.	sub-stratum	
						14.	segment number (1 / 2 / 9)	
2.	frame used (list-1, area-2)				15.	second stage stratum (code)		
3.	round number	6	2		16.	sample enterprise number (segment 1/2) / enterprise number (segment 9)		
4.	schedule number	0	2	2				
5.	sample (central-1, state-2)				17.	informant code		
6.	sector (rural - 1, urban - 2)				18.	response code		
7.	state – region				19.	survey code		
8.	district				20.	reason for casualty (list frame / segment 9 of area frame) / substitution of original enterprise (segment 1/2 of area frame)		
9.	sub – round							
10.	sub – sample (put '1' for list frame)							
11.	FOD sub-region							

CODES FOR BLOCK 1

item 17 : **informant code** : owner/partner – 1, manager – 2, others working in the enterprise – 9

item 18 : **response code** (to be filled up after filling up the entire schedule):

informant : co-operative and capable – 1, co-operative but not capable – 2, busy – 3, reluctant – 4, others – 9

item 19 : **survey code**: original enterprise surveyed – 1, substitute surveyed – 2, casualty – 3

item 20 : **reason for**

casualty (list frame and segment 9 of area frame): enterprise: Government/ PSU/ registered under Section 2m(i) or 2m(ii) of Factories Act, 1948/ Bidi and Cigar Workers (Condition of Employment) Act, 1966 and under the coverage of ASI – 1, non-operative/closed during the reference year/ non-traceable – 2, in operation during the reference year but data could not be collected – 3, others(specify) – 9

substitution of original enterprise (segment 1/2 of area frame): informant : busy – 1, not available – 2, non-cooperative – 3, others – 9

* Tick mark (✓) may be put in appropriate place.

CODES FOR BLOCK 2

item 207: type of ownership			
proprietary (male).....	1	partnership between members not all from the same household...	4
proprietary (female).....	2	co-operative society.....	5
partnership with members of the same household..	3	limited company (outside public sector).....	6
		others.....	9
item 212: general educational level of the working owner			
not literate.....	01	primary.....	04
diploma/ certificate course.....			08
literate without formal schooling	02	middle.....	05
graduate.....			10
literate but below primary.....	03	secondary.....	06
postgraduate or above.....			11
		higher secondary....	07
item 213: whether accounts maintained			
Yes, accounts usually maintained,			
and information was collected from books of accounts..	1	No usable books of accounts maintained.....	3
but information was collected orally.....	2		
item 215: location of the enterprise			
within household premises	1		
outside household premises:			
with fixed premises and with permanent structure.....	2	mobile market	5
with fixed premises and with temporary structure/kiosk/stall	3		
with fixed premises but without any structure	4	without fixed premises (street vendors, etc.) .	6
items 217 and 218: registered/recognised under
