Overview

ABSTRACT

The National Sample Survey Organisation (NSSO) has been carrying out All-India surveys on consumer expenditure. While some of these smaller-scale surveys are spread over a full year and others over six months only, the quinquennial (full-scale) surveys have all been of a full year's duration. Household consumer expenditure is measured as the expenditure incurred by a household on domestic account during a specified period, called reference period. It includes the imputed values of goods and services, which are not purchased but procured otherwise for consumption. In other words, it is the sum total of monetary values of all the items (i.e. goods and services) consumed by the household on domestic account during the reference period. Any expenditure incurred towards the productive enterprises of the households is also excluded from household consumer expenditure. To minimise recall errors, a very detailed item classification is adopted to collect information, including items of food, items of fuel, items of clothing, bedding and footwear, items of educational and medical expenses, items of durable goods and other items. The schedule has also collected some other household particulars including age, sex and educational level etc. of each household member.

KIND OF DATA

Sample survey data [ssd]

UNITS OF ANALYSIS

Randomly selected households based on sampling procedure and members of the household

Scope

NOTES

Schedule 1.0 of the 55th NSS round consists of the following blocks:

Block 0: Descriptive identification of sample household: This block is meant for recording descriptive identification particulars of a sample household.

Block 1: Identification of sample household

Block 2: Particulars of field operation: The identity of the Investigator, Assistant Superintendent and Superintendent associated, date of survey/inspection/scrutiny of schedules, despatch, etc., has been recorded in this block against the appropriate items in the relevant columns.

Block 3: Household characteristics:

Characteristics which are mainly intended to be used to classify the households for tabulation has been recorded in this

block.

Block 4: Demographic and other particulars of household members:

All members of the sample household have been listed in this block. Demographic particulars (viz., relation to head, sex, age, marital status and general education), working status, type of income received and number of meals taken have been recorded for each member using one line for one member.

Block 5: Consumption of food, pan, tobacco and intoxicants during the last 7 days and 30 days has been recorded in this block.

Block 5.1: Consumption of fuel and light during the last 30 days has been recorded in this block.

Block 6: Consumption of clothing, bedding etc. during the last 365 days has been recorded in this block.

Block 7: Consumption of footwear during the 365 days has been recorded in this block.

Block 8.1: Expenditure on education & medical (institutional) goods and services during the last 365 days has been recorded in this block.

Block 8.2: Expenditure on miscellaneous goods and services including medical (non-institutional), rents and taxes during the last 30 days has been recorded in this block.

Block 9: Expenditure for purchase and construction (including repair and maintenance) of durable goods for domestic use during the last 365 days has been recorded in this block.

Block 10.1: Particulars of production and consumption from kitchen garden, backyard etc.:

This block is intended to collect information on quantity and value of each item produced in the kitchen garden during the agriculture year July 1998 - June 1999. This apart, information on item wise consumption made out of the produce from kitchen garden during last 30 days preceding the date of survey has been collected irrespective of whether the item has been produced during the agriculture year July 1998 - June 1999.

Block 10.2: Consumption of selected non-food items from home-produced stock:

This block has been designed to collect information on consumption of some selected non-food items out of home-produced stock during last 30 days preceding the date of survey.

Block 11: Purchase of selected commodities supplied through public distribution system:

This block is designed to collect information on purchase of four commodities, namely, rice, wheat, sugar and kerosene through public distribution system and from other sources.

Block 12: Perception of household regarding sufficiency of food:

This block has been filled after completion of the enquiry on all the preceding blocks. This question is asked in order to know the perception of the household regarding sufficiency of food.

Block 13 : Particulars of goods and services received as part of wages and salaries or perquisites and gifts given and gifts received by the household (only for non-food items): This block is restricted to non-food items only, that is, items 310 to 643 of detailed blocks. It has been designed to record the particulars of goods and services received as part of wages and salaries or perquisites and gifts given and gifts received by the household during the last 30 days prior to the date of survey.

Block 14: Summary of consumer expenditure:

This block is meant to derive the value of household per capita consumption expenditure for a period of 30 days.

Block 15: Remarks by investigator:

Any remark which is considered necessary for explaining any peculiarity in the consumption pattern of the household or any other characteristic of the household has been noted here. Such remarks help understanding the entries made in different blocks of the schedule, especially when any entry is very high or very low.

Block 16: Remarks by supervisory officer:

The supervisory officers note their views on any aspect relating to the household and on any observed peculiarity in the consumption pattern of the household in this block.

Coverage

GEOGRAPHIC COVERAGE

The survey covers the whole of the Indian Union excepting (i) Ladakh & Kargil districts of Jammu & Kashmir, (ii) interior villages of Nagaland situated beyond 5 kms. of a bus route & (iii) villages of Andaman & Nicobar Islands remaining inaccessible throughout the year. All the villages of the country, uninhabited according to 1991 census, are also left out of the survey coverage of the NSS 55th round.

UNIVERSE

The survey used the interview method of data collection from a sample of randomly selected households and members of the household.

Sampling

Sampling Procedure

An outline of sampling design:

A stratified sampling design has been adopted for selection of the sample first-stage units (FSU's). The FSU's are villages (panchayat wards for Kerala) for rural areas and Urban Frame Survey (UFS) blocks for urban areas. The Ultimate stage units (USU's) are enterprises for schedule 2.0 and households for schedule 1.0/ 10/ 10.1, which are selected by the method of circular systematic sampling from the corresponding frame in the FSU. Large FSU's are subdivided into hamlet groups (rural)/ sub-blocks (urban), that are grouped into two segments, and USU's are selected independently from each of these segments.

Sampling Frame:

List of villages (panchayat wards for Kerala) as per 1991 Census and latest lists of UFS blocks are respectively used for selection of rural and urban sample FSU's. For selection of sample villages from the State of Jammu & Kashmir, list of villages as per 1981 Census has been used as the sampling frame.

Sample size (FSU's):

A total number of 10,384 FSU's were selected for survey in the central sample at all-India level (rural & urban combined) in the 55th round. For state samples, there were matching sample size as per the usual matching pattern being followed over the last few rounds. Sample size for the whole round for each State/UT x Sector (i.e. rural/ urban) are allocated equally among the 4 sub-rounds. Sample FSU's for each sub-round are selected afresh in the form of 2 independent sub-samples.

Selection of FSU's:

For each sub-round, sample FSU's from each stratum are selected in the form of 2 independent sub-samples by following circular systematic sampling with (a) probability proportional to population for all rural strata other than stratum 1, and (b) equal probability for rural stratum 1 as well as all urban strata.

Deviations from Sample Design

There was no deviation from the original sampling design.

Questionnaires

Overview

Schedule 1.0 of the 55th NSS round consists of the following blocks:

Block 0: Descriptive identification of sample household: This block is meant for recording descriptive identification particulars of a sample household.

Block 1: Identification of sample household

Block 2: Particulars of field operation

Block 3: Household characteristics:

Characteristics which are mainly intended to be used to classify the households for tabulation has been recorded in this block.

Block 4: Demographic and other particulars of household members:

All members of the sample household have been listed in this block. Demographic particulars (viz., relation to head, sex, age, marital status and general education), working status, type of income received and number of meals taken have been recorded for each member using one line for one member.

Block 5: Consumption of food, pan, tobacco and intoxicants during the last 7 days and 30 days has been recorded in this block.

Block 5.1: Consumption of fuel and light during the last 30 days has been recorded in this block.

Block 6: Consumption of clothing, bedding etc. during the last 365 days has been recorded in this block.

Block 7: Consumption of footwear during the 365 days has been recorded in this block.

Block 8.1: Expenditure on education & medical (institutional) goods and services during the last 365 days has been recorded in this block.

Block 8.2: Expenditure on miscellaneous goods and services including medical (non-institutional), rents and taxes during the last 30 days has been recorded in this block.

Block 9: Expenditure for purchase and construction (including repair and maintenance) of durable goods for domestic use during the last 365 days has been recorded in this block.

Block 10.1: Particulars of production and consumption from kitchen garden, backyard etc.:

This block is intended to collect information on quantity and value of each item produced in the kitchen garden during the agriculture year July 1998 - June 1999. This apart, information on item wise consumption made out of the produce from kitchen garden during last 30 days preceding the date of survey has been collected irrespective of whether the item has been produced during the agriculture year July 1998 - June 1999.

Block 10.2: Consumption of selected non-food items from home-produced stock:

This block has been designed to collect information on consumption of some selected non-food items out of home-produced stock during last 30 days preceding the date of survey.

Block 11: Purchase of selected commodities supplied through public distribution system:

This block is designed to collect information on purchase of four commodities, namely, rice, wheat, sugar and kerosene through public distribution system and from other sources.

Block 12: Perception of household regarding sufficiency of food:

This block has been filled after completion of the enquiry on all the preceding blocks. This question is asked in order to know the perception of the household regarding sufficiency of food.

Block 13 : Particulars of goods and services received as part of wages and salaries or perquisites and gifts given and gifts

received by the household (only for non-food items): This block is restricted to non-food items only, that is, items 310 to 643 of detailed blocks. It has been designed to record the particulars of goods and services received as part of wages and salaries or perquisites and gifts given and gifts received by the household during the last 30 days prior to the date of survey.

Block 14: Summary of consumer expenditure:

This block is meant to derive the value of household per capita consumption expenditure for a period of 30 days.

Block 15: Remarks by investigator:

Any remark which is considered necessary for explaining any peculiarity in the consumption pattern of the household or any other characteristic of the household has been noted here. Such remarks help understanding the entries made in different blocks of the schedule, especially when any entry is very high or very low.

Block 16: Remarks by supervisory officer:

The supervisory officers note their views on any aspect relating to the household and on any observed peculiarity in the consumption pattern of the household in this block.

Questionnaires

Schedule 1.0 of the 55th NSS round consists of the following blocks:

Block 0: Descriptive identification of sample household: This block is meant for recording descriptive identification particulars of a sample household.

Block 1: Identification of sample household

Block 2: Particulars of field operation

Block 3: Household characteristics:

Characteristics which are mainly intended to be used to classify the households for tabulation has been recorded in this block.

Block 4: Demographic and other particulars of household members:

All members of the sample household have been listed in this block. Demographic particulars (viz., relation to head, sex, age, marital status and general education), working status, type of income received and number of meals taken have been recorded for each member using one line for one member.

Block 5: Consumption of food, pan, tobacco and intoxicants during the last 7 days and 30 days has been recorded in this block.

Block 5.1: Consumption of fuel and light during the last 30 days has been recorded in this block.

Block 6: Consumption of clothing, bedding etc. during the last 365 days has been recorded in this block.

Block 7: Consumption of footwear during the 365 days has been recorded in this block.

Block 8.1: Expenditure on education & medical (institutional) goods and services during the last 365 days has been recorded in this block.

Block 8.2: Expenditure on miscellaneous goods and services including medical (non-institutional), rents and taxes during the last 30 days has been recorded in this block.

Block 9: Expenditure for purchase and construction (including repair and maintenance) of durable goods for domestic use during the last 365 days has been recorded in this block.

Block 10.1: Particulars of production and consumption from kitchen garden, backyard etc.:

This block is intended to collect information on quantity and value of each item produced in the kitchen garden during the agriculture year July 1998 - June 1999. This apart, information on item wise consumption made out of the produce from kitchen garden during last 30 days preceding the date of survey has been collected irrespective of whether the item has been produced during the agriculture year July 1998 - June 1999.

Block 10.2: Consumption of selected non-food items from home-produced stock:

This block has been designed to collect information on consumption of some selected non-food items out of home-produced stock during last 30 days preceding the date of survey.

Block 11: Purchase of selected commodities supplied through public distribution system:

This block is designed to collect information on purchase of four commodities, namely, rice, wheat, sugar and kerosene through public distribution system and from other sources.

Block 12: Perception of household regarding sufficiency of food:

This block has been filled after completion of the enquiry on all the preceding blocks. This question is asked in order to know the perception of the household regarding sufficiency of food.

Block 13 : Particulars of goods and services received as part of wages and salaries or perquisites and gifts given and gifts received by the household (only for non-food items): This block is restricted to non-food items only, that is, items 310 to 643 of detailed blocks. It has been designed to record the particulars of goods and services received as part of wages and salaries or perquisites and gifts given and gifts received by the household during the last 30 days prior to the date of survey.

Block 14: Summary of consumer expenditure:

This block is meant to derive the value of household per capita consumption expenditure for a period of 30 days.

Block 15: Remarks by investigator:

Any remark which is considered necessary for explaining any peculiarity in the consumption pattern of the household or any other characteristic of the household has been noted here. Such remarks help understanding the entries made in different blocks of the schedule, especially when any entry is very high or very low.

Block 16: Remarks by supervisory officer:

The supervisory officers note their views on any aspect relating to the household and on any observed peculiarity in the consumption pattern of the household in this block.

Description

Sub Sample (SubSample)

File: Blocks 1,3,12_Household Characteristics

An important feature of the NSS sampling design is that the total sample of first stage units is drawn in the form of two or more independent and parallel samples, termed as interpenetrating sub-samples. Each sub-sample is drawn by the same sampling scheme and is capable of providing valid estimates of the population parameters. The comparison of sub-sample wise estimates shows the margin of uncertainty associated with the combined sample estimate.

Interpenetrating sub-samples have been used in NSS (i) to obtain valid estimates from each sub-round (season) of the survey round, and (ii) to ensure that Central and State samples for any State/ UT cover independent and equally valid samples of units.

The samples surveyed by the NSSO staff are termed as Central sample and the matched samples surveyed by State Government staff are termed as State sample.

Interviewer instructions

Whether the originally selected sample household has been surveyed or a substituted household has been surveyed will be indicated against this item by recording '1' if it is the originally selected sample household, and '2' if it is the substituted one. If neither the originally selected household nor the substituted household can be surveyed i.e., if the sample household is a casualty, code '3' will be recorded. In such cases only blocks 0, 1, 2, 15 and 16 will be filled in and on the top of the front page of the schedule the word 'CASUALTY' will be written and underlined.

Substitution Code (Substn_Code)

Description

Household consumer expenditure :

The expenditure incurred by a household on domestic consumption during the reference period is the household's consumer expenditure. The household consumer expenditure is the total of the monetary values of consumption of various groups of items namely (i) food, pan (betel leaves), tobacco, intoxicants and fuel & light, (ii) clothing and footwear and (iii) miscellaneous goods and services and durable articles.

Monthly per capita expenditure (MPCE) :

For a household, this is household consumer expenditure over a period of 30 days divided by household size. A person's MPCE is understood as that of the household to which he/she belongs.

Household Size (B3_q1)

File: Blocks 1,3,12_Household Characteristics

Overview

Type: Continuous
 Format: numeric
 Width: 2
 Decimals: 0

Valid cases: 120309
 Invalid: 0

Description

Household :

A group of persons normally living together and taking food from a common kitchen constitutes a household. The word "normally" means that temporary visitors are excluded but temporary stay-aways are included. Thus a son or daughter residing in a hostel for studies is excluded from the household of his/her parents, but a resident employee or resident domestic servant or paying guest (but not just a tenant in the house) is included in the employer/host's household. "Living together" is usually given more importance than "sharing food from a common kitchen" in drawing the boundaries of a household in case the two criteria are in conflict; however, in the special case of a person taking food with his family but sleeping elsewhere (say in a shop or a different house) due to space shortage, the household formed by such a person's family members is taken to include the person also. Each inmate of a mess, hotel, boarding and lodging house, hostel, etc. is considered as a single-member household except that a family living in a hotel (say) is considered as one household only; the same applies to residential staff of such establishments.

Household size :

The size of a household is the total number of persons in the household.

Literal question

How many members are there in the household?

Interviewer instructions

The size of the sample household i.e., the total number of persons normally residing together (i.e., under the same roof) and taking food from the same kitchen (including temporary stayaways and excluding temporary visitors) will be recorded against this item. This number will be same as the last serial number recorded in column 1 of block 4.

NIC (B3_q2)

Format: character	Invalid: 0
Width: 3	

Literal question

Which occupation are the members in?

Interviewer instructions

The description of the principal household occupation will be recorded in the space provided. The appropriate three-digit occupation code of the NCO 1968 is to be recorded in the entry cell which has been trisected for recording each digit separately.

Household type (B3_q4)

File: Blocks 1,3,12_Household Characteristics

Overview

Type: Discrete	Valid cases: 120309
Format: character	Invalid: 0
Width: 1	

Interviewer instructions

The household type code based on the means of livelihood of a household will be decided on the basis of the source of the household's income during the 365 days preceding the date of survey. For this purpose, only the household's income (net income and not gross income) from economic activities will be considered; but the incomes of servants and paying guests will not be taken into account.

Sector wise household type (HH_Type)

File: Blocks 1,3,12_Household Characteristics

Overview

Format: character	Invalid: 0
Width: 2	

Religion (B3_q5)

File: Blocks 1,3,12_Household Characteristics

Overview

Type: Discrete	Valid cases: 120192
Format: character	Invalid: 0
Width: 1	

Literal question

Which religion does the household belong to?

Interviewer instructions

The religion of the household will be recorded against this item in codes. If different members of the household claim to belong to different religions, the religion of the head of the household will be considered as the religion of the household.

Social Group (B3_q6)

File: Blocks 1,3,12_Household Characteristics

Social Group (B3_q6)

File: Blocks 1,3,12_Household Characteristics

Overview

Type: Discrete	Valid cases: 120309
Format: character	Invalid: 0
Width: 1	

Literal question

Which social group does the household belong to?

Interviewer instructions

Whether or not the household belongs to scheduled tribe, scheduled caste or other backward class will be indicated against this item in terms of the specified codes which are:

scheduled tribe - 1, scheduled caste - 2, other backward class - 3, others - 9.

Those who do not come under any one of the first three social groups will be assigned code 9 meant to cover all other categories. In case different members belong to different social groups, the group to which the head of the household belongs will be considered as the 'social group' of the household.

Whether owns any land (B3_q7)

File: Blocks 1,3,12_Household Characteristics

Overview

Type: Discrete	Valid cases: 119780
Format: character	Invalid: 0
Width: 1	

Literal question

Whether household owns any land?

Interviewer instructions

Code 1 or 2 will be recorded against this item depending on whether the household owns any land or not as on the date of survey.

A piece of land is considered 'owned by the household' if permanent heritable possession with or without the right to transfer the title is vested in a member or members of the household. Land held in owner-like possession under long-term lease or assignment is also considered as land owned. Thus, in determining the ownership of a plot of land, two basic concepts are involved, namely,

- Land owned by the household i.e., land on which the household has the right of permanent heritable possession with or without the right to transfer the title e.g., Pattadars, Bhumidars, Jenmons, Bhumiswamis, Rayat, Sithibans etc. A plot of land may be leased out to others by the owner without losing the right of permanent heritable possession.
- Land held under special conditions such as the holder does not possess the title of ownership but the right for long-term possession of the land (for example, land possessed under perpetual lease, hereditary tenure and long-term lease for 30 years or more) will be considered as being held under owner-like possession. In the states where land reform legislation has provided for full proprietorship to erstwhile tenants, they are to be considered as having owner-like possession, even if they have not paid the full compensation.

Sometimes a plot may be possessed by a tribal in accordance with traditional tribal rights from local chieftains or village/district council. Again a plot may be occupied by a tenant for which the right of ownership vests in the community. In both the cases the tribal or other individual (tenant) will be taken as owner; for in all such cases, the holder has owner-like possession of the land in question.

Type of land owned (B3_q8)

File: Blocks 1,3,12_Household Characteristics

Overview

Type: Discrete	Valid cases: 98264
Format: character	Invalid: 0
Width: 1	

Type of land owned (B3_q8)

File: Blocks 1,3,12_Household Characteristics

Interviewer instructions

Homestead of household is defined as the dwelling house of the household together with any courtyard, compound, garden, out-house, place of working, family courtyard, guest-house, shop, workshop/offices for running household enterprises, tanks, wells, latrine, drains and boundary walls which are annexed to the dwelling house. All land coming under homestead is defined as homestead land.

Codes will be recorded against the item depending on the type of land owned. If the household owns only homestead and no other land, the appropriate code will be 1. But, if the household owns some other piece of land along with homestead land, code 2 will be entered against this item. Code 3 will be applicable when a household owns a piece of land but not the homestead land.

Note: Gardens, orchards or plantation annexed to the dwelling house should also be covered under homestead land. (This is a deviation from the 50th round.)

Land owned (0.00 hectares) (B3_q9)

Against these two items, the code corresponding to the primary source of energy that is used by the household for cooking and lighting during last 30 days preceding the date of survey, will be recorded. If more than one type of energy is utilised, the primary or principal one on the basis of its use will have to be identified and the corresponding code will be noted in the appropriate box.

HH Recd Any Income from Assistance from IRDP (B3_q19)

File: Blocks 1,3,12_Household Characteristics

Overview

Type: Discrete

Valid cases: 119545

Format: character

Invalid: 0

Width: 1

Description

Integrated Rural Development Programme (IRDP) is one of the Indian Government's main poverty alleviation programmes in the field of rural development. Its object is the uplift of rural families identified as poor. The objective is sought to be achieved by providing productive assets and inputs to target groups. The assets are provided through financial assistance in the form of subsidy from the Government and term credit advance by financial institutions. The programme is implemented in all the community development blocks in the country.

HH Recd Any Income from Assistance from IRDP (B3_q19)

File: Blocks 1,3,12_Household Characteristics

Literal question

Whether household received any income from assistance from IRDP?

Interviewer instructions

The answer to this question will be recorded in code. If the household has not received any assistance from IRDP during the last 5 years, code 1 will be recorded. For yes, the codes are: milch animal - 2, draught animal - 3, sheep/goat - 4, pumpset - 5, for fish-pond - 6, sewing machine - 7, others: agricultural tools & equipment -8, others - 9.

Note 1: If household 'A' received IRDP assistance but household 'B' has utilized it then household 'A' will be treated as having received the assistance.

2: If a household gets IRDP assistance for more than once during the reference period, the code for which received last will be given.

Format: character	Invalid: 0
Width: 1	

Literal question

Whether household usually eats enough food?

Interviewer instructions

This block will be filled after completion of the enquiry on all the preceding blocks. The expression in item 1 - 'getting enough food everyday' - as used in common parlance, conveys that the concerned person gets, by and large, sufficient food to eat. This question is asked in order to know the perception of the household regarding sufficiency of food. While putting this question to the informant, it is thus presumed that the informant has a clear understanding of its meaning. There are equivalent phrases conveying the same meaning in regional languages. It is, therefore, important to put the proper question in the local language and record the answer given by the informant in the appropriate code.

Care should be taken to see that the informant is not offended by this question. The question should, in fact, not be asked to those whose reported consumption would obviously indicate that they get sufficient food to eat. In item 1, if the members of the household are reported as getting enough food everyday throughout the year, the code to be entered in the box space of this block is 1. If adequate food is available in only a few months of the year code 2 will be noted. Code 3 will indicate that the household does not usually get enough food everyday for all its members. Here the reference period is last 12 calendar months preceding the date of enquiry.

Literal question

In which months of the year the household does not get enough food?

Interviewer instructions

Month code when not enough food (B12_q2_1)

File: Blocks 1,3,12_Household Characteristics

If adequate food was available in only some months of the year i.e. if code 2 is recorded in item 1, those calendar months in which all members of the household did not have enough food everyday will be recorded in the cells provided against item 2 in codes. For example, suppose all members of a sample household did not have enough food everyday in the months of January and March during the reference period. The entries to be made are 01 & 03 in the first two cells of the first row out of the 11 cells provided in the block against item 2.

Description

MPCE classes :

It is the usual practice, in NSS consumer expenditure reports, to present various estimates, including state and all-India level values of different socio-economic indicators, and distributions of households and all-India level values of different socio-economic indicators, and distributions of households and persons over different socio-economic categories or statuses, separately for a number of classes of the population formed on the basis of MPCE. For this NSS round, 12 MPCE classes were drawn up for each sector - rural and urban - as follows :

RURAL	URBAN
(Rs.)	(Rs.)
1. 0 - 220	0 - 290
2. 220 - 250	290 - 330
3. 250 - 290	330 - 405
4. 290 - 330	405 - 480
5. 330 - 370	480 - 550
6. 370 - 410	550 - 630
7. 410 - 460	630 - 735
8. 460 - 515	735 - 855
9. 515 - 605	855 - 1040
10. 605 - 765	1040 - 1315
11. 765 - 945	1315 - 1535
12. 945 & above	1535 & above

Sub Sample (SubSample)

File: Block 4_Demographic and Other Particulars of Household Members

Overview

Type: Discrete
 Format: character
 Width: 1

Valid cases: 600016
 Invalid: 0

Description

An important feature of the NSS sampling design is that the total sample of first stage units is drawn in the form of two or more independent and parallel samples, termed as interpenetrating sub-samples. Each sub-sample is drawn by the same sampling scheme and is capable of providing valid estimates of the population parameters. The comparison of sub-sample wise estimates shows the margin of uncertainty associated with the combined sample estimate.

Interpenetrating sub-samples have been used in NSS (i) to obtain valid estimates from each sub-round (season) of the survey round, and (ii) to ensure that Central and State samples for any State/ UT cover independent and equally valid samples of units.

The samples surveyed by the NSSO staff are termed as Central sample and the matched samples surveyed by State Government staff are termed as State sample.

Description

Household consumer expenditure :

The expenditure incurred by a household on domestic consumption during the reference period is the household's consumer expenditure. The household consumer expenditure is the total of the monetary values of consumption of various groups of items namely (i) food, pan (betel leaves), tobacco, intoxicants and fuel & light, (ii) clothing and footwear and (iii) miscellaneous goods and services and durable articles.

Monthly per capita expenditure (MPCE) :

For a household, this is household consumer expenditure over a period of 30 days divided by household size. A person's MPCE is understood as that of the household to which he/she belongs.

What are the sources of income?

Interviewer instructions

Source of income of each of the household members will be ascertained and recorded in codes.

Days Stayed away (B4_q10)

File: Block 4_Demographic and Other Particulars of Household Members

Overview

Type: Continuous	Valid cases: 214422
Format: numeric	Invalid: 385594
Width: 2	Minimum: 0
Decimals: 0	Maximum: 30
Range: 0-30	Mean: 1.2
	Standard deviation: 4.1

Literal question

How many days a member has stayed away from the household?

Interviewer instructions

The number of days for which the member 'stayed away from home' during the 30 days preceding the date of enquiry should be recorded here. A continuous absence from home for 24 hours will be reckoned as a 'day stayed away'. That is, the entry will be made in completed number of days and any fraction of a day will be ignored. The location of the place where the person stayed, having been away from his/her own household, may also be within the same village/town and staying away will not only mean physical absence but also non-participation in food consumption from his/her own household. For members who did not stay away for at least 1 day during the last 30 days, zero (0) will be recorded.

No. of Meals per day (B4_q11)

No. of Meals per day (B4_q11)

File: Block 4_Demographic and Other Particulars of Household Members

Description

Meal

A 'Meal' is composed of one or more readily cat able (generally cooked) items of food, the usual major constituent of which is cereal food. The meals consumed by a person twice or thrice a day provide him/her the required energy of (calorie) and other nutrients for living and for pursuing his/her normal avocations. A 'meal' as opposed to 'snacks ' as opposed to 'snacks', 'nasta' or 'high tea' , contains larger quantum and variety of food. In rare cases, a full meal may contain larger quantity of non-cereal food. Even that, if the total quantum of food in plate is heavy as a meal, the contents of the food plate will also be considered as a real. Sometimes the contents of a 'nasta' may not be very different from the contents of a 'meal'. The difference in quantity will there be the guiding factor for deciding whether the plate is to be led as a 'meal ' or a nasta.

Literal question

How many meals do you usually take in a day?

Interviewer instructions

The number of meals consumed by a person is usually reported as 2 or 3. In rare cases, one may come across a person who may be taking food only once in a day or more than three times a day. While in the former case the number of meals for the person will be 1 per day, in the latter case, however, only 3 should be entered. That is, in this column, the recorded number of meals taken in a day, even if it is reported to be higher, should not exceed 3. A breast-fed baby does not directly share the food consumed by members of the household. Hence for such babies the entry in this column will be '0'.

Description

An important feature of the NSS sampling design is that the total sample of first stage units is drawn in the form of two or more independent and parallel samples, termed as interpenetrating sub-samples. Each sub-sample is drawn by the same sampling scheme and is capable of providing valid estimates of the population parameters. The comparison of sub-sample wise estimates shows the margin of uncertainty associated with the combined sample estimate.

Interpenetrating sub-samples have been used in NSS (i) to obtain valid estimates from each sub-round (season) of the survey round, and (ii) to ensure that Central and State samples for any State/ UT cover independent and equally valid samples of units.

The samples surveyed by the NSSO staff are termed as Central sample and the matched samples surveyed by State Government staff are termed as State sample.

Description

MPCE classes :

It is the usual practice, in NSS consumer expenditure reports, to present various estimates, including state and all-India level values of different socio-economic indicators, and distributions of households and all-India level values of different socio-economic indicators, and distributions of households and persons over different socio-economic categories or statuses, separately for a number of classes of the population formed on the basis of MPCE. For this NSS round, 12 MPCE classes were drawn up for each sector - rural and urban - as follows :

RURAL URBAN

(Rs.) (Rs.)

1. 0 - 220 0 - 290
2. 220 - 250 290 - 330
3. 250 - 290 330 - 405

Description

Sub Sample (SubSample)

File: Block 6_ Annual household expenditure on clothing

An important feature of the NSS sampling design is that the total sample of first stage units is drawn in the form of two or more independent and parallel samples, termed as interpenetrating sub-samples. Each sub-sample is drawn by the same sampling scheme and is capable of providing valid estimates of the population parameters. The comparison of sub-sample wise estimates shows the margin of uncertainty associated with the combined sample estimate.

Interpenetrating sub-samples have been used in NSS (i) to obtain valid estimates from each sub-round (season) of the survey round, and (ii) to ensure that Central and State samples for any State/ UT cover independent and equally valid samples of units.

The samples surveyed by the NSSO staff are termed as Central sample and the matched samples surveyed by State Government staff are termed as State sample.

Description

MPCE classes :

It is the usual practice, in NSS consumer expenditure reports, to present various estimates, including state and all-India level values of different socio-economic indicators, and distributions of households and all-India level values of different socio-economic indicators, and distributions of households and persons over different socio-economic categories or statuses, separately for a number of classes of the population formed on the basis of MPCE. For this NSS round, 12 MPCE classes were drawn up for each sector - rural and urban - as follows :

RURAL URBAN

(Rs.) (Rs.)

1. 0 - 220 0 - 290
2. 220 - 250 290 - 330
3. 250 - 290 330 - 405

Description

MPCE classes :

It is the usual practice, in NSS consumer expenditure reports, to present various estimates, including state and all-India level values of different socio-economic indicators, and distributions of households and all-India level values of different socio-economic indicators, and distributions of households and persons over different socio-economic categories or statuses, separately for a number of classes of the population formed on the basis of MPCE. For this NSS round, 12 MPCE classes were drawn up for each sector - rural and urban - as follows :

RURAL URBAN

(Rs.) (Rs.)

1. 0 - 220 0 - 290
2. 220 - 250 290 - 330
3. 250 - 290 330 - 405
4. 290 - 330 405 - 480
5. 330 - 370 480 - 550
6. 370 - 410 550 - 630
7. 410 - 460 630 - 735
8. 460 - 515 735 - 855
9. 515 - 605 855 - 1040
10. 605 - 765 1040 - 1315
11. 765 - 945 1315 - 1535
12. 945 & above 1535 & above

Description

An important feature of the NSS sampling design is that the total sample of first stage units is drawn in the form of two or more independent and parallel samples, termed as interpenetrating sub-samples. Each sub-sample is drawn by the same sampling scheme and is capable of providing valid estimates of the population parameters. The comparison of sub-sample wise estimates shows the margin of uncertainty associated with the combined sample estimate.

Interpenetrating sub-samples have been used in NSS (i) to obtain valid estimates from each sub-round (season) of the survey round, and (ii) to ensure that Central and State samples for any State/ UT cover independent and equally valid samples of units.

The samples surveyed by the NSSO staff are termed as Central sample and the matched samples surveyed by State Government staff are termed as State sample.

Description

MPCE classes :

It is the usual practice, in NSS consumer expenditure reports, to present various estimates, including state and all-India level values of different socio-economic indicators, and distributions of households and all-India level values of different socio-economic indicators, and distributions of households and persons over different socio-economic categories or statuses, separately for a number of classes of the population formed on the basis of MPCE. For this NSS round, 12 MPCE classes were drawn up for each sector - rural and urban - as follows :

RURAL URBAN

(Rs.) (Rs.)

1. 0 - 220 0 - 290
2. 220 - 250 290 - 330
3. 250 - 290 330 - 405
4. 290 - 330 405 - 480
5. 330 - 370 480 - 550
6. 370 - 410 550 - 630
7. 410 - 460 630 - 735
8. 460 - 515 735 - 855
9. 515 - 605 855 - 1040
10. 605 - 765 1040 - 1315
11. 765 - 945 1315 - 1535
12. 945 & above 1535 & above

Description

MPCE classes :

It is the usual practice, in NSS consumer expenditure reports, to present various estimates, including state and all-India level values of different socio-economic indicators, and distributions of households and all-India level values of different socio-economic indicators, and distributions of households and persons over different socio-economic categories or statuses, separately for a number of classes of the population formed on the basis of MPCE. For this NSS round, 12 MPCE classes were drawn up for each sector - rural and urban - as follows :

RURAL	URBAN
(Rs.)	(Rs.)
1. 0 - 220	0 - 290
2. 220 - 250	290 - 330
3. 250 - 290	330 - 405
4. 290 - 330	405 - 480
5. 330 - 370	480 - 550
6. 370 - 410	550 - 630
7. 410 - 460	630 - 735
8. 460 - 515	735 - 855
9. 515 - 605	855 - 1040
10. 605 - 765	1040 - 1315
11. 765 - 945	1315 - 1535
12. 945 & above	1535 & above
