Overview

ABSTRACT
In pursuance of the recommendations made by the Governing Council (G.C.) of the National Sample Survey Organization (NSSO) in its 44th meeting held on 16 January 1987 to undertake a comprehensive survey on the socio-economic conditions of the tribal people in the 44th round (July 1988 - June 1989) of NSS, various schedules of enquiries on the subject were drawn up and tested in the field through a try-out survey. The schedules were discussed in details in the meetings of the Working Groups (W.G) set up by the G.C., NSSO for the NSS 44th round. In the light of the experiences gained through the try-out survey, the schedules of enquiry were finalized by the W.G. and subsequently approved by the G.C. of the NSSO in its 45th meeting held on 29 December 1987.

Schedules of investigation : In order to study the living conditions of tribals, it is, probably, imperative to know the environment in which the tribals live. Hence a village schedule (schedule type 3.1) was canvassed to collect information at village/hamlet level on the extent of availability of various facilities which have direct or indirect bearing on tribal life.

However, the major thrust in collecting information on living conditions of tribals will, obviously, be at the household level. There are various aspects of tribal life which need to be studied. From the point of view of analysis it would have, probably, been ideal to collect all the necessary information from the same set of sample households in an integrated manner. But as the factors are numerous, any attempt to accommodate all the items of information in a single schedule of enquiry will make the schedule unwieldy. It was, thus, decided to frame two schedules of enquiries for collecting information from the tribal households - one mainly on socio-economic aspects relating to the level of living of tribals (schedule type - 29.1) and the other on economic and enterprise aspects of the tribal households (schedule type 29.2).

Further, with a view to studying the problems of land alienation faced by the tribal population due to in-migration of non-tribals in the tribal areas and also to assess the differences in the socio-economic standard of living between the tribals and the non-tribals, a schedule of enquiry (schedule type 29.3) was designed for collecting information from the non-tribal households residing in the tribal areas.

In short, the following four schedules of enquiries have been framed for the tribal survey:

(i) Village schedule 3.1 : General information on village characteristics

(ii) Household schedule 29.1 : Level of living of tribals

(iii) Household schedule 29.2 :Economic activity of the tribals

(iv) Household schedule 29.3 : Particulars of migration and ownership of land by non-tribals.

Here in this study the focus is Household schedule 29.1: Level of living of tribals.The object of the enquiry on the living condition of the tribal population carried out in the present round was to throw light on as many aspects as possible of the tribal population of this country. They will relate to aspects of their "level of the living" including demographic and activity particulars, family expenditure etc. as well as to their entrepreneurial activities.

KIND OF DATA
Sample survey data [ssd]

UNITS OF ANALYSIS
Randomly selectedhousehold and its memebers

Scope

NOTES
There are various aspects of tribal life on which information is required to study the living conditions of tribals. It has been stated earlier that all those aspects cannot be accommodated in one schedule of enquiry.

The household schedules 29.1 was canvassed in the scheduled tribe households. If different members of a household belong to different tribes, the tribe of the head of the household belong to different tribes, the tribe of the head of the household was considered as the tribe of the household. The schedules was canvassed in the special as well as in general samples belonging to all the rural and urban strata.

In schedule 29.1 demographic particulars, educational particulars with the emphasis on drop-outs and assistance received from various agencies including government, activity particulars and health care & morbidity particulars of each member of the household were collected. Data on economic activity of the members was collected in respect of both usual and current week status following the concepts adopted in the "Employment and Unemployment" survey conducted in 43rd round (July 1987 - June 1988) of National Sample Survey (NSS). At the household level the survey covered information on consumer expenditure, purchase of selected commodities available though public distribution system or from open market and also the particulars of dwelling unit. Although attempts were made to collect information on the total household consumption of the tribal households by using the concepts adopted in the "Consumer Expenditure" survey on the NSS 43rd round, detailed item wise information was not collected due to the practical difficulties of data collection particularly from the tribal households.

Reference period : Different reference periods were used for different items of investigation. The reference period 'last day' will mean the day prior to the date of survey: 'last week' will mean the 30 days preceding the date of survey and 'last year' will indicate 365 days preceding the date of survey.

Coverage

GEOGRAPHIC COVERAGE
The survey covered the whole of Indian Union except Ladakh and Kargil districts of Jammu and Kashmir state. schedule 29.1 and 29.2 were not be canvassed in Jammu & Kashmir, Punjab, Haryana, Chandigarh, Delhi and Pondicherry as there is no schedule tribe in those states as per the prescribed list.

Sampling

Sampling Procedure

Tthe sample design is, as usual, stratified two-stage with the census village as the first stage unit in the rural sector and UFS block as the first stage unit in the urban sector. The second stage units were households for all schedules.The sample design in the rural sector was decided with a view to providing good estimates for the tribal enquiry. Except in the north-eastern region, the tribal population was concentrated in some districts within the states having considerable tribal population and even in those districts they were found to be unevenly distributed geographically. Therefore special stratification and selection procedures were adopted not only to net sufficient number of tribal households in the sample but also to improve the design in general for the tribal enquiry.

Sampling frame of villages: The list of 1981 census villages constitute the sampling frame for selection of villages in most districts. However in Assam (where '81 census was not done) and a few districts of some other states (where the available lists of villages were not satisfactory), 1971 census village lists were used as frame.

Stratification : In Haryana, Jammu & Kashmir, Punjab, Chandigarh, Delhi, Goa, Daman & Diu and Pondicherry where there were practically no tribal population, the strata used in NSS 43rd round were retained. In Meghalaya, Mizoram, Nagaland, Arunachal Pradesh, Sikkim, Dadra and Nagar Haveli and Lakshadweep also the strata of 43rd round were retained because of the high percentage of ST. population in these States/U.T.'s. (The strata of 43rd round have been retained in the case of Sikkim as the distribution of tribal population is more or less uniform over all the districts).In the remaining states fresh stratification was carried out as described below.

In these states all districts accounting for the bulk of the states's tribal population were selected for formation of strata with concentration of tribal population. Besides these districts, tribal concentration strata were demarcated also in some other districts with relatively small tribal population in order to ensure coverage of as many different ethnic groups as possible.

Within each district so identified for formation of tribal concentration strata, , the tehsils with relatively high concentration of tribal population, together constituted one stratum. These tehsils were selectd in such a way that together they accounted for the bulk (70% or more) of the district tribal population and the proportion of tribal to total population and the proportion of tribal to total population in this stratum was significantly greater than that of the district as a whole. The strata so formed were not always geographically contiguous. These tribal concentration strata are called STRATUM TYPE -1. Further, all the strata of Meghalaya, Mizoram, Nagaland, Arunachal Pradesh, Dadra & Nagar Haveli, Lakshdweep and Sikkim are also considered as stratum type-1. All the remaining strata in the rural sector (in any State/U.T.) were called stratum type -2.

General and special sample villages : There were two types of sample villages in this round. The first type was the general sample in which all enquiries were carried out. The second type was designated as "special sample villages" in which only schedules 3.1, 29.1, 29.2 and 29.3 were canvassed. The special sampleswere intended for augmenting the general sample for the tribal enquiry. These special sample villages were selected only from the tribal concentration strata (stratum type 1) of the 16 States and the U.T. OF Andaman & Nicobar Islands 1) of 16 States and the U.T. of Andaman & Nicobar Islands. There were no special sample villages in the remaining States/U.T.'s. The special samples were called sample type-1 and the general samples, sample type-2.

Schedules 29.1 was canvassed both in rural and urban sectors. Six households each from the frame of schedules tribe households in the villages of special as well as general samples falling in the tribal strata were canvassed. On the other hand only two households were selected from the sample villages of stratus type 2 as well as from each sample block in urban areas of the schedules 29.1. In the special sample villages requiring hamlet group formation, the hamlet group having maximum number of tribal population will be designated as area type 1 and the other hamlet group selected at random from the remaining hamlet groups will be called area type 2. From the area type 1, 4 tribal households will be selected, while only 2 tribal households will be sampled from area type 2 for he schedule - 29.1.

Detailed procedures of samp[ling may be seen in INSTRUCTIONS TO FIELD STAFF : VOLUME I attached as external resource.

Deviations from Sample Design

There was no deviation from the original sample deviation.

Weighting

Sample weights were NOT included in each of the data files

Questionnaires

Overview

Schedule 29.1 consisted of the following blocks :

Block 1 : identification of sample household

Block 2 : particulars of field operations

Block 3 : remarks by investigator

Block 4 : remarks by supervisory officers(s)

Block 5 : household characteristics

Block 6 : demographic, personal characteristics and migration particulars of household members.

Block 7 : particulars of education

Block 8 : usual and current week activity particulars

Block 9 : quality and value of purchase of selected commodities

Block 10: particulars of health care and morbidity

Block 11 : particulars of ceremonies performed by the household

Block 12 : cash purchase and consumption of food, tobacco, intoxicants, fuel & light, clothing and footwear

Block 13 : expenditure on miscellaneous goods and services, rents and taxes and durable goods for domestic use.
Block 14 : particulars of dwelling unit.

Data Collection

Data Collection Mode

Face-to-face [f2f]

Data Collection Notes

The survey period of the round was divided into four sub-rounds of 3 months each as follows:-

sub-round number period

1 July - September 1988
2 October- December 1988
3 January- March 1989
4 April - June 1989

Equal number of sample villages and block were allocated for survey in each of these sub-rounds. Each village and block was surveyed during the sub-round to which it has been allotted.

Questionnaires

Schedule 29.1 consisted of the following blocks :

Block 1 : identification of sample household

Block 2 : particulars of field operations

Block 3 : remarks by investigator

Block 4 : remarks by supervisory officers(s)

Block 5 : household characteristics

Block 6 : demographic, personal characteristics and migration particulars of household members.

Block 7 : particulars of education

Block 8 : usual and current week activity particulars

Block 9 : quality and value of purchase of selected commodities

Block 10: particulars of health care and morbidity

Block 11 : particulars of ceremonies performed by the household

Block 12 : cash purchase and consumption of food, tobacco, intoxicants, fuel & light, clothing and footwear

Block 13 : expenditure on miscellaneous goods and services, rents and taxes and durable goods for domestic use.
Block 14 : particulars of dwelling unit.

Description

There are two types of sample villages in this round. The first type is the general sample in which all enquiries will be carried out. The second type is designated as "special sample villages" in which only schedules 3.1, 29.1, 29.2 and 29.3 will be canvassed. The special samples are intended for augmenting the general sample for the tribal enquiry. These special sample villages will be selected only from the tribal concentration strata (stratum type 1) of the 16 States and the U.T. OF Andaman & Nicobar Islands 1). There are no special sample villages in the remaining States/U.T.'s. The special samples are called sample type-1 and the general samples, sample type-2.

Livelihood class (code) (B5_q6)
File: Block-5-characteristics-sample household-Records

Overview	
Type: Discrete	Valid cases: 16396
Format: character	Invalid: 0
Width: 5	

Interviewer instructions

6.5.1 The livelihood class of a household will be decided on the basis of
the source of household's income from gainful activity (for the definition of 'gainful activity', reference may be made to para 6.8.2 (a) .if a household as no such income, the livelihood class will be 'others' (code 99). If household's income is mostly from one source, there will not be any difficulty in classifying its livelihood class. But, if the members of the household, excluding those employed by the household and the paying guests, derive their income from more than one source listed under livelihood class codes at the bottom of the block in the schedule, the source which has fetched the maximum income during the last 365 days will be the livelihood class for the household and the corresponding code is to be entered against this item.

Industry (code) (B5_q7a)
File: Block-5-characteristics-sample household-Records

Overview	
Type: Discrete	Valid cases: 15915
Format: character	Invalid: 0

Interviewer instructions

6.5.6 Name of the scheduled tribe to which the tribal household
belongs will be recorded in terms of code against this item. The names of the scheduled tribes and their corresponding codes are given in appendix enclosed with this instruction. In some cases, different members of the household may belong to different tribes. It is also possible, though the eventuality is rare, that some members of the household are not tribals. In all such cases, the tribes of the head of the household will be considered as the tribe of the household.

Sex of the head (code) (B5_q10)
File: Block-5-characteristics-sample household-Records

Overview	
Type: Discrete	Valid cases: 16395
Format: character	Invalid: 0
Width: 1	

Land possessed (0.00 acres) (B5_q11)
File: Block-5-characteristics-sample household-Records

Overview	
Type: Continuous	Valid cases: 15975
Format: numeric	Invalid: 461
Width: 7	Minimum: 0
Decimals: 2	Maximum: 5620.3
Range: 0-5620.32	Mean: 3.7
	Standard deviation: 68.7

Interviewer instructions

The total area of land possessed by all the members of the household on the date of survey will be recorded in 0.00 acres against this item. Land possessed will constitute areas which are owned and retained by the household plus areas under owner like possession plus areas leased in from others plus areas which are under the possession of the household though neither owned nor leased in. It should be servant/paying guest who are considered as normal members of the household should not be included. Land possessed by those members would be shown against the households where they would have been considered as normal resident members had they not been staying with the present household.

How long the hh. is residing in the present site (code) (B5_q12)
File: Block-5-characteristics-sample household-Records

Overview	
Type: Discrete	Valid cases: 16402
Format: character	Invalid: 0
Width: 1	

Interviewer instructions

Particulars of migration of individual members will be collected in block 6. Against this item, information regarding the movement of the household as a whole is to be collected. For this particular purpose, even movement within the village will be considered. The number of years the household is residing in the present site will be recorded in codes as specified in the schedule.

If code 1 or 2 in item no. 12 reason for shifting (code) (B5_q13)
File: Block-5-characteristics-sample household-Records

Overview	

Type: Discrete
Format: character
Width: 1

Valid cases: 1881
Invalid: 0

Interviewer instructions

If the household has moved to the present site during last 5 years, i.e., if the code against item 12 is either 1 or 2, the reason for moving out of the old place by the head of the household is to be recorded in codes.

Making of fire (code) (B5_q14)
File: Block-5-characteristics-sample household-Records

Overview	

Type: Discrete
Format: character
Width: 1

Valid cases: 16342
Invalid: 0

Interviewer instructions

generally, for domestic purpose, now-a-days stick is used to make fire. But there are still some remote places where match sticks are not available and the tribals use traditional method of making fire by striking a piece of stone against another. The actual practice of the household is to be ascertained and the appropriate code is to be entered. The codes are : match stick - 1; traditional method-2; others - 9. Sometimes, fire may be preserved by the household for use as and when required. In that case, the appropriate code will be 9 unless the household use any other method for making fire.

HH. consumer expenditure (last 30 days) (Rs.) (B5_q15)

Whether assistance received under IRDP (code) (B5_q19)
File: Block-5-characteristics-sample household-Records

Overview	
Type: Discrete	Valid cases: 16332
Format: character	Invalid: 0
Width: 1	

Interviewer instructions

The objective of the Integrated Rural Development Programme (IRDP) is to assist the families below the poverty line in rural areas by taking up self-employment ventures in a variety of activities like sericulture, animal husbandry and land based activities in the primary sector; weaving; handicrafts etc. in the secondary sector; and service and business activities in the tertiary sector. The program aims to achieve the stated objective providing income generating assets including working capital through package of assistance comprising subsidy and institutional credit. Based on some of the shortcomings noticed in its implementation during the sixth plan, the program has been modifies suitable. Besides other modifications, it has also been decided that a supplementary does will be given to those families which were assisted during the Sixth Plan but could not cross the poverty line.

Whether the h.hold was visited by the L.H.V/M.H.V. during last 6 months. (B5_q20)

Decimals: 0	Maximum: 99
Range: 0-99	Mean: 23.5
	Standard deviation: 17.9

Interviewer instructions

The age is completed years of all the members listed in column (1) will be
ascertained and recorded in col. (5). For a new born baby or the baby who has not completed one year of age at the time of listing, the entry to be made in this column will be 'o'.

Marital status (code) (B6_q6)
File: Block-6-demographic-migration-particulars-Records

Overview	
Type: Discrete	Valid cases: 79468
Format: character	Invalid: 0
Width: 1	

Interviewer instructions

The marital status of each member will be recorded in this column in terms of the specified code numbers.

For code 2. 3&4 in col. (6) no. of times married (B6_q7)
File: Block-6-demographic-migration-particulars-Records

Overview	
Type: Continuous	Valid cases: 38896
Format: numeric	Invalid: 40631
Width: 2	Minimum: 0
Decimals: 0	Maximum: 25
Range: 0-25	Mean: 1.1
	Standard deviation: 0.5

Interviewer instructions

For each of the ever married persons, i.e. , persons with marital status codes 2 or 3 or 4, it is to be ascertained as to how many times the person has married. The number so determined will be recorded in columns (7).

For code 2 in col. (6) no. of living spouse (B6_q8)
File: Block-6-demographic-migration-particulars-Records

Overview	
Type: Discrete	Valid cases: 34691
Format: numeric	Invalid: 44836
Width: 2	
Decimals: 0	

Interviewer instructions

For each of the currently married persons, i.e., persons with marital status code 2 in col. (6), the number of husbands/wives alive on the date of survey will be recorded in col. (8). In deriving the number, husbands/wives who are divorced or separated from the concerned member will not be taken into account.

Highest level of education attained (code) (B6_q9)
File: Block-6-demographic-migration-particulars-Records

Overview	
Type: Discrete	Valid cases: 79368
Format: character	Invalid: 0
Width: 2	

Interviewer instructions

Information regarding the education attained by the normal members of the household listed in col. (1) will be recorded in col. (9) in terms of specified codes. For the purpose of making entries in this column, only the course successfully completed will be considered. For instance, those who have passed class XII is considered as higher secondary. Hence, for a person who has studied up to, say, first year B.A., his educational attainment will be considered as higher secondary (code 07). Similarly for a person who has studied up to 12th standard but has not sat for the examination or has failed, his educational attainment will be considered 'secondary' only.

Whether place of enumeration different from last usual residence (Yes=1; No=2) (B6_q13)
File: Block-6-demographic-migration-particulars-Records

Overview	
Type: Discrete	Valid cases: 79177
Format: character	Invalid: 0
Width: 1	

Interviewer instructions

6.6.13 For
obtaining the appropriate response to this question, it has to be ascertained from each member of the household, whether his/her place of enumeration is different from the last (previous) usual residence. The usual residence for the purpose of this survey has been defined as a place (village or town) where the person has stayed continuously for a period of six months or more. If the answer is in the affirmative, code 1 and if it is in the negative code 2 will be recorded in col. (13).

If yes in col.(13):- Period since leaving the last usual place of residence (years (B6_q14)
File: Block-6-demographic-migration-particulars-Records

Overview	
Type: Continuous	Valid cases: 18469
Format: numeric	Invalid: 61058
Width: 2	Minimum: 0
Decimals: 0	Maximum: 88
Range: 0-88	Mean: 14.6
	Standard deviation: 13.5

Interviewer instructions

The period elapsed since leaving the last usual residence will be recorded in years rounded off to the nearest integer in this column. For working out this, the period of temporary stay less than six months) in other places after leaving the last usual residence and ultimately moving into the place of enumeration will also be included. If the period so determined is less than six months, the entry will be 'O' in this column.

From where migrated (code) (B6_q15)
File: Block-6-demographic-migration-particulars-Records

Overview	
Type: Discrete	Valid cases: 18468
Format: character	Invalid: 0
Width: 1	

Interviewer instructions

the type of area from where the person has migrated to the place of enumeration, i.e., the type of last usual residence will be recorded in this column in terms of the specified codes for each migrant member.

Reason for leaving usual place of residence (code) (B6_q16)
File: Block-6-demographic-migration-particulars-Records

Overview	
Type: Discrete	Valid cases: 18455
Format: character	Invalid: 0
Width: 1	

Interviewer instructions

The reason for moving out of the
last usual residence will be ascertained for each migrant member and entered in terms of the specified code in this column. It may so happen that a person has moved out of his last usual residence for a particular reason, stayed in a different town/village for a short period (less than six months) and then moved to the place of enumeration for a different reason. In such a case only the reason which motivated his/her first movement (i.e. the movement from the last usual residence) will be recorded.

Duration of stay in the last place of residence (years) (B6_q17)
File: Block-6-demographic-migration-particulars-Records

Width: 1	

Interviewer instructions

Type of educational institution in which the member is currently enrolled will be indicated in codes in this column. An institution run by the central or state government, local bodies, public sector undertakings etc. will be regarded as government institution. All other types of ownership will be treated as private. If an institution provides residential accommodation for students, the institution will be treated as residential, whether or not the student in question avails of the facility. Combining these two criteria, a code structure, as given below, has been framed for type of institution :

Whether staying in Hostel (B7_q8)
File: Block-7-Member-Education particulars-Records

Overview	
Type: Discrete	Valid cases: 12108
Format: character	Invalid: 0
Width: 1	

Interviewer instructions

If the student is continuing his studies staying in a hostel, the entry in this column will be 1, otherwise 2 will be recorded. The hostel may be for students of the institution alone or for students of different educational institutions situated in the locality, which he is studying may be a non-residential institution. It is to be noted here that a student who is staying in a hostel will generally form a single member household.

Whether received any scholarship stipend (B7_q9)
File: Block-7-Member-Education particulars-Records

Overview	
Type: Discrete	Valid cases: 12135
Format: character	Invalid: 0
Width: 1	

Interviewer instructions

Students, in some cases, are awarded scholarship or stipend in cash to continue their studies. If the member has received or due to receive such a benefit during the current academic year, code 1 will be recorded here; otherwise code 2 will be entered in this column.

If code '1' in col.(9):-Annual amount of scholarship/ stipend (Rs.) (B7_q10)
File: Block-7-Member-Education particulars-Records

Overview	
Type: Continuous	Valid cases: 2419
Format: numeric	Invalid: 76668
Width: 6	Minimum: 0
Decimals: 0	Maximum: 300000
Range: 0-300000	Mean: 1448.6
	Standard deviation: 13264.7

Interviewer instructions

If the entry in col. (9) is 1, the total amount of cash received and receivable as scholarship/stipend during the current academic year will be recorded in nearest rupees in col. (10)

Agency providing the scholarship/stipend (B7_q11)
File: Block-7-Member-Education particulars-Records

Overview	
Type: Discrete	Valid cases: 2466
Format: character	Invalid: 0
Width: 1	

Whether any provision of mid- day meal/nutrition programme (B7_q12)
File: Block-7-Member-Education particulars-Records

Overview	
Type: Discrete	Valid cases: 11795
Format: character	Invalid: 0
Width: 1	

Interviewer instructions

There are schools which provide standard food to all or some students as midday meal, tiffin etc., free or at subsidized rate. If such food is regularly received in the school by the student member, code 1 will be recorded here. Code 2 will be appropriate entry otherwise. There are institutions which provide canteen facilities to their students. Students can purchase foods of their choice and requirements from these canteens on payment. Code 1 should not be entered here simply because such facilities for canteen are available. The deciding factor for code 1 in this column is that (I) the food packet must be similar for groups of students and (ii) payment at the subsidized rate for this, if any, need be made periodically and not every day.

If yes, agency providing midday meal (B7_q13)
File: Block-7-Member-Education particulars-Records

Overview	
Type: Discrete	Valid cases: 2360
Format: character	Invalid: 0
Width: 1	

Interviewer instructions

If yes, agency providing midday meal (B7_q13)
File: Block-7-Member-Education particulars-Records

it is to be ascertained by the investigator whether the food received by the student member from his/ her educational institution free of cost or at subsidized rate is supplied by government or by any private body/trust. Code 1 will be given in col. (13) if the agency supplying the food is government. In case of private body/trust, it is to be further ascertained whether the body/trust is an organization of some community which provides the food only to the members of the same community. If it is so, the entry in col. (13) will be 2. In all other cases code 9 will be recorded in this column. Care should be taken in making entries in this column. Since cases may not be rare where food supplied by government is distributed to the students through the school authorities or through private organization. There may be cases where although the food is supplied by private agency government pays money to those agencies by way of subsidy to keep down the price of the food packet. In all such cases, food is to be considered as provided by government.

Whether mother tongue is the medium of teching (Yes-1,No-2) (B7_q14)
File: Block-7-Member-Education particulars-Records

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 11903
Invalid: 0

Interviewer instructions

it is to be ascertained as to whether teaching in the class is imparted in the mother tongue of the student member code will be 1, if the answer is in affirmative and code 2 will be recorded in this column is the answer is in negative. It may so happen that some of the subjects are taught in the mother tongue of the student member and some others are not. In that case, code 1 will be entered in this column, if majority of the subjects are taught in the mother tongue; otherwise code 2 will be recorded.

Distance from educational inst. (Km.) (B7_q15)
File: Block-7-Member-Education particulars-Records

Overview

Type: Continuous
Format: numeric
Width: 3
Decimals: 0
Range: 0-500

Valid cases: 11492
Invalid: 67595
Minimum: 0
Maximum: 500
Mean: 2.1
Standard deviation: 9.2

Interviewer instructions

Distance of the educational institution from the residence of the student member will be recorded in this column in kilometers

If code 2 in col.(4):- Whether ever enrolled (B7_q16)
File: Block-7-Member-Education particulars-Records

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 67358
Invalid: 0

Interviewer instructions

it will be ascertained from all those members who are not currently attending any educational institution, i.e, those with code 2 in col. (4), whether the persons had ever been enrolled in a school in the past. Code 1 will be entered for ever-enrolled persons and code 2 for never-enrolled persons. As stated earlier, persons taught by a private tutor or in a kinder-garden/nursery school should not be treated as school enrolment.

If code 1 in col.(16) Age at entry in school (Years) (B7_q17)
File: Block-7-Member-Education particulars-Records

Overview	
Type: Continuous	Valid cases: 13425
Format: numeric	Invalid: 65662
Width: 2	Minimum: 0
Decimals: 0	Maximum: 80
Range: 0-80	Mean: 6.5
	Standard deviation: 2.1

Pre question

If code=1 in q-16 ask this question

Post question

If code=2 in q-16 skip this s question

Interviewer instructions

age in completed years at which the person had been first enrolled in a school will be entered here.

Number of years attented (B7_q18)
File: Block-7-Member-Education particulars-Records

Overview	
Type: Continuous	Valid cases: 13347
Format: numeric	Invalid: 65740
Width: 2	Minimum: 0
Decimals: 0	Maximum: 90
Range: 0-90	Mean: 6.4
	Standard deviation: 4.2

Pre question

If code=1 in q-16 ask this question

Post question

If code=2 in q-16 skip this s question

Interviewer instructions

The total number of years attended by a person in studying different courses will be recorded here in completed years. It is possible that person has attended more years in studying a course than its duration because of failure in different classes

Level at which discountinued(code) (B7_q19)
File: Block-7-Member-Education particulars-Records

Overview	
Type: Discrete	Valid cases: 13364
Format: character	Invalid: 0
Width: 2	

Pre question

If code=1 in q-16 ask this question

Post question

If code=2 in q-16 skip this s question

Interviewer instructions

Level at which discountinued(code) (B7_q19)
File: Block-7-Member-Education particulars-Records

6.7.18 Entry in this column will be made in similar
way as is done in col. (6) of this block. The codes are identical to 'level of education' provided for col. (9) of block 6. However, it is to be noted that if a member successfully completed a class and thereafter did not continue his/her study, the 'level at which discontinued' would be the level corresponding to the higher class than the completed one. For example, if a student successfully completed class VIII, the level at which discontinued would be the code corresponding to secondary'. On the other hand, if a member discontinued his/her study being unsuccessful in a class (or in the middle of the academic year), the level corresponding to the class last attended by the member would be considered for making entry in this column. However, if a person discontinued his studies after successfully completing the level of "graduation & above", one of the codes 11 to 14 would be recorded against him/her, depending upon the subject of study.

Reason for discountination(code) (B7_q20)
File: Block-7-Member-Education particulars-Records

Overview	
Type: Discrete	Valid cases: 13425
Format: character	Invalid: 0
Width: 1	

Pre question

If code=1 in q-16 ask this question

Post question

If code=2 in q-16 skip this s question

Interviewer instructions

A member might have discontinued his/her studies either at the end of a course or at the middle of the course. Reason for discontinuance of the study will be recorded in this column in specified codes.

If 2 in col. (16) reason for non-enrollment (code) (B7_q21)
File: Block-7-Member-Education particulars-Records

Overview	
Type: Discrete	Valid cases: 53464
Format: character	Invalid: 0
Width: 1	

Interviewer instructions

If a person is found to have never enrolled in an educational institution, i.e., if the entry in col. (16) is 2, the reason for non-enrolment is to be recorded in terms of codes in column (21).

Whether attending non-formal educational centre (B7_q22)
File: Block-7-Member-Education particulars-Records

Overview	
Type: Discrete	Valid cases: 66175
Format: character	Invalid: 0
Width: 1	

Interviewer instructions

For the purpose of this survey, the non-formal education centres are not considered as educational institutions. Thus, it is to be ascertained form all those who are not currently attending any educational institution (i.e., with code 2 in col. (4) of this block) as to whether he is attending a non-formal education centre or not. If the answer is in affirmative, code 1 will be entered in this column; otherwise, the entry will be code 2. Conventionally, code 2 will be recorded in this column for those (having code 2 in col. (4)) who are in the age group of 15 - 35 years but literate and above, and also for those who are above 35 years of age.

Interviewer instructions

6.8.3 The usual activity status of a person will be
determined on the basis of the various activities pursued by the person during the reference period of 365 days adopting "relatively long time (major time)" criterion. For this, a person has to be first classified into one of the three broad category groups (working, not working but seeking and/or available for work and neither working nor available for work) on the basis of the time spent on them during the reference period of 365 days preceding the date of survey. Thus the broad activity status of a person will be one of the three category groups, on which the person spent relatively long time during the 365 days. In deciding this, one should consider only the normal working time available for pursuing the various activities and not 24 hours of each day. After deciding the broad usual status of the person, the detailed activity status within the broad group will be determined adopting again the "relatively long" or 'major time" criterion. The detailed activity status, thus determined, will be the principal usual activity status of the person. The code corresponding to this activity status will be recorded in col. (2) against the serial number of the person. It may be noted that if a person found to be engaged in domestic duties (or any non-gainful activity for a relatively long period of the reference period of 365 days is also reported to be simultaneously seeking/available for work, the person should be categorized as "unemployed" and not as "engaged in domestic duties" (or the non-gainful activity pursued).

principal industry (B8_c4)

subsidiary usual gainful activity Status (code) (B8_c7)
File: Block-8-member-activity-status-Records

Overview	
Type: Discrete	Valid cases: 17622
Format: character	Invalid: 0
Width: 2	

Interviewer instructions

6.8.3 For each
person listed in this block, it has to be ascertained whether the person worked in a subsidiary capacity during the 365 days preceding the date of survey, or in other words, whether the person had a subsidiary gainful usual status.

6.8.3 persons having code 1 in col. (6), the status
code of the gainful activity pursued by them in their subsidiary capacity will be recorded in column (7) . In the situation where a person has been found to have pursued more than one gainful activity during the last 365 days in his or her subsidiary capacity, the activity on which more time has been spent would be considered for recording entry in this column.

subsidiary Industry (B8_c8)

Current week activity Status (code) (B8_c11)
File: Block-8-member-activity-status-Records

Overview	
Type: Discrete	Valid cases: 77811
Format: character	Invalid: 0
Width: 2	

Interviewer instructions

the current week activity status of a person will be the activity status obtaining for a person during the reference period of seven days preceding the date of survey. Irrespective of the usual activity pursued by a person, his/her current week activity will be determined strictly on the basis of the activities pursued by the person during the reference period of seven days preceding the date of survey adopting the priority criterion.

Current week activity Industry (3 digited) (B8_c13)
File: Block-8-member-activity-status-Records

Overview	

Type: Discrete	Valid cases: 34062
Format: character	Invalid: 0
Width: 3	

Interviewer instructions

For each person assigned the 'work' status code (i.e. codes 11 to 72) in column (11), the description of the principal industrial - occupation relevant to the type of gainful activity pursued by the person during the reference week will be recorded in column (12). The corresponding 3 digited industry group code (NIC 1987) will be recorded in column (13) and the 3 digited occupation family code (NCO 1968) will be recorded in column (14). In case more than one industry - occupation combination is assignable to a person, the principal industry-occupation relevant to the person will be the one, in which relatively more time has been spent during the reference week in pursuing such gainful activities.

Current week activity Occupation (3 digited) (B8_c14)

Wage and salary earnings (Rs.) Cash (B8_c15)
File: Block-8-member-activity-status-Records

Overview	

Type: Continuous	Valid cases: 13392
Format: numeric	Invalid: 65557
Width: 5	Minimum: 0
Decimals: 0	Maximum: 98000
Range: 0-98000	Mean: 780
	Standard deviation: 3833.3

Interviewer instructions

The wage and salary earnings (not total earnings) receivable for the wage/salaried work done during the reference week will be recorded in these columns. The status codes for which wage and salary earnings are relevant are 31, 41, 51, 71 and 72. Thus , if one of these status codes appears in column (11), columns (15) to (17) will obviously be filed in. But even if 'work' status codes other than those mentioned above (i.e. if the codes are 11 to 16, 61 and 62) are recorded in column (11), it is to be ascertained from the person as to whether he/she did any 'wage/salaried work, on any day during the reference week. If yes, wage and salary earnings receivable for the days such work was carried out would be recorded in these columns. The wages and salaries for the work done during the reference week may be already received or may be receivable in cash or in kind or partly in cash and partly in kind. The total wage or salary received or receivable for the week in cash will be recorded in column (15) and the value (evaluated at current retail price) of salary or wages in kind received or receivable will be recorded in column (16). The total of columns (15) and (16) will be recorded in column (17). For recording the wages and salaries, amount receivable as 'overtime' for the additional work done beyond normal working time will also be counted. Bonus (expected or paid) and perquisites, evaluated at retail prices and duly apportioned for the reference week, will be considered as wages and included for making entries in these columns.

Interviewer instructions

The items mentioned in col. (2) might have been purchases by the household during the reference period for household consumption, either wholly from public distribution system, or wholly from other sources (traders or producers) or partly from public distribution system and partly from other sources or the household might not have purchased some of the items. The position is to be ascertained for each of the items and the appropriate code is to be recorded in col. (3) by consulting the codes provided in the schedule.

Type of shop (code) (B9_c5)
File: Block-9-consumer goods-purchase-Records

Overview	
Type: Discrete	Valid cases: 58955
Format: character	Invalid: 0
Width: 1	

Interviewer instructions

By shop is meant the ration, fair price or control shop from which the sample household purchased during the reference period or generally purchase or entitled to purchase the item mentioned in column (2). The type of shop relates to the ownership type of the control shop. The entry in this column will be made in terms of the specified codes

PDS-Quantity (0.00) (B9_c6)

Interviewer instructions

Columns (5) to (12) : health services received last year: An important facility now being available to the people under public health measure is vaccinations/inoculations to gain immunity against certain infectious diseases. These columns are meant for collecting information regarding health care services of this type received by the members of the household during 365 days preceding the date of survey.

All the immunization vaccines listed in cols. (5) to (12) except those against cholera (col. (10), tetanus (col. 11) and rabies (col. 12) are administered in infancy, early childhood and adolescent stages and hence as a rule code 7 (not received) is to be put in cols. (5) to (9) for members above 16 years of age. Immunization measures against cholera and rabies are applicable to all irrespective of their age. Although tetanus injection, as a course of three doses is, generally, given only to women during antenatal period, it is given as a single dose to any person as a precautionary measure against tetanus when he/she receives injury or wounds or cuts .It will be enquired whether a member has been immunized by these vaccines during 365 days preceding the date of survey and the appropriate codes will be entered in these columns.

Whether there was ailment during last 30 days (B10_c13)
File: Block-10-members-health care-morbidity-Records

Overview	
Type: Discrete	Valid cases: 78388
Format: character	Invalid: 0
Width: 1	

Interviewer instructions

For each member, it is to be ascertained whether the member has suffered from an ailment or injury during last 30 days preceding the date of survey, irrespective of whether the ailment has been treated or not. If an illness had started prior to the reference period and continued during the reference period, it would also be considered as an ailment during the reference period. In case of two or more spells of illness during the reference period, the particulars of the diagnosed or treated ailments will be recorded in this block. If two or more ailments are diagnosed or all are undiagnosed, the ailment of longer duration will be considered for making entries in this block. The entry in this column will be made in terms of codes yes-1, no - 2.

Interviewer instructions

6.10.2 If an ailment noted in column (14) has been treated according to medical advice, code 1 will be entered here. If the ailment has not been treated for some reasons or other, the entry in this column will be 2. Untreated illness will include cases of self drugging and also treatment on the advice of non-medical but knowledgeable persons. However, in rural India, particularly among the tribals, there are medical practitioners who follow indigenous system of medicine other than ayurvedic and unani. It is to be first ascertained as to whether such system of medicine is well recognized and respected by local people. If it is so, a person treated by a practitioner of this system of medicine will be considered as treated, otherwise not. Care should be taken not to include the cases of faith healing etc. under this system. Generally, the tribal medicine man prescribes herbal or animal based medicine. It is to be noted that if after recovery from an ailment 0which was treated) a fresh spell of the ailment starts during the reference period for which no further consultation is done and the ailment is treated as per an earlier prescription, the case of ailment will be recognized as untreated.

Source of treatment (code) (B10_c16)
File: Block-10-members-health care-morbidity-Records

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 5943
Invalid: 0

Interviewer instructions

The entry in this column will be made when the code in col. (15) is 1. To receive the medical treatment a medical practioner might have been consulted somewhere, say, OPD of a hospital, primary health centre, doctor's chamber etc. Type of such places and type of doctors have been codified and listed in the schedule. The appropriate code will be recorded in this column after due investigation . about the source of treatment.

System of medicine (code) (B10_c17)
File: Block-10-members-health care-morbidity-Records

Interviewer instructions

The serial numbers of ceremonies performed by the household during last 365 days will be recorded in col. (1) giving continuous serial numbers starting from 1. the description and code for each ceremony will be recorded in columns (2) and (3) respectively. The ceremonies may be broadly classified into two groups, namely, household and community .some of the ceremonies are household affairs, i. e. , those are performed by the household alone whereas some others are community affairs in which the household also participate and bears part of the expenditure. In columns (1) to (3), the household ceremonies are to be listed first. After exhausting all such ceremonies are to be listed first. After exhausting all such ceremonies performed by the household during the last 365 days preceding the date of survey, community ceremonies observed during the reference period in which the household had borne at least part of the expenditure guest will be recorded. Within each broad group (i.e. household and community ceremonies), the particulars of the ceremonies will be noted in the following lines in sequential order of the dates of performance of the ceremonies.

Expenditure incurred on ceremony (Rs.) (B11_c4)
File: Block-11-Household-ceremonies-Records

Interviewer instructions

Column (6) will be filled in, if the household performed any ceremony connected with the marriage of a male and/or female member [i. e. if the code in col. (3) is 3 or 4]. According to tribal customs the bridegroom has to pay a price to the bride's household for marrying the girl as opposed to the practice among the non- tribals to pay to the bridegroom's household by the bride's household. In case of a marriage of a female/male member it is to be enquired whether bridegroom/bribe price has been paid by the household, if not, code 4 will be entered in this column. In case a payment has been made, it is to be further investigated whether the payment was made fully in cash or fully in kind (say, land, livestock etc.) or partly in cash and partly in kind. Depending upon the situation code 1 or 2 or 3 will be entered in this column.

Item code (B12_c1)
File: Block-12-household-consumer expenditure-Records

In this block information on purchase, consumption out of home-grown stock, consumption out of gift, loan etc. and the total consumption of food, pan, tobacco, intoxicants, fuel & light, clothing and footwear for the household during the last 30 days prior to the date of survey will be collected. Purchase and consumption of items by members (in hotels etc.) of the household during the days of their absence from the usual place of residence should also be taken into account as far as possible, while making entries against the items of this block.

Information is to be collected, in some cases, for each item of consumption and in some other cases, only for sub-totals or for residual item belonging to the "food" group. The description of the sub-total items and residual item (Viz other food items) and their item codes have been printed in this block under cols. (2) and (1) respectively. Wherever information is required for each item of consumption, few blank lines have been provided before the sub-total items for recording information on consumption of individual constituent items of those sub-totals. The complete list of those items on which information is required separately (if consumed by the household) has been provided in the schedule under "code list for block 12". The codes are same as those provided for block 5 of schedule 1.0, NSS 43rd round. In the blank line, the description of items consumed and their respective codes will be entered in cols. (2) and (1) respectively, consulting the code list mentioned above. Where such blank lines have not been provided as in the cases of salt, other food items, pan, clothing, and footwear, information is not required for individual items. It is to be noted that item code 429 stands for 'other food items' so far this block is concerned although the same item code stands for beverages and processed food sub-total in schedule 1.0 if NSS 43rd round. The 'other food item' will include all food items other than those mentioned in this block. In other words, this will include milk and milk products, edible oil, vegetables, fresh fruits, dry fruits and nuts, sugar , spices and beverages, refreshments & processed food.

Interviewer instructions

In columns (4) and (5) the quantity and value respectively of items purchased in exchange of money during the last 30 days prior to the date of survey will be recorded. Here purchase made against cash payment 9including those made on credit but to be repaid in cash) will be taken into account. Barter purchase if any, will not be considered here. Purchases made for domestic consumption only should be considered. It may be noted that purchases made for gifts, charities or for household ceremonial purposes should be considered as purchase and the total value of purchase inclusive of such purchases should be recorded in these columns. In case the purchase is for both productive and consumption purposes, the part ascribable to productive purposes should be excluded.

Total consumption : These columns relate to the total consumption of the household during the reference period. Column (10) relates to the quantity of total consumption and col. (11) to the corresponding value. The term 'total' includes all consumption in columns (6) to (9) as well as consumption out of monetary and non-monetary purchases. Consumption out of purchase is not necessarily equal to the total purchase in the current period as recorded in columns (4) and (5).

Whether dwelling unit is owned (B14_q1)
File: Block-14-dwelling unit-particulars-Records

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 16393
Invalid: 0

Interviewer instructions

This item refers only to the dwelling unit or the actual residence of the sample household. In some extreme cases, it may so happen that the household does not possess any dwelling unit at all. The household residing more or less permanently on the roadside under some sheds, inside a pipe etc. fall in this category. They will be considered as having no dwelling unit and code 1 will be assigned to them. When the dwelling unit in which the household resides is owned by the household, code 2 will be entered while code 3 will find place against this item when dwelling unit is taken on hire. In all other cases, the appropriate code for this item will be 9. Items 2 to 15 will be crossed when the entries against item 1 is 1 i. e. when the household does not have any dwelling unit.

Tenure type of the plot (code) (B14_q2)
File: Block-14-dwelling unit-particulars-Records

Tenure type of the plot (code) (B14_q2)
File: Block-14-dwelling unit-particulars-Records

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 16355
Invalid: 0

Interviewer instructions

The item relates to the plot of land on which the dwelling unit is situated. The land may be owned, leased in or otherwise occupied. Depending upon the case, code 1 or 2 or 9 will be entered against this item. In case the plot of land on which the dwelling unit is situated is taken on a long term lease 9say 30 years of more), it will be treated as owner like possession and code 1 will be entered against item 2. In case of multistoried building, if an apartment is owned and occupied by the household, tenure type of the plot will also be 1.

Area of the house site (0.00 sq.m.) (B14_q3)
File: Block-14-dwelling unit-particulars-Records

Overview

Type: Continuous
Format: numeric
Width: 7
Decimals: 2
Range: 0-4005

Valid cases: 16293
Invalid: 104
Minimum: 0
Maximum: 4005
Mean: 17.3
Standard deviation: 70.8

Interviewer instructions

The area of the house site will be recorded in square metres against this item. The area of the house site will include the area on which the dwelling unit is built and the vacant area within the compound of the house.

Covered area (0.00 sq.m.) (B14_q4)
File: Block-14-dwelling unit-particulars-Records

Overview

Type: Continuous
Format: numeric
Width: 6
Decimals: 2
Range: 0-600

Valid cases: 16204
Invalid: 193
Minimum: 0
Maximum: 600
Mean: 1.4
Standard deviation: 12.3

Interviewer instructions

This will be the sum of the floor area of all rooms, kitchen, etc. and covered and/ or uncovered verandah of the dwelling unit. The area will be recorded in square metres and in whole number. The verandah will mean the space adjacent to the rooms which is used as an access to the rooms of the dwelling unit. Verandah will not, however, cover a passage or a corridor used mainly as an access to the dwelling unit itself.

Plinth level (code) (B14_q5)
File: Block-14-dwelling unit-particulars-Records

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 16357
Invalid: 0

Interviewer instructions

Plinth level means constructed ground floor, level of the house from the ground at the main entrance of the dwelling unit. The entries against this item will be made in terms of codes

Type of structure (code) (B14_q6)
File: Block-14-dwelling unit-particulars-Records

Overview	
Type: Discrete	Valid cases: 16372
Format: character	Invalid: 0
Width: 1	

Interviewer instructions

The structures have been classified into three categories, namely, pucca, semi- pucca and katcha on the basis of the materials used for construction. Code 1 or 2 or 3 will be entered against this item if the dwelling unit is categorized as pucca, semi-pucca or katcha respectively.
A katcha house is one whose walls and roof are made of mud, bamboo, grass, leaves, reeds, thatch or unburnt bricks. A pucca house is one whose walls and roofs are made of burnt brick, stone, cement concrete, concrete jack-boards (cement plastered reeds) and timber, tiles, galvanized tin, or asbestos cement sheets used in construction of roofs will be regarded as pucca materials. A semi pucca-house is one of which either the roof of the walls are made of pucca materials like 'burnt bricks, stones, cement concrete or timber.

Type of entrance (code) (B14_q7)
File: Block-14-dwelling unit-particulars-Records

Overview	
Type: Discrete	Valid cases: 16370
Format: character	Invalid: 0
Width: 1	

Interviewer instructions

It is to be ascertained to whether the height of the main entrance of the dwelling unit is sufficient for a person of normal height to enter into the dwelling unit in an upright position without bending his/her body. If it is like that, code 1 will be recorded against this item. Code 2 will be recorded if the person cannot enter into the dwelling unit in an upright position but can do so by bending only. If the height of the entrance is such that one has to crawl for entering into the dwelling unit, code 3 is to be recorded against this item.

Whether the living room is shared with animal (Yes-1,No-2 (B14_q8)
File: Block-14-dwelling unit-particulars-Records

Overview	
Type: Discrete	Valid cases: 16369
Format: character	Invalid: 0
Width: 1	

Interviewer instructions

Code 1 will be entered against this item, if the household keeps livestock in the room in which the members of the household live. If the household does not possess any livestock or there is a separate shed for keeping the livestock, the code to be entered against this item will be 2. However, keeping pet dogs, cats and birds in the living room should not be considered as sharing of room with animals.
