Overview

ABSTRACT

In pursuance of the recommendations made by the Governing Council (G.C.) of the National Sample Survey Organization (NSSO) in its 44th meeting held on 16 January 1987 to undertake a comprehensive survey on the socio-economic conditions of the tribal people in the 44th round (July 1988 - June 1989) of NSS, various schedules of enquiries on the subject were drawn up and tested in the field through a try-out survey. The schedules were discussed in details in the meetings of the Working Groups (W.G) set up by the G.C., NSSO for the NSS 44th round. In the light of the experiences gained through the try-out survey, the schedules of enquiry were finalized by the W.G. and subsequently approved by the G.C. of the NSSO in its 45th meeting held on 29 December 1987.

With a view to studying the problems of land alienation faced by the tribal population due to in-migration of non-tribals in the tribal areas and also to assess the differences in the socio-economic standard of living between the tribals and the non-tribals, a schedule of enquiry (schedule type 29.3) was designed and collected information from the non-tribal households residing in the tribal areas.

KIND OF DATA

Sample survey data [ssd]

UNITS OF ANALYSIS

Randomly selected household and its members

Scope

NOTES

In order to measure the disparity between the tribal and non-tribal households in respect of certain key characteristics and also the extent of displacement of the tribal population from the tribal belts due to in-migration of non-tribals, schedule 29.3 was designed to collect information from the non-tribal households residing in the tribal areas. Thus this schedule was canvassed only in the rural sector in the villages of general and special samples falling under stratum type 1 (tribal concentrated stratum).

The particulars collected through this schedule related to in-migration, economic activity, assets and liabilities along with the details about the extent and manner of acquisition and disposal of land by the non-tribals.

Coverage

GEOGRAPHIC COVERAGE

The survey covered the whole of Indian Union except Ladakh and Kargil districts of Jammu and Kashmir state. This schedule was canvassed only in the rural sector in the villages

Sampling

Sampling Procedure

The sample design is, as usual, stratified two-stage with the census village as the first stage unit in the rural sector and UFS block as the first stage unit in the urban sector. The second stage units were households for all schedules. The sample design in the rural sector was decided with a view to providing good estimates for the tribal enquiry. Except in the north-eastern region, the tribal population was concentrated in some districts within the states having considerable tribal population and even in those districts they were found to be unevenly distributed geographically. Therefore special stratification and selection procedures were adopted not only to net sufficient number of tribal households in the sample but also to improve the design in general for the tribal enquiry.

Sampling frame of villages: The list of 1981 census villages constitute the sampling frame for selection of villages in most districts. However in Assam (where '81 census was not done) and a few districts of some other states (where the available lists of villages were not satisfactory), 1971 census village lists were used as frame.

Stratification : In Haryana, Jammu & Kashmir, Punjab, Chandigarh, Delhi, Goa, Daman & Diu and Pondicherry where there were practically no tribal population, the strata used in NSS 43rd round were retained. In Meghalaya, Mizoram, Nagaland, Arunachal Pradesh, Sikkim, Dadra and Nagar Haveli and Lakshadweep also the strata of 43rd round were retained because of the high percentage of ST. population in these States/U.T.'s. (The strata of 43rd round have been retained in the case of Sikkim as the distribution of tribal population is more or less uniform over all the districts). In the remaining states fresh stratification was carried out as described below.

In these states all districts accounting for the bulk of the states's tribal population were selected for formation of strata with concentration of tribal population. Besides these districts, tribal concentration strata were demarcated also in some other districts with relatively small tribal population in order to ensure coverage of as many different ethnic groups as possible.

Within each district so identified for formation of tribal concentration strata, the tehsils with relatively high concentration of tribal population, together constituted one stratum. These tehsils were selected in such a way that together they accounted for the bulk (70% or more) of the district tribal population and the proportion of tribal to total population and the proportion of tribal to total population in this stratum was significantly greater than that of the district as a whole. The strata so formed were not always geographically contiguous. These tribal concentration strata are called STRATUM TYPE -1. Further, all the strata of Meghalaya, Mizoram, Nagaland, Arunachal Pradesh, Dadra & Nagar Haveli, Lakshadweep and Sikkim are also considered as stratum type-1. All the remaining strata in the rural sector (in any State/U.T.) were called stratum type -2.

General and special sample villages : There were two types of sample villages in this round. The first type was the general sample in which all enquiries were carried out. The second type was designated as "special sample villages" in which only schedules 3.1, 29.1, 29.2 and 29.3 were canvassed. The special samples were intended for augmenting the general sample for the tribal enquiry. These special sample villages were selected only from the tribal concentration strata (stratum type 1) of the 16 States and the U.T. OF Andaman & Nicobar Islands 1) of 16 States and the U.T. of Andaman & Nicobar Islands. There were no special sample villages in the remaining States/U.T.'s. The special samples were called sample type-1 and the general samples, sample type-2.

Schedule type 29.3 was canvassed in the general and special sample villages to tribal strata only. Four households were selected from the frame of non-scheduled tribe households in each of the villages of stratum type 1. In large special sample villages, the distribution of sample households was 2 each from area type 1 and area type 2, Schedule 29.3 was not be canvassed in the urban sector.

Detailed procedures of sampling may be seen in INSTRUCTIONS TO FIELD STAFF : VOLUME I attached as external resource.

Deviations from Sample Design

There was no deviation from the original sample design.

Weighting

Sample weights were NOT included in each of the data files

Questionnaires

Overview

Schedule 29.3 consisted of the following blocks :

Block 1 : identification of sample household

Block 2 : particulars of field operations

Block 3 : remarks by investigator

Block 4 : remarks by supervisory officer (s)

Block 5 : household characteristics

Block 6 : demographic and migration particulars of household members

Block 7 : usual and current week activity particulars

Block 8 : particulars of land owned and possessed activity on the date of survey

Block 9 : particulars of disposal of land during last 5 years

Block 10 : inventory of assets owned on the date of survey.

Block 11 : particulars of cash dues and grain & other commodity dues payable by the household on the date of survey and transaction of loans during last 365 days.

Data Collection

Data Collection Mode

Face-to-face [f2f]

Data Collection Notes

The survey period of the round was divided into four sub-rounds of 3 months each as follows:-

sub-round number period

1 July - September 1988

2 October- December 1988

3 January- March 1989

4 April - June 1989

Equal number of sample villages and block were allocated for survey in each of these sub-rounds. Each village and block was surveyed during the sub-round to which it has been allotted.

Questionnaires

Schedule 29.3 consisted of the following blocks :

Block 1 : identification of sample household

Block 2 : particulars of field operations

Block 3 : remarks by investigator

Block 4 : remarks by supervisory officer (s)

Block 5 : household characteristics

Block 6 : demographic and migration particulars of household members

Block 7 : usual and current week activity particulars

Block 8 : particulars of land owned and possessed activity on the date of survey

Block 9 : particulars of disposal of land during last 5 years

Block 10 : inventory of assets owned on the date of survey.

Block 11 : particulars of cash dues and grain & other commodity dues payable by the household on the date of survey and transaction of loans during last 365 days.

Interviewer instructions

Livelihood Class (code) (B5_q2)

File: Block-5-Household characteristics-records

6.5.1 The livelihood class of a household will be decided on the basis of the source of household's income from gainful activity (for the definition of 'gainful activity', reference may be made to para 6.8.2 (a) .if a household as no such income, the livelihood class will be 'others' (code 99). If household's income is mostly from one source, there will not be any difficulty in classifying its livelihood class. But, if the members of the household, excluding those employed by the household and the paying guests, derive their income from more than one source listed under livelihood class codes at the bottom of the block in the schedule, the source which has fetched the maximum income during the last 365 days will be the livelihood class for the household and the corresponding code is to be entered against this item. It is to be noted that if the collection of minor forest products is the main source of income and if selling is the main purpose behind the collection of minor products, the livelihood class will be 5 and not 1. Apart from wood obtained from the forests, which is generally referred to as major forest products, there are large number of other products obtained from root, barks, leaves flower and fruits which are known under the generic name of minor Forest produce. Livelihood code will be 1 when the household members hunt, trap and gather forest products for household consumption only and the incomes generated from such activities during the reference year add up to the maximum amount. In fact this livelihood class indicates a very early stage of economy. There are some tribal households who live solely or mainly on hunting, trapping and gathering of forest produces

Industry (Code) (B5_q3)

File: Block-5-Household characteristics-records

Overview

Type: Discrete	Valid cases: 9805
Format: character	Invalid: 0
Width: 3	

Interviewer instructions

The entry against this item will be recorded in terms of six digit code numbers of which first three left hand digits will refer to the appropriate 'industry-group' and the next three to the relevant occupation family' of the NIC 1987 and NCO 1968 respectively.

Occupation (Code) (B5_q3ii)

File: Block-5-Household characteristics-records

Religion (B5_q4)

File: Block-5-Household characteristics-records

Overview

Type: Discrete	Valid cases: 10050
Format: character	Invalid: 0
Width: 1	

Interviewer instructions

6.5.6 the religion of the household in terms of the specified code will be recorded against this item. If different members of the household claim to have different religions, the religion of the head of the household will be considered as the religion of the household. In case a tribal household claims to belong to a religion other than those mentioned against religion codes 1 to 7, it is to be ascertained as to whether the proclaimed religion is a traditional tribal religion or not. If yes, the entry against this item will be 8 : otherwise code 9 will be entered against this item.

Land owned (0.00 Acres) (B5_q5)

Interviewer instructions

The marital status of each member will be recorded in this column in terms of the specified code numbers.

Highest level of education attained (B6_c7)

File: Block-6-Demographic and migration particulars-records

Overview

Highest level of education attained (B6_c7)

File: Block-6-Demographic and migration particulars-records

Type: Discrete
Format: character
Width: 2

Valid cases: 49227
Invalid: 0

Interviewer instructions

Information regarding the education attained by the normal members of the household listed in col. (1) will be recorded in col. (9) in terms of specified codes. For the purpose of making entries in this column, only the course successfully completed will be considered. For instance, those who have passed class XII is considered as higher secondary. Hence, for a person who has studied up to, say, first year B.A., his educational attainment will be considered as higher secondary (code 07). Similarly for a person who has studied up to 12th standard but has not sat for the examination or has failed, his educational attainment will be considered 'secondary' only.

Whether place of enumeration different from last usual residence (B6_c8)

File: Block-6-Demographic and migration particulars-records

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 49149
Invalid: 0

Interviewer instructions

6.6.13 For obtaining the appropriate response to this question, it has to be ascertained from each member of the household, whether his/her place of enumeration is different from the last (previous) usual residence. The usual residence for the purpose of this survey has been defined as a place (village or town) where the person has stayed continuously for a period of six months or more. If the answer is in the affirmative, code 1 and if it is in the negative code 2 will be recorded in col. (13). The place of enumeration will, obviously, be his/her current place of stay (destination) and the place (village or town) where the person stayed continuously for a period of six months or more any time in his/her life time prior to moving into the current place of stay (i.e. place of enumeration) will be considered 'the place of last usual residence' (origin). However, it may be noted here that visits of daughter-in-law (staying sometimes more than six months) to their parent's house for child birth or for any other reason will not be considered as migratory movement and, therefore, will not be taken into account for making entries in this column.

Period since leaving the last usual place of residence (Years) (B6_c9)

File: Block-6-Demographic and migration particulars-records

Overview

Type: Continuous
Format: numeric
Width: 2
Decimals: 0
Range: 0-97

Valid cases: 13982
Invalid: 35248
Minimum: 0
Maximum: 97
Mean: 15.3
Standard deviation: 13.9

Interviewer instructions

6.6.13 The period elapsed since leaving the last usual residence will be recorded in years rounded off to the nearest integer in this column. For working out this, the period of temporary stay (less than six months) in other places after leaving the last usual residence and ultimately moving into the place of enumeration will also be included. If the period so determined is less than six months, the entry will be '0' in this column.

From where migrated (B6_c10)

File: Block-6-Demographic and migration particulars-records

Overview

From where migrated (B6_c10)

File: Block-6-Demographic and migration particulars-records

Interviewer instructions

the type of area from where the person has migrated to the place of enumeration, i.e., the type of last usual residence will be recorded in this column in terms of the specified codes for each migrant member.

Reason for leaving the last usual place of residence (code) (B6_c11)

File: Block-6-Demographic and migration particulars-records

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 13961
Invalid: 0

Interviewer instructions

6.6.13 The reason for moving out of the last usual residence will be ascertained for each migrant member and entered in terms of the specified code in this column. It may so happen that a person has moved out of his last usual residence for a particular reason, stayed in a different town/village for a short period (less than six months) and then moved to the place of enumeration for a different reason. In such a case only the reason which motivated his/her first movement (i.e. the movement from the last usual residence) will be recorded.

Duration of stay in last usual place of residence (Years) (B6_c12)

File: Block-6-Demographic and migration particulars-records

Description

Principal Usual Activity Status (Code) (B7_c2)

File: Block-7-activity particulars-records

The activity status of an individual is the activity situation obtaining for the person in respect of his/her participation in gainful and also non-gainful activities during the given reference period. Normally, one of the following three major activity situations or combination of them will obtain to a person :

(i) of working or being engaged in gainful activities (work) for pay. Profit or family gain.

(ii) of being not engaged in gainful activities (work) but either of making tangible efforts to seek work or being available for work. and

(i) of being not available for work because of various reasons.

Interviewer instructions

The usual activity status of a person will be determined on the basis of the various activities pursued by the person during the reference period of 365 days adopting "relatively long time (major time)" criterion. For this, a person has to be first classified into one of the three broad category groups (working, not working but seeking and/or available for work and neither working nor available for work) on the basis of the time spent on them during the reference period of 365 days preceding the date of survey. Thus the broad activity status of a person will be one of the three category groups, on which the person spent relatively long time during the 365 days. In deciding this, one should consider only the normal working time available for pursuing the various activities and not 24 hours of each day. After deciding the broad usual status of the person, the detailed activity status within the broad group will be determined adopting again the "relatively long" or 'major time" criterion. The detailed activity status, thus determined, will be the principal usual activity status of the person. The code corresponding to this activity status will be recorded in col. (2) against the serial number of the person. It may be noted that if a person found to be engaged in domestic duties (or any non-gainful activity for a relatively long period of the reference period of 365 days is also reported to be simultaneously seeking/available for work, the person should be categorized as "unemployed" and not as "engaged in domestic duties" (or the non-gainful activity pursued).

Format: character	Invalid: 0
Width: 1	

Interviewer instructions

6.8.3 For each person listed in this block, it has to be ascertained whether the person worked in a subsidiary capacity during the 365 days preceding the date of survey, or in other words, whether the person had a subsidiary gainful usual status.

Subsidiary activity Status (Code) (B7_c7)

File: Block-7-activity particulars-records

Overview

Type: Discrete	Valid cases: 10007
Format: character	Invalid: 0
Width: 2	

Interviewer instructions

6.8.3 persons having code 1 in col. (6), the status code of the gainful activity pursued by them in their subsidiary capacity will be recorded in column (7) . In the situation where a person has been found to have pursued more than one gainful activity during the last 365 days in his or her subsidiary capacity, the activity on which more time has been spent would be considered for recording entry in this column.

Current week activity Status (Code) (B7_c11)

File: Block-7-activity particulars-records

Interviewer instructions

the current week activity status of a person will be the activity status obtaining for a person during the reference period of seven days preceding the date of survey. Irrespective of the usual activity pursued by a person, his/her current week activity will be determined strictly on the basis of the activities pursued by the person during the reference period of seven days preceding the date of survey adopting the priority criterion.

Type of ownership (Code) (B8_c7)

File: Block-8-of land owned and possessed-records

Overview

Type: Discrete	Valid cases: 19840
Format: character	Invalid: 0
Width: 1	

Interviewer instructions

A plot may be possessed by a tribal household according to traditional tribal rights. Generally, a plot of land is given to the household by local chieftains or village/district council. The holder of such land may or may not possess a title of ownership. Even if the household does not possess a title of ownership, it will be deemed to have owner like possession without title provided the household has the right of long term use of the land. Government is aware of the situation and in some states has taken various measures to confer titles to the owner of those lands. In column (7), information on the status of ownership of each plot will be collected. The entries will be made in codes

How acquired (Code) (B8_c8)

File: Block-8-of land owned and possessed-records

Overview

Type: Discrete	Valid cases: 19840

	Standard deviation: 1.9

Interviewer instructions

Particulars of plots taken on rent lease by the household and held on the date of survey will be recorded in these columns. For leased-in plots, columns (1) to (4) and columns (15) to (17) only are to be filled in. Area leased in by the household will be recorded in col. (15) in acres up to 2 places of decimal separately for each plot leased-in. Information pertaining to terms under which leasing-in of the plots were agreed upon would be recorded in column (16). For recording entries in column (17), it is necessary to ascertain the type of lessor from whom the land has been taken lease. It is to be noted that in some tribal areas, the ownership of land vests with the community. Village /District Council, tribal chief or clan chief allots a piece of land to the individual for a specified period (say, for a cycle in case of shifting cultivation). If any such land is possessed by the household on the date of survey, it will be considered as leased-in.

Range: 0-240000

Mean: 13541.3

Standard deviation: 25694.8

Interviewer instructions

The amount of compensation received or receivable for the disposal of land will be recorded in rupees in col. (10). The entry in this column will be 0(zero), if no compensation is received or receivable. Whether the full settlement amount has already been received or not will be ascertained. If full amount is received, code 1 will be entered in col. (11) and if only part payment is received the appropriate code for col. (11) will be 2. code 2 will also be applicable in cases where no payment has been received by the household till the date of survey, although some amount is receivable on account of the disposal of land. Further enquiry is to be made to ascertain as to whether the household considers the full settlement amount (even if the full amount is not yet received) as adequate compensation for the land disposed of. If yes, code 1 will be recorded in col. (12); otherwise, the entry in this column will be 2.

Interviewer instructions

The items of assets on which information is to be collected have been printed under col. (2) of schedule. For most of the items, entry in col. (3) will indicate the number of such items owned by the household on the date of survey. However, for items relating to land except land for house site (serial nos. 02 to 06), area owned is to be recorded in 0.00 acres in col. (3). For house site, the area is to be recorded in the area is to be recorded in square meter. Again, the appropriate entry in col. (3) will be floor area in square meter for the items relating to building (serial nos. 18 to 22). Printed cross (x) has been provided in col. (3) against some items for which quantity figures are not required.

Value (Rs.) (B10_c4)

Description

All claims against the household held by others will be considered as loans of the household. Unpaid bills of grocers, doctors etc. will also constitute the liability of the household. Unpaid bills of grocers etc. will also constitute the liability of the household. Sometimes, payments are made regularly to shopkeepers, doctors etc. once in a month or after a fixed period of interval. In such cases, dues will be considered payable only after the expiry of the due date.
