Overview

ABSTRACT
The 44th round started from July 1988. The survey period of this round was July 1988 to June 1989. This round has been devoted to mainly three enquiries. First and foremost, there has been an enquiry on the living condition of the tribal population. Of the other two, one is concerned with the housing condition of the general population and the other is a survey on current building construction activity. For the purpose of this enquiry, "tribal population" mean the members of the Scheduled Tribes declared under the Article 342 of the Constitution of India. They are known to be the descendants of the earliest inhabitants of India (hence called "Adivasis"). At present, in most parts of India, they form one of the economically weakest sections of the society. So far there has not been any systematic study of their living conditions covering the whole country. Whatever data are available are derived from the decennial censuses, apart from some micro studies carried out by social anthropologists. In the NSS the tribal population has always been covered as part of the general population. In NSS 32nd and 33rd rounds special surveys had been carried out through an integrated schedule (schedule 16.4) in the North-Eastern region. The survey was conducted in the rural areas of the following States:- 32nd round : Arunachal Pradesh, Assam (N. Cachar and Karbi Anglong districts only), Manipur, Meghalaya and Tripura; 33rd round : In addition to the above States, Mizoram also. Even though this covered many aspects specially related to the life of the people of this region (who are mostly tribals), no such survey has so far been undertaken about the life of the tribals living in the main tribal belt stretching from West Bengal through Bihar, Orissa, Madhya Pradesh to Gujarat and Rajasthan. The scope of the enquiry is to understand the living condition of the tribals living in the main tribal belt stretching from West Bengal through Bihar, Orissa, Madhya Pradesh to Gujarat and Rajasthan.) The object of the enquiry in the this round is to throw light on as many aspects as possible of the tribal population of this country. This relates to aspects of their "level of the living" including demographic and activity particulars, family expenditure etc. as well as to their entrepreneurial activities.

KIND OF DATA
Sample survey data [ssd]

UNITS OF ANALYSIS
Randomly selected households based on sampling procedure and members of the household

Scope

NOTES
NSS Round 44 Schedule 29.2 has been designed to collect information on enterprise accounts, economic activity, land particulars and other related aspects of the tribal households. The major items include in this schedule are ownership particulars of land, alienation of land during last five years, input and output of the enterprises run by the household, materials collected from the forest, inventory of assets owned and indebtedness of the household. The schedule consists of 17 blocks as enumerated below:

Block 1: identification of sample household

Block 2: particulars of field operations

Block 3: remarks by investigator

Block 4: remarks by supervisory officer (s)

Block 5: household characteristics

Block 6: demographic particulars of household members

Block 7: particulars of assistance received by the household during last 3 years

Block 8: particulars of land owned and possessed

Block 9: particulars of disposal of land during last 5 years

Block 10: information on input items for cultivation during 1987-88

Block 11: particulars of crops produced during 1987-88

Block 12: particulars of wage employment in forest and forestry operation

Block 13: particulars of forest produce collected, consumed at home and sold by household members during last 30 days as self-employed

Block 14: particulars of household enterprise (other than cultivation) during last 30 days

Block 15: particulars of products (other than forest products) marketed during last 30 days

Block 16 : inventory of assets owned on the date of survey

Block 17 : cash dues and grain & other commodity dues payable by the household as on the date of survey and particulars of transaction of loans during last 365 days

Coverage

GEOGRAPHIC COVERAGE
The survey covered the whole of Indian Union except Ladakh and Kargil districts of Jammu and Kashmir state. The rural areas of Nagaland, so far outside NSS coverage up to the 43rd round, have also been brought in this round.

UNIVERSE
The survey used the interview method of data collection from a sample of randomly selected households and members of the household.

Sampling

Sampling Procedure

The sample design is stratified two-stage with the census village as the first stage unit in the rural sector and UFS block as the first stage unit in the urban sector. The second stage units are households.

The sample design in the rural sector has been decided with a view to providing good estimates for the tribal enquiry. Except in the north-eastern region, the tribal population is concentrated in some districts within the states having considerable tribal population and even in those districts they are found to be unevenly distributed geographically. Therefore special stratification and selection procedures have been adopted not only to net sufficient number of tribal households in the sample but also to improve the design in general for the tribal enquiry.

While the rural design is oriented towards the tribal enquiry, the urban design is oriented towards the enquiry on construction. As building construction activity is found to be concentrated in some areas in the urban sector, attempts have been made in urban design to demarcate such areas in larger towns as separate strata. Detailed description of the rural and urban sample designs are as follows:

SAMPLE DESIGN : RURAL

Sampling frame of villages:
The list of 1981 census villages constitute the sampling frame for selection of villages in most districts. However in Assam (where '81 census was not done) and a few districts of some other states (where the available lists of villages were not satisfactory), 1971 census village lists have been used as frame.

Stratification :
In Haryana, Jammu & Kashmir, Punjab, Chandigarh, Delhi, Goa, Daman & Diu and Pondicherry where there are practically no tribal population, the strata used in NSS 43rd round were retained. In Meghalaya, Mizoram, Nagaland, Arunachal Pradesh, Sikkim, Dadra and Nagar Haveli and Lakshadweep also the strata of 43rd round were retained because of the high percentage of ST population in these States/U.T.'s. (The strata of 43rd round have been retained in the case of Sikkim as the distribution of tribal population is more or less uniform over all the districts). In the remaining states fresh stratification was carried out as described below.

In these states all districts accounting for the bulk of the state's tribal population were selected for formation of strata with concentration of tribal population. Besides these districts, tribal concentration strata have been demarcated also in some other districts with relatively small tribal population in order to ensure coverage of as many different ethnic groups as possible.

Within each district so identified for formation of tribal concentration strata, the tehsils with relatively high concentration of tribal population, together constituted one stratum. These tehsils were selected in such a way that together they accounted for the bulk (70% or more) of the district tribal population and the proportion of tribal to total population in this stratum was significantly greater than that of the district as a whole. The strata so formed were not always geographically contiguous. These tribal concentration strata are called STRATUM TYPE -1. Further, all the strata of Meghalaya, Mizoram, Nagaland, Arunachal Pradesh, Dadra & Nagar Haveli, Lakshadweep and Sikkim are also considered as stratum type-1. All the remaining strata in the rural sector (in any State/U.T.) are called stratum type -2.

Deviations from Sample Design

There was no deviation from the original sampling design.

Questionnaires

Overview

NSS Round 44 Schedule 29.2 consists of 17 blocks as enumerated below:

Block 1: identification of sample household
Block 2: particulars of field operations
Block 3: remarks by investigator
Block 4: remarks by supervisory officer (s)
Block 5: household characteristics
Block 6: demographic particulars of household members
Block 7: particulars of assistance received by the household during last 3 years
Block 8: particulars of land owned and possessed
Block 9: particulars of disposal of land during last 5 years
Block 10: information on input items for cultivation during 1987-88
Block 11: particulars of crops produced during 1987-88
Block 12: particulars of wage employment in forest and forestry operation
Block 13: particulars of forest produce collected, consumed at home and sold by household members during last 30 days as self-employed
Block 14: particulars of household enterprise (other than cultivation) during last 30 days
Block 15: particulars of products (other than forest products) marketed during last 30 days
Block 16 : inventory of assets owned on the date of survey
Block 17 : cash dues and grain & other commodity dues payable by the household as on the date of survey and particulars of transaction of loans during last 365 days

Variable List

Blocks 1, 5_household characteristics

Content	The identification particulars of the sample village/block and the sample household in which the survey schedule have been canvassed have been recorded in block 1. Certain characteristics of the sample household, such as, size, social-group, principal occupation, etc., meant to be used as classificatory variables have been recorded in block 5.

Description

Sub Sample (SubSample)
File: Blocks 1, 5_household characteristics

An important feature of the NSS sampling design is that the total sample of first stage units is drawn in the form of two or more independent and parallel samples, termed as interpenetrating sub-samples. Each sub- sample is drawn by the same sampling scheme and is capable of providing valid estimates of the population parameters. The comparison of sub-sample wise estimates shows the margin of uncertainty associated with the combined sample estimate.

Interpenetrating sub-samples have been used in NSS (i) to obtain valid estimates from each sub-round (season) of the survey round, and (ii) to ensure that Central and State samples for any State/ UT cover independent and equally valid samples of units.

The samples surveyed by the NSSO staff are termed as Central sample and the matched samples surveyed by State Government staff are termed as State sample.

Informant's Reln. to Head (Informant_code)
File: Blocks 1, 5_household characteristics

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 15798
Invalid: 0

Literal question

What is informant's relation to head of the household?

Interviewer instructions

The relationship of the principal informant (i.e. the person providing the bulk of the information) to the head of the household is to be recorded in the box space in terms of codes. The relevant codes are:
head of the household 1
other member of the household ...2
others 9

Response Code (Resp_Code)
File: Blocks 1, 5_household characteristics

Overview

Type: Discrete

Interviewer instructions

Response Code (Resp_Code)
File: Blocks 1, 5_household characteristics

This item will be filled in after collecting all the required information for all items in the schedule. The entry is to be made in terms of codes on the basis of the impression formed by the investigator regarding the overall response of the informant. The codes are:

informant co-operative and capable 1
informant co-operative but not capable 2
informant busy 3
informant reluctant 4
others 9

Survey Code (Survey_Code)
File: Blocks 1, 5_household characteristics

Overview	
Type: Discrete	Valid cases: 15814
Format: character	Invalid: 0
Width: 1	

Interviewer instructions

Survey code: Whether the originally selected sample household has been surveyed or a substituted household has been surveyed will be indicated against this item by recording '1' if it is the originally selected sample household, and '2' if it is the substituted one. If neither the originally selected household nor the substituted household can be surveyed i.e., if the sample household is a casualty, code '3' will be recorded.

Casualty Code (Casualty_Code)
File: Blocks 1, 5_household characteristics

Overview	
Type: Discrete	Valid cases: 118
Format: character	Invalid: 0
Width: 1	

Interviewer instructions

If the originally selected household cannot be surveyed, irrespective of whether a substitute household can be surveyed or not, the reason for the originally selected household becoming a casualty will be recorded against this item in terms of codes. The codes are :

informants busy 1
members away from home 2
informant non-cooperative 3
others 9

Household size (B5_q1)
File: Blocks 1, 5_household characteristics

Overview	
Type: Continuous	Valid cases: 15814
Format: numeric	Invalid: 0
Width: 2	
Decimals: 0	

Description

Household size (B5_q1)
File: Blocks 1, 5_household characteristics

Household
A household is a group of persons who normally live together and take food from a common kitchen. However, a boarding house, a hotel or a hostel is treated as a cluster of households, where each individual boarder forms a separate household. If, however, a group of persons among them normally pooled their income for spending, they together are treated as constituting a single household. Barracks of military and paramilitary forces, orphanages and vagrant-houses are excluded from the scope of the survey.

Household size:
The size of a household is taken to be the number of members normally residing in it. This size includes temporary stay-aways but excludes temporary visitors and guests of the household.

Literal question

How many members are there in the household?

Interviewer instructions

Size of the sample household i.e. the total number of persons normally residing together (under the same roof) and taking food from the same kitchen (including temporary stay-aways and excluding temporary visitors) will be recorded against this item. Total number of normal resident members of the household will be considered as its size. The entry against this item will be equal to the last serial number in col. (1) of block 6.

Livelihood class (Code) (B5_q2)
File: Blocks 1, 5_household characteristics

Overview

Type: Discrete
Format: character
Width: 2

Valid cases: 15807
Invalid: 0

Literal question

What are the means of livelihood for the household?

NIC Code (B5_q3a)
File: Blocks 1, 5_household characteristics

Overview

Type: Discrete
Format: character
Width: 3

Valid cases: 15328
Invalid: 0

Literal question

Which industry is the principal earner working in?

Interviewer instructions

The household industry -occupation determined according to the definition, three digit level industry (NIC, 1970) and occupation (NCO, 1968) codes for the household are to be recorded in the box spaces against item 3. The industry code will be recorded in the left most three box spaces followed by occupation code.

Literal question

What is the occupation of the principal earner of the household?

Name of the tribe (Code) (B5_q4)
File: Blocks 1, 5_household characteristics

Overview

Type: Discrete
Format: character
Width: 2

Valid cases: 15787
Invalid: 0

Literal question

What is the name of the tribe?

Religion (Code) (B5_q5)
File: Blocks 1, 5_household characteristics

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 15800
Invalid: 0

Literal question

What is the religion of the household?

Interviewer instructions

Religion of the household will be recorded in terms of the specified code in this column. The codes are :

1 Hinduism
2 Islam
3 Christianity
4 Sikhism
5 Jainism
6 Buddhism
7 Zorastrianism
9 Others

Sex of the head of the household (B5_q6)
File: Blocks 1, 5_household characteristics

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 15814
Invalid: 0

Literal question

What is the sex of the head of the household?

Interviewer instructions

The sex of the head of the household will be recorded against item 6 in terms of codes. The codes are :
male 1
female 2

Land owned (0.00 acres) (B5_q7)
File: Blocks 1, 5_household characteristics

Overview

Land owned (0.00 acres) (B5_q7)
File: Blocks 1, 5_household characteristics

Type: Continuous
Format: numeric
Width: 7
Decimals: 2
Range: 0-3504

Valid cases: 13991
Invalid: 1823
Minimum: 0
Maximum: 3504
Mean: 3
Standard deviation: 30

Literal question

How much land is owned by the household?

Interviewer instructions

Particulars of land owned will be collected in details in block 8 of this schedule. The total of the entries in col. (6) of block 8 will give the area owned by the sample household and will be recorded against item 7 of block 5.

Land possessed (0.00 acres) (B5_q8)
File: Blocks 1, 5_household characteristics

Overview

Type: Continuous
Format: numeric
Width: 7
Decimals: 2
Range: 0-3504

Valid cases: 14859
Invalid: 955
Minimum: 0
Maximum: 3504
Mean: 3.1
Standard deviation: 29.9

Literal question

How much land is possessed by the household?

Interviewer instructions

The total land possessed by the household will, generally, be equal to the land 'owned' plus land 'leased in' minus land 'leased out'. Thus, land possessed will be worked out by subtracting the entry against 'total line' of col. (11) from the sum of the entries against 'total line' in col.(6) and (15) of block 8. However, if any household possesses some land which is neither owned nor leased in, then the area of such land will be added with the area of land possessed derived from block 8 and the total will be recorded in 0.00 acre against item 8.

Type of cultivation (Code) (B5_q9)
File: Blocks 1, 5_household characteristics

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 15814
Invalid: 0

Literal question

What type of cultivation method is followed by the household? Is it shifting or settled cultivation method?

Interviewer instructions

Of the two types of cultivation, namely, the settled and shifting, the one in which the household was engaged during the agricultural year 1987-88 will be shown against item 9 in terms of codes. If the household was engaged only in settled cultivation, code 1 would be recorded against this item and code 2 would be entered if the household was engaged only in shifting cultivation. The appropriate code would be 3 when the household carried out settled as well as shifting cultivation. Code 4 would be assigned to those households who did not undertake any cultivation during the reference period.

Area under settled cultivation (0.00 acres) (B5_q10)
File: Blocks 1, 5_household characteristics

Overview

43

Area under settled cultivation (0.00 acres) (B5_q10)
File: Blocks 1, 5_household characteristics

Type: Continuous
Format: numeric
Width: 7
Decimals: 2
Range: 0-9999.99

Valid cases: 9988
Invalid: 5826
Minimum: 0
Maximum: 10000
Mean: 66.2
Standard deviation: 791.5

Literal question

How much area is under settled cultivation?

Interviewer instructions

Depending upon the entry against item 9, area under settled or under settled or under shifting cultivation or under both will be recorded in 0.00 acre. Although there may not be much of a problem in collecting information in respect of settled cultivation, area under shifting cultivation may not be readily available. Plots of land under shifting cultivation are not usually measured in the way it is done in the case of plain land under settled cultivation. The informant may give some idea of the length and breadth of the plots by some unconventional measures, such as, number of foot steps, number of bamboo poles of certain length, seed ratio etc. The area will, thus, be estimated and converted into acres and then recorded here.

Area under shifting cultivation (0.00 acres) (B5_q11)
File: Blocks 1, 5_household characteristics

Overview

Type: Continuous

Width: 7
Decimals: 2
Range: 0-9999.99

Valid cases: 3566
Invalid: 12248
Minimum: 0
Maximum: 10000
Mean: 323.7
Standard deviation: 1766.6

Literal question

How much area is under shifting cultivation?

Interviewer instructions

Depending upon the entry against item 9, area under settled or under settled or under shifting cultivation or under both will be recorded in 0.00 acre. Although there may not be much of a problem in collecting information in respect of settled cultivation, area under shifting cultivation may not be readily available. Plots of land under shifting cultivation are not usually measured in the way it is done in the case of plain land under settled cultivation. The informant may give some idea of the length and breadth of the plots by some unconventional measures, such as, number of foot steps, number of bamboo poles of certain length, seed ratio etc. The area will, thus, be estimated and converted into acres and then recorded here.

Hhold consumer exp. out of home grown stock & free collection (Rs) (last 30 days) (B5_q12)
File: Blocks 1, 5_household characteristics

Overview

Type: Continuous
Format: numeric
Width: 6
Decimals: 0
Range: 0-140000

Valid cases: 13513
Invalid: 2301
Minimum: 0
Maximum: 140000
Mean: 380.1
Standard deviation: 2774.1

Literal question

How much did the household consume out of home grown stock & free collection in terms of rupees in the last 30 days?

Interviewer instructions

Hhold consumer exp. out of home grown stock & free collection (Rs) (last 30 days) (B5_q12)
File: Blocks 1, 5_household characteristics

Consumer expenditure of a household is the expenditure incurred by it for the purpose of its domestic consumption. Expenditure incurred by the household on account of its productive enterprises will not be taken into consideration in arriving at the household consumer expenditure. Total household consumption will consist of consumption made out of

(i) commodities and services purchased in cash or on credit.
(ii) Commodities and services received in exchange of goods and services including those received from government under NREP, RLEGP etc.
(iii) Home-grown/home-produced stock.
(iv) Transfer receipts such as borrowings, gifts etc.
(v) Free collection.

The part of household consumer expenditure during 30 days preceding the date of survey made out of the goods produced by the household in its own farm and/ or non-farm enterprises and that made out of free collection will be added together and the total will be recorded in rupees against item 12. While for the commodities consumed from the home-grown/produced stock, evaluation will be done at the ex-farm or ex-factory price, for the commodities consumed out of free collection, the evaluation will be done at the average local retail price.

Total Hhold consumer exp. (Rs) (last 30 days) (B5_q13)
File: Blocks 1, 5_household characteristics

Overview	
Type: Continuous	Valid cases: 15814
Format: numeric	Invalid: 0
Width: 6	Minimum: 0
Decimals: 0	Maximum: 140000
Range: 0-140000	Mean: 820
	Standard deviation: 2657.2

Interviewer instructions

The total household consumer expenditure during the reference period of 30 days preceding the data of survey will be arrived at taking into consideration all the five constituent sources listed below :

(i) commodities and services purchased in cash or on credit.
(ii) Commodities and services received in exchange of goods and services including those received from government under NREP, RLEGP etc.
(iii) Home-grown/home-produced stock.
(iv) Transfer receipts such as borrowings, gifts etc.
(v) Free collection.

and the same will be recorded in rupees against item 13.

Hhold monthly per capita exp. (Rs 0.00) (B5_q14)

Width: 7	Minimum: 0
Decimals: 2	Maximum: 8333.3
Range: 0-8333.33	Mean: 166.9
	Standard deviation: 273

Description

Household consumer expenditure:
It is the expenditure of a household on domestic consumption only. It is the same as the expenditure covered in the consumer expenditure survey of the NSSO. Any expenditure incurred by the household on its enterprise account was excluded from consumer expenditure.

Household monthly per capita consumer expenditure (MPCE):
This was obtained from the household's total consumer expenditure during last 30 days divided by the household size and recorded in terms of rupees and paisas.

Sub Sample (SubSample)
File: Block 6_demographic particulars of household member

Type: Discrete
Format: character
Width: 1

Valid cases: 77784
Invalid: 0

Description

An important feature of the NSS sampling design is that the total sample of first stage units is drawn in the form of two or more independent and parallel samples, termed as interpenetrating sub-samples. Each sub- sample is drawn by the same sampling scheme and is capable of providing valid estimates of the population parameters. The comparison of sub-sample wise estimates shows the margin of uncertainty associated with the combined sample estimate.

Interpenetrating sub-samples have been used in NSS (i) to obtain valid estimates from each sub-round (season) of the survey round, and (ii) to ensure that Central and State samples for any State/ UT cover independent and equally valid samples of units.

The samples surveyed by the NSSO staff are termed as Central sample and the matched samples surveyed by State Government staff are termed as State sample.

Village/Bl. Srl. No. (Vill_Blk_Slno)
File: Block 6_demographic particulars of household member

Education (B6_q7)
File: Block 6_demographic particulars of household member

Literal question

What is the education level of the member of the household?

Interviewer instructions

Information regarding the general education attained by the normal members of the household listed in col. (1) will be recorded in this col. in terms of the specified code numbers. For the purpose of making entries in this column, only the course successfully completed will be considered. For instance, for a person who has studied up to first year B.A., his educational attainment will be considered only secondary/higher secondary. Also, for a person who has studied up to 12th standard but has not sat for the final examination or has failed or even passed in the examination, his educational attainment will be considered secondary/higher secondary. The relevant codes to be used for recording entries in this column are:

01 not literate
02 literate without formal schooling
03 literate but below primary
04 primary
05 middle
06 secondary
07 higher secondary
08 diploma / certificate course in agriculture
09 diploma / certificate course in engineering & technology
10 diploma / certificate course in other subjects
11 graduate & above in agriculture
12 graduate & above in engineering & technology
13 graduate & above in medicines
14 graduate & above in other subjects

Literal question

If the household received assistance, then how much was the value in rupees of this assistance?

Interviewer instructions

If the entry in col. (3) against an item is 1, total value of the assistance received during the last 3 years for the item will be recorded in col. (5) in rupees. When the assistance is partly in the form of subsidy and partly as loan, the total of subsidy and loan will be recorded here.

Whether assistance is for physical assets (B7_q6)
File: Block 7_particulars of assistance received by the household during last 3 year

Overview	
Type: Discrete	Valid cases: 3062
Format: character	Invalid: 0
Width: 1	

Literal question

If the household received assistance, then whether this assistance was for physical assets?

Interviewer instructions

When an assistance for an item is received by the household during last 3 years, it is to be further enquired whether the assistance has been given for obtaining physical asset. If yes the entry in column (6) will be 1; otherwise 2 will be entered in that column.

If yes in q6 whether still possessed (B7_q7)
File: Block 7_particulars of assistance received by the household during last 3 year

Overview	
Type: Discrete	Valid cases: 1749
Format: character	Invalid: 0
Width: 1	

Literal question

If the household received assistance in the form of physical assets, then whether this physical asset is still possessed?

Interviewer instructions

If the household has received the assistance for owning a physical asset (i.e. if the code in col. (6) is 1), a further enquiry is to be made to determine whether the said asset is still under the possession of the household on the date of survey. If the entire asset is under the possession of the household, the entry in col. (7) against that item will be 1. If, on the other hand, only part of the physical asset is possessed by the household on the date of survey, the relevant entry in col. (7) will be 2. The appropriate code in col. (7) will be (3),) when the asset is not in the possession of the household.

If 2 or 3 in q7, reason for non-possession (B7_q8)

If the household received assistance in the form of physical assets and this physical asset is not possessed now, then what was the reason for non-possession?

Interviewer instructions

If the household does not possess the physical asset, received as assistance during last 3 years, in its entirety (i.e. if the code in col. (7) is either 2 or 3), the reason for non-possession will be recorded in terms of codes as given below:

sold 1
mortgaged 2
consumed 3
died 4
destroyed by natural calamities 5
destroyed by wild animals 6
usurped by others 7
others 8

Valid cases: 30194
Invalid: 0

Interviewer instructions

Serial number of plots either owned or leased in by the household as on the date of survey, will be recorded in col. (1). The plots will be listed in the following order:

(i) the plots owned wholly or partly by the household will be listed first;

(ii) next, the plots partially owned and partially leased in, if any, will be recorded;

(iii) finally, the plots taken on lease wholly of partly and possessed on the date of survey will be listed.

The last line of the block will give the grand total of the entries.

Location (Code) (B8_q3)
File: Block 8_particulars of land owned and possessed

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 30108
Invalid: 0

Literal question

What is the location of the plot?

Interviewer instructions

The location of the plot in terms of codes is to be entered in this column. The location codes are different for rural households and urban households and are as follows:

for rural schedules for urban schedules

within village .... 1 within sample town 1
outside village: outside sample town:
in the rural sector .... 2 in the urban sector 2
in the urban sector ....3 in the rural sector 3

Geographical area of plot (0.00 acres) (B8_q4)
File: Block 8_particulars of land owned and possessed

Overview

Whether the area of the plot quoted from document or from memory?

Area owned (0.00 acres) (B8_q6)
File: Block 8_particulars of land owned and possessed

Overview

Type: Continuous
Format: numeric
Width: 7
Decimals: 2
Range: 0-3504

Valid cases: 28484
Invalid: 1710
Minimum: 0
Maximum: 3504
Mean: 1.5
Standard deviation: 20.9

Literal question

How much is the area owned?

Interviewer instructions

If the entire plot is owned by the members of household, the total owned area, which is the total geographical area will be recorded in acres up to two places of decimal in column (6). If, however, the plot is owned jointly by two or more households, the actual area owned by the members of the household is quoted from some document by the informant, code 1 will be entered in col. (5); otherwise code 2 will be recorded.

Type of ownership (Code) (B8_q7)
File: Block 8_particulars of land owned and possessed

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 28470
Invalid: 0

Literal question

What is the type of ownership? Is the title clear?

Type of ownership (Code) (B8_q7)
File: Block 8_particulars of land owned and possessed

Interviewer instructions

A plot may be possessed by a tribal household according to traditional tribal rights. Generally, a plot of land is given to the household by local chieftains or village/district council. The holder of such land may or may not possess a title of ownership. Even if the household does not possess a title of ownership, it will be deemed to have owner like possession without title provided the household has the right of long term use of the land. Government is aware of the situation and in some states has taken various measures to confer titles to the owner of those lands. In column (7), information on the status of ownership of each plot will be collected. The entries will be made in codes as given below:

with title 1
without title but applied for 2
without title and not applied for 3
customary title 4

One of the codes 1 to 3 will be applicable in those states where Government has already conferred titles or is taking measures towards that direction. Code 4 will be given in cases where a plot is owned according to tribal rights and where (in states or districts) Government has not yet taken any step towards conferring titles to individuals.

How acquired (Code) (B8_q8)
File: Block 8_particulars of land owned and possessed

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 28470
Invalid: 0

Literal question

How the plot was acquired?

Interviewer instructions

For each plot owned by the household on the date of survey, it is to be ascertained as to how the plot was acquired by the household. The entries in this column will be made in terms of codes as given below:

inherited 1
purchased from tribals 2
purchased from non-tribals 3
allotted by government 4
allotted by the village/district council etc 5
received as gift 6
alienated land restored 7
others 9

Most of the codes are self-explanatory. As regards code 7, it may be mentioned that disposal of land by a tribal to non-tribals is not legal. If such disposal took place in the past, the triblas were entitled to get the land restored. Code 7 will be entered in col.(8) when such restoration takes place.

From whom acquired (Code) (B8_q9)
File: Block 8_particulars of land owned and possessed

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 28470
Invalid: 0

Literal question

From whom the plot was acquired?

Interviewer instructions

From whom acquired (Code) (B8_q9)
File: Block 8_particulars of land owned and possessed

The previous owners from whom the plots of land have been acquired are classified into certain groups. After ascertaining the appropriate group, the relevant code will be entered in this column. The codes are as follows:

own tribe of the same village 1
own tribe of other village/town 2
other tribe 3
non-tribals 4
others 5

Period since acquired (years) (B8_q10)
File: Block 8_particulars of land owned and possessed

Overview

Type: Continuous	Valid cases: 28470
Format: numeric	Invalid: 1724
Width: 2	Minimum: 0
Decimals: 0	Maximum: 99
Range: 0-99	Mean: 24.6
	Standard deviation: 24.2

Literal question

Since how many years the plot has been acquired?

Interviewer instructions

Number of years elapsed since the acquisition took place will be recorded in this column in completed years against each plot owned by the household.

Area leased out (0.00 acres) (B8_q11)
File: Block 8_particulars of land owned and possessed

Overview

Type: Continuous	Valid cases: 905
Format: numeric	Invalid: 29289
Width: 6	Minimum: 0
Decimals: 2	Maximum: 131
Range: 0-131.04	Mean: 1.5
	Standard deviation: 6

Literal question

How much area has been leased out?

Interviewer instructions

The actual area leased out by the household is to be recorded in this column in acres up to two places of decimal.

Terms of lease (Code) (B8_q12)
File: Block 8_particulars of land owned and possessed

Overview

Type: Discrete	Valid cases: 757
Format: character	Invalid: 0
Width: 1	

Literal question

What are the terms of lease?

Interviewer instructions

Terms of lease (Code) (B8_q12)
File: Block 8_particulars of land owned and possessed

Information on the terms of lease on which the land has been leased out will be recorded in column (12) in terms of codes as specified below:

for fixed money 1
for fixed produce 2
for share of produce 3
for share of produce with other terms 4
under usufructuary mortgage 5
under other terms 9

It may be noted here that a lease agreement may be made verbally or in writing. Most of the terms are self- explanatory. However, it may be noted that household under crop sharing basis will mean that the owner of land receives a stipulated share of the produce but does not participate in the work nor does he organize or conduct agricultural operations on that plot of land which he has leased out. Further, usufructuary mortgage is a type of mortage in which the mortgagor (the person who mortgages the property) retains the ownership of his land but the possession of the land is transferred to the mortgagee (i.e. the person to whom the land is mortgaged) till the fore-closure of the deed.

To whom leased out (Code) (B8_q13)
File: Block 8_particulars of land owned and possessed

Overview

Type: Discrete	Valid cases: 757
Format: character	Invalid: 0
Width: 1	

Literal question

To whom the plot has been leased out?

Interviewer instructions

Information on the type of lessee household will be recorded in this column in terms of codes. The codes are same as those provided for column (9) .

Period since acquired (years) (B8_q14)
File: Block 8_particulars of land owned and possessed

Overview

Type: Continuous	Valid cases: 757
Format: numeric	Invalid: 29437
Width: 2	Minimum: 0
Decimals: 0	Maximum: 98
Range: 0-98	Mean: 12.4
	Standard deviation: 25.3

Literal question

Since how many years the plot has been acquired?

Interviewer instructions

The time elapsed since the plot or a part of it is leased out will be recorded in completed years in this column.

Area leased in (0.00 acres) (B8_q15)
File: Block 8_particulars of land owned and possessed

Overview

Area leased in (0.00 acres) (B8_q15)
File: Block 8_particulars of land owned and possessed

Type: Continuous
Format: numeric

Type: Discrete	Valid cases: 275
Format: character	Invalid: 0
Width: 1	

Literal question

To whom the plot has been disposed?

Interviewer instructions

7.9.5 The category of person or organization to whom the
land was disposed of would be recorded in this column in terms of codes provided below :

own tribe of the same village...............................1
own tribe of the other village or town....................2
other tribe...3
non-tribals...4
government department/ public bodies..................5
private body...6
others...9

Why disposed (Code) (B9_q8)
File: Block 9_particulars of disposal of land during last 5 years

Overview	
Type: Discrete	Valid cases: 275
Format: character	Invalid: 0
Width: 1	

Literal question

Why the plot has been disposed?

Interviewer instructions

7.9.5 The reason which compelled the household to dispose of the
plot of land will be ascertained and recorded in this column in terms of codes given below:

acquired by government 1
acquired by public bodies....................................2
ceremonial expenditure.......................................3
other household expenditure.................................4
capital expenditure..5
unauthorized occupation by others..........................6
repayment of debt..7
others...9

Whether permission for disposal obtained (B9_q9)
File: Block 9_particulars of disposal of land during last 5 years

Overview	
Type: Discrete	Valid cases: 274
Format: character	Invalid: 0
Width: 1	

Literal question

Whether permission was obtained for disposal?

Interviewer instructions

In some states, permission is required for transfer of any land in tribal areas. Permission is a must in all the states if such transfer is made to non- tribals. Whatever be the position, for each disposal, it is to be ascertained permission is obtained from the appropriate authority for disposal of land. If permission is taken, the entry in col. (9) will be 1: otherwise code 2 may be entered in this column.

Amount of compensation recd. (Rs.) (B9_q10)
File: Block 9_particulars of disposal of land during last 5 years

Overview	
Type: Continuous	Valid cases: 277
Format: numeric	Invalid: 0
Width: 6	
Decimals: 0	

Literal question

How much amount was received as compensation?

Interviewer instructions

The amount of compensation received or receivable for the disposal of land will be recorded in rupees in col. (10). The entry in this column will be 0(zero), if no compensation is received or receivable.

Nature of payment (Code) (B9_q11)
File: Block 9_particulars of disposal of land during last 5 years

Overview	
Type: Discrete	Valid cases: 234
Format: character	Invalid: 0
Width: 1	

Literal question

What was the nature of payment? Whether full payment was made or not?

Interviewer instructions

Whether the full settlement amount has already been received or not will be ascertained. If full amount is received, code 1 will be entered in col. (11) and if only part payment is received the appropriate code for col. (11) will be 2.

Whether full settlement is adequate (B9_q12)
File: Block 9_particulars of disposal of land during last 5 years

Overview	
Type: Discrete	Valid cases: 234
Format: character	Invalid: 0
Width: 1	

Literal question

Whether full settlement is adequate for the disposal of plot?

Interviewer instructions

Further enquiry is to be made to ascertain as to whether the household considers the full settlement amount (even if the full amount is not yet received) as adequate compensation for the land disposed of. If yes, code 1 will be recorded in col. (12); otherwise, the entry in this column will be 2.

Whether any claim is filed for restoration of alienated land (B9_q13)
File: Block 9_particulars of disposal of land during last 5 years

Overview	
Type: Discrete	Valid cases: 136
Format: character	Invalid: 0
Width: 1	

Literal question

Whether any claim is filed for restoration of alienated land?

Interviewer instructions

Whether any claim is filed for restoration of alienated land (B9_q13)
File: Block 9_particulars of disposal of land during last 5 years

It has been stated earlier that transfer of land from tribal to non-tribal is not legally valid. For all cases of disposal to non-tribals [code 4 in col. (7)] it is to be enquired whether the household has filed any claim to the appropriate authority for restoration of such land. If such claim is filed, the entry in col. (13) will be 1; otherwise, code 2 will be entered in this column.

If yes in q13, whether alienated land is restored (B9_q14)
File: Block 9_particulars of disposal of land during last 5 years

Overview	
Type: Discrete	Valid cases: 7
Format: character	Invalid: 0
Width: 1	

Literal question

If claim is filed for restoration of alienated land, then whether alienated land is restored?

Interviewer instructions

If the entry in col. (13) is 1 i.e. if any claim has been filed, it is to be ascertained whether the land in question is restored to the tribal household. The code in col. (14) will be 1 if the land is restored, otherwise code 2 will be entered.

If yes in q14, whether restored land is disposed of again (B9_q15)
File: Block 9_particulars of disposal of land during last 5 years

Overview	
Type: Discrete	Valid cases: 3
Format: character	Invalid: 0
Width: 1	

Literal question

If claim is filed for restoration of alienated land and it is restored also, then whether restored land is disposed of again?

Interviewer instructions

In regard to the piece of land restored, it will be further enquired whether the said land is disposed of again. If yes, the entry in col. (15) will be 1 and if no, code 2 will be entered.

Description

An important feature of the NSS sampling design is that the total sample of first stage units is drawn in the form of two or more independent and parallel samples, termed as interpenetrating sub-samples. Each sub- sample is drawn by the same sampling scheme and is capable of providing valid estimates of the population parameters. The comparison of sub-sample wise estimates shows the margin of uncertainty associated with the combined sample estimate.

Interpenetrating sub-samples have been used in NSS (i) to obtain valid estimates from each sub-round (season) of the survey round, and (ii) to ensure that Central and State samples for any State/ UT cover independent and equally valid samples of units.

The samples surveyed by the NSSO staff are termed as Central sample and the matched samples surveyed by State Government staff are termed as State sample.

Village/Bl. Srl. No. (Vill_Blk_Slno)

Fuel charges for irrigation (B10_q1)
File: Blocks 10, 12_input items used for cultivation during 1987-88 and particulars of wage employment in forestry operation

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 12842
Invalid: 0

Literal question

Whether incurred any expenditure on fuel charges for irrigation?

Interviewer instructions

"Fuel charges for irrigation" will include the value of diesel oil etc. used to run the
pump set or the hiring charges, if any, of the pump set. Expenditure on repairs and maintenance of sources of irrigation
owned by the household will also come under this item.

Charges for irrigation (B10_q2)
File: Blocks 10, 12_input items used for cultivation during 1987-88 and particulars of wage employment in forestry operation

Overview

Charges for irrigation (B10_q2)
File: Blocks 10, 12_input items used for cultivation during 1987-88 and particulars of wage employment in forestry operation

Type: Discrete
Format: character
Width: 1

Valid cases: 12840
Invalid: 0

Literal question

Whether incurred any expenditure on charges for irrigation?

Interviewer instructions

If some community irrigation facilities like canals, deep tubewell etc. are available
and household made use of those facilities for cultivation, the amount paid to the government or other local bodies for getting the benefit will be considered as "charges for irrigation". Also labour charges for bringing water from a distance for the purpose of cultivation will also be included under this item.

Fertiliser and pesticide used (B10_q3)

Literal question

Whether incurred any expenditure on labour rent, revenue etc.?

Distance of forest from the village (km.) (B12_q1)
File: Blocks 10, 12_input items used for cultivation during 1987-88 and particulars of wage employment in forestry operation

Overview

Type: Continuous
Format: numeric
Width: 3
Decimals: 0
Range: 0-999

Valid cases: 13340
Invalid: 1361
Minimum: 0
Maximum: 999
Mean: 12.7
Standard deviation: 35.2

Literal question

How much is the distance of forest from the village in kms.?

Interviewer instructions

The distance of the nearest forest from the village/town in which the tribal household resides will be recorded in kilometers against item 1.

Whether any member worked in a forest during last 30 days as wage employee (B12_q2)
File: Blocks 10, 12_input items used for cultivation during 1987-88 and particulars of wage employment in forestry operation

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 14701
Invalid: 0

Literal question

Whether any member worked in a forest during last 30 days as wage employee?

Interviewer instructions

It is to be ascertained whether any normal member of the household worked in the capacity of regular salary/wage employee or casual wage employee in any forest during 30 days preceding the date of survey. The work may be manual or non-manual. Even if one member worked for one day. Code 1 would be entered against this item; otherwise the entry would be code 2.

No. of members (B12_q3)
File: Blocks 10, 12_input items used for cultivation during 1987-88 and particulars of wage employment in forestry operation

Overview

No. of members (B12_q3)

File: Blocks 10, 12_input items used for cultivation during 1987-88 and particulars of wage employment in forestry operation

Type: Continuous
Format: numeric
Width: 1
Decimals: 0
Range: 0-8

Valid cases: 478
Invalid: 14223
Minimum: 0
Maximum: 8
Mean: 1.7
Standard deviation: 1

Literal question

If any member worked in a forest during last 30 days as wage employee, then how many members worked?

Interviewer instructions

Item 3 to 5: items 3 to 5 will be relevant if the entry against item 2 is 1. Number of members worked as wage employee during 30 days preceding the date of survey, irrespective of number of days worked by them will be recorded against item 3.

No. of days worked by all members as wage employee (B12_q4)

File: Blocks 10, 12_input items used for cultivation during 1987-88 and particulars of wage employment in forestry operation

Overview

Type: Continuous
Format: numeric
Width: 3
Decimals: 0

Valid cases: 465
Invalid: 14236

Literal question

If any member worked in a forest during last 30 days as wage employee, then how many number of days worked by all the members as wage employee?

Interviewer instructions

Total number of days worked(the day will be counted even if worked for an hour in a day) by all the members of the household either as regular wage/salaried employee or casual employee will be recorded against item 4. In case more than one member have worked, the number of days preceding the date of survey has to be ascertained separately and then added together to get the total number of days worked by the members of the household for recording entries against item 4.

Total wage receivable (Rs.) (B12_q5)

File: Blocks 10, 12_input items used for cultivation during 1987-88 and particulars of wage employment in forestry operation

Overview

Type: Continuous
Format: numeric
Width: 5
Decimals: 0

Valid cases: 463
Invalid: 14238

Literal question

If any member worked in a forest during last 30 days as wage employee, then how much total wage was received in terms of rupees?

Interviewer instructions

Wages receivable by all the members taken together for the work done by them will be recorded against item 5 in rupees. In calculating the wages, amount received or receivable as bonus. Perquisites etc. for the number of days worked by the members should be taken into account. However, overtime payment, if any, will be excluded.

Which crop is being cultivated by the household?

Seed used (kg.) (B11_q5)
File: Block 11_particulars of crops produced during 1987-88

Overview

Type: Continuous
Format: numeric
Width: 1
Decimals: 0
Range: 0-9

Valid cases: 24681
Invalid: 24

Literal question

How much quantity of seed was used by the household in terms of kgs.?

Interviewer instructions

These two columns 5 and 6 are to be filled in only in case of shifting cultivation. If the household produced crop like paddy, maize, minor millets. Pulses, oil seeds and/ or cotton under shifting cultivation during the period corresponding to the agricultural year 1987-88, the quantity of seeds used for each crop so produced would be recorded in col. (5) in kg. The approximate quantity of seeds used per hectare of land is to be ascertained through enquiry and recorded kg. in col. (6). A cross mark (x) is to put in cols. (5) and (6) for crops produced in settled cultivation.

Decimals: 0
Range: 0-2

Valid cases: 349
Invalid: 24356

Literal question

What was the yield rate per acre of Kharif crop? How much crop was produced?

Interviewer instructions

Columns (7) to (10): yield rate per acre: These columns are to be filled-in only in case of settled cultivation : For each of the crops produced in the kharif season of the agricultural year 1987-88, the yield rate of the crop per acre is to be ascertained through enquiry and to be recorded in column (7) in kilograms for all crops except citrus fruits (07), other fruits (08) and account (09) in which case the unit will be numbers. A cross mark (x) will be put in this column when the crop category is 'others' (99).

Whether different from normal year (B11_q8)
File: Block 11_particulars of crops produced during 1987-88

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 459
Invalid: 0

Literal question

Whether different from normal year (B11_q8)
File: Block 11_particulars of crops produced during 1987-88

Whether the yield rate per acre of Kharif crop was different from the normal year?

Interviewer instructions

It is to be noted that a particular crop might have been produced in different plots of land with varying yield rates. In such a situation all the plots in which the crop was produced would be considered to arrive at an average yield rate. It is to be further enquired whether the yield rate recorded in col. (7) is different than what the household, generally, gets in the kharif season of normal agricultural year. The comparison should, generally, be made with the previous agricultural year. But, if the previous agricultural year happens to be an exceptionally good or bad year, the comparison should be made with the most recent normal agricultural year. Information so collected will be recorded in col. (8) in terms of codes as given below :

yield rate more than the normal year 1
yield rate same as the normal year...............................2
yield rate less than the normal year..............................3

Quantity (Kg. / No.) (B11_q9)
File: Block 11_particulars of crops produced during 1987-88

Overview

Literal question

What was the yield rate per acre of Rabi crop? How much crop was produced?

Interviewer instructions

The particulars to be collected in cols. (9) and (10) relate to the crops produced in Rabi season. These columns are to be filled in exactly in a similar manner as discussed above for columns (7) and (8). However, if a particular crop is produced in kharif and Rabi seasons, two different yield rates for two different seasons are to be noted in cols. (7) and (9) respectively.

Description

Sub Sample (SubSample)
File: Block 13_particulars of forest produce collected, consumed at home and sold by household members during last 30 days as self-employed

An important feature of the NSS sampling design is that the total sample of first stage units is drawn in the form of two or more independent and parallel samples, termed as interpenetrating sub-samples. Each sub- sample is drawn by the same sampling scheme and is capable of providing valid estimates of the population parameters. The comparison of sub-sample wise estimates shows the margin of uncertainty associated with the combined sample estimate.

Interpenetrating sub-samples have been used in NSS (i) to obtain valid estimates from each sub-round (season) of the survey round, and (ii) to ensure that Central and State samples for any State/ UT cover independent and equally valid samples of units.

The samples surveyed by the NSSO staff are termed as Central sample and the matched samples surveyed by State Government staff are termed as State sample.

Village/Bl. Srl. No. (Vill_Blk_Slno)
File: Block 13_particulars of forest produce collected, consumed at home and sold by household members during last 30 days as self-employed

Overview

Type: Discrete
Format: character
Width: 5

Valid cases: 11758
Invalid: 0

Description

The first-stage units are census villages in the rural sector and the NSSO urban frame survey (UFS) blocks in the urban sector. This variable indicates the serial number assigned to such units.

Standard deviation: 6531

Literal question

How much forest produce was collected by the household members during last 30 days as self-employed?

Interviewer instructions

Columns (3) & (4): Produce collected: Quantity and value of each of the products collected during 30 days preceding the date of survey will be recorded in columns (3) and (4) respectively. Quantity figure will be recorded in Kg. whereas the value of the products evaluated at the ex-farm price will be entered in 0.00 rupees. If the quantity of a produce can not be expressed in Kg., a cross mark (x) may be put in cols. (3), (5) and/or (7), as the case may be.

Value (Rs. 0.00) (B13_q4)
File: Block 13_particulars of forest produce collected, consumed at home and sold by household members during last 30 days as self-employed

Overview

Type: Continuous
Format: numeric
Width: 6
Decimals: 0
Range: 0-150000

Valid cases: 10479
Invalid: 1279
Minimum: 0
Maximum: 150000
Mean: 895
Standard deviation: 4068.1

Literal question

How much forest produce was consumed at home by the household members during last 30 days as self-employed?

Interviewer instructions

Columns (5) & (6): Produce consumed at home: Quantity and value of forest produce consumed in the household during 30 days preceding the date of survey will be recorded in these columns. The value of the produce will be ascertained on the basis of ex-farm price. Consumption may be out of forest produce collected during the reference period or from an earlier stock built up from such collection. Thus, for an item, there may be entries in columns (1), (2), (5) and/or (7) to ((9) without having entries in cols. (3) and (4).

Description

An important feature of the NSS sampling design is that the total sample of first stage units is drawn in the form of two or more independent and parallel samples, termed as interpenetrating sub-samples. Each sub- sample is drawn by the same sampling scheme and is capable of providing valid estimates of the population parameters. The comparison of sub-sample wise estimates shows the margin of uncertainty associated with the combined sample estimate.

Interpenetrating sub-samples have been used in NSS (i) to obtain valid estimates from each sub-round (season) of the survey round, and (ii) to ensure that Central and State samples for any State/ UT cover independent and equally valid samples of units.

The samples surveyed by the NSSO staff are termed as Central sample and the matched samples surveyed by State Government staff are termed as State sample.

Minimum: 0
Maximum: 105000
Mean: 869.7
Standard deviation: 4485.1

Literal question

How much was the total value of output produced by the household enterprise (other than cultivation) during the last 30 days?

Interviewer instructions

Col.(5) will give the total of columns (3) and (4). The products will be evaluated at the ex-farm/ex-factory price.

Raw material purchased (Rs.) (B14_q6)
File: Block 14_particulars of household enterprise (other than cultivation) during last 30 days

Overview

Type: Continuous
Format: numeric
Width: 5
Decimals: 0
Range: 0-45000

Valid cases: 929
Invalid: 5278
Minimum: 0
Maximum: 45000
Mean: 624.5
Standard deviation: 3089.1

Literal question

How much expenditure was incurred on raw material purchase by the household enterprise (other than cultivation) during the last 30 days?

Interviewer instructions

Columns (6) to (10): Information relating to consumption of raw materials, fuel, lubricant, auxiliary materials and other expenses relevant to the productive enterprises during the reference period will be colleted in these columns.

Columns (6) will be used to record the consumption of raw materials out of cash purchase (including credit purchase) only.

It is to be noted that expenditure on those materials only will be considered which are consumed in the process of production during the reference period irrespective of whether they are purchased, produced or procured from other sources during the reference period.

Raw material obtained in kind from own enterprise (Rs.) (B14_q7)
File: Block 14_particulars of household enterprise (other than cultivation) during last 30 days

Overview

Type: Continuous
Format: numeric

How much quantity of the products (other than forest products) was marketed by the household during the last 30 days?

Interviewer instructions

Column (6): For each of the products in the categories of "surplus agricultural produce' 'handlooms' and 'handicrafts' sold, the quantity of the product sold to a particular agency will be recorded in col. (6) in standard unit. The standard unit is kg. for any product falling under "surplus agricultural produce" metres for 'handlooms' and numbers for' handicrafts.

Value in cash (Rs.) (B15_q7)
File: Block 15_particulars of products (other than forest products) marketed during last 30 days

Overview

Type: Continuous
Format: numeric
Width: 6
Decimals: 0
Range: 3-200000

Valid cases: 2317
Invalid: 38
Minimum: 3
Maximum: 200000
Mean: 1925
Standard deviation: 9242.1

Literal question

How much was the value of the products (other than forest products) marketed by the household during the last 30 days in terms of cash?

Interviewer instructions

Columns (7) to (9): Value of the products marketed: For each of the product sold, the value of the product sold to a particular agency will be recorded in col. (7) if it is sold in cash and in col. (8) if in kind. Column (9) will give the total of columns (7) and (8). In case of sale in kind, the value is to be imputed at the retail market price.

Value in kind (Rs.) (B15_q8)
File: Block 15_particulars of products (other than forest products) marketed during last 30 days

Type: Continuous	Valid cases: 124
Format: numeric	Invalid: 2231
Width: 5	Minimum: 0
Decimals: 0	Maximum: 30200
Range: 0-30200	Mean: 1122.4
	Standard deviation: 3563.2

Literal question

How much was the value of the products (other than forest products) marketed by the household during the last 30 days in terms of kind?

Total value (Rs.) (B15_q9)
File: Block 15_particulars of products (other than forest products) marketed during last 30 days

Overview	
Type: Continuous	Valid cases: 2355
Format: numeric	Invalid: 0
Width: 6	Minimum: 2
Decimals: 0	Maximum: 200000
Range: 2-200000	Mean: 2007.5
	Standard deviation: 9385.7

Literal question

How much was the total value of the products (other than forest products) marketed by the household during the last 30 days in terms of cash and kind both clubbed togather?

Interviewer instructions

In case of sale in kind, the value is to be imputed at the retail market price.

To whom marketed (B15_q10)
File: Block 15_particulars of products (other than forest products) marketed during last 30 days

Overview	
Type: Discrete	Valid cases: 2355
Format: character	Invalid: 0
Width: 1	

Literal question

To whom the products (other than forest products) were marketed by the household during the last 30 days?

Interviewer instructions

To whom marketed (B15_q10)
File: Block 15_particulars of products (other than forest products) marketed during last 30 days

Column (10): to whom marketed: Whether the product is sold in cash or in kind and the agency to whom the product has been sold during the reference period of 30 days preceding the date of survey are to be ascertained for each of the products sold. If the same product is sold to different agencies, two lines are to be filled in to record the relevant particulars. The appropriate code is to be entered in col. (10) by consulting the code list as given below :

in cash : direct to consumer household..................1
" : to cooperatives/LAMPS........................2
" : to private traders................................3
" : others...5
in kind : direct to consumer household...................6
" : others...7

The code list has been kept similar to one provided for col. (9) of block 13. It may be seen that code 4 is missing from the code list for col. (10) of block 15, as the particular code (forest officials) is not considered relevant for this block.

Description

Sub Sample (SubSample)
File: Block 16_inventory of assets owned on the date of survey

An important feature of the NSS sampling design is that the total sample of first stage units is drawn in the form of two or more independent and parallel samples, termed as interpenetrating sub-samples. Each sub- sample is drawn by the same sampling scheme and is capable of providing valid estimates of the population parameters. The comparison of sub-sample wise estimates shows the margin of uncertainty associated with the combined sample estimate.

Interpenetrating sub-samples have been used in NSS (i) to obtain valid estimates from each sub-round (season) of the survey round, and (ii) to ensure that Central and State samples for any State/ UT cover independent and equally valid samples of units.

The samples surveyed by the NSSO staff are termed as Central sample and the matched samples surveyed by State Government staff are termed as State sample.

Village/Bl. Srl. No. (Vill_Blk_Slno)
File: Block 16_inventory of assets owned on the date of survey

Valid cases: 119283
Invalid: 99941
Minimum: 0
Maximum: 9971
Mean: 98.5
Standard deviation: 529.4

Literal question

How much area/floor area was owned by the household as on the date of survey?

Interviewer instructions

The items of assets on which information is to be collected have been printed under col. (2). For most of the items, entry in col. (3) will indicate the number of such items owned by the household on the date of survey. However, for items relating to land except land for house site (serial nos. 02 to 06), area owned is to be recorded in 0.00 acres in col. (3). For house site, the area is to be recorded in the area is to be recorded in square meter. Again, the appropriate entry in col. (3) will be floor area in square meter for the items relating to building (serial nos. 18 to 22). Printed cross (x) has been provided in col. (3) against some items for which quantity figures are not required.

Valid cases: 218347
Invalid: 877
Minimum: 0
Maximum: 999999
Mean: 7430.3
Standard deviation: 27487.6

Literal question

How much was the value of the area/floor area owned by the household as on the date of survey?

Interviewer instructions

Column (4): Value of assets: For each of the items mentioned in col. (2), the total value of all the assets owned by the household on the date of survey will be recorded in rupees in column (4). A physical asset owned by the household on the date of survey might have been purchased long time ago or might have been acquired otherwise. If an asset, is purchased during 365 days preceding the date of survey, the value of the asset will be purchase price. In all other cases, the value of the asset is to be evaluated at the current market price prevailing in the locality on the date of survey, considering the present condition of the asset.

Year of borrowing (B17_q4b)
File: Block 17_particulars of dues payable by the household and transaction of loans during last 365 days

Overview

Type: Discrete	Valid cases: 4143
Format: character	Invalid: 0
Width: 2	

Literal question

Which year the loan was borrowed?

Interviewer instructions

Year of borrowing (B17_q4b)
File: Block 17_particulars of dues payable by the household and transaction of loans during last 365 days

For each loan, the month and year of borrowing will be recorded in col. (4). Month and year will be recorded in codes in codes. For example, February 1980 will be recorded ".0280".

Duration of outstanding loan (Years) (B17_q5)
File: Block 17_particulars of dues payable by the household and transaction of loans during last 365 days

Overview	
Type: Continuous	Valid cases: 4260
Format: numeric	Invalid: 0
Width: 2	Minimum: 0
Decimals: 0	Maximum: 99
Range: 0-99	Mean: 8.7
	Standard deviation: 24.9

Literal question

Since how many years the loan has been outstanding?

Interviewer instructions

Column (5) will be filled in when a loan is outstanding i.e.yet to be fully repaid on the date of survey. The period elapsed since the amount was borrowed be recorded in completed years in col. (5).

Credit agency (Code) (B17_q6)
File: Block 17_particulars of dues payable by the household and transaction of loans during last 365 days

Overview	
Type: Discrete	Valid cases: 4238
Format: character	Invalid: 0
Width: 1	

Literal question

Which was the credit agency from whom loan was taken?

Interviewer instructions

Column (6): credit agency: The agency from which a loan has been taken will be recorded in this column in codes as given below:

```
government.................................................1
cooperative society....................................... 2
commercial bank...........................................3
landlord......................................................4
money lender - tribal.......................................5
money lender - non-tribal.................................6
trader.........................................................7
relatives & friends..........................................8
others........................................................9
```

The codes are self-explanatory. However, it may be noted that the code for 'landlord' will be applicable only when the loan is given by a landlord to his own tenant. If the loan is taken from a person who belongs to landlord class but the borrower is not a tenant of that landlord, the appropriate code will be either 5 or 6 as the case may be. Again credit agency will be 'relatives and friends' only when a loan is received from a friend or a relative free of interest. If the loan bears interest 'it will be considered as taken from money lender, trader etc., depending upon the type of business carried out by the person.

Nature of interest (B17_q7)
File: Block 17_particulars of dues payable by the household and transaction of loans during last 365 days

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 4205
Invalid: 0

Literal question

What is the nature of interest of loan?

Interviewer instructions

Columns (7) & (8): nature and rate of interest: The rate of interest per 100 rupees per annum actually charged by the lender will be recorded in column (8) in two decimal places of rupees. The nature of interest expressed in terms of codes as specified below will be recorded in column (7).
interest free...1
differential rate of interest.............................2
simple interest...3
compound interest......................................4

Sometimes, a loan is advanced by a government department or public bodies at a confessional rate of interest to certain people for specific purposes. If the household has received any such loan, the entry in col. (7) will be 2 i.e. differential rate of interest.

Rate of interest (% per annum) (0.00) (B17_q8)
File: Block 17_particulars of dues payable by the household and transaction of loans during last 365 days

Overview

Type: Continuous
Format: numeric
Width: 6
Decimals: 2
Range: 0-200

Valid cases: 3233
Invalid: 1027
Minimum: 0
Maximum: 200
Mean: 19.4
Standard deviation: 20.1

Literal question

What is the annual rate of interest of loan?

Purpose of loan (Code) (B17_q9)
File: Block 17_particulars of dues payable by the household and transaction of loans during last 365 days

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 4234
Invalid: 0

Literal question

Why the loan was taken by the household?

Interviewer instructions

Purpose of loan (Code) (B17_q9)
File: Block 17_particulars of dues payable by the household and transaction of loans during last 365 days

Column (9) purpose of loan: purpose for which the loan is taken will be recorded in code numbers in this column. The codes are as follows:

```
capital expenditure in farm business.....................................1
current expenditure in farm business.....................................2
capital expenditure in non-farm business...............................3
current expenditure in non-farm business.............................4
expenditure relating to marriage.........................................5
expenditure relating to other social ceremonies........................6
expenditure relating to religious ceremonies..........................7
repayment of debt.........................................................8
others.....................................................................9
```

The purpose is defined as the occasion which prompted the household to contract the loan. Even if the loan was utilized for a purpose other than that for which the loan had been contracted, the purpose for which the loan was originally taken would be recorded here. If more than one purpose was involved, the purpose for which the major amount had been planned to be spent would be recorded.

Type of security (Code) (B17_q10)
File: Block 17_particulars of dues payable by the household and transaction of loans during last 365 days

Overview	
Type: Discrete	Valid cases: 4195
Format: character	Invalid: 0
Width: 1	

Literal question

What type of security was given for obtaining loan?

Interviewer instructions

Column (10): type of security: Information relevant security which the household had to pledge for obtaining the loan would be recorded in this column in terms of codes as specified below:
```
no security .......................................................... 1
surety security or guarantee by third party .....................2
crop/forest produce ..................................................3
mortgage of immovable property ............................... 4
ornaments ........................................................... 5
other types of security .............................................6
```

If the loan is obtained without any security, the appropriate code will be 1.

Repayment of loan during last year - Principal (Rs.) (B17_q11)

Liquidation of loan during last year - Principal (Rs.) (B17_q14)
File: Block 17_particulars of dues payable by the household and transaction of loans during last 365 days

How much principal amount of loan was liquidated during last year?

Interviewer instructions

Columns (14) to (16): liquidation of loans during last 365 days: Sometimes, to provide debt relief to the weaker section and others, government agencies, banks etc. write off such loans. If such liquidation of debts took place during the reference period of 365 days preceding the date of survey, the total amount (including interest), would be recorded in cols. (14) to (16). It is important to note that amount repaid by the household will not be included under amount liquidated. Similarly, amount liquidated (exempted from paying) should not be taken as amount repaid.
