V1.0; Re-organised anonymised dataset for public distribution.

Overview

ABSTRACT
The enterprise survey of the 55th round covers all informal enterprises in the non-agricultural sector of the economy, excluding those engaged in mining & quarrying and electricity, gas & water supply. NIC codes to identify the enterprises in this round will be as per NIC 1998. The enterprises in the informal sector have been divided into six broad industry groups, viz. (i) manufacturing, (ii) construction, (iii) trade and repair services, (iv) hotels and restaurants (v) transport, storage and communications and (vi) other service sector enterprises. From each of these categories, enterprises are classified into two classes, the first one being Own Account Enterprises (OAE) i.e. those who do not hire any worker on a regular basis and the second class consisting of all the remaining enterprises (i.e the establishments).

KIND OF DATA
Sample survey data [ssd]

Scope

NOTES
The 55th round of NSS conducted during July 1999 to June 2000 was an integrated survey on household consumer expenditure, employment-unemployment and informal sector non-agricultural enterprises.The eligibility criteria for enterprises to be covered in the survey was at least 30 days of operation (15 days of operation for seasonal enterprises) in the reference year. Although, there is no unique definition of informal sector, for our purpose all unincorporated enterprises which operate on either proprietary or partnership basis were considered to constitute the informal sector. This definition differed from the usual NSS concept of unorganized sector. In the unorganized sector, in addition to the proprietary or partnership enterprises, cooperative societies, trusts, private and public limited companies were also covered. Thus informal sector can be considered as a subset of the unorganized sector. It may be mentioned that all manufacturing units of proprietary or partnership nature which were covered under ASI were also not treated as informal enterprises.

The NIC-1998 codes (2-digited) for the activities covered were as follows: manufacturing : 15 to 37, construction: 45, trade and repair services: 50 to 52, hotels and restaurants: 55, transport, storage and communications: 60 to 64, other services: 65 to 67, 70 to 74, 80, 85, 90 to 93. It may be noted that, unlike in NIC 1987, repairing services have been considered with trade sector in NIC 1998, and not with the manufacturing sector.

Reference Period: Last month was used as the reference period to collect most of the data. Various receipts and expenses as well as employment, emoluments, rent, interest, net surplus and value added for the enterprises were collected for last month only. Last month will refer to the last working month for perennial and casual enterprises. For seasonal enterprises, however, last month refered to an average month in the last working season. Month refer to a period of 30 days. For some of the items like value of fixed assets, amount of loan outstanding etc., the reference period was 'as on the date survey'. For some other items like net additions to fixed assets, number of months operated, number of other economic activities taken up etc., the period of reference was the 'last 365 days preceding the date of survey'.

Structure of the schedule: Schedule 2.0 consisted of 14 blocks (blocks 0 to 13). Blocks 0 and 1 were meant to record identification of the enterprise; Blocks 11, 12 and 13 were for reporting particulars of field operation, remarks by the

investigator and comments by the supervisory officers. In the remaining 9 blocks, data were to be collected from the enterprises.

Some operational characteristics of the enterprises were collected in block 2. Blocks 3, 3.1 and 4, 4.1 were the main blocks of the schedule where operating expenses and various receipts of the enterprises will be recorded. In Blocks 3 and 4 recorded the principal expenses and receipts whereas in blocks 3.1 and 4.1 recorded the other expenses and receipts. Schedule 2.0 has been designed in such a way that the different types of receipts and expenses for different types of enterprises could be accommodated within the framework of blocks 3 and 4. To meet this objective, each of these two blocks was subdivided into 7 sub-blocks. While these sub-blocks were meant for specific types of enterprise, blocks 3.1 and 4.1 are common for all enterprises. It may be noted that for an enterprise which runs a mixed activity, more than one of the sub-blocks of blocks 3 & 4 had entries.

Block 5 was kept for calculation of gross value added. The employment particulars of the enterprises were recorded in block 6. Blocks 7, 8 and 9 were meant to collect information on emoluments, fixed assets and loan position of the enterprises respectively. The factor incomes of the enterprise was recorded in block 10. It may be noted that from this block also, value added can be generated. So, blocks 5 and 10 together provide an in-built check in the schedule for assessing the reasonability of the data.

Coverage

GEOGRAPHIC COVERAGE

The survey covered the whole of the Indian Union except (i) Ladakh and Kargil districts of Jammu & Kashmir, (ii) villages situated beyond 5 Kms. of bus route in the state of Nagaland and (iii) inaccessible villages of Andaman and Nicobar. As in the previous

rounds, all the uninhabited villages of the country, according to 1991 census, are left out of the coverage of NSS 55th round.

Sampling

Sampling Procedure

General: A stratified sampling design has been adopted for selection of the sample first-stage units (FSUs). The FSUs are villages (panchayat wards for Kerala) for rural areas and Urban Frame Survey (UFS) blocks for urban areas. The Ultimate stage units (USUs) are enterprises for canvassing informal sector enterprise schedule. USUs are selected by the method of circular
systematic sampling from the corresponding frame in the FSU. Large FSUs are subdivided into hamlet groups (rural) / sub-blocks (urban) that are grouped into two segments, and USUs are selected independently from each of these segments.

Sample size (FSUs): A total number of 10,384 FSUs were selected for survey in the central sample at all-India level (rural & urban combined) in the 55th round. Sample size for the whole round for each State/UT and Sector (i.e. rural/ urban) are allocated equally among the four sub-rounds. Sample FSUs for each sub-round are selected afresh in the form of two independent sub-
samples. Out of the 10384 FSUs selected for the survey, 10170 were actually surveyed. This comprises of 6046 villages and 4124 urban blocks.

Stratification of enterprises:All the eligible informal non-agricultural enterprises (other than mining & quarrying and electricity, gas & water supply which operated at least 30 days (15 days for seasonal enterprises) during the last year in a segment (both rural & urban) are stratified into 12 strata by jointly considering their broad industry group and enterprise class. Eligible enterprises could belong to any of the 6 broad industry groups, viz. manufacturing - 1, construction - 2, trade & repair services - 3, hotels & restaurants - 4, transport, storage & communication - 5 and other service sector - 6. The enterprises are classified into two enterprise classes. Enterprise class of an enterprise is '1' for Own Account Enterprises. Enterprise class for Establishments is '2'. Thus there are 12 possible strata of various combinations of broad industry groups and enterprise classes.

General procedure of selection of enterprises:Sample enterprises are selected by circular systematic sampling with equal probability. Enterprises under each stratum (i.e. segment x broad industry group x enterprise class) are arranged in the ascending order of NIC 2-digit codes (3-digit codes for hotels & restaurants) before sampling.

Deviations from Sample Design

There was no deviation from the original sampling design

Response Rate

A total number of 10,384 FSUs were selected for survey in the central sample at all-India level (rural & urban combined) in the 55th round. Sample size for the whole round for each State/UT and Sector (i.e. rural/ urban) are allocated equally among the four sub-
rounds. Sample FSUs for each sub-round are selected afresh in the form of two independent sub-samples. Out of the 10384 FSUs selected for the survey, 10170 were actually surveyed. This comprises of 6046 villages and 4124 urban blocks.

Weighting

Total data is distributed in 8 sub-samples,there being 2 sub-samples in each sub-round (1,2,3,4)
Multipliers(Weight) are given sub-round wise for each sub-round(Variable- WGT).
For annual tabulation use simple average of 4 sub-rounds.
First, get sub-round specific combined multiplier (variable-WGT Combined) estimates.Then apply a common divisor of 4 to get average of 4 sub-rounds

Questionnaires

Overview

Schedule 2.0 consisted of 14 blocks (blocks 0 to 13).
Blocks 0 and 1 were meant to record identification of the enterprise;
Blocks 11, 12 and 13 were for reporting particulars of field operation, remarks by the investigator and comments by the supervisory officers.
In the remaining 9 blocks, data were collected from the enterprises as given below.

Block 2 : Operational characteristics.
Block 3 & 3.1 : Principal and other operating expenses.
Block 4 & 4.1 : Principal and other receipts
Block 5 : Calculation of gross value added for the reference month
Block 6 : Employment particulars of the enterprise during the reference month
Block 7 : Compensation to workers during the reference month
Block 8 : Fixed assets owned and hired
Block 9 : Loan outstanding as on the date of survey
Block 10 : Factor income of the enterprise

Data Collection

1999-10-01	1999-12-31	Sub-round-2
2000-01-01	2000-03-31	Sub-round-3
2000-04-01	2000-06-30	Sub-round-4

Data Collection Mode

Face-to-face [f2f]

Data Collection Notes

The fieldwork of the survey was carried out during 1st July 1999 to 30th June 2000. The entire survey period was divided into four sub-rounds of three months' duration each and equal number of sample villages and blocks were allocated to each sub-round. Each FSU was surveyed during the sub-round period to which it is allocated. Within a particular sub-round, the fieldwork was spread out uniformly over different months to the extent possible.

Questionnaires

Schedule 2.0 consisted of 14 blocks (blocks 0 to 13).
Blocks 0 and 1 were meant to record identification of the enterprise;
Blocks 11, 12 and 13 were for reporting particulars of field operation, remarks by the investigator and comments by the supervisory officers.
In the remaining 9 blocks, data were collected from the enterprises as given below.

Block 2 : Operational characteristics.
Block 3 & 3.1 : Principal and other operating expenses.
Block 4 & 4.1 : Principal and other receipts
Block 5 : Calculation of gross value added for the reference month
Block 6 : Employment particulars of the enterprise during the reference month
Block 7 : Compensation to workers during the reference month
Block 8 : Fixed assets owned and hired
Block 9 : Loan outstanding as on the date of survey
Block 10 : Factor income of the enterprise

Literal question

Enterprise visit no.

Interviewer instructions

visit-no (visit_no)
File: Block1-2-Operational-Characteristics-enterprises-records

Entry against this item will be 1

segment-no (segment_no)
File: Block1-2-Operational-Characteristics-enterprises-records

Overview	
Type: Discrete	Valid cases: 197646
Format: character	Invalid: 0
Width: 1	

Interviewer instructions

Entry against this item will be either 1 or 2. Segment number 1 will refer to the area of concentration. Segment number 2 is the union of the other two hamlet-groups selected. If there is no hg/sb formation, record 1 against this item.

broad-industry-group-code (B1_q14)
File: Block1-2-Operational-Characteristics-enterprises-records

Overview	
Type: Discrete	Valid cases: 197646
Format: character	Invalid: 0
Width: 1	

Interviewer instructions

There will be 6 broad industry groups which will be given codes 1 to 6. The codes for the groups are: anufacturing - 1, construction - 2, trade and repair services - 3, hotels & restaurants - 4, transport, storage and communications - 5 and other service sector - 6.

enterprise-type (B1_q15)
File: Block1-2-Operational-Characteristics-enterprises-records

Overview	
Type: Discrete	Valid cases: 197646
Format: character	Invalid: 0
Width: 1	

Literal question

Enterprise Class

Interviewer instructions

The enterprises within each of the broad groups are divided into two enterprise classes. The first enterprise class refers to all OAEs and will be given code 1. All other enterprises (establishments) will comprise the second enterprise class. These constitute the usual 'non-directory' and 'directory' establishments. Code 2 will be recorded for the second enterprise class. This item will be a copying item from column 3 of block 5, schedule 0.1/0.2.

enterprise-serial-no. (B1_q16)
File: Block1-2-Operational-Characteristics-enterprises-records

Overview	
Type: Discrete	Valid cases: 197646
Format: character	Invalid: 0
Width: 2	

Interviewer instructions

enterprise-serial-no. (B1_q16)
File: Block1-2-Operational-Characteristics-enterprises-records

Serial no. of the enterprise will be the copied from appropriate cols. 17 to 28, block 5 of the listing schedule 0.1/ 0.2 for rural and urban sectors, respectively.

survey code (B1_q19)
File: Block1-2-Operational-Characteristics-enterprises-records

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 197646
Invalid: 0

Interviewer instructions

If the original enterprise is surveyed, code against this item will be 1. If the original enterprise could not be surveyed for some reason or other and some substitute enterprise had to be surveyed, code will be 2. If the substitute enterprise also could not be surveyed, code will be 3. In such cases, only blocks 0,1,11,12 and 13 are to be filled in and the word 'CASUALTY' may be written on the top of the schedule.

reason-for-substitution (B1_q20)
File: Block1-2-Operational-Characteristics-enterprises-records

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 1642
Invalid: 0

Interviewer instructions

This item will be filled in for substitute enterprise only. For survey code 1 (original enterprise surveyed), this item will remain blank. If the enterprise is substituted more than once, the code for first substitution will be recorded.

nic 2-digit code (NIC_2)
File: Block1-2-Operational-Characteristics-enterprises-records

Overview

Type: Discrete
Format: character
Width: 2

Valid cases: 197646
Invalid: 0

nic 3-digit code (NIC_3)
File: Block1-2-Operational-Characteristics-enterprises-records

Overview

Type: Discrete
Format: character
Width: 3

Valid cases: 197646
Invalid: 0

nic 4-digit code (NIC_4)
File: Block1-2-Operational-Characteristics-enterprises-records

Overview

nic 4-digit code (NIC_4)
File: Block1-2-Operational-Characteristics-enterprises-records

Type: Discrete
Format: character
Width: 4

Valid cases: 197646
Invalid: 0

nic 5-digit code (NIC_5)
File: Block1-2-Operational-Characteristics-enterprises-records

Overview

Type: Discrete
Format: character
Width: 5

Valid cases: 197646
Invalid: 0

Interviewer instructions

NIC codes as per the 1998 classification may be put at 5-digit level. Each box will contain one digit and no box will remain empty.

Nature of operation (B2_q2)
File: Block1-2-Operational-Characteristics-enterprises-records

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 197646
Invalid: 0

Interviewer instructions

This item intends to capture the seasonality of the enterprise under survey. Three codes are provided in the schedule. If the enterprise operates more or less regularly throughout the year, it is a perennial enterprise and code 1 will be recorded. If the enterprise operates during particular season(s) of the year, it is termed as a seasonal enterprise and code 2 will be recorded. If the enterprise carries on its activity only occasionally, but total number of days operated in the last 365 days is 30 days or more then it will be treated as a casual enterprise and code 3 will be recorded.

type-of-ownership code (B2_q3)
File: Block1-2-Operational-Characteristics-enterprises-records

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 197646
Invalid: 0

Interviewer instructions

Since only proprietary and partnership enterprises are our concern, the codes for this item relate to those types of enterprises only. Proprietary enterprises are those where an individual is the sole owner of the enterprise. If the owner is a male, code will be 1; for a female owner, code will be 2. Partnership is defined as the 'relation between persons who have agreed to share the profits of a business carried on by all or any one of them acting for all'. Partners may be from the same household or they may be from different households. In the former case, ownership code will be 3 and in the case of the latter, code will be 4. Partnership may be based either on formal registration or on the basis of tacit understanding. However, ASI units of proprietary and partnership nature will be outside our purview. If ownership is with a Hindu Undivided Family (HUF), the treatment will be same as proprietary enterprises, i.e, if the head of HUF is a male, code will be 1; for a female head, code will be 2.

acount-maintained code (B2_q4)
File: Block1-2-Operational-Characteristics-enterprises-records

acount-maintained code (B2_q4)
File: Block1-2-Operational-Characteristics-enterprises-records

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 197646
Invalid: 0

Literal question

Whether accounts maintained ?

Interviewer instructions

If the enterprise maintains usable books of accounts and makes them available to the investigator, code against this item will be 1, otherwise, code will be 2. Generally, the owners do keep some records for their own use. But these are very haphazardly maintained and are not usable for accounting purpose. In such cases, the code against this item will be 2 (even if the data are supplied from such records). In this round, the data is to be collected for the last working month even if the accounts are maintained.

location-of-enterprise (B2_q5)
File: Block1-2-Operational-Characteristics-enterprises-records

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 197646
Invalid: 0

Interviewer instructions

Seven codes have been provided for this item. If the enterprise is located within the household premises, code will be 1. If the location of the enterprise is outside the household premises,

No-of-months-operated (B2_q6)
File: Block1-2-Operational-Characteristics-enterprises-records

Overview

Type: Continuous
Format: numeric
Width: 2
Decimals: 0
Range: 0-12

Valid cases: 197591
Invalid: 55

Literal question

Number of months operated during the last 365 days:.

Interviewer instructions

Number of months operated by the enterprise in the last 365 days will be recorded against this item. Entry against this item will lie between 1 and 12. An operating month does not mean a month in which the enterprise has operated with full intensity. Suppose, in a particular month the enterprise has operated only for 5 days. Even then that month will be counted as an operating month. It may also be ensured that the fractional months in the beginning or end of the reference year are not missed in calculation. The idea is that a month should mean a block of 30 days and not always a completed calendar month.

Mixed-activity code (B2_q7)
File: Block1-2-Operational-Characteristics-enterprises-records

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 197646
Invalid: 0

Literal question

Mixed-activity code (B2_q7)
File: Block1-2-Operational-Characteristics-enterprises-records

whether mixed activity ?

Interviewer instructions

If the enterprise is running mixed activities simultaneously, it will be reflected against this item. Mixed activity means activities mixed at any level of NIC-1998. But for the present survey, we will restrict our attention to mixture of activities at two digit level in general. However, 551 (hotels), 552 (restaurants), 6302 (storage and warehousing), mixed with any other activity at same or higher level of NIC, will be considered as mixed activity even if the activities carried out by the enterprise are not separable at higher levels of NIC. This is being done since these 3 activities cannot be uniquely identified at 2-digit level as per NIC-98. That means an enterprise running a mixed activity of wholesale & retail trade or manufacture of food & manufacture of textiles or trade and restaurant or real estate and legal service or communication and hotel or manufacturing and construction, education and health, etc. will be considered under this item. Code 1 will be recorded if it is a mixed activity according to the above definition. Otherwise, code will be 2.

Literal question

Number of other economic activities taken up during last 365 days:

Interviewer instructions

Since many of the enterprises in the informal sector are very small, due to necessity or otherwise, the phenomenon of carrying out multiple activities (any economic activity including self employment in agriculture, wage earning, etc.) simultaneously or at different points of time by the entrepreneurs may be quite prevalent. The number of such activities other than the major activity of the current enterprise is to be recorded. It may be noted that the owner need not operate his other activities from the present location. NIC level for determination of multiple activity will be same as that of mixed activity

Interviewer instructions

source/destination agency: The objective here is to find the nature of links the enterprise has with its immediate supplier of basic inputs and immediate purchaser of the goods/services. This will also give some idea about the locations of purchase and sale for the informal enterprises. In case the source / destination agency is more than one, the top two sources / destinations may be considered for recording the codes. Each cell should be divided into two boxes and codes should be written in descending order of value of purchase / sale from left to right. If there is only one source / destination, it can be noted in the left most box.

Problems faced by the enterprise

Interviewer instructions

Different types of problems faced by the informal enterprises in their day-to-day operation will be recorded against this item in terms of codes. In case the problems faced by the enterprises are a combination of those mentioned below, the top three major problems may be considered for recording the codes. The cell should be divided into three boxes and codes should be written in descending order of seriousness from left to right. If there are less than three problems, these can be noted starting from the left most box. For code 19, the problem may be mentioned in the space provided to the right of the item. "Labour problem" means problem between management and labourers. Non availability of labourer should not be given code 09.

Overview	
Type: Discrete	Valid cases: 197646
Format: character	Invalid: 0
Width: 1	

Literal question

Working on contract basis?

Interviewer instructions

Many of the enterprises in the informal sector are not big enough to have total freedom in terms of procurement of raw materials, machinery or marketing. They may heavily depend on bigger units/ contractors /middlemen for one or more of these. A high proportion of women, for example, staying at home and carrying on their domestic duties, are also engaged in economic activities such as stitching, preparation of paper bags etc. In most cases, they do it on a contract basis for bigger enterprises. They are variously called as home workers, home based workers, out workers etc. Apart from these, even bigger enterprises may engage in contracts for raw materials, credit, sale etc. for various reasons. This phenomenon is proposed to be captured through questions 17 to 21.

The enterprises in the informal sector are tiny units. In many cases, the enterprises are observed to be working as per the orders from a bigger unit. In such cases, certain conditions are put on the server unit by the contractor or master unit. Conditions may be on the sale of products, may be on the mode of payment or may be on the supply of raw materials, etc. If the surveyed unit works under contract, code against this item will be 1. Otherwise, code will be 2.

Literal question

Total operating expenses Manufacturing activity

Interviewer instructions

yearly-expens-manufacture (B3_q309)
File: Block3-3dot1-Principal- and-other-operating- expenses-records

Record the materials consumed in the manufacturing process. Three major raw materials may be recorded in items 301 to 303. Item 304 will record the combined value of the remaining raw materials consumed during the reference month. This block is intended to record value of raw materials consumed (excluding intermediate products) during the reference month. Since the objective is to record the actual value of various inputs, the amounts actually consumed of the various input items are to be recorded. Any material produced at home and used in the enterprise as raw material will be included in this sub-block. For raw materials collected free of cost, labour charges and/or transport charges incurred, if any, will be taken as the value of the raw materials. But if no expenditure is incurred for such free collection, no imputation need be made. Item 305: Purchase value of goods sold in the same condition as purchased is to be reported against item 305. This will show the trading part of the manufacturing enterprises. The purchase value of all goods which are purchased and sold without any transformation will be recorded here. This will also include the purchase value of goods bought exclusively for sale.

Valuation: The value of consumption relates to all the materials utilised in the process of production. These may be purchased during the reference period or prior to the reference period or these may be supplied by the household. The values of these materials are to be calculated by taking the purchase price, where purchase price will mean the delivered value of the goods at the enterprise, i.e., it will include agents' commissions and taxes/duties paid, if any. Evaluation of the materials supplied by the household will be done at the ex-farm price.

	Standard deviation: 3316488.5

Source of information

Yearly figure reported here has been arrived by multiplying by 12 in case of perennial and casual enterprises and by no. of months operated in case of seasonal enterprises.

Literal question

Total operating expenses Trading activity

Interviewer instructions

Trading is an act of purchase and sale of goods without any transformation. A grocery shop or a fruit vendor typifies a trading unit in the informal sector. The major three commodities of the trading enterprise will be recorded against items 311 to 313. The combined value of purchase of the remaining items will be reported against item 314. For credit purchase also full value of the commodities will be reported. Purchase price will include transport charge, sale tax, octroi and any other incidental charges mixed up with the cost of commodities. Barter trading should not be treated as trading activity. Selling of own produce is also not covered under trade.

Yearly figure reported here has been arrived by multiplying by 12 in case of perennial and casual enterprises and by no. of months operated in case of seasonal enterprises.

Literal question

Total operating expenses Hotel and restaurant activity activity

Interviewer instructions

Values of all articles consumed for preparation of food and drink will be recorded for the reference month. All spices, oil, vegetables, meat, eggs, curds, milk, sauce, squash, etc. will be taken into account. The articles consumed for both soft and alcoholic drinks are also to be considered. The value should include the credit purchases as well.
Some articles like cold drinks, cakes, pastries, beer, wines etc. are traded by the hotels and restaurants. The purchase value of such goods may be recorded against this item.

All such items like crockery, glassware, bedding and other consumables i.e. items those are of semi durable nature, will be recorded against this item. Care should be taken so that the fixed assets are not covered here. Furnishing materials like curtains, flower vases, etc. will also be reported here.

Source of information

Yearly figure reported here has been arrived by multiplying by 12 in case of perennial and casual enterprises and by no. of months operated in case of seasonal enterprises.

Literal question

Total other operating expenses of all activities(item 399)

Interviewer instructions

This is total of 17 items.
Record the other operating expenses not covered in block 3 for the above 7 types of activities. In general, for service enterprises, this block will record all the operating expenses as no separate sub block has been provided in block 3.

These will cover fuels, lubricants, electricity charges, packing materials, consumable stores, postal charges, stationery cost, taxes paid, etc. Expenditure on minor repair and maintenance of fixed assets and charges for work done by other concerns (whether paid or payable) are also to be taken care of. Cost of transportation of goods (raw materials) from the source of supply to the site of the enterprise and the commission paid to the purchasing agents for this purpose will also appear in this block.

Description

Block 4 will record the principal receipts in seven sub-blocks corresponding to which the principal expenses have already been collected in block 3. The items are earmarked in the sub-blocks activity wise against which the principal receipts will appear. In the paragraphs given below, detailed instructions are provided to collect information on these items. As said earlier, there will be some commonality in items between blocks 4 and 4.1. Precaution has to be taken that whenever an item has already been covered in block 4, receipts are not duplicated against a similar item in block 4.1. Examples of such items are: service charges (items 442, 454, 463, 464 and 482 of block 4) and receipts from services provided (item 491 of block 4.1). Again items 473 and 483 of block 4 and item 495 of block 4.1 relate to donations. In each such case, priority will be given to items of block 4 over block 4.1. The approach of data collection will be the amount receivable during the reference month.

Source of information

Yearly figure reported here has been arrived by multiplying by 12 in case of perennial and casual enterprises and by no. of months operated in case of seasonal enterprises.

Literal question

Principal Receipts-manufacturing activity

Interviewer instructions

yearly-receipt-manufacturing (B4_q419)
File: Block4-4dot1-Principal-other-receipts-records

Total value of items 409 and 413 will give the total principal receipts from the manufacturing unit.

The figure is total of the following item-
Value of output of 3 major products/by- products. Value for goods manufactured (actually sold or not sold) at ex-factory value. If the number of products and by-products exceeds 3, the value of remaining products will be added together and the total will be shown against item 404. The intermediate products (Intermediate products are used in the production of final products of the manufacturing unit. Intermediate products lose their identity in the final product) made by the enterprise and meant for further processing are generally not included here, but if they are sold as they are, they should be included.

Item 405: The ex-factory sale values of all goods incidental to manufacturing which were sold in the reference month in the same condition as they were purchased will be recorded here. This will also include the sale value of goods bought exclusively for re-sale.

Valuation : The values of finished products and by-products which were produced and made ready for sale/use/free distribution/home consumption and the value of intermediate products, if any, that were produced and made ready for sale during the reference period, will be recorded in whole number of rupees. Value of manufactured products lost by theft/damage/destroyed by fire etc. during the reference period will also be included. The ex-factory value of the products and by-products will be reported here. It excludes excise duty paid or sales tax realised by the enterprise on behalf of the Government as also all distributive expenses incurred such as discount or rebate, charges for carriage outward, commission to selling agents, etc.

Items 411 to 413 : For any manufacturing process, a stock of semi-finished goods (goods which are yet to get the shape of final product) remains at the beginning and at the end of the reference period. The net balance (item 412 - item 411) of such semi-finished goods forms a sort of notional output for that enterprise. The value of net balance of semi-finished goods will be recorded against item 413 with appropriate sign ('+' for increase and '-' for decrease).

Invalid: 148428
Minimum: -2500
Maximum: 1499667000
Mean: 59390.5
Standard deviation: 6766771.3

Interviewer instructions

In any trading unit generally some goods are left in stock at any point of time. Items 431 and 432 will record the opening and closing value of such stock at purchase price. The value of stock should include the credit purchases also. It is not easy to get the stock figures from the trading enterprise. As a proxy measure, capital locked up in stock may be collected. The estimates of the stock figures will be noted at the beginning and at the end of the reference month. The difference of items 432 and 431 will be noted with proper sign against item 433, which will refer to the change in stock of trading goods.

Mean: 28.1
Standard deviation: 425.9

Literal question

Overall Trade margin (in percentage-whole number)

Interviewer instructions

This item will record the overall trade margin of the unit as a direct query from the traders. Trade margin is the percentage gain in sale price over the corresponding purchase price and it may not necessarily pertain to the reference month only. Trade margin will refer to the margin the trader normally keeps in the transaction of the trading goods. Note that this item does not form a part of the value added of the sample unit but is collected to have an assessment of the consistency of the collected data.

Description

A worker is defined as one who participates either full time or part time in the activity of the enterprise. The worker may serve the enterprise in any capacity - primary or supervisory. He/she may or may not receive wages/ salaries in return to his/ her work incidental to or connected with the entrepreneurial activity.

Literal question

Hired Worker - Full time Female

Interviewer instructions

A hired worker is a person employed directly or through any agency on payment of regular wage/ salary in cash or kind. Apprentices, paid or unpaid, are to be treated as hired workers. Paid household workers, servants and resident workers of the proprietor (in the case of proprietary enterprise) or partners (in the case of partnership enterprise) working in an enterprise are also to be considered as hired workers for the purpose of making entry against this item. It may be noted here that the information regarding working owner/ partner(s) shall be recorded against item 1 only and not against item 2, even if they take regular payment from the enterprise. It is possible that for an OAE also, hired workers may be found in some situations. This may happen when an enterprise is identified as OAE at the listing stage on the basis of one year reference period, but in the reference month there is a hired worker in the enterprise.

Other worker/helper-Full time Female

Interviewer instructions

Information regarding the workers not covered in items 1 & 2 above shall be recorded against this item. This includes all persons belonging to the household of the proprietor or households of the partners who are working in or for the enterprise without regular salary or wages. Persons working as exchange labourer in the enterprise without salary or wages will also be covered in this category. All unpaid household workers/ helpers who are associated with the activities of the enterprise during the reference month will be considered for recording entries against this item.

Decimals: 0	Maximum: 140000000
Range: 0-140000000	Mean: 66169.6
	Standard deviation: 844939

Description

This block is meant for recording value of fixed assets owned and hired by the sample enterprise. Three reference periods have been used in this block. While the value of assets will be collected as on the date of survey, net addition to the fixed assets will be recorded for the last 365 days. The value of rent payable on hired assets should be recorded for the reference month.

Source of information

Market value of the fixed assets as on the date of survey separately for owned and hired assets shall be recorded in columns (3) & (4) respectively. Market value means the value that the equipment would have fetched from the open market if sold in present condition.

Literal question

Land and Building owned

Interviewer instructions

land-own (B8_q1_c3)
File: Block8-Fixed-assets-owned--hired-records

Land will mean the land on which the enterprise is accommodated together with the surrounding area which is used for the enterprise. This will also include improvement to land. However, if only a portion of the land belonging to the residence of a household is utilised for the enterprise, only that portion of the land may be considered as capital assets for the enterprise. Land owned with permanent heritable possession with or without right to transfer the title will come under this item. Land held on long term lease, say, 30 years or more will also be treated as land owned. For encroached land, market value will be recorded in column (4) and entry '0' in column (6) Building is the structure which houses the activities of the enterprise. This will also include all other structures like shed, house, portions of a house or other structure, building under construction and other conveniences in which the activities of the enterprise are carried out. This will include other constructions such as laying of passage, raising of wall, construction of water tank or sewerage, boring of tube-well, etc.

Type: Continuous	Valid cases: 3521
Format: numeric	Invalid: 194125
Width: 7	Minimum: 0
Decimals: 0	Maximum: 5000000
Range: 0-5000000	Mean: 27737
	Standard deviation: 122596.8

Source of information

In this column information regarding net additions to the fixed assets owned during last 365 days will be recorded. Net addition may be obtained by subtracting depletion of assets from the addition made during last 365 days.

Literal question

Land and Building net addition

yearly-land-rent (B8_q1_c6)
File: Block8-Fixed-assets-owned--hired-records

Overview	

yearly-land-rent (B8_q1_c6)
File: Block8-Fixed-assets-owned--hired-records

Type: Continuous
Format: numeric
Width: 7
Decimals: 0
Range: 0-2400000

Valid cases: 197646
Invalid: 0
Minimum: 0
Maximum: 2400000
Mean: 1625.1
Standard deviation: 10880.9

Source of information

The rent payable for the reference month on the hired assets by the enterprise will be recorded in this column. If no rent is payable for any asset put '0' in column (6) for that particular type of asset with appropriate remarks in block 12. If an enterprise is located in a rented house where the household resides as well, rent may be imputed on the basis of floor area occupied by the enterprise. For rent paid in kind, imputed value may be given. If the enterprise runs in one's own house, rent need not be imputed.

Standard deviation: 134201.7

Literal question

Plant and machinery owned

Interviewer instructions

Plant is generally the name given to an assembly of machinery/ equipment / devices installed for the operation of entrepreneurial activities. Machinery means an implement or mechanical device used in the entrepreneurial activities. These are assets of durable nature and can be easily identified. The full value of the machinery should be reported, if the machinery was purchased during the year on hire-purchase basis. Advance payments made for the purchase of a machinery (not in possession on the date of survey) will not be recorded.

Literal question

Transport equipment owned

Interviewer instructions

All vehicles, power-driven or man/animal-driven, used for transporting passengers (only for transport activity), goods and materials by the enterprise in connection with its activity will be covered by this item. Animals, if used for drawing vehicles or carrying loads, will be treated as part of transport equipment, otherwise it will be included in item 4. If the equipment is used both for domestic as well as enterprise purpose, the criterion to be followed is major time disposition of the equipment i.e., whether equipment is used more for domestic purpose or for use in enterprise. Transport equipment which is occasionally rented out will be included if it is mainly used for the activities of the enterprise.

Range: 0-8000000	Mean: 5619.5
	Standard deviation: 46658.8

Literal question

Tools and other fixed assets owned

Interviewer instructions

Tools refer to small loose implements, generally held in hand for operation and having normal life of more than one year. Other fixed assets refer to other durable equipment (not covered under items 1 to 3 above) which are used for the entrepreneurial activity either directly or indirectly. These will include furniture, fixtures, laboratory equipment, office equipments etc. Livestock used in oil ghani will also be included under this item. If the same animal is used part of the time in oil ghani and part of the time for transporting materials, it will be classified under item 4 or item 3 depending upon major time spent.

	Standard deviation: 152978.5

Description

Any borrowing in cash or kind to be repaid in cash or kind is termed as loan. When a loan is granted by a banker/financier to an enterprise, the whole amount is placed at the disposal of the enterprise and interest at an agreed rate is charged thereon from the date of disbursement of the loan. Information on amount of loan taken including interest which is outstanding on the date of survey by different sources of loan will be recorded in block 9. It may be noted that loans taken for the purpose of utilising the same in the entrepreneurial activities of an enterprise will be included even if such loans are used for other purposes. On the other hand, loan taken for other purposes but ultimately used in the enterprise will be excluded. In case of hire purchase also, loan outstanding on the date of survey, including interest will be considered in block 9 against the corresponding serial number. While loans are generally given in cash from agencies 1 to 3, it can be either cash or kind or both from other agencies. All entries in this block will be made in whole number of rupees.

Overview

Type: Continuous	Valid cases: 197646
Format: numeric	Invalid: 0
Width: 8	Minimum: 0
Decimals: 0	Maximum: 17299920
Range: 0-17299920	Mean: 8316
	Standard deviation: 72232.4

Description

The total income generated by any enterprise is distributed into four factors of production. Interest goes to the investors, rent goes to the owners of land and building, emolument goes to the workers and the remaining income (operating surplus) is retained by the entrepreneur. In this block factor incomes of the enterprise will be recorded in whole number of rupees.

Source of information

Yearly figure reported here has been arrived by multiplying by 12 in case of perennial and casual enterprises and by no. of months operated in case of seasonal enterprises.

Interviewer instructions

Total emoluments payable to the workers of the enterprise during the reference month is to be recorded here. This is a transfer entry from column (3), item 3 of block 7. (yearly Figure is derived and posted here)
