Overview

ABSTRACT
The NSS 65th round (July 2008-June 2009) was comprehensively dedicated to the all India survey on housing condition. In this round, a nation-wide survey enquiry was organised to provide estimates on various characteristics of housing amenities, housing condition, cost of construction, etc.

Information on housing condition collected through schedule 1.2 canvassed in the NSS 65th Round is broadly categorised into three groups.

Firstly, information on the particulars of various facilities available to the sample households for decent living such as drinking water, latrine, bathroom, electricity etc. which were collected from all the selected households.

Secondly, information was collected on some of the characteristics of the houses, particulars of the dwelling unit and the micro environment surrounding the dwelling unit from the households who were living in houses. These broadly relate to different aspects of the structure of the houses, number of rooms, floor area, rent of the hired dwellings, use of the house, age of the structure, condition of the structure, drainage arrangement, garbage collection arrangement, etc.

Finally, information regarding number of constructions undertaken, number of constructions completed, type of constructions, cost of constructions, sources of finance, etc. was collected from the households who undertook constructions during the last 365 days, Besides, information was collected on first hand purchase of constructed house/flat by the households during the last 365 days such as number of such purchases, their area and cost.

KIND OF DATA
Sample survey data [ssd]

UNITS OF ANALYSIS
Randomly selected households based on sampling procedure.

Scope

NOTES
In the NSS 65th round survey (July 2008 – June 2009) on housing condition, information was collected on the particulars of living facilities, such as major source of drinking water, availability of bathroom, use of latrine, type of latrine, whether the household has electricity for domestic use, etc. Information was also collected on particulars of housing characteristics and micro environment, such as plinth area of the house, plinth level, use of house, period since built, condition of structure, drainage arrangement, etc. Information on particulars of dwelling included number of rooms, floor area of the dwelling, ventilation of the dwelling, total number of married couples in the household, kitchen type, floor type, wall type, roof type,

etc. Besides, details of construction and repair, undertaken by the households during the last 365 days, for residential purpose was collected including cost of construction, source of finance and first-hand purchase of constructed house/ flat during the last 365 days. This apart, data was collected on household characteristics such as land possessed, principal industry and occupation of the household, average monthly household consumer expenditure of the household, tenurial status of dwelling, maximum distance to the place of work normally travelled by any earner of the household, etc.

In the present round, Schedule 1.2 on housing condition consisted of 11 blocks.

The first three blocks, viz. Blocks 0, 1 and 2, were used to record identification of sample households and particulars of field operations, as is the common practice in usual NSS rounds. Similarly, the last three blocks, viz., Blocks 8, 9 & 10, were again the usual blocks to record the remarks of investigator/senior investigator, comments by superintendent/ senior superintendent and comments by other supervisory officer(s), respectively.

Block 3 was used for recording the household characteristics like household size, gender of the head of the household, principal industry and occupation, religion, social group, household type, land possessed, tenurial status of dwelling, area type in which the dwelling unit is located, maximum distance to the place of work normally travelled by any earner of the household, monthly per capita consumer expenditure, etc.

Through Block-4 recorded the particulars of living facilities, such as major source of drinking water, availability of bathroom, use of latrine, type of latrine, whether the household has electricity for domestic use, etc.

In Block-5, particulars of housing characteristics and micro environment, such as plinth area of the house, plinth level, use of house, period since built,condition of structure, drainage arrangement, etc,were collected .

Particulars of dwelling such as number of rooms, floor area of the dwelling, ventilation of the dwelling, total number of married couples in the household, kitchen type, floor type, wall type, roof type, etc. were collected through Block-6.

Particulars of construction and repair, undertaken by the households during the last 365 days, for residential purpose were collected in Block 7. This included cost of construction, source of finance and first-hand purchase of constructed house/ flat during the last 365 days.

KEYWORDS
Housing condition, Building, Flood risk, Approach Road, Dwelling, Living facilities, Building construction

Coverage

GEOGRAPHIC COVERAGE
The survey covered the whole of the Indian Union except (i) interior villages of Nagaland situated beyond five kilometres of the bus route and (ii) villages in Andaman and Nicobar Islands which remained inaccessible throughout the year.

UNIVERSE
The survey used the interview method of data collection from a sample of randomly selected households and members of the household

Sampling

Sampling Procedure

A stratified multi-stage design was adopted for the 65th round survey. The first stage units (FSU) were the 2001 census villages (Panchayat wards in case of Kerala) in the rural sector and Urban Frame Survey (UFS) blocks in the urban sector. For towns where no UFS frame was available (applicable to Leh and Kargil towns of J & K), each town was treated as an FSU. The ultimate stage units (USU) were households in both the sectors. In case of large FSUs, one intermediate stage of sampling was the selection of two hamlet-groups (hgs)/ sub-blocks (sbs) from each FSU. Details of the sample design and estimation procedure may be found attached as a document in the external resources.

Deviations from Sample Design

There was no deviation from the original sample deviation.

Response Rate

At the all-India level, 12,952 FSUs (8188 villages and 4764 urban blocks) was allocated for survey for the 'central sample'. Out of these 12,952 FSUs allotted for survey, 12,865 FSUs could be surveyed - 8,130 in rural and 4,735 in urban. In the central sample, 1,53,518
households were actually surveyed – 97,144 in rural areas and 56,374 in urban areas.

In NSS 65th round, a sample of 13,996 FSUs (8,552 villages and 5,444 urban blocks) was also selected for survey by the state agencies (State sample) at the all-India level.

Weighting

Sample weights were calculated and included in each of the data files Variable 'Wgt_SS' refers to Multiplier for each Subsample.
Variable 'Wgt_Combined' refers to Combined Multiplier.

Questionnaires

Overview

Schedule 1.2 consists of 11 blocks including block 0. The blocks are:

Block 0: descriptive identification of sample household
Block 1: identification of sample household
Block 2: particulars of field operation
Block 3: household characteristics
Block 4: particulars of living facilities
Block 5: housing characteristics and micro environment
Block 6: particulars of the dwelling
Block 7: particulars of construction and repair for residential purpose
Block 10: remarks by investigator
Block 11: comments by supervisory officer(s)

Data Collection

Data Collection Dates

Data Collection Notes

The fieldwork of 65th round of NSSO started from 1st July, 2008 and continued till 30th June, 2009. As usual, the survey period of this round was divided into four sub-rounds, each with duration of three months, the 1st sub-round period ranging from July to September, 2008, the 2nd sub-round period from October to December, 2008, 3rd sub-round from January to March, 2009 and 4th
sub-round from April to June, 2009. An equal number of sample villages/blocks (FSUs), as far as possible, was allotted for survey
in each of these four sub-rounds.

Questionnaires

Schedule 1.2 consists of 11 blocks including block 0. The blocks are:

Block 0: descriptive identification of sample household
Block 1: identification of sample household
Block 2: particulars of field operation
Block 3: household characteristics
Block 4: particulars of living facilities
Block 5: housing characteristics and micro environment
Block 6: particulars of the dwelling
Block 7: particulars of construction and repair for residential purpose
Block 10: remarks by investigator
Block 11: comments by supervisory officer(s)

Block-7-Constructions-records

Content	This dataset contain information like type of construction, floor area, expenditure incurred, source of finance, etc., in respect of constructions undertaken, either at the present premises or elsewhere, during the last 365 days. This apart, number of constructed houses/flats purchased first-hand during the last 365 days are also recorded separately along with their floor area and cost of acquiring them.
Cases	15282
Variable(s)	54
Structure	Type: relational Keys: Key_Constrn_no(Key to locate construction no), Key_hhold(Key to locate household)

Description

Indicate NSS survey round no.

Schedule Number (Sch_no)
File: Block-1-2-Identification-household-records

Overview	
Type: Discrete	Valid cases: 153518
Format: character	Invalid: 0
Width: 3	

Description

Indicate schedule number 1.2

Sample (Sample)
File: Block-1-2-Identification-household-records

Overview	
Type: Discrete	Valid cases: 153518
Format: character	Invalid: 0
Width: 1	

Description

Sample villages and blocks selected for survey by NSSO(FOD) is called CENTRAL sample and matching sample selected for survey by state statical offices is called STATE sample

Literal question

Sample (1-Central or 2-State)

Sub-Round (SubRound)
File: Block-1-2-Identification-household-records

Overview	
Type: Discrete	Valid cases: 153518
Format: character	Invalid: 0
Width: 1	

Description

The period of survey is of one year duration starting on 1st July 2008 and ending on 30th June 2009. The survey period of this round is divided into four sub-rounds of three months' duration each as follows:

sub-round 1 : July - September 2008
sub-round 2 : October - December 2008
sub-round 3 : January - March 2009
sub-round 4 : April - June 2009

In each of these four sub-rounds equal number of sample villages/ blocks (FSUs) have been allotted for survey with a view to ensuring uniform spread of sample FSUs over the entire survey period.

Literal question

Sub-Round

Sub-Sample (SubSample)
File: Block-1-2-Identification-household-records

Overview	
Type: Discrete	Valid cases: 153518
Format: character	Invalid: 0
Width: 1	

Description

As per census arrangement the villages have been arranged and FSUs have been selected by circular systematic sampling with probability proportional to population for all rural strata. For urban strata x sub-strata (wherever applicable), the towns within the stratum have been arranged in ascending order of population; then FSUs were selected by circular systematic sampling with equal probability for UFS towns. Within each stratum/ sub-stratum, multiple of 4 FSUs were selected. Samples have been drawn in the form of two independent sub-samples (sub-sample-1 and 2)

Literal question

Sub-sample

Sector (Sector)
File: Block-1-2-Identification-household-records

Overview	
Type: Discrete	Valid cases: 153518
Format: character	Invalid: 0
Width: 1	

Description

In the NSS, the domains of study are usually rural and urban areas within a zone, state, region or district. The rural and urban areas of the country are taken as adopted in the latest population census.

Literal question

Sector code (1-Rural,2-Urban)

State (State)
File: Block-1-2-Identification-household-records

Overview

Overview

State (State)
File: Block-1-2-Identification-household-records

Type: Discrete
Format: character
Width: 2

Valid cases: 153518
Invalid: 0

Description

States and Union Territories are the broad domains of study in the NSS. They are assigned 2 digited codes,

Literal question

State Code

Region (Region)
File: Block-1-2-Identification-household-records

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 153518
Invalid: 0

Description

States have been divided into regions by grouping contiguous districts similar in respect of population density and crop pattern. In Gujarat, however, some districts have been split for the purpose of region formation, considering the location of dry areas and the distribution of tribal population in the state. The compositions of the regions are given in Appendix-II of instruction manual

Literal question

Region code

FOD Sub-Region (FODSub_Region)

District code

Stratum (Stratum)
File: Block-1-2-Identification-household-records

Overview

Type: Discrete
Format: character
Width: 2

Valid cases: 153518
Invalid: 0

Stratum (Stratum)
File: Block-1-2-Identification-household-records

Description

Rural sector: All villages of a district form a separate stratum
Urban sector: In the urban sector, strata have been formed within each NSS region on the basis of size class of towns as per Census 2001 town population. This departure has been made in the stratification principle in order to facilitate generation of town-class wise estimates to satisfy the requirements of the user ministries.

Literal question

Stratum no

Sub-Stratum(urban only) (Sub_Stratum)
File: Block-1-2-Identification-household-records

Overview

Type: Discrete	Valid cases: 56363
Format: character	Invalid: 0
Width: 2	

Description

There is no sub-stratification in the rural sector and for strata corresponding to non-UFS towns. However, to net adequate number of slums, for all other urban strata, each stratum has been divided into 2 sub-strata as follows:
sub-stratum 1: all UFS blocks having area type 'slum area'
sub-stratum 2: remaining UFS blocks

Literal question

Sub-stratum no

FSU Serial number (FSU)
File: Block-1-2-Identification-household-records

Overview

Type: Discrete	Valid cases: 153518
Format: character	Invalid: 0
Width: 5	

Description

A stratified multi-stage design has been adopted for the 65th round survey. The first stage units (FSU) are the 2001 census villages (Panchayat wards in case of Kerala) in the rural sector and Urban Frame Survey (UFS) blocks in the urban sector. For towns with no UFS frame available (applicable to Leh and Kargil towns of J & K), each town is treated as an FSU.

Literal question

First Stage Unit (FSU) no.

hamlet group/ sub block No (Hg_sb_no)
File: Block-1-2-Identification-household-records

Overview

Type: Discrete	Valid cases: 153518
Format: character	Invalid: 0
Width: 1	

Description

Large sample FSUs with approximate present population of 1200 or more are divided into a suitable number (say, D) of 'hamlet-groups' in the rural sector and 'sub-blocks' in the urban sector, by more or less equalizing present population of the FSU.The FSUs without hg/ sb formation are treated as sample hg/ sb number 1.

Literal question

Hamlet-group/ Sub-block No.

Second Stage Stratum no. (Stage2Stratum)
File: Block-1-2-Identification-household-records

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 153518
Invalid: 0

Description

Two cut-off points 'A' and 'B' (in Rs.), determined from NSS 61st round data for each NSS region for urban areas in such a way that top 30% of the population have MPCE equal to or more than 'B' and bottom 30% of the population have MPCE equal to or less than A, have been used for second-stage stratification.

All the households listed in the selected FSU/ hamlet-group/ sub-block have been stratified into three second stage strata (SSS) for schedule 1.2

Literal question

Second stage stratum no.

Household No. (Hhold_No)
File: Block-1-2-Identification-household-records

Overview

Type: Discrete
Format: character
Width: 2

Valid cases: 153518

Literal question

Sample Household no

Informant's relation to head (code) (B1_q16)
File: Block-1-2-Identification-household-records

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 153457
Invalid: 0

Literal question

Informant's relation to head (code)

Interviewer instructions

Information in this schedule will be collected from the usual members of the household. The informant will be the household member who provides bulk of the information for the selected household. In case, the household members of the selected household could not provide bulk of the information, the household will be substituted by another household. Informant's relation to the head of the household will be ascertained and recorded in codes in this item.

Response Code (B1_q17)
File: Block-1-2-Identification-household-records

Valid cases: 153518
Invalid: 0

Literal question

Respons code

Interviewer instructions

Response Code (B1_q17)
File: Block-1-2-Identification-household-records

This item will be filled in after collecting information for all items in the schedule. The entry is to be made in terms of codes on the basis of the impression formed by the investigator regarding the overall response of the informant.

Survey Code (B1_q18)
File: Block-1-2-Identification-household-records

Overview	
Type: Discrete	Valid cases: 153518
Format: character	Invalid: 0
Width: 1	

Literal question

Survey code

Interviewer instructions

Whether the originally selected sample household or a substituted household has been surveyed will be indicated against this item by recording code '1' if the originally selected household has been surveyed and code '2' if the substitute household has been surveyed. If neither the originally selected household nor a substitute household could be surveyed, i.e., if the sample household is a casualty, code '3' will be recorded. In case of a casualty, only the blocks 0, 1, 2, 8, 9 and 10 are to be filled up and on the top of the front page of the schedule the word 'CASUALTY' will be written in block capitals.

Reason for substitution (code) (B1_q19)
File: Block-1-2-Identification-household-records

Overview	
Type: Discrete	Valid cases: 2998
Format: character	Invalid: 0
Width: 1	

Literal question

Reason for substitution of original household (code)

Interviewer instructions

For an originally selected sample household, which could not be surveyed, irrespective of whether a substituted household could be surveyed or not, the reason for not surveying the original household will be recorded against item 19 in terms of codes.

Hh size-Male (B3_q1)
File: Block-3-Household characteristics records

Overview

Type: Continuous	Valid cases: 149616
Format: numeric	Invalid: 3902
Width: 2	Minimum: 0
Decimals: 0	Maximum: 23
Range: 0-23	Mean: 2.5
	Standard deviation: 1.4

Literal question

Household size-Male

Interviewer instructions

Household size is to be recorded in this item. The total number of male (including eunuch) members of the household will be recorded.

Hh size-Female (B3_q2)
File: Block-3-Household characteristics records

Overview

Type: Continuous	Valid cases: 148912
Format: numeric	Invalid: 4606
Width: 2	Minimum: 0
Decimals: 0	Maximum: 22
Range: 0-22	Mean: 2.4
	Standard deviation: 1.4

Literal question

Household size-female

Interviewer instructions

Household size is to be recorded in this item. The total number of female members of the household will be recorded.

Hh size- Total (B3_q3)
File: Block-3-Household characteristics records

Overview	
Type: Continuous	Valid cases: 153518
Format: numeric	Invalid: 0
Width: 2	Minimum: 1
Decimals: 0	Maximum: 40
Range: 1-40	Mean: 4.8
	Standard deviation: 2.4

Literal question

Household size-Total

Interviewer instructions

Household size is to be recorded in this item. The total number members of the household will be recorded

Gender of the head (B3_q4)
File: Block-3-Household characteristics records

Overview	
Type: Discrete	Valid cases: 153450
Format: character	Invalid: 0
Width: 1	

Literal question

Gender of the head of the household

Interviewer instructions

gender of the head of the household will be recorded. Code 1 will be recorded if the head of household is male and code 2 will be recorded if the head of the household is female. If the head of household is eunuch, code '1' will also be recorded

NIC-2004 (B3_q5)
File: Block-3-Household characteristics records

Overview	
Type: Discrete	Valid cases: 144231
Format: character	Invalid: 0
Width: 5	

Literal question

Principal industry (NIC-2004)

Interviewer instructions

The description of the principal household industry will be recorded in the space provided. The appropriate five-digit industry code of the NIC-2004 is to be recorded . For households deriving income from non-economic activities only, (e.g. for a household where income is derived only from pension/ begging/ prostitution, etc.) a dash (-) may be put against this item

NCO-2004 (B3_q6)
File: Block-3-Household characteristics records

Overview	
Type: Discrete	Valid cases: 144121
Format: character	Invalid: 0
Width: 3	

Literal question

Principal occupation (NCO-2004)

NCO-2004 (B3_q6)
File: Block-3-Household characteristics records

Interviewer instructions

The description of the principal household occupation will be recorded in the space provided. The appropriate three-digit occupation code of the NCO-2004 is to be recordedl. For households deriving income from non-economic activities only, a dash (-) may be put against this item.

Hh type (B3_q7)
File: Block-3-Household characteristics records

Overview

Type: Discrete
Format: character
Width: 2

Valid cases: 153518
Invalid: 0

Literal question

Household type

Religion (B3_q8)
File: Block-3-Household characteristics records

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 153499
Invalid: 0

Literal question

Religion

Interviewer instructions

The religion of the household will be recorded against this item in codes. If different members of the household claim to belong to different religions, the religion of the head of the household will be considered as the religion of the household.

Social group (B3_q9)
File: Block-3-Household characteristics records

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 153476
Invalid: 0

Literal question

Social group

Interviewer instructions

Whether the household belongs to scheduled tribe, scheduled caste or other backward class will be indicated against this item in terms of codes

Land possessed (B3_q10)
File: Block-3-Household characteristics records

Overview

Type: Discrete
Format: character
Width: 2

Valid cases: 153286
Invalid: 0

Land possessed (B3_q10)
File: Block-3-Household characteristics records

Literal question

Land possessed as on date of survey(code)

Interviewer instructions

Land possessed is given by land owned (including land under 'owner like possession') + land leased in - land leased out + land held by the household but neither owned nor leased in (e.g., encroached land). The area of land possessed by the household within the country only as on the date of survey will be worked out in hectares and the relevant code corresponding to the area of land is to be recorded against this item.

Tenurial status (B3_q11)
File: Block-3-Household characteristics records

Overview	
Type: Discrete	Valid cases: 153518
Format: character	Invalid: 0
Width: 1	

Literal question

Tenurial status of dwelling

Interviewer instructions

A dwelling unit is considered to be 'owned' by the sample household if permanent heritable possession with or without the right to transfer the title is vested in a member or members of the household. Dwelling units in owner-like possession under long term lease or assignment is also considered as owned. If the sample household has the right of permanent heritable possession of the dwelling unit with or without the right to transfer the title, such dwelling units will be considered as 'freehold' and code 1 will be recorded. Dwelling units held under special conditions such that the holder does not possess the title of ownership of the dwelling unit but the right for long term possession of the dwelling unit (e.g., dwelling units possessed under perpetual lease, hereditary tenure and long term lease for 30 years or more) will be considered as being 'leasehold' and for such type of dwelling units code 2 will be considered. If the dwelling unit, in which the sample household lives, is provided by an employer to a member of the sample household, such dwelling units will be considered as 'employer quarter' and code 3 will be assigned. If the dwelling is taken on rent, by the sample household, which is payable at monthly, quarterly or any other periodic intervals or on lease, for a period of less than 30 years, it will be treated as a hired dwelling. It may be noted that a hired dwelling unit may be free of rent also. If the sample household had taken the dwelling unit in rent with written contract with its owner, for such dwelling unit, code 4 will be entered. On the other hand, if the sample household lives in a hired dwelling unit without a written contract with the owner of the dwelling unit, code 5 will be entered for such dwelling unit. Households living more or less regularly, under bridges, in pipe, etc., in purely temporary flimsy improvisations built by the roadside (which are liable to be removed any moment), are considered to have no dwellings and for such households code 6 will be recorded against this item. Code 9 will be entered in all other types of possession of the dwelling unit (e.g., encroached one).

Area type (B3_q12)
File: Block-3-Household characteristics records

Overview	
Type: Discrete	Valid cases: 153473
Format: character	Invalid: 0
Width: 1	

Pre question

Ask this question if answer to Q.11 is code-1to5 or 9

Literal question

If entry 1 to 5 or 9 in item 11, area type in which the dwelling unit is located

Post question

Skip otherwise

Interviewer instructions

For those who are living in houses (i.e., excluding those with no dwelling: code 6 in item 11), information on the type of area in which the dwelling unit is located will be recorded against this item in terms of codes.

Max distance to the place of work (B3_q13)
File: Block-3-Household characteristics records

Overview	
Overview	

Type: Discrete	Valid cases: 153093
Format: character	Invalid: 0
Width: 1	

Literal question

Maximum distance to the place of work normally travelled by any earner of the household (code)

Interviewer instructions

Information for this item will be collected with a reference period of last 365 days. A household member with earning either from economic activities and/or from non-economic activities will be considered as an earner in the household. Place of work will refer to the place where the activities, considering both the economic and non-economic activities together, are performed by the earners. Distance will mean the one way actual distance from residence to the place of work normally travelled by the earner. For a household with a single earner, there will not be any problem in ascertaining the maximum distance normally travelled to the place of work by him/her. In case there is more than one earner in a household, the distance will be the maximum distance travelled by any earner.
However, for the pensioners, remittance recipients and rentiers, who may travel certain distances to collect money from the banks or post offices or from the tenants, code 1 will always be entered. For persons, whose place of work is not fixed, e.g., hawkers, casual workers, mobile trade, beggars, etc., the distance normally travelled from residence to the farthest point of his/her area of operation may be considered for assigning codes in this item. In all the situations, the distance normally travelled from residence to the farthest point of his/her place of activity will be ascertained and the relevant code will be entered.

Purchase (Rs.) (B3_q14)

Major source of drinking water- cell 1 (B4_q1_1)
File: Block-4-Household living facilities-records

Overview	
Type: Discrete	Valid cases: 153516
Format: character	Invalid: 0
Width: 2	

Literal question

Major source of drinking water (record the two most often used sources against cell 1 and cell 2 in descending order of uses)

Interviewer instructions

Major source of drinking water- cell 1 (B4_q1_1)
File: Block-4-Household living facilities-records

In item 1, information in respect of the household's major source of drinking water during the last 365 days will be collected. Since a household may use more than one source of drinking water, provision has been made to record two such sources in column 3 of item 1 against cell 1 and cell 2, respectively. Entry in cell 1 will relate to that source of drinking water which is used most by the household and in cell 2, entry will relate to the second most used source of drinking water. However, if a household has only one source of drinking water, the relevant entry will be made against cell 1, and a dash (-) may be put in cell 2.

Drinking water packaged in bottles, pouches, and similar containers will be classified as bottled drinking water. Generally this packaged drinking water meets certain safety standards and are considered safe for drinking. However, tap water, well water, etc., kept by households in bottles, for convenience, will not be treated as bottled drinking water. If bottled drinking water is major source of drinking water, code 01 will be appropriate. If an arrangement is made by corporation, municipality, panchayat or other local authorities or any private or public housing estate or agency to supply water through pipe for household uses and if the sample household is availing such facility, then code 02 will be appropriate. Drinking water carried through pipe from sources like well, tank, river, etc., by the owner / occupants only for convenience of the household, however, will not be treated as tap water. Instead, such a source will get the code appropriate to the actual source from which water is carried through pipe. A well is considered as protected if has generally the following protective measures to lower the risk of contamination:

1) A headwall around the well with a properly fitting cover
2) A concrete drainage platform around the well with a drainage channel
3) A handpump or bucket with windlass

A well which does not have protective measures to lower the risk of contamination will be considered as unprotected well. Rainwater harvesting is the gathering or accumulating and storing of rainwater. Traditionally, rainwater harvesting has been practised in arid and semi-arid areas, and has provided drinking water, domestic water, water for livestock, etc. When harvested rainwater is used as a major source of drinking water code 11 will be applicable.

Major source of drinking water- cell 2 (B4_q1_2)

Whether drinking water sufficient (B4_q2)
File: Block-4-Household living facilities-records

Overview	
Type: Discrete	Valid cases: 153518
Format: character	Invalid: 0
Width: 1	
Literal question	

Whether availability of drinking water from the first source (most often used source) is sufficient throughout the year?

Interviewer instructions

This information will be collected in respect of the 'most often used source' recorded against cell 1 of item 1. For collecting this information, the investigator will have to depend on the judgement of the informant. Code 1 will be recorded if the reply is affirmative; otherwise code 2 will be recorded.

Dinking water-Jan (B4_q3_1)
File: Block-4-Household living facilities-records

Overview	
Type: Discrete	Valid cases: 3138
Format: character	Invalid: 0
Width: 1	

Literal question

If code 2 in item 2, during which calendar months of the year availability of drinking water was not sufficient?

Interviewer instructions

For the households which did not get sufficient drinking water throughout the year from the first source (most often used source), information will be collected regarding the calendar months of the year during which availability of drinking water was not sufficient from the first source. 12 cells have been provided against this item to record information for all the 12 calendar months of the year. Each cell is earmarked, with the name of the month written at the top of the cell to enter the code for eligible month. Code '1' will be recorded in the cell for the calendar month if availability of drinking water was not sufficient in that month. The cell(s) corresponding to the calendar month(s) will be left blank for which availability of drinking water was not considered not sufficient during the year.

Facility of drinking water (B4_q4)
File: Block-4-Household living facilities-records

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 153483
Invalid: 0

Literal question

Facility of drinking water

Interviewer instructions

For the households with more than one sources of drinking water recorded in item 1, the information for this item will relate to the first source (most often used source). Information as to whether the household's first source of drinking water is for its exclusive use or is shared with other households/community will be indicated in codes.
If the source of drinking water is shared by and restricted to a few households in the locality or in other situations, code 9 will be entered.

Distance of the drinking water source (B4_q5)
File: Block-4-Household living facilities-records

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 153123
Invalid: 0

Literal question

Distance to the source of drinking water

Interviewer instructions

For the households with more than one sources of drinking water recorded in item 1, the information for this item will relate to the first source (most often used source). The distance to the first source of drinking water from the dwelling unit will be ascertained and recorded in codes.

Facility of bathroom (B4_q6)
File: Block-4-Household living facilities-records

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 153498
Invalid: 0

Literal question

Facility of bathroom:

Interviewer instructions

Information about the bathroom facility available to the members of the household will be indicated against this item in codes.

Distance from the bathing place (B4_q7)
File: Block-4-Household living facilities-records

Overview	

Type: Discrete
Format: character
Width: 1

Valid cases: 153443
Invalid: 0

Literal question

Distance from the bathing place

Interviewer instructions

The distance of the bathing place from the dwelling unit will be ascertained and entered against this item in codes. If the household members use more than one bathing place, the one used by majority of the members will be its bathing place. An enclosed area without a roof used for bathing purposes will also be considered as a bathing place, but not as a bathroom.

Use of latrine (B4_q8)
File: Block-4-Household living facilities-records

Overview	

Type: Discrete
Format: character
Width: 1

Valid cases: 153508
Invalid: 0

Literal question

Use of latrine:

Interviewer instructions

In this item information will be collected about whether the household's latrine facility is for its exclusive use or shared with one or more households in the building or for use of households in the locality or whether the household does not have access to latrine facility.

Type of latrine (B4_q9)
File: Block-4-Household living facilities-records

Overview	

Type: Discrete
Format: character
Width: 1

Valid cases: 88494
Invalid: 0

Pre question

Check code in Q.8. If it is 1 to 3, ask this question

Literal question

If code 1, 2 or 3 in item 8, type of latrine

Post question

Skip this question otherwise

Interviewer instructions

For the households who have access to latrine (i.e., if entry is 1, 2 or 3 in item 8), the type of latrine used by the household will be recorded in codes.A latrine connected to underground sewerage system is called flush system latrine. A latrine connected to underground septic chambers will be considered as a septic tank latrine. A latrine connected to a pit dug in earth is called a pit latrine. In a few areas, one may still come across latrines that are serviced by scavengers. These are called service latrines. Appropriate code of the type of latrine used by the household will be entered in item 9.

Electricity for domestic use (B4_q10)
File: Block-4-Household living facilities-records

Electricity for domestic use (B4_q10)
File: Block-4-Household living facilities-records

Overview	
Type: Discrete	Valid cases: 153518
Format: character	Invalid: 0
Width: 1	

Literal question

Whether the household has electricity for domestic use?

Interviewer instructions

If the household has electricity facilities for domestic use code 1 will be recorded, otherwise code will be 2. The use of the electricity may be for lighting or cooking or for both. Electricity may be used legally or illegally and the electricity may be supplied to the household either through public agencies, corporations or by private suppliers. However, if the household makes its own arrangement, either through generator or solar panel, to generate electricity, the household will not be considered as having electricity for domestic use.

Type of electric wiring (B4_q11)
File: Block-4-Household living facilities-records

Overview	
Type: Discrete	Valid cases: 117194
Format: character	Invalid: 0
Width: 1	

Pre question

If code = 1 in Q.10 ask this question

Literal question

If code 1 in item 10, type of electric wiring.

Post question

Skip otherwise

Interviewer instructions

If the sample household has electricity for domestic use, type of electric wiring available in the dwelling unit will be indicated here.

Plinth area(Sq. ft.) (B5_q1)
File: Block-5-Housing characteristics-environment-records

Overview

Type: Continuous	Valid cases: 153461
Format: numeric	Invalid: 0
Width: 6	Minimum: 1
Decimals: 0	Maximum: 400000
Range: 1-400000	Mean: 686.8
	Standard deviation: 1445.4

Literal question

Plinth area of the house (in square feet and in whole numbers)

Interviewer instructions

Plinth area is the total constructed area of the surface on the ground over which the structure is created. The plinth area will be recorded against this item in square feet and in whole numbers. In case more than one structure is used by the household, total plinth area of all the structures taken together will be recorded. In case of a multi-storeyed building, plinth area will refer to the surface on the ground over which the structure is created.

Plinth level (ft.) (B5_q2)
File: Block-5-Housing characteristics-environment-records

Overview

Type: Discrete	Valid cases: 152645
Format: numeric	Invalid: 816
Width: 1	
Decimals: 0	
Range: 0-7	

Literal question

Plinth level (in feet and in whole numbers)

Plinth level (ft.) (B5_q2)
File: Block-5-Housing characteristics-environment-records

Interviewer instructions

Plinth level means the constructed ground floor level from the land (at the main entrance of the building) on which the building is constructed. If the ground floor is at the same level as the land on which the house stands, it will be considered as having no plinth and '0' will invariably be recorded. It may be noted that plinth level of the building is to be recorded, even if the household is residing in a floor higher or lower than the ground floor. If the building consists of more than one structure, plinth level of the building will relate to the main (in the sense of having greater floor area) structure used for residential purpose. The plinth level will be recorded against this item in feet and in whole numbers.

Use of house (B5_q3)
File: Block-5-Housing characteristics-environment-records

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 153414
Invalid: 0

Interviewer instructions

The purpose for which the house is used will be entered against this item.If the house is used exclusively for residential purpose, code 1 will be applicable. If the house is used for residential purposes as well as for carrying out economic activities, like, production of goods, production of services or trading of goods, etc., code 2 will be entered. In all other cases, such as when the house is used for residential purpose and for some non-economic activities, code 9 will be applicable.

Period since built (B5_q4)
File: Block-5-Housing characteristics-environment-records

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 129089
Invalid: 0

Pre question

If code 1 or 2 in Q.3 of block-3, then ask this question

Literal question

If codes 1 or 2 in item 11 of block 3 (i.e., for the household with own dwelling), period since built:

Post question

Skip this question otherwise

Interviewer instructions

Information on the 'period since built' will be collected only from the sample households with own dwelling, i.e., if entry in item 11 of block 3 is either 1 or 2. Period since built will be counted from the time the dwelling unit was ready for possession for the first time after completion of the building and this information will be entered in terms of codes. Note that period since built is to be decided in respect of the ground floor of the building when the different stories were built at different times.

Year of start (B5_q5)
File: Block-5-Housing characteristics-environment-records

Decimals: 0
Range: 1985-2009

Valid cases: 12493
Invalid: 140968
Minimum: 1985
Maximum: 2009
Mean: 2005.7
Standard deviation: 1.5

Year of start (B5_q5)
File: Block-5-Housing characteristics-environment-records

Pre question

If code 1 or 2 in Q.4, then ask this question

Literal question

If code 1 or 2 in item 4, year of start of dwelling unit

Post question

Skip this question otherwise

Interviewer instructions

For dwelling units which were built during the last 5 years (i.e., for dwelling units with code 1 or 2 in item 4), information on 'year of start' and 'year of completion' will be collected, in items 5 and 6 respectively. Four cells have been provided against each of the items 5 and 6 for recording four digits of the 'year of start' and 'year of completion' respectively, with one digit in each cell. The 'year of start' will correspond to the period during which the plinth work of the building started and 'year of completion' will relate to the year during which the dwelling unit was ready for possession. For example, if the plinth work of the dwelling unit started in 2006 and the dwelling unit was ready for possession in 2007, the entry in respect of item 5 will be '2006' and in respect of item 6, the entry will be '2007

Year of completion (B5_q6)
File: Block-5-Housing characteristics-environment-records

Condition of structure (B5_q7)
File: Block-5-Housing characteristics-environment-records

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 153430
Invalid: 0

Literal question

Condition of structure

Interviewer instructions

Condition of structure (B5_q7)
File: Block-5-Housing characteristics-environment-records

Condition of structure refers to the physical condition of the structure of the house and will be recorded in appropriate code. The code, relevant for the structure, will be determined as follows:

(i) if the structure does not require any immediate repairs, major or minor, it will be regarded as in 'good' condition and code 1 will be assigned,

(ii) if the structure requires immediate minor repairs but not major repairs, it will be regarded as in 'satisfactory' condition and code 2 will be recorded for such a structure,

(iii) if the structure of the building requires immediate major repairs without which it may be unsafe for habitation or requires to be demolished and rebuilt, it will be regarded as in 'bad' condition and code 3 will be recorded for such building,

Drainage arrangement (B5_q8)
File: Block-5-Housing characteristics-environment-records

Overview	
Type: Discrete	Valid cases: 153449
Format: character	Invalid: 0
Width: 1	

Literal question

Drainage arrangement:

Interviewer instructions

A system for carrying off waste water and liquid waste of the house will be considered as drainage system. Information on the drainage system available to the house will be recorded against this item in codes.It may be noted that if no system exists to carry off the waste water of the house, but water flows down by its own gravity, in an unregulated manner, it will be considered as no drainage, and code 5 will be entered. In other cases, depending upon the drainage system available appropriate code will be given.

Garbage collection (B5_q9)
File: Block-5-Housing characteristics-environment-records

Overview	
Type: Discrete	Valid cases: 153423
Format: character	Invalid: 0
Width: 1	

Literal question

Garbage collection arrangement

Interviewer instructions

Garbage collection arrangement means the arrangement which usually exist to carry away the refuse and waste of households to some dumping place away from the residential areas. In some places, the public bodies collect the garbage from the premises of the household or from some fixed points in the locality where the residents put their garbage; in others, a body of residents themselves make the arrangement of carrying the garbage to the final dumping place away from residential areas without participation of any public body. In the first situation, code 1 will be recorded and code 2 in the second situation. Information on the arrangement prevailing for the colony / locality of the dwelling unit will be obtained and entered in codes.

Animal shed (B5_q10)
File: Block-5-Housing characteristics-environment-records

Overview	

Animal shed (B5_q10)
File: Block-5-Housing characteristics-environment-records

Type: Discrete
Format: character
Width: 1

Valid cases: 153442
Invalid: 0

Literal question

Animal shed

Interviewer instructions

Information as to whether there is any animal shed or not in the building or in its neighbourhood will be recorded against this item in codes.If there is no animal shed within 100 feet of the house (even on the adjacent plots) code 3 will be recorded. If there is an animal shed in the house or attached to the house code 1 will be recorded. If there is an animal shed within 100 feet of the house but not within / attached to it, code 2 will be recorded. The animals and / or the shed need not be owned or possessed by any household in the house. Animal shed for the purpose of this survey, is a structure where livestock (cattle, buffalo, horse, goat, pig, etc. but not poultry and pets) are sheltered.

Flood during last 5 years (B5_q11)
File: Block-5-Housing characteristics-environment-records

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 153408
Invalid: 0

Literal question

Whether experienced any flood during last 5 years?:

Interviewer instructions

If rain water during monsoon and / or water from sea, river, etc., enters into the ground floor of the house, or though water did not enter the house but the house was surrounded by water for some days then the house is said to have experienced flood.

Approach road (B5_q12)
File: Block-5-Housing characteristics-environment-records

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 153416
Invalid: 0

Literal question

Approach road / lane / constructed path

Interviewer instructions

Information as to whether the house has a direct opening to any road or not will be recorded against this item in codes. If from the plot of the house, one can approach a road / lane / constructed path without passing through another plot, the house is to be regarded as having a direct opening to a road. If, on the other hand, one has to pass through another plot to approach a road / lane / constructed path, the house is to be regarded as having no direct opening to a road. A road / lane / constructed path will be treated as having street lights if it has some lighting provision as on the date of survey.

Type of dwelling (B6_q1)
File: Block-6-Dwelling particulars-records

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 153244
Invalid: 0

Literal question

Type of dwelling

Interviewer instructions

The information on the type of the dwelling unit will be entered against this item in codes. The codes are: independent house-1, flat-.2, others-9.
Others" will include all other housing arrangements such as flat-like dwellings which are not self contained in respect of bath and toilet facilities. Huts/ tenements constructed of mud, bamboo, grass, leaves, reeds and other katcha materials, often found to be without self contained arrangement, will also be categorised as 'others'.

No. of living rooms (B6_q2)

Decimals: 0	Maximum: 8700
Range: 0-8700	Mean: 287.6
	Standard deviation: 216.4

Literal question

Floor area of the living room (in square feet and in whole numbers)

Interviewer instructions

Information for each of these q.4 to q.7 is to be recorded in square feet and in whole numbers. The information on inside floor area (carpet area), i.e., the inside area of the floor excluding the area covered by the walls, of all "living rooms" taken together is to be recorded against item 4 and that of "other rooms" will be recorded against q.5. If a room is used both for business and residential purposes and the residential use is not very nominal, the total area of the room will be included for recording the entry. On the other hand, if only a portion of a room is used for residential purposes, only the area of that portion will be included for making the entry. The same procedure will be adopted in case of room being shared with another household. The floor area of the "covered veranda" and that of "uncovered veranda" is to be recorded against q.6 and q.7, respectively.

Ventilation (B6_q9)
File: Block-6-Dwelling particulars-records

Overview

Type: Discrete	Valid cases: 153406
Format: character	Invalid: 0
Width: 1	

Literal question

Ventilation of the dwelling unit

Interviewer instructions

Ventilation (B6_q9)
File: Block-6-Dwelling particulars-records

Information as to whether, in general, ventilation of the dwelling unit is good, satisfactory or bad will be collected and entered against this item in terms of codes.
It is to be noted that ventilation of all the rooms in the dwelling unit is to be considered. By ventilation it is generally meant the extent to which the rooms are open to air and light. For eliciting this information, the investigator will have to depend mainly on the judgement of the informant. A few guidelines are suggested below which may be helpful for the investigator for assessing the situation.

(i) If the majority of the rooms have two or more windows with arrangement for cross ventilation, the dwelling unit may be considered as having 'good' ventilation and code 1 will be recorded.

(ii) If the majority of the rooms have two or more windows without having any arrangement for cross ventilation or if majority of the living rooms have only a single window each with proper arrangement for cross ventilation, the dwelling unit will be considered to have a 'satisfactory' ventilation arrangement and in such cases code 2 will be recorded.

(iii) If the majority of the rooms have no window or have only one window each without any arrangement for cross ventilation, the dwelling unit will be considered to have 'bad' ventilation and code 3 will be entered.

It may, however, be noted that, in some cases, the rooms of the dwelling unit may be such that it does not have proper ventilation, as per the criteria mentioned above, but the rooms have proper air-conditioning facility. Such cases will also be considered as 'good' ventilation and code 1 will be entered.

No. of married couples (B6_q10)
File: Block-6-Dwelling particulars-records

Overview	
Type: Discrete	Valid cases: 142286
Format: numeric	Invalid: 11175
Width: 2	
Decimals: 0	
Range: 0-10	

Literal question

Total number of married couples in the household:

Interviewer instructions

For the purpose of this survey, 'married couple' will mean the couples either formed through marriage or through the system of live-together as reported by the informant. Total number of married couples in the household irrespective of their ages is to be recorded in this item. When both the husband and the wife (i.e., the male and female partners) are the household members, they should be considered for counting the number of married couples. If one of them is a household member and the other is not a household member, it should not be counted as a married couple. A man with two wives in a household will constitute two married couples. But one woman with two husbands in a household will form a single couple. If there is no married couple in the household entry will be '0'.

Whether separate room available? (B6_q11)
File: Block-6-Dwelling particulars-records

Overview	
Type: Discrete	Valid cases: 153461
Format: character	Invalid: 0
Width: 1	

Literal question

Whether a separate room is available to each married couple?

Interviewer instructions

Information as to whether each married couple of the household has a separate room for their use or not is to be ascertained and recorded against this item in terms of codes. Even if children of age 10 years or below are also using the room along with the couple, it is to be considered as a case of having a separate room for the couple. A couple living in single room-cum-kitchen will be considered to have a separate room.

Couples without separate room (B6_q12)
File: Block-6-Dwelling particulars-records

Overview	

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 0-5

Valid cases: 35119
Invalid: 118342

Literal question

If code 2 in item 11, number of married couples not getting a separate room

Interviewer instructions

If code 2 in item 11, number of married couples not getting a separate room is to be recorded against this item. If entry is either 1 or 9 in item 11, a dash (-) may be entered in this item.

Kitchen type (B6_q13)
File: Block-6-Dwelling particulars-records

Overview	

Type: Discrete
Format: character
Width: 1

Valid cases: 153433
Invalid: 0

Interviewer instructions

Information about the kitchen facility in the dwelling unit will be recorded in codes. If the dwelling unit has a room used exclusively as a kitchen, it will be considered to have a separate kitchen. If such a kitchen has a water tap inside, code 1 will be recorded and code 2 will be recorded otherwise. If a room is used as kitchen-cum-store or kitchen-cum-dining room, then also the household will be considered to have a separate kitchen. In all other cases, code 3 will be recorded. If a room, with or without partition (which does not extend up to the ceiling), is shared as kitchen by two or more households, code 3 will be the appropriate entry against this item.

Floor type (B6_q14)
File: Block-6-Dwelling particulars-records

Overview	

Type: Discrete
Format: character
Width: 1

Valid cases: 153449
Invalid: 0

Literal question

Floor type

Interviewer instructions

Information on the basic building materials with which the floor, walls and roof of the dwelling unit are constructed will be collected and recorded in codes against Q.14, 15 and 16, respectively.
When the basic building materials used are different for different walls, the materials used for major portion of wall area of the dwelling will be the wall type. For determining the wall type, only the walls of the dwelling will be considered. Roof / floor type will also be determined on the basis of the material used for major portion of roof / floor area of the dwelling, if the different portions of the roof / floor are made of different building materials. For determining the material of the roof, the material of which the outer roof exposed to the weather (and not the ceiling) is made, i.e., tiles, thatch, corrugated iron, zinc or asbestos sheet, etc., will be considered. However, if the roof is mainly made of bricks, tiles, stone, etc., with the mud, cement or lime plaster exposed to the sky, the material of roof will not be mud, cement, lime, etc. but it will be brick, tile, stone, etc. which constituted the fabric of the roof.

Invalid: 133391
Minimum: 0
Maximum: 30000
Mean: 992.5
Standard deviation: 1266.5

Literal question

Monthly rent (Rs.) (payable approach)

Interviewer instructions

This item will be filled in for all dwellings with code 3, 4, or 5 against item 11 of block 3. For other households, a '-' mark may be put against this item. The actual amount (in whole number of Rupees) payable per month by the household will be recorded against this item. If the household has paid some amount initially which is adjusted in the monthly rent, the amount adjusted in each month shall also be included in the monthly rent. If the household is residing in employer's quarters, (i.e., for those with code 3 against item 11 of block 3), the amount deducted from the salary of the household member to whom the quarter is allotted along with the house rent allowance the person might have received if he/she had not been provided the accommodation, will be the rent of the dwelling unit. Rent does not include any salami/pugree or any kind of cess payable to local bodies or government or monthly maintenance charges payable to the co-operative society, etc

Srl. no. of construction (B7_q3)
File: Block-7-Constructions-records

Overview	
Type: Discrete	Valid cases: 15282
Format: character	Invalid: 0
Width: 2	

Literal question

Srl. no. of constructions

Interviewer instructions

Six serial numbers, to record details of six constructions in the two sheets of Block 7, are already printed. Each column relates to one construction and information in items 4 to 27 is to be collected separately for each construction. While recording the constructions, all the constructions undertaken 'at the present premises' will be listed first, followed by those undertaken at 'elsewhere'. If a sample household undertook more than six constructions, additional sheet (second sheet) of Block 7 may be attached and continuous serial number, starting from 7 may be given against item 3 (srl. no. of constructions).

No. of constructions undertaken (B7_q1)
File: Block-7-Constructions-records

Literal question

Number of constructions undertaken during last 365 days

Interviewer instructions

The number of constructions undertaken by the sample household for residential purposes during the last 365 days is to be entered against this item. This will include the constructions which started earlier, but the activity continued during the last 365 days, as well as the constructions initiated during the last 365 days (whether completed or not).

No. of constructions completed (B7_q2)
File: Block-7-Constructions-records

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 0-4

Valid cases: 15175
Invalid: 107

Literal question

Number of constructions completed during the last 365 days

Interviewer instructions

In column 3, the total number of constructions completed by the sample household during the last 365 days will be entered. A new construction will be considered as 'completed' if it is considered by its owner as completed and ready for its first occupation. Issuing of 'completion certificate' from any authority will not be a pre-requisite for the building to be considered as 'completed'. In the case of addition, alteration and improvement, a construction will be considered as 'completed' if the owner feels so.

Place of constructions (B7_q4)
File: Block-7-Constructions-records

Overview

Literal question

No. of dwelling units

Post question

Skip this otherwise

Interviewer instructions

The number of dwelling units in the new building or the number of dwelling units in which additional floor space has been constructed will be recorded against this item in the relevant column(s). Sometimes, it may be difficult to arrive at the number of dwelling units, especially in the case of new buildings which are not yet occupied by the households. In such situations, the number of dwelling units for which provision has been made in the building, as adjudged and reported by the informant, will be recorded in this item.

total cost of construction (Rs.) (B7_q10)

Standard deviation: 121155.9

Literal question

Total cost of construction (Rs.)

Interviewer instructions

total cost of construction (Rs.) (B7_q10)
File: Block-7-Constructions-records

Costs incurred up to the date of survey (amount paid and payable) for each of the constructions undertaken will be recorded separately in whole number of rupees against this item. For the constructions that have been completed during the last 365 days, the total cost for each such construction will be considered. For the constructions that are in progress, the total cost of the constructions up to the date of survey will be entered in the relevant columns.
While making the entries in this item, the following may be kept in mind:

·The cost of purchase or procurement of only that part of the total materials, labour and services hired (i.e., expenditure incurred including payment due on account of professional and personal services, municipal and other taxes and fees, etc. for construction) which have actually been utilised in the construction will be considered for making entries.
·Household labour will be evaluated at the wage rate prevailing at the time of construction.
·Materials supplied from home will be evaluated at the ex-farm/ex-factory price prevailing at the time of its use.
·For materials obtained as free collection and used in the construction, only transport charges and the related hired and household labour will be evaluated and recorded.
·Materials received as gifts or in the form of subsidies will be evaluated at the local retail price.
·The total cost will also include the cost of site preparation, such as demolition of the existing structure, development of land, etc.
·The value of land on which the construction is made will not be included in the cost.
·The expenditure incurred on routine repairs and maintenance of the structure such as white washing, painting, etc. will not be included in the cost.

Finance own labour/ material (Rs.) (B7_q11)
File: Block-7-Constructions-records

Overview	
Type: Discrete	Valid cases: 9401
Format: character	Invalid: 0
Width: 7	

Literal question

Amount (Rs.) financed for construction from source:labour/ material

Interviewer instructions

Total cost of construction recorded in item 10 may be financed by the households from different sources. In items 11 to 21, provisions have been made to record, for each of the constructions, amount financed from different sources for the total cost of construction. Amount financed, for the total cost of construction, will include both cash and kind, as well as household labour and/or material, and gifts received in kind. Household labour and materials supplied from home or gifts received in kind from others and used for construction will be evaluated in the same manner as described in para. 4.7.8. Material received from the institutional agencies in the form of subsidy and used in the construction work, will also be considered and the entries will be made against the respective institutional agencies, from which such materials have been received. Eleven different sources are listed and the amount financed from each of the sources for the construction will be recorded against the different sources in whole number of rupees. Note that total cost of construction recorded against item 10 will match with that recorded against item 22 for each construction.
More details may be seen in instruction manual

Range: 0-2225000	Mean: 37751.2
	Standard deviation: 96931.5

Literal question

Cost of construction during last 365 days (Rs):-material- pucca

Interviewer instructions

It may be noted that the cost of purchase or procurement of only that part of the total materials, labour (household labour will be evaluated at the wage rate prevailing at the time of construction) and services hired (i.e., expenditure incurred including payment due on account of professional and personal services, municipal and other taxes and fees, etc. for construction) which have actually been utilised in the construction during the last 365 days will be considered for making entries in these items. As such there must be positive entry in at least one of the items 23 to 26 for each of the constructions undertaken during the last 365 days. The total of the expenditure, recorded in items 23 to 26 will be recorded against item 27. Household labour and material supplied from own source and materials received as gifts will also be included in the respective items. Expenditure relating to the material and labour purchased, hired or procured but not used in the construction during the last 365 days will not be taken into account for filling in this item. It may be noted that, service charges, i.e., expenditure incurred (including payments due) on account of professional and personal services, municipal and other taxes and fees if any for construction, rental and hire charges of equipment used for construction will be included with 'others'.

No. of residential units acquired (B7_q28)
File: Block-7-Constructions-records

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 0-2

Valid cases: 5182
Invalid: 10100

Literal question

Number of residential unit acquired during last 365 days

Interviewer instructions

In this item, the total number of residential unit (s), the sample household has acquired during the last 365 days will be entered. If the household has not acquired any residential unit during the last 365 days, zero (0) may be entered in this item.

Total floor area (Sq. ft.) (B7_q29)
File: Block-7-Constructions-records

Overview

Type: Continuous
Format: numeric
Width: 4
Decimals: 0
Range: 0-2257

Valid cases: 99
Invalid: 15183
Minimum: 0
Maximum: 2257
Mean: 594.6
Standard deviation: 471.7

Total floor area (Sq. ft.) (B7_q29)
File: Block-7-Constructions-records

Literal question

If entry > 0 in item 28, total floor area (in square feet and in whole numbers)

Interviewer instructions

In this item, total floor area of all the residential units acquired during the last 365 days will be entered in square feet. If entry in item 28 is 0, a dash (-) may be put in this item.

Total expenditure incurred (Rs.) (B7_q30)
File: Block-7-Constructions-records

Overview

Type: Continuous	Valid cases: 101
Format: numeric	Invalid: 15181
Width: 7	Minimum: 0
Decimals: 0	Maximum: 2575000
Range: 0-2575000	Mean: 483540.4
	Standard deviation: 620916.5

Literal question

Total expenditure incurred for residential unit acquired during last 365 days (Rs.)

Interviewer instructions

If the sample household did not carry out the construction itself but acquired the residential units during the last 365 days, total expenditure for that residential unit will be considered here. It may be noted that only the first-hand purchase of the residential units are to be considered. If the cost of the land is paid separately, then the amount paid for the land will not be considered for recording the total expenditure. But if it cannot be separated, the total would include the cost of the land. It may be noted that, if some amount is due to be paid but the residential unit has been acquired during the last 365 days, the amount paid and the amount payable will be added up and entered in this item. If the sample household acquired residential units by ways other than purchase during the reference period, say acquired free from non-household entities, the market value of the residential unit will be considered for making entry in item 30.
