Overview

ABSTRACT

The 66th round (July 2009-June 2010) of NSS is earmarked for survey on 'Household Consumer Expenditure' and 'Employment and Unemployment'. The survey on 'household consumer expenditure' is the eighth quinquennial survey in the series, the last one being conducted in the 61st round (2004-2005) of NSS.

The period of survey was one year from 1st July 2009 to 30th June 2010. The survey period of this round divided into four sub-rounds of three months' duration each as follows:

sub-round 1 : July - September 2009

sub-round 2 : October - December 2009

sub-round 3 : January - March 2010

sub-round 4 : April - June 2010

In each of these four sub-rounds equal number of sample villages/ blocks (FSUs) allotted for survey with a view to ensuring uniform spread of sample FSUs over the entire survey period.

Household Consumer Expenditure

The programme of quinquennial surveys on consumer expenditure and employment & unemployment has been adopted by the National Sample Survey Office (NSSO) since 1972-73. Under the programme, the survey on consumer expenditure provides a time series of household consumer expenditure data, which is the prime source of statistical indicators of level of living, social consumption and well-being, and the inequalities thereof. Apart from the quinquennial series (QS), there also exists an "annual series", comprising consumer expenditure surveys conducted in the intervening periods between QS rounds - starting from the 42nd round (July 1986 - June 1987) and using a smaller sample.

Household consumer expenditure (HCE) during a specified period, called the reference period, may be defined as the total of the following:

- (a) expenditure incurred by households on consumption goods and services during the reference period
- (b) imputed value of goods and services produced as outputs of household (proprietary or partnership) enterprises owned by households and used by their members themselves during the reference period
- (c) imputed value of goods and services received by households as remuneration in kind during the reference period
- (d) imputed value of goods and services received by households through social transfers in kind received from government units or non-profit institutions serving households (NPISHs) and used by households during the reference period.

Reference period and schedule type: The reference period is the period of time to which the information collected relates. In NSS surveys, the reference period often varies from item to item. Data collected with different reference periods are known to exhibit certain systematic differences. In this round, two schedule types have been drawn up to study these differences in detail. Sample households will be divided into two sets - Schedule Type 1 will be canvassed in one set and Schedule Type 2 in the other. The reference periods to be used for different groups of consumption items are given below, separately for each schedule type.

KIND OF DATA

Sample survey data [ssd]

UNITS OF ANALYSIS

Households and Persons

KEYWORDS

Consumer Expenditure, Schedule 1.0, NSSO Round 66

Coverage

GEOGRAPHIC COVERAGE

The survey covered the whole of the Indian Union except (i) interior villages of Nagaland situated beyond five kilometres of the bus route and (ii) villages in Andaman and Nicobar Islands which remain inaccessible throughout the year.

For Leh (Ladakh) and Kargil districts of Jammu & Kashmir there will be no separate sample first-stage units (FSUs) for 'central sample'. For these two districts, sample FSUs drawn as 'state sample' also treated as central sample.

Sampling

Sampling Procedure

Sample design

Outline of sample design: A stratified multi-stage design was adopted for the 66th round survey. The first stage units (FSUs) were the 2001 Census villages (Panchayat wards in case of Kerala) in the rural sector and Urban Frame Survey (UFS) blocks in the urban sector. In addition, two non-UFS towns of Leh and Kargil of Jammu & Kashmir were also treated as FSUs in the urban sector. The ultimate stage units (USU) were households in both the sectors. In case of large FSUs, one intermediate stage of sampling was the selection of two hamlet-groups (hgs)/subblocks (sbs) from each rural/urban FSU.

Sampling frame for first stage units:

For the rural sector, the list of 2001 Census villages (henceforth the term 'village' will mean Panchayat wards for Kerala) constituted the sampling frame. For the urban sector, the list of latest available UFS blocks was considered as the sampling frame. For non-UFS towns, the frame consisted of the individual towns (only two towns, viz., Leh & Kargil constituted this frame).

Stratification:

Within each district of a State/UT, generally speaking, two basic strata were formed: i) rural stratum comprising all rural areas of the district and (ii) urban stratum comprising all urban areas of the district. However, within the urban areas of a district, wherever there were one or more towns with population 10 lakhs or more as per Census 2001 in a district, each of these formed a separate basic stratum and the remaining urban areas of the district were considered as another basic stratum. Sub-stratification: Each rural stratum was divided into 2 sub-strata as follows: sub-stratum 1: all villages with proportion of child workers (p) $> 2P$ (where P is the average proportion of child workers for the State/UT as per Census 2001) sub-stratum 2: remaining villages

Total sample size (FSUs):

At all-India level, 12784 FSUs were allocated to the Central sample and 15132 FSUs to the State sample. Further, the data of 24 State sample FSUs of Leh and Kargil districts of J&K surveyed by DES, J&K, were included in the Central sample.

Allocation of total sample to States and UTs:

The total number of sample FSUs was allocated to the States and UTs in proportion to population as per Census 2001 subject to a minimum sample allocation to each State/UT, and subject to resource availability in terms of field investigators.

Allocation of State/UT level sample to rural and urban sectors:

State/UT level sample size was allocated between the two sectors in proportion to population as per Census 2001 with double weightage to urban sector, subject to the restriction that the urban sample size for bigger States like Maharashtra, Tamil Nadu, etc. should not exceed the rural sample size. A minimum of 16 FSUs (to the extent possible) was allocated to each State/UT separately for rural and urban areas. Further, the State-level allocations for both rural and urban sectors were adjusted marginally in a few cases to ensure that each stratum/sub-stratum got a minimum allocation of 4 FSUs.

Allocation to strata/sub-strata:

Within each sector of a State/UT, the sample size was allocated to different strata/sub-strata in proportion to population as per Census 2001. Allocations at stratum/sub-stratum level were adjusted to multiples of 4 with a minimum sample size of 4 and equal-sized samples were allocated to the four sub-rounds.

Selection of FSUs:

For the rural sector, from each stratum/sub-stratum, the required numbers of sample villages were selected by probability proportional to size with replacement (PPSWR), size being the population of the village as per Census 2001. For the urban sector, FSUs were selected from each stratum using Simple Random Sampling Without Replacement (SRSWOR). Both rural and urban samples were drawn in the form of two independent sub-samples.

Formation and selection of hamlet-groups/sub-blocks:

Selected FSUs with approximate population 1200 or more were divided into a suitable number of geographically compact 'hamlet-groups' (having more or less equal population) in the rural sector and 'sub-blocks' in the urban sector .

Selection of hamlet-groups/sub-blocks:

Hamlet-groups (hg)/sub-blocks (sb) were selected from FSUs where hamlet-groups/sub-blocks were formed, two in the

following manner. The hg/sb with maximum percentage share of population was always selected and termed hg/sb 1; one more hg/sb was selected from the remaining hg's/sb's by simple random sampling (SRS) and termed hg/sb 2. Listing and selection of the households was done independently in the two selected hamlet-groups/sub-blocks.

Questionnaires

Overview

Household consumer expenditure is measured as the expenditure incurred by a household on domestic account during a specified period, called reference period. It includes the imputed values of goods and services, which are not purchased but procured otherwise for consumption. In other words, it is the sum total of monetary values of all the items (i.e. goods and services) consumed by the household on domestic account during the reference period. The imputed rent of owner-occupied houses is excluded from consumption expenditure. Any expenditure incurred towards the productive enterprises of the households is also excluded from household consumer expenditure.

To make the definition of household consumption operational, clear guidelines are needed not only on what is included in household consumer expenditure and what is excluded, but also on

(a) the identification of the household performing each act of consumption

(b) the assigning of a time to of each act of consumption.

Only then can one attempt to record the consumption of a household H within a reference period P.

It has been found convenient to assign different meanings of the word "consumption" (and hence different approaches to its measurement) for different categories of consumption items.

Household Identification (HH_ID)

File: Identification of Sample Household

Overview

Type: Discrete	Valid cases: 100794
Format: character	Invalid: 0
Width: 9	

Description

Unique identification of each surveyed household is provided by combination of :

FSU Serial Number = (5)
 Hamlet-Group /Sub-Block Number = (1)
 Second Stage Stratum Number = (1)
 Household Serial Number = (2)

Centre Code (centre_code)

File: Identification of Sample Household

Overview

Type: Discrete	Valid cases: 100794
Format: character	Invalid: 0
Width: 3	

first stage unit (FSU) (FSU_Serial_number)

File: Identification of Sample Household

Overview

Type: Discrete	Valid cases: 100794
Format: character	Invalid: 0
Width: 5	

Description

The first stage units (FSU) are the 2001 census villages (Panchayat wards in case of Kerala) in the rural sector and Urban Frame vey (UFS) blocks in the urban sector. The FSU number gives the village/block selected for the survey

Round (Round)

File: Identification of Sample Household

Overview

Type: Discrete	Valid cases: 100794
Format: character	Invalid: 0
Width: 2	

Description

The period of survey is of one year duration starting on 1st July 2009 and ending on 30th June 2010. It is called 66th round

Schedule Number (Schedule_Number)

File: Identification of Sample Household

Overview

Width: 4	

Stratum (Stratum)

File: Identification of Sample Household

Overview

Type: Discrete

Format: character

Width: 2

Valid cases: 100794

Invalid: 0

Description

Within each district of a State/ UT, generally speaking, two basic strata is formed: i) rural stratum comprising of all rural areas of the district and (ii) urban stratum comprising of all the urban areas of the district. However, within the urban areas of a district, if there are one or more towns with population 10 lakhs or more as per population census 2001 in a district, each of them is form a separate basic stratum and the remaining urban areas of the district considered as another basic stratum.

Sub-Stratum (Sub_Stratum)

File: Identification of Sample Household

Overview

Type: Discrete

Format: character

Width: 1

Valid cases: 59097

Invalid: 0

Description

Rural sector: If 'r' be the sample size allocated for a rural stratum, the number of sub-strata formed are 'r/4'. The villages within a district as per frame are first arranged in ascending order of population. Then sub-strata 1 to 'r/4' demarcated in such a way that each sub-stratum is comprise a group of villages of the arranged frame and have more or less equal population.

Urban sector: If 'u' be the sample size for a urban stratum, 'u/4' number of sub-strata are formed. The towns within a district, except those with population 10 lakhs or more and also the non-UFS towns, are first arranged in ascending order of population. Next, UFS blocks of each townis arranged by IV unit no. × block no. in ascending order. From this arranged frame of UFS blocks of all the towns, 'u/4' number of sub-strata are formed in such a way that each sub-stratum have more or less equal number of FSUs.

For towns with population 10 lakhs or more, the urban blocks will be first arranged by IV unit no. × block no. in ascending order. Then 'u/4' number of sub-strata are formed in such a way that each sub-stratum I have more or less equal number of blocks.

All non-UFS towns taken together within the district I form one sub-stratum.

Hamlet (hg_sb_Number)

File: Identification of Sample Household

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 100794
Invalid: 0

Description

Hamlet (hg_sb_Number)

File: Identification of Sample Household

Large FSUs having approximate present population of 1200 or more is divided into a suitable number (say, D) of 'hamlet-groups' in the rural sector and 'sub-blocks' in the urban sector as stated below.

approximate present population of the sample village/block no. of hgs/sbs to be formed (D)

less than 1200 (no hamlet-groups/sub-blocks) 1
 1200 to 1799 3
 1800 to 2399 4
 2400 to 2999 5
 3000 to 3599 6
and so on

For rural areas of Himachal Pradesh, Sikkim, Uttarakhand (except four districts Dehradun (P), Nainital (P), Hardwar and Udham Singh Nagar), Poonch, Rajouri, Udhampur, Doda, Leh (Ladakh), Kargil districts of Jammu and Kashmir and Idukki district of Kerala, the number of hamlet-groups will be formed as follows:

approximate present population of the sample village no. of hgs to be formed

less than 600 (no hamlet-groups) 1
 600 to 899 3
 900 to 1199 4
 1200 to 1499 5
and so on

Second Stage Stratum (Second_Stage_Stratum)

File: Identification of Sample Household

Overview

Type: Discrete	Valid cases: 100794
Format: character	Invalid: 0
Width: 1	

Description

The listed households has been stratified into two SSS as under:

SSS composition of SSS within a sample FSU Number of Household to be surveyed

FSU without hg/sb formation | FSU with hg/sb
 formation (for each
 |hs/sb)

SSS 1: relatively affluent households 2 1

SSS 2: of the remaining, households having principal earning
 from non- agricultural activity 4 2

SSS 3: other households 2 1

Urban

SSS 1: households having MPCE of top 10% of
 urban population (MPCE > B) 2 1

SSS 2: households having MPCE of middle 60%
 of urban population (A = MPCE = B) 4 2

SSS 3: households having MPCE of bottom 30% of
 urban population (MPCE < A) 2 1

Household Serial Number (HHS_no)

File: Identification of Sample Household

Overview

Type: Discrete	Valid cases: 100794
Format: character	Invalid: 0
Width: 2	

Description

The sample household number (i.e., order of selection) of the selected household

Description

The period of survey is of one year duration starting on 1st July 2007 and ending on 30th June 2008. The survey period of this round are divided into four sub-rounds of three months' duration each as follows:

- 1 sub-round 1 : July - September 2009
- 2 sub-round 2 : October - December 2009
- 3 sub-round 3 : January - March 2010
- 4 sub-round 4 : April - June 2010

Sub-Sample (Sub_Sample)

File: Household Characteristics

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 100794
Invalid: 0

Description

The sample is drawn in the form of two independent Sub-sample , which can provide an independent estimate

- 1 Sub-Sample 1
- 2 Sub-Sample 2

Hamlet (hg_sb_Number)

File: Household Characteristics

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 100794
Invalid: 0

Description

Hamlet (hg_sb_Number) File: Household Characteristics

Large FSUs having approximate present population of 1200 or more is divided into a suitable number (say, D) of 'hamlet-groups' in the rural sector and 'sub-blocks' in the urban sector as stated below.

approximate present population of the sample village/block no. of hgs/sbs to be formed (D)

less than 1200 (no hamlet-groups/sub-blocks) 1
1200 to 1799 3
1800 to 2399 4
2400 to 2999 5
3000 to 3599 6
.....and so on

For rural areas of Himachal Pradesh, Sikkim, Uttarakhand (except four districts Dehradun (P), Nainital (P), Hardwar and Udham Singh Nagar), Poonch, Rajouri, Udhampur, Doda, Leh (Ladakh), Kargil districts of Jammu and Kashmir and Idukki district of Kerala, the number of hamlet-groups will be formed as follows:

approximate present population of the sample village no. of hgs to be formed

less than 600 (no hamlet-groups) 1
600 to 899 3
900 to 1199 4
1200 to 1499 5
.....and so on

Second Stage Stratum (Second_Stage_Stratum) File: Household Characteristics

Overview

Type: Discrete	Valid cases: 100794
Format: character	Invalid: 0
Width: 1	

Description

The listed households has been stratified into two SSS as under:

SSS composition of SSS within a sample FSU Number of Household to be sueveyed

FSU without hg/sb formation | FSU with hg/sb
|formation (for each
hs/sb)

Rural

SSS 1: relatively affluent households 2 1

SSS 2: of the remaining, households having principal earning
from non- agricultural activity 4 2

SSS 3: other households 2 1

Urban

SSS 1: households having MPCE of top 10% of
urban population (MPCE > B) 2 1

SSS 2: households having MPCE of middle 60%
of urban population (A = MPCE = B) 4 2

SSS 3: households having MPCE of bottom 30% of
urban population (MPCE < A) 2 1

Household Serial Number (HHS_no)

File: Household Characteristics

Overview

Type: Discrete	Valid cases: 100794
Format: character	Invalid: 0
Width: 2	

Description

The sample household number (i.e., order of selection) of the selected household

Level (Level)

File: Household Characteristics

Overview

Type: Discrete	Valid cases: 100794
Format: character	Invalid: 0
Width: 2	

Filler (Filler)

Format: numeric	Invalid: 0
Width: 2	Minimum: 1
Decimals: 0	Maximum: 35
Range: 1-35	Mean: 4.6
	Standard deviation: 2.3

Description

The size of the sample household i.e., the total number of persons normally residing together (i.e., under the same roof) and taking food from the same kitchen (including temporary stay-aways and excluding temporary visitors).

NIC-2004 (NIC_2004)

File: Household Characteristics

Overview

Type: Discrete	Valid cases: 93525
Format: character	Invalid: 0
Width: 5	

Description

principal industry (NIC-2004): The principal household industry (five digit) gives a clearer idea of the industrial activity which determines the principal industry of the household.

NCO-2004 (NCO_2004)

File: Household Characteristics

Overview

Type: Discrete	Valid cases: 93492
Format: character	Invalid: 0
Width: 3	

Description

principal occupation (NCO-2004): The principal household occupation (three digit) gives a clearer idea of the occupation of the household.

Household Type (HH_Type)

File: Household Characteristics

Overview

Type: Discrete	Valid cases: 100794
Format: character	Invalid: 0
Width: 2	

Description

The household type code based on the means of livelihood of a household decided on the basis of the sources of the household's income during the 365 days preceding the date of survey. For this purpose, only the household's income (net income and not gross income) from economic activities are considered; but the incomes of servants and paying guests are not be taken into account.

Religion (Religion)

Stratum (Stratum)

File: Demographic and other particulars of household members

Overview

Type: Discrete
Format: character
Width: 2

Valid cases: 468205
Invalid: 0

Description

Within each district of a State/ UT, generally speaking, two basic strata is formed: i) rural stratum comprising of all rural areas of the district and (ii) urban stratum comprising of all the urban areas of the district. However, within the urban areas of a district, if there are one or more towns with population 10 lakhs or more as per population census 2001 in a district, each of them is form a separate basic stratum and the remaining urban areas of the district considered as another basic stratum.

Sub-Stratum (Sub_Stratum)

File: Demographic and other particulars of household members

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 286690
Invalid: 0

Description

Rural sector: If 'r' be the sample size allocated for a rural stratum, the number of sub-strata formed are 'r/4'. The villages within a district as per frame are first arranged in ascending order of population. Then sub-strata 1 to 'r/4' demarcated in such a way that each sub-stratum is comprise a group of villages of the arranged frame and have more or less equal population.

Urban sector: If 'u' be the sample size for a urban stratum, 'u/4' number of sub-strata are formed. The towns within a district, except those with population 10 lakhs or more and also the non-UFS towns, are first arranged in ascending order of population. Next, UFS blocks of each townis arranged by IV unit no. × block no. in ascending order. From this arranged frame of UFS blocks of all the towns, 'u/4' number of sub-strata are formed in such a way that each sub-stratum have more or less equal number of FSUs.

Hamlet (hg_sb_Number)

File: Demographic and other particulars of household members

Overview

Type: Discrete	Valid cases: 468205
Format: character	Invalid: 0
Width: 1	

Description

Hamlet (hg_sb_Number)

File: Demographic and other particulars of household members

Large FSUs having approximate present population of 1200 or more is divided into a suitable number (say, D) of 'hamlet-groups' in the rural sector and 'sub-blocks' in the urban sector as stated below.

approximate present population of the sample village/block no. of hgs/sbs to be formed (D)

less than 1200 (no hamlet-groups/sub-blocks) 1
 1200 to 1799 3
 1800 to 2399 4
 2400 to 2999 5
 3000 to 3599 6
and so on

For rural areas of Himachal Pradesh, Sikkim, Uttarakhand (except four districts Dehradun (P), Nainital (P), Hardwar and Udham Singh Nagar), Poonch, Rajouri, Udhampur, Doda, Leh (Ladakh), Kargil districts of Jammu and Kashmir and Idukki district of Kerala, the number of hamlet-groups will be formed as follows:

approximate present population of the sample village no. of hgs to be formed

less than 600 (no hamlet-groups) 1
 600 to 899 3
 900 to 1199 4
 1200 to 1499 5
and so on

Second Stage Stratum (Second_Stage_Stratum)

File: Demographic and other particulars of household members

Overview

Type: Discrete	Valid cases: 468205
Format: character	Invalid: 0
Width: 1	

Description

The listed households has been stratified into two SSS as under:

SSS composition of SSS within a sample FSU Number of Household to be surveyed

 FSU without hg/sb formation | FSU with hg/sb
 formation (for each
hs/sb)

Rural

SSS 1: relatively affluent households 2 1

SSS 2: of the remaining, households having principal earning
 from non- agricultural activity 4 2

SSS 3: other households 2 1

Urban

SSS 1: households having MPCE of top 10% of
 urban population (MPCE > B) 2 1

SSS 2: households having MPCE of middle 60%
 of urban population (A = MPCE = B) 4 2

SSS 3: households having MPCE of bottom 30% of
 urban population (MPCE < A) 2 1

Household Serial Number (HHS_no)

File: Demographic and other particulars of household members

Overview

Type: Discrete	Valid cases: 468205
Format: character	Invalid: 0
Width: 2	

Description

The sample household number (i.e., order of selection) of the selected household

Level (Level)

File: Demographic and other particulars of household members

Overview

Person Serial Number (Person_Serial_no)

File: Demographic and other particulars of household members

Overview

Type: Discrete	Valid cases: 468205
Format: character	Invalid: 0
Width: 2	

Description

It is the serial number of each member/person of the household

Relation to head (Relation)

File: Demographic and other particulars of household members

Overview

Type: Discrete	Valid cases: 468205
Format: character	Invalid: 0
Width: 1	

Description

relation to head (code):It is the relationship of each member of the household to the head of the household (for the head, the relationship is 'self').

Sex (Sex)

File: Demographic and other particulars of household members

Sex (Sex)

File: Demographic and other particulars of household members

Overview

Type: Discrete	Valid cases: 468205
Format: character	Invalid: 0
Width: 1	

Description

sex (male-1, female-2): The sex of each member of the household .

Age (Age)

File: Demographic and other particulars of household members

Overview

Type: Continuous	Valid cases: 468205
Format: numeric	Invalid: 0
Width: 3	Minimum: 0
Decimals: 0	Maximum: 115
Range: 0-115	Mean: 28.2
	Standard deviation: 19

Description

age (years): The age in completed years of all the members listed will be ascertained and recorded in this column. For infants below one year of age, '0' will be entered. Ages above 99 will be recorded in three digits.

Marital Status (Marital_Status)

File: Demographic and other particulars of household members

Overview

Type: Discrete	Valid cases: 468205
Format: character	Invalid: 0
Width: 1	

Description

marital status (code): The marital status of each member of the household.

General Education level (Education)

File: Demographic and other particulars of household members

Overview

Type: Discrete	Valid cases: 468205
Format: character	Invalid: 0
Width: 2	

Description

general educational level (code): It is the level of general education attained by the members of the household.

Day Stayed away (Days_stayed_away)

File: Demographic and other particulars of household members

Overview

Type: Discrete	Valid cases: 179211
Format: character	Invalid: 0
Width: 2	

Day Stayed away (Days_stayed_away)

File: Demographic and other particulars of household members

Description

number of days stayed away from home during last 30 days: The number of days for which the member 'stayed away from home' during the 30 days preceding the date of enquiry . A continuous absence from home for 24 hours will be recorded as a 'day stayed away'.

No. of Meals per day (Meal_per_day)

File: Demographic and other particulars of household members

Overview

Type: Discrete

Format: character

Width: 1

Valid cases: 468157

Invalid: 0

Description

number of meals usually taken in a day: The number of meals consumed by a person is usually reported as 2 or 3. One may also come across a person who takes food more than three times a day.

Meal at school (Meals_school)

File: Demographic and other particulars of household members

Overview

Type: Discrete

Format: character

Width: 2

Valid cases: 137816

Invalid: 0

Description

There are schools/balwadis, etc. which provide standard food to all or some students as midday meal, tiffin, etc. free or at subsidised rate. Such meals are to be considered as meals taken away from home. If such food is received free are called meal at school.

Meal by Employer (Meals_employer)

File: Demographic and other particulars of household members

Overview

Type: Discrete

Format: character

Width: 2

Valid cases: 116912

Invalid: 0

Description

Sometimes meals are provided by the employer. These may be as perquisites or as part of wages in kind. These meals are generally consumed at the place of work and are to be considered as meals taken away from home. It may not be rare that meals provided by the employer are brought home by the employees and consumed there. Such meals are also to be considered as meals taken away from home.

Meals others (Meals_Others)

File: Demographic and other particulars of household members

Overview

Type: Discrete

Format: character

Width: 2

Valid cases: 145179

Invalid: 0

Description

Meals others (Meals_Others)

File: Demographic and other particulars of household members

There are institutions which provide canteen facilities to their students. Students can purchase food of their choice and to their requirements from those canteens on payment.

Meals on Payment (Meals_Payment)

File: Demographic and other particulars of household members

Overview

Type: Discrete
Format: character
Width: 2

Valid cases: 127111
Invalid: 0

Description

meals received on payment' will mean that the informant has to incur some expense or part with a certain portion of his salary/wage for getting the meals. Meals purchased from hotel, restaurant or an eating-house will be considered as 'meals taken away from home on payment'

Meals at Home (Meals_Home)

File: Demographic and other particulars of household members

Overview

Width: 2

Valid cases: 4813463
Invalid: 0

Description

Stratum (Stratum)

File: Consumption of cereals, pulses, milk and milk products, edible oil, egg, fish and meat, vegetables, fruits, spices, beverages and processed food and pan, tobacco, intoxicants, fuel and light during last 30 or 7 days

Within each district of a State/ UT, generally speaking, two basic strata is formed: i) rural stratum comprising of all rural areas of the district and (ii) urban stratum comprising of all the urban areas of the district. However, within the urban areas of a district, if there are one or more towns with population 10 lakhs or more as per population census 2001 in a district, each of them is form a separate basic stratum and the remaining urban areas of the district considered as another basic stratum.

Sub-Stratum (Sub_Stratum)

File: Consumption of cereals, pulses, milk and milk products, edible oil, egg, fish and meat, vegetables, fruits, spices, beverages and processed food and pan, tobacco, intoxicants, fuel and light during last 30 or 7 days

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 2797924
Invalid: 0

Description

Rural sector: If 'r' be the sample size allocated for a rural stratum, the number of sub-strata formed are 'r/4'. The villages within a district as per frame are first arranged in ascending order of population. Then sub-strata 1 to 'r/4' demarcated in such a way that each sub-stratum is comprise a group of villages of the arranged frame and have more or less equal population.

Urban sector: If 'u' be the sample size for a urban stratum, 'u/4' number of sub-strata are formed. The towns within a district, except those with population 10 lakhs or more and also the non-UFS towns, are first arranged in ascending order of population. Next, UFS blocks of each townis arranged by IV unit no. × block no. in ascending order. From this arranged frame of UFS blocks of all the towns, 'u/4' number of sub-strata are formed in such a way that each sub-stratum have more or less equal number of FSUs.

For towns with population 10 lakhs or more, the urban blocks will be first arranged by IV unit no. × block no. in ascending order. Then 'u/4' number of sub-strata are formed in such a way that each sub-stratum I have more or less equal number of blocks.

All non-UFS towns taken together within the district I form one sub-stratum.

Schedule Type (Schedule_type)

File: Consumption of cereals, pulses, milk and milk products, edible oil, egg, fish and meat, vegetables, fruits, spices, beverages and processed food and pan, tobacco, intoxicants, fuel and light during last 30 or 7 days

Overview

Sub-Round (Sub_Round)

File: Consumption of cereals, pulses, milk and milk products,edible oil, egg, fish and meat, vegetables, fruits, spices, beverages and processed food and pan, tobacco, intoxicants,fuel and light during last 30 or 7 days

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 4813463
Invalid: 0

Description

The period of survey is of one year duration starting on 1st July 2007 and ending on 30th June 2008. The survey period of this round are divided into four sub-rounds of three months' duration each as follows:

- 1 sub-round 1 : July - September 2009
- 2 sub-round 2 : October - December 2009
- 3 sub-round 3 : January - March 2010
- 4 sub-round 4 : April - June 2010

Sub-Sample (Sub_Sample)

File: Consumption of cereals, pulses, milk and milk products,edible oil, egg, fish and meat, vegetables, fruits, spices, beverages and processed food and pan, tobacco, intoxicants,fuel and light during last 30 or 7 days

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 4813463
Invalid: 0

Description

The sample is drawn in the form of two independent Sub-sample , which can provide an independent estimate

FOD Sub-Region (FOD_Sub_Region)

File: Consumption of cereals, pulses, milk and milk products,edible oil, egg, fish and meat, vegetables, fruits, spices, beverages and processed food and pan, tobacco, intoxicants,fuel and light during last 30 or 7 days

Overview

Type: Discrete
Format: character
Width: 4

Valid cases: 4813111
Invalid: 0

Hamlet (hg_sb_Number)

File: Consumption of cereals, pulses, milk and milk products, edible oil, egg, fish and meat, vegetables, fruits, spices, beverages and processed food and pan, tobacco, intoxicants, fuel and light during last 30 or 7 days

Overview

Type: Discrete

Format: character

Width: 1

Valid cases: 4813463

Invalid: 0

Description

Large FSUs having approximate present population of 1200 or more is divided into a suitable number (say, D) of 'hamlet-groups' in the rural sector and 'sub-blocks' in the urban sector as stated below.

approximate present population of the sample village/block no. of hgs/sbs to be formed (D)

less than 1200 (no hamlet-groups/sub-blocks) 1
 1200 to 1799 3
 1800 to 2399 4
 2400 to 2999 5
 3000 to 3599 6
and so on

For rural areas of Himachal Pradesh, Sikkim, Uttarakhand (except four districts Dehradun (P), Nainital (P), Hardwar and Udham Singh Nagar), Poonch, Rajouri, Udhampur, Doda, Leh (Ladakh), Kargil districts of Jammu and Kashmir and Idukki district of Kerala, the number of hamlet-groups will be formed as follows:

approximate present population of the sample village no. of hgs to be formed

less than 600 (no hamlet-groups) 1
 600 to 899 3
 900 to 1199 4
 1200 to 1499 5
and so on

Second Stage Stratum (Second_Stage_Stratum)

File: Consumption of cereals, pulses, milk and milk products, edible oil, egg, fish and meat, vegetables, fruits, spices, beverages and processed food and pan, tobacco, intoxicants, fuel and light during last 30 or 7 days

Overview

Type: Discrete

Format: character

Width: 1

Valid cases: 4813463

Invalid: 0

Description

Second Stage Stratum (Second_Stage_Stratum)

File: Consumption of cereals, pulses, milk and milk products, edible oil, egg, fish and meat, vegetables, fruits, spices, beverages and processed food and pan, tobacco, intoxicants, fuel and light during last 30 or 7 days

The listed households has been stratified into two SSS as under:

SSS composition of SSS within a sample FSU Number of Household to be surveyed

 FSU without hg/sb formation | FSU with hg/sb
 formation (for each
hs/sb)

SSS 1: relatively affluent households 2 1

SSS 2: of the remaining, households having principal earning
 from non- agricultural activity 4 2

SSS 3: other households 2 1

Urban

SSS 1: households having MPCE of top 10% of
 urban population (MPCE > B) 2 1

SSS 2: households having MPCE of middle 60%
 of urban population (A = MPCE = B) 4 2

SSS 3: households having MPCE of bottom 30% of
 urban population (MPCE < A) 2 1

Household Serial Number (HHS_no)

File: Consumption of cereals, pulses, milk and milk products, edible oil, egg, fish and meat, vegetables, fruits, spices, beverages and processed food and pan, tobacco, intoxicants, fuel and light during last 30 or 7 days

Overview

Stratum (Stratum)

File: Consumption of clothing, bedding and footwear during last 365 days

Overview

Type: Discrete
Format: character
Width: 2

Valid cases: 1217060
Invalid: 0

Description

Within each district of a State/ UT, generally speaking, two basic strata is formed: i) rural stratum comprising of all rural areas of the district and (ii) urban stratum comprising of all the urban areas of the district. However, within the urban areas of a district, if there are one or more towns with population 10 lakhs or more as per population census 2001 in a district, each of them is form a separate basic stratum and the remaining urban areas of the district considered as another basic stratum.

Sub-Stratum (Sub_Stratum)

File: Consumption of clothing, bedding and footwear during last 365 days

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 718521
Invalid: 0

Description

Rural sector: If 'r' be the sample size allocated for a rural stratum, the number of sub-strata formed are 'r/4'. The villages within a district as per frame are first arranged in ascending order of population. Then sub-strata 1 to 'r/4' demarcated in such a way that each sub-stratum is comprise a group of villages of the arranged frame and have more or less equal population.

Urban sector: If 'u' be the sample size for a urban stratum, 'u/4' number of sub-strata are formed. The towns within a district, except those with population 10 lakhs or more and also the non-UFS towns, are first arranged in ascending order of population. Next, UFS blocks of each townis arranged by IV unit no. × block no. in ascending order. From this arranged frame of UFS blocks of all the towns, 'u/4' number of sub-strata are formed in such a way that each sub-stratum have more or less equal number of FSUs.

For towns with population 10 lakhs or more, the urban blocks will be first arranged by IV unit no. × block no. in ascending order. Then 'u/4' number of sub-strata are formed in such a way that each sub-stratum I have more or less equal number of blocks.

All non-UFS towns taken together within the district I form one sub-stratum.

Description

Large FSUs having approximate present population of 1200 or more is divided into a suitable number (say, D) of 'hamlet-groups' in the rural sector and 'sub-blocks' in the urban sector as stated below.

approximate present population of the sample village/block no. of hgs/sbs to be formed (D)

less than 1200 (no hamlet-groups/sub-blocks) 1
1200 to 1799 3
1800 to 2399 4
2400 to 2999 5
3000 to 3599 6
.....and so on

For rural areas of Himachal Pradesh, Sikkim, Uttarakhand (except four districts Dehradun (P), Nainital (P), Hardwar and Udham Singh Nagar), Poonch, Rajouri, Udhampur, Doda, Leh (Ladakh), Kargil districts of Jammu and Kashmir and Idukki district of Kerala, the number of hamlet-groups will be formed as follows:

approximate present population of the sample village no. of hgs to be formed

less than 600 (no hamlet-groups) 1
600 to 899 3
900 to 1199 4
1200 to 1499 5
.....and so on

Second Stage Stratum (Second_Stage_Stratum)

Stratum (Stratum)

File: Expenditure on education and medical (institutional) goods and services

Overview

Type: Discrete
Format: character
Width: 2

Valid cases: 365912
Invalid: 0

Description

Within each district of a State/ UT, generally speaking, two basic strata is formed: i) rural stratum comprising of all rural areas of the district and (ii) urban stratum comprising of all the urban areas of the district. However, within the urban areas of a district, if there are one or more towns with population 10 lakhs or more as per population census 2001 in a district, each of them is form a separate basic stratum and the remaining urban areas of the district considered as another basic stratum.

Sub-Stratum (Sub_Stratum)

File: Expenditure on education and medical (institutional) goods and services

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 204226
Invalid: 0

Description

Rural sector: If 'r' be the sample size allocated for a rural stratum, the number of sub-strata formed are 'r/4'. The villages within a district as per frame are first arranged in ascending order of population. Then sub-strata 1 to 'r/4' demarcated in such a way that each sub-stratum is comprise a group of villages of the arranged frame and have more or less equal population.

Urban sector: If 'u' be the sample size for a urban stratum, 'u/4' number of sub-strata are formed. The towns within a district, except those with population 10 lakhs or more and also the non-UFS towns, are first arranged in ascending order of population. Next, UFS blocks of each townis arranged by IV unit no. × block no. in ascending order. From this arranged frame of UFS blocks of all the towns, 'u/4' number of sub-strata are formed in such a way that each sub-stratum have more or less equal number of FSUs.

For towns with population 10 lakhs or more, the urban blocks will be first arranged by IV unit no. × block no. in ascending order. Then 'u/4' number of sub-strata are formed in such a way that each sub-stratum I have more or less equal number of blocks.

All non-UFS towns taken together within the district I form one sub-stratum.

 |formation (for each
hs/sb)

Rural

SSS 1: relatively affluent households 2 1

SSS 2: of the remaining, households having principal earning
 from non- agricultural activity 4 2

SSS 3: other households 2 1

Urban

SSS 1: households having MPCE of top 10% of
 urban population (MPCE > B) 2 1

SSS 2: households having MPCE of middle 60%
 of urban population (A = MPCE = B) 4 2

SSS 3: households having MPCE of bottom 30% of
 urban population (MPCE < A) 2 1

Household Serial Number (HHS_no)

File: Expenditure on miscellaneous goods and services including medical (non-institutional), rents and taxes during the last 30 days

Overview

Type: Discrete
 Format: character
 Width: 2

Valid cases: 2145291
 Invalid: 0

Description

The sample household number (i.e., order of selection) of the selected household

Level (Level)

File: Expenditure on miscellaneous goods and services including medical (non-institutional), rents and taxes during the last 30 days

Overview

Type: Discrete
 Format: character

Maximum: 19826800
Mean: 439569.7
Standard deviation: 757608.6

Generated Multiplier (Multiplier)

File: Expenditure on miscellaneous goods and services including medical (non-institutional), rents and taxes during the last 30 days

Overview

Type: Continuous
Format: numeric
Width: 8
Decimals: 2
Range: 0.695-99134

Valid cases: 2145291
Invalid: 0
Minimum: 0.7
Maximum: 99134
Mean: 2198.3
Standard deviation: 3788.3

Description

Generated Multiplier (Multiplier)

File: Expenditure on miscellaneous goods and services including medical (non-institutional), rents and taxes during the last 30 days

Calculated multiplier

Apply weight (or multipliers) as follows :

For generating subsample-combined estimates based on data of all subrounds taken together all households/ enterprises are to be considered.

Apply weight (or multipliers) as follows :

weight = $MLT/100$, if NSS=NSC
= $MLT/200$ otherwise.

Household Identification (HH_ID)

File: Expenditure for purchase and construction (including repair and maintenance) of durable goods for domestic use

Overview

Type: Discrete	Valid cases: 3076552
Format: character	Invalid: 0
Width: 9	

Description

Unique identification of each surveyed household is provided by combination of :

FSU Serial Number = (5)
 Hamlet-Group /Sub-Block Number = (1)
 Second Stage Stratum Number = (1)
 Household Serial Number = (2)

Centre code (centre_code)

File: Expenditure for purchase and construction (including repair and maintenance) of durable goods for domestic use

Overview

Type: Discrete	Valid cases: 3076552
Format: character	Invalid: 0
Width: 3	

First Stage Unit (FSU) (FSU_Serial_number)

File: Expenditure for purchase and construction (including repair and maintenance) of durable goods for domestic use

Overview

Type: Discrete	Valid cases: 3076552
Format: character	Invalid: 0
Width: 5	

Description

The first stage units (FSU) are the 2001 census villages (Panchayat wards in case of Kerala) in the rural sector and Urban Frame vey (UFS) blocks in the urban sector. The FSU number gives the village/block selected for the survey

Round (Round)

File: Expenditure for purchase and construction (including repair and maintenance) of durable goods for domestic use

Overview

Type: Discrete	Valid cases: 3076552
Format: character	Invalid: 0
Width: 2	

Description

The period of survey is of one year duration starting on 1st July 2009 and ending on 30th June 2010. It is called 66th round

Schedule Number (Schedule_Number)

File: Expenditure for purchase and construction (including repair and maintenance) of durable goods for domestic use

Overview

Type: Discrete
Format: character
Width: 3

Valid cases: 3076552
Invalid: 0

Sample (Sample)

File: Expenditure for purchase and construction (including repair and maintenance) of durable goods for domestic use

Overview

Invalid: 0

State (State)

File: Expenditure for purchase and construction (including repair and maintenance) of durable goods for domestic use

Overview

Type: Discrete
Format: character
Width: 2

Valid cases: 3076552
Invalid: 0

Description

Indicate the province (state/Union Territory).

Region (Region)

File: Expenditure for purchase and construction (including repair and maintenance) of durable goods for domestic use

Overview

Type: Discrete
Format: character
Width: 3

Valid cases: 3076552
Invalid: 0

District (State_District)

File: Expenditure for purchase and construction (including repair and maintenance) of durable goods for domestic use

Overview

Type: Discrete
Format: character
Width: 4

Valid cases: 3076552
Invalid: 0

Stratum (Stratum)

File: Expenditure for purchase and construction (including repair and maintenance) of durable goods for domestic use

Overview

Type: Discrete
Format: character
Width: 2

Valid cases: 3076552
Invalid: 0

Description

Within each district of a State/ UT, generally speaking, two basic strata is formed: i) rural stratum comprising of all rural areas of the district and (ii) urban stratum comprising of all the urban areas of the district. However, within the urban areas of a district, if there are one or more towns with population 10 lakhs or more as per population census 2001 in a district, each of them is form a separate basic stratum and the remaining urban areas of the district considered as another basic stratum.

Sub-Stratum (Sub_Stratum)

File: Expenditure for purchase and construction (including repair and maintenance) of durable goods for domestic use

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 1804582
Invalid: 0

Description

Rural sector: If 'r' be the sample size allocated for a rural stratum, the number of sub-strata formed are 'r/4'. The villages within a district as per frame are first arranged in ascending order of population. Then sub-strata 1 to 'r/4' demarcated in such a way that each sub-stratum is comprise a group of villages of the arranged frame and have more or less equal population.

Urban sector: If 'u' be the sample size for a urban stratum, 'u/4' number of sub-strata are formed. The towns within a district, except those with population 10 lakhs or more and also the non-UFS towns, are first arranged in ascending order of population. Next, UFS blocks of each townis arranged by IV unit no. × block no. in ascending order. From this arranged frame of UFS blocks of all the towns, 'u/4' number of sub-strata are formed in such a way that each sub-stratum have more or less equal number of FSUs.

For towns with population 10 lakhs or more, the urban blocks will be first arranged by IV unit no. × block no. in ascending order. Then 'u/4' number of sub-strata are formed in such a way that each sub-stratum I have more or less equal number of blocks.

All non-UFS towns taken together within the district I form one sub-stratum.

Schedule Type (Schedule_type)

Width: 1

Valid cases: 3173462
Invalid: 0

Description

Hamlet (hg_sb_Number)

File: Summary of consumer expenditure

Large FSUs having approximate present population of 1200 or more is divided into a suitable number (say, D) of 'hamlet-groups' in the rural sector and 'sub-blocks' in the urban sector as stated below.

approximate present population of the sample village/block no. of hgs/sbs to be formed (D)

less than 1200 (no hamlet-groups/sub-blocks) 1
 1200 to 1799 3
 1800 to 2399 4
 2400 to 2999 5
 3000 to 3599 6
and so on

For rural areas of Himachal Pradesh, Sikkim, Uttarakhand (except four districts Dehradun (P), Nainital (P), Hardwar and Udham Singh Nagar), Poonch, Rajouri, Udhampur, Doda, Leh (Ladakh), Kargil districts of Jammu and Kashmir and Idukki district of Kerala, the number of hamlet-groups will be formed as follows:

approximate present population of the sample village no. of hgs to be formed

less than 600 (no hamlet-groups) 1
 600 to 899 3
 900 to 1199 4
 1200 to 1499 5
and so on

 of urban population (A = MPCE = B) 4 2

SSS 3: households having MPCE of bottom 30% of
 urban population (MPCE < A) 2 1

Household Serial Number (HHS_no)

File: Summary of consumer expenditure

Overview

Type: Discrete	Valid cases: 3173462
Format: character	Invalid: 0
Width: 2	

Description

The sample household number (i.e., order of selection) of the selected household

Level (Level)

File: Summary of consumer expenditure

Overview

Type: Discrete	Valid cases: 3173462
Format: character	Invalid: 0
Width: 2	

Filler (Filler)

File: Summary of consumer expenditure

Overview

Type: Discrete	Valid cases: 3173462
Format: character	Invalid: 0
Width: 2	

Item Serial number (Sl_NO)

File: Summary of consumer expenditure

Overview

Type: Discrete	Valid cases: 3173462
Format: character	Invalid: 0
Width: 2	

Value (Value)

File: Summary of consumer expenditure

Overview

Type: Continuous	Valid cases: 3173462
Format: numeric	Invalid: 0
Width: 8	Minimum: 1
Decimals: 0	Maximum: 18285565
Range: 1-18285565	Mean: 6804
	Standard deviation: 42189.1

Description

value of consumption (in Rs.) during reference period

ok stamp (Ok_stamp)

File: Summary of consumer expenditure

ok stamp (Ok_stamp)

File: Summary of consumer expenditure

Overview

Type: Discrete	Valid cases: 0
Format: character	Invalid: 0
Width: 1	

blank (Blank)

File: Summary of consumer expenditure

Overview

Type: Discrete	Valid cases: 0
Format: character	Invalid: 0
Width: 1	

nss (NSS)

File: Summary of consumer expenditure

Overview

Type: Discrete	Valid cases: 3173462
Format: character	Invalid: 0
Width: 2	

nsc (NSC)

File: Summary of consumer expenditure

Overview

Type: Discrete	Valid cases: 3173462
Format: character	Invalid: 0
Width: 3	

Posted Multiplier (MLT)

File: Summary of consumer expenditure

Overview

Type: Continuous	Valid cases: 3173462
Format: numeric	Invalid: 0
Width: 8	Minimum: 139
Decimals: 0	Maximum: 19826800
Range: 139-19826800	Mean: 448721.8
	Standard deviation: 774094.2

Description

For generating subsample-combined estimates based on data of all subrounds taken together all households/ enterprises are to be considered.

Apply weight (or multipliers) as follows :

weight = $MLT/100$, if $NSS=NSC$
 = $MLT/200$ otherwise.

Generated Multiplier (Multiplier)

File: Summary of consumer expenditure

Overview

Type: Continuous	Valid cases: 3173462
Format: numeric	Invalid: 0
Width: 8	Minimum: 0.7
Decimals: 2	Maximum: 99134
Range: 0.695-99134	Mean: 2244.1
	Standard deviation: 3870.8

Description

Calculated multiplier

Apply weight (or multipliers) as follows :

For generating subsample-combined estimates based on data of all subrounds taken together all households/ enterprises are to be considered.

Apply weight (or multipliers) as follows :

weight = $MLT/100$, if $NSS=NSC$
= $MLT/200$ otherwise.
